

Table of Contents

Assessing the Heating Ability of Carbon Nanotubes-Fe_3O_4 Nanocomposites for Magnetic Hyperthermia Application	
A. Sabik, M.R. Elamin, O.M. Lemine, M. Alshammari, M. Hjiri, T. Attoub, N. Alonaizan, A.Z. Alanzi, M. Elansary, M. Henini and A. Khatab	1
Application of Atomic Force Microscope: A Comprehensive Approach for Determining Nanomechanical Characteristics of Biomaterials Using as Scaffolds in Tissue Engineering	
F.S. Bodowara, A.M. Alshaybani and B.B. Akhremitchev	15
Synthesis and Optimization of Polypyrrole-Grafted Graphene Oxide Nanohybrids	
S. Mumtaz, A. Sadiq, F. Saleem, A. Nasir and T. Yasin	33
Structural, Morphological, Optical and Magnetic Properties of Undoped and Fe Doped Manganese Oxide Nanoparticles Prepared by CBD	
M.Q. Rasheed, M. Rauf and M.S. Akhtar	43
Structural, Morphological and Optical Investigations of Pure and Iron Doped Manganese Sulfide Thin Film by Chemical Bath Deposition	
H.W. Abbas, M. Shafique and M.S. Akhtar	51
Nanoparticles Ordering Classification Using Deep Convolutional Neural Networks	
M. Amarif, A. Aejaal and H. Ateeyah	57
The Study of Tunable Excitation Independent and Dependent Photoluminescence Behaviour of P-Functionalized Carbon Dots	
R. Yadav, A. Yadav and V. Lahariya	67
Synthesis, Characterization, and Photocatalytic Performance of (Eu, Ni) Co-Doped ZnO Thin Films for Environmental Applications	
B. Zaidi, M. Hajji, T. Bouarroudj, M.S. Akhtar, M.A. Saeed, G. Charrada, B. Hadjoudja, B. Chouial, N. Jebbari and N. Kamoun-Turki	77
Specific Heat Analysis of Water and Ethylene Glycol Based rGO-ND Hybrid Nanofluids: Experimental and Artificial Neural Network Predictions	
S.S. Lingala	89
