

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Advanced Materials Engineering and Processing Technologies

Characteristics of Nanostructured TiO₂ Prepared by One-Step Soaking Method for Photovoltaic Application M.S. Park, S.J. Sung and D.H. Kim	3
Natural Materials for Thermal Insulation: Mulch and Lava-Rock Characterizations A.P. Jean, C. Adams, M.A. Medina and F. Miranville	8
Thin-Shell Silk Cocoon (TSC) as a Nitrogen Source of ABE Fermentation by <i>Clostridium acetobutylicum</i> N. Kittithanesuan and M. Phisalaphong	14
Enhancing Sustainable Recycle Solid Waste to Porous Activated Carbon for Methane Uptake N.S. Nasri, R. Noorshaheeda, U.D. Hamza, J. Mohammed, M.M. Ahmed and H. Mohd Zain	19
Sustainable Recycle Solid Waste to Synthetic Renewable Solid Energy N.S. Nasri, H. Mohd. Zain, J. Mohammed, U.D. Hamza and M.M. Ahmed	24
Enzymatic Esterification of Oleic Acid and Propanol by Novozym 435 S. Mulalee, K. Sena and M. Phisalaphong	29
Impact of Powder Metallurgy Electrode in Electric Discharge Machining of H-13 Steel G.S. Brar and G. Mittal	34
Recycled Cigarette Filter as Reinforcing Filler for Natural Rubber M.K. Lai, H.H. Teo and J.Y. Lee	39
Manufacturing Method of Increasing Hollow Steel Shaft Thickness Using Uniaxial Pressing M. Dohi, H. Kamiyama, S. Nishida, Y. Kotani and H. Watari	44
Electrospray Coating of a TiO₂ Electrode for Dye-Sensitized Solar Cells by a Post-Treatment Method J.H. Kim, S.J. Sung and D.K. Hwang	51
Preparation and Characterization of Hot Wall Deposited CuInGaSe₂ Thin Films for Solar Cell Applications S. Arul, N. Muthukumarasamy, M.D. Kannan and S. Jayakumar	56
Quantitative Characterization of Sulfide Corrosion Reaction in Transformer Oil H.S. Lian, D.S. Zheng, J.Y. Yan, Q.M. Li, Y. Zhou, Z.D. Wang and C.R. Li	60
Continuous Transesterification for Ethyl Ester Production from Refined Palm Oil through Static Mixer K. Wijitsopa, K. Somnuk, T. Theppaya and G. Prateepchaikul	64

Chapter 2: Applied Mechanics, Mechanical Engineering and Manufacturing Technologies

Design of a Novice Hydraulic Buoyant Force Engine N. Mir-Nasiri and B. Almenov	71
Multi-Objective Optimization of a Two-Disk Rotor System J.J. Huang, L.X. Zheng and M. Qing	79
2k-H Planetary Gear Transmission System and its Largest Lyapunov Exponent J.L. Liu, S.L. Guo and L.N. Han	83
Comparison of the Strength Analysis about Single Bogie Frame and its in the Assembly Q.X. Wang, Q.H. Dai, J.J. Sun and W.H. Wu	87
Numerical Simulation of the Nozzle Angles Effect on the Pressure at Thrustwall and Nozzle Outlet of PDE Z.W. Wang, K. Zhang and L.X. Zheng	92

SMA Damped Tape Spring Hinge for Quasi-Static Deployment of a Satellite Solar Array J.W. Jeong, K.C. Shin, K.W. Kim, J.H. Lim and J.J. Lee	96
The Fluid-Structure Interaction Analysis of the Inverted Umbrella Aerator Curved Blade P. Xing, A.M. Zhang and Z.X. Deng	101
A Processing Approach Incorporating Copper Backing-Wheel Device in Submerged Arc Welding for Manufacturing Cryogenic Storage Tanks S. Rajsiri, M. Chomjanngam and S. Tuntawiroon	106
Modeling of Droplet Generation by a Modified T-Junction Device Using COMSOL L. Lei, H.B. Zhang, D.J. Bergstrom, B. Zhang and W.J. Zhang	112
The Design of Self-Erection Derrick of Simple Offshore Workover Rig Y.G. Gai and Z.L. Zhang	117
Vibration Forecast and Vibration Attenuation Research of the Finished Motorcycle Based on Virtual Analysis Z.Q. Meng and M. Li	122
Secondary Flows in Radial Diffusing Channels G. Gopalakrishnan	126
Master Slave Quadrotor Formation for Lifting Force Multiplication T. Rakgowa, K.S. Sim, E.K. Wong and M.E. Nia	133
Increase in Accuracy and Smoothness of Movement of the Mechatronic Unit of Linear Micromotions E. Novikova, D. Shtykh, A.V. Zhdanov and V. Morozov	137
In-the-Loop Simulation Based on the Test Bed of Automotive Steer-by-Wire System W.M. Yu	142
Discussion of Modern Machinery Production Technique and High Precision Machining Technology J.N. Xu	146
Design and Application of Electromechanical Brake System X.M. Liao	152
The Parametric Design of Scissors Lifting Platform Based on SolidWorks and Optimization Analysis W.C. Jiang, X.Y. Zhao, H.Y. Cui and C.C. Li	157
Optimal Design and Structural Precision Analysis for a Spherical Coordinate System 3D Scanner Guiding Device S.W. Park, H.Y. Maeng and J.W. Park	164
Simulation Mathematical Model of Heating by a Multichannel CO₂-Laser V. Morozov, A.V. Zhdanov, A. Shlegel and A. Ivanchenko	169
Hardware Design of Bipedal Locomotion Robot K.S. Sim, C.P. Tso, G.Y. Lim and M.C. Foo	174
MEMS Micro-Era Missile-Borne H.W. Jin, J. Liu, L. Zhang and X. Qian	178
Natural Convective Coutte Flow in a Vertical Parallel Plate Microchannel M. Narahari and R. Pendyala	182
Research on Uncertain Factors Analysis and Optimization Model for Collaborative Manufacturing Process M.H. Zhang	188

Chapter 3: Electronic Technologies and Integrated Circuits

Design and Implementation of a Single Clock Dual-Band Switched-Capacitor Filter Y. Liu, J.H. Song, J.N. Cui, Y. Wang and T.L. Wang	195
A Study of Kurtosis-Based Dictionary-Diagnosis Method against Switch-Current Circuit Faults Z. Zhang, Z.M. Duan and Y. Long	199
Design of Intelligent Resistivity Measurement System S.F. Qi and K. Zhang	204
Research on the Voltage Sensitivity of Differential Cymbal Piezoelectric Vibration Acceleration Sensor H. Gao, D.H. Li and B.Z. Dong	208

Effect of Structure and Thickness on the Electrical Characteristics of QLED Device H. Gao, D.H. Li and H. Ma	214
The Progress of Millimeter / Submillimeter Wave TWT Research H.W. Jin, L. Zhang, J. Liu and X. Qian	219

Chapter 4: Electrical Engineering and Electric Machines

A Reactive Power Control Strategy Based on Power Correction in the Process of Voltage Restoring D.H. Peng, P.F. Cui and Z. Wang	225
Calculation of Temperature Rise for High-Voltage Induction Motor with Compact Type in Starting Process D.W. Meng, B.Q. Zhang and X.X. Shi	232
Development of Adaptive Distance Relay for STATCOM Connected Transmission Line with Wavelet Transform and ANN R.P. Hasabe and A.P. Vaidya	237
Application of Remanufacturing Technology in Imported Roll EDT Machine Z.Y. Zuo, L. Jiang, Y.Q. Zhan and L. Yang	243
Piezoelectric Beam Length Optimization for Raindrop Energy Harvesting Application C.H. Wong, Z. Dahari, A.A. Manaf and M.A. Miskam	247

Chapter 5: Power System and Energy Engineering, its Applications

Power System Fault Diagnosis Based on Wavelet Transform and Neural Networks J. Liu, L. Li and Q.T. Long	255
Time-Domain Analysis and Experimental Verification of Portable Grounding System's TGR X.B. Qu, B.H. Zhou, Y.P. Fu, L.J. Yang and N. Zhang	259
Integrated Split Heat Pump System for Building Applications S. Nizetic, R. Gizdic, A. Yadav and M. Bugarin	263
Biogas Source of Energy and Solution to the Environment Problems in Rwanda A. Rwigema	268
Vegetalized Complex Partition (VCP): Impact of a Green Roof under a Humid Tropical Climate, Comparison between Hong Kong and Reunion Island A.P. Jean, T. Libelle, F. Miranville and M.A. Medina	273
Optimal Energy Storage Sizing for Wind Power Applications C.Y. Han, R.Y. Kong, T.D. Guo and W. Pei	278
Short-Term Wind Power Forecasting in Wind Power Plants of North China Based on Support Vector Regression Analysis H.J. Shao and H.K. Wei	284
A Clean Energy Generation System of In-Tandem Combinations Each of Heat Pump, Compressor and Turbine in Wind Tunnel Y.C. Feng	289
Utilization of Energy Storage to Buffer PV Output during Cloud Transients Y. Moumouni and R.F. Boehm	295
Solar-Diesel Hybrid Model and Control for Central Heating M. Abdalla, S. Emran, M. Mukhtar, A. Nabil and Z. Tahboob	305
Research on Correction to Fitting Factors of Shape Function and Convergence of Wind Turbine Airfoils Y.Q. Chen, Y.F. Fang, S. Guo and Z.H. Chen	313
Effect of Anti-Reflective Layer in Dye-Sensitized Solar Cells J.E. Nam, H.J. Jo, D.H. Son, D.H. Kim and J.K. Kang	320
Analysis of Research Trends of Organic Solar Cell Using Patent Information Y.I. Kwon and D.H. Jeong	324
Research on the Application of Fuel Cell in the Electricity-Generating Industry A.L. Hu	329

Fault Diagnosis of Wind Turbine's Converter Based on Memristive Neural Network Y.L. Wang and X. Wang	333
--	-----

Chapter 6: Automation and Control Systems

Speed Sensorless Control with ANN-MRAS Based on Modified ACO for Induction Motor Drives K. Xu, H.L. Li and S.C. Liu	341
Distributed Cross-Direction Control System Based on CAN-Bus X.C. Shi, Y.C. Feng, J.S. Zeng and K.F. Chen	345
Design and Application of Hotel Intelligent Control System Z.H. Zhang and W.F. Zhou	350
A Novel Traction Control Strategy Based on Optimal Slip Ratio Control for Electric Vehicle L.F. Wu, L.F. Wang and J.Z. Zhang	355
Consensus Problem of Multivehicle Formation Using Nearest Neighbor Rule with Addition of State Buffer U.E. Amin, S.L. Guo and L.N. Han	360
A Brief Description of ESP Working Principle and Common Control Methods S.X. Zhou, Q. Zhang and R. Xue	364
