## Preface

|                                                                                                                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Synthesis and Characterization of ZnO-SiO<sub>2</sub>/Epoxy Nanocomposite Coating by Sol-Gel Process</b><br>N. Farhadyar and M.S. Sadjadi                                                                                              | 1   |
| <b>Synthesis and Characterization of Bimetallic Fe/Co Nanocatalyst on CNTs for Fischer-Tropsch Reaction</b><br>S. Ali, N.A. Mohd Zabidi and D. Subbarao                                                                                   | 9   |
| <b>Fabrication and Characterization of Si Nano-Columns by Femtosecond Laser</b><br>O.T. Ghalehbeygi, V. Kara, L. Trabzon, S. Akturk and H. Kizil                                                                                          | 15  |
| <b><i>In Situ</i> Fabrication and Characterization of (NiCr)Al-Al<sub>2</sub>O<sub>3</sub> Nanocomposite by Mechanical Alloying</b><br>A.R. Shirani-Bidabadi, A. Shokuhfar, M.H. Enayati and M. Biglari                                   | 21  |
| <b>Characteristics of TiN and NCD Layers Deposited on Magnesium Alloys</b><br>M. Golabczak                                                                                                                                                | 29  |
| <b>Advantages of Nanocrystalline Materials for Microwave-Absorbing</b><br>S. Bergheul, F. Otmane, Z. Hamlati and M. Azzaz                                                                                                                 | 37  |
| <b>Synthesize and Characterization of Multifunctional Silica Coated Magnetic Nanoparticles Using Polyvinylpyrrolidone (PVP) as a Mediator</b><br>M.S. Sadjadi, F. Fathi, N. Farhadyar and K. Zare                                         | 43  |
| <b>Oscillating Velocity and Enhanced Diffusivity of Nanosystems from a New Quantum Transport Model</b><br>P. Di Sia                                                                                                                       | 49  |
| <b>Chitosan Capped Colloidal Gold Nanoparticles for Sensing Zinc Ions in Water</b><br>S. Promnimit, T. Bera, S. Baruah and J. Dutta                                                                                                       | 55  |
| <b>Growth of Calcium Phosphate Using Chemically Treated Titanium Oxide Nanotubes</b><br>A.L.A. Escada, J.P.B. Machado, S.G. Schneider, R.Z. Nakazato and A.P. Rosifini Alves Claro                                                        | 63  |
| <b>Solid-State Diffusion Formation of Nanocrystalline Nb<sub>3</sub>Sn Layers at Two-Staged Annealing of Multifilamentary Nb/Cu-Sn Wires</b><br>E.N. Popova, I.L. Deryagina, E.P. Romanov, E.A. Dergunova, A.E. Vorobyova and S.M. Balaev | 69  |
| <b>AgNPs Included GC/Poly [3, 4-Ethylenedioxythiophene] Modified Electrode Toward Electrochemical Detection of H<sub>2</sub>O<sub>2</sub></b><br>A.S. Rad, M. Ardjmand, M. Jahanshahi and A. Safekordi                                    | 77  |
| <b>Adsorption of Lead Ions in Aqueous Solution Using Yttrium Oxide Nanoparticles</b><br>S. Sadjadi, S.J. Ahmadi and M. Hosseinpour                                                                                                        | 83  |
| <b>Synthesis of Biopolymeric <math>\alpha</math>-Lactalbumin Protein Nanoparticles and Nanospheres as Green Nanofluids Using in Drug Delivery and Food Technology</b><br>P. Esmaeilzadeh, Z. Fakhroueian and A.A. Miran Beigi             | 89  |
| <b>Photodegradation of Phenol over Flame-Made Sn-Doped ZnO Nanoparticles</b><br>K. Wetchakun, N. Wetchakun, B. Inceesungvorn and S. Phanichphant                                                                                          | 97  |
| <b>Preparation of Nanocrystalline Titanium Dioxide (TiO<sub>2</sub>) Thin Films by the Sol-Gel Dip Coating Method</b><br>R. Mechiakh, R. Gheriani and R. Chtourou                                                                         | 105 |
| <b>Formation of Transparent Nanoporous Titanium Oxide Films on Glass Substrates Using an Anodization Process</b><br>E. Manea, C. Obreja, M. Purica, A. Dinescu, F. Comanescu, V. Schiopu and E. Budianu                                   | 113 |
| <b>New Approach to Ammonia Synthesis by Catalysis in Magnetic Field</b><br>N. Yahya, P. Puspitasari, K. Koziol and G. Pavia                                                                                                               | 119 |
| <b>Ultra-Morphological and Nanomechanical Characterization of Reinforced Enamel and Dentin by Self-Etch Adhesives: The Super Tooth</b><br>A. Sadr, T. Nikaido, T. Takagaki, I. Hariri, A. Nazari and J. Tagami                            | 131 |
| <b>Synthesis and Characterization of Cu-10-20wt%Ni Nanopowders by a Chemical Precipitation Route</b><br>R. Roohibakhsh, H.R. Rezaie and H. Razavizadeh                                                                                    | 141 |
