

Table of Contents

Introduction

I. Aluminium and Aluminium Alloys

Numerical and Physical Modelling of Aluminium Barbotage Process M. Saternus, T. Merder and P. Warzecha	1
Bayern's Method of Al_2O_3 Production – Possibilities of Red Mud Disposal and Utilization M. Saternus	11
Microstructure and Mechanical Properties of Aluminum Processed by Multi-Axial Compression K. Rodak, K. Radwański and R.M. Molak	21
The Effect of Al-17wt.%Si Alloy Melt Overheating on Solidification Process and Microstructure Evolution J. Piątkowski	29
Modern Methods of Aluminum Alloys Welding J. Adamiec, T. Pfeifer and J. Rykała	35
Mechanical Properties of Aluminium Matrix Composites Reinforced with Glassy Carbon Particles J. Myalski and J. Śleziona	39
AlSi7Mg/SiC and Heterophase SiC_P+C_G Composite for Use in Cylinder-Piston System of Air Compressor M. Dyzia	49
Interaction of Al-Si Alloys with SiC/C Ceramic Particles and their Influence on Microstructure of Composites A.J. Dolata	55

II. Magnesium and Magnesium Alloys

Microstructure and Properties of Sand Casting Magnesium Alloys for Elevated Temperature Applications A. Kielbus	63
Structural Stability of Mg–6Al–2Sr Magnesium Alloy A. Kielbus and T. Rzychoń	75
Characteristics of Eutectic Precipitations in Selected Magnesium Cast Alloys J. Szala	83
Solidification Process, Microstructure, Density and Hardness of the Mg-Al Alloys with Zn, Cu, Ni and AlTiB Additions F. Binczyk	91
Repairing the WE43 Magnesium Cast Alloys J. Adamiec	99
Weldability of the MSRB Magnesium Alloy J. Adamiec	107
X-Ray Microtomography for 3D Microstructure Characterization of Magnesium Matrix Composite Reinforced with Glassy Carbon Particles A. Botor-Probierz, A. Olszówka-Myalska, S.A. McDonald and P.J. Withers	119
Effect of Glassy Carbon Particles on Wear Resistance of AZ91E Matrix Composite A. Olszówka-Myalska, J. Myalski and A. Botor-Probierz	127

III. Titanium and Titanium Alloys

Assessment of Quality of Ti Alloys Melted in Induction Furnace with Ceramic Crucible A. Szkliniarz and W. Szkliniarz	139
Deformation of Ti-6Al-4V Alloy with Carbon A. Szkliniarz	149
