

Table of Contents

Preface

Chapter 1: Macroscopic Theory of Anisotropic Solids	1
Chapter 2: Experimental Techniques for the Study of Elastic Properties of Solids	39
Chapter 3: Homogeneous Deformation Theory of Elastic Constants	113
Chapter 4: Force Constant Approach and Elastic Constants of Crystals	169
Chapter 5: Temperature Variation of Elastic Constant	189
Chapter 6: Elastic Constant of Polycrystalline Aggregates and of Composite Materials	213
