

Table of Contents

Preface

Chapter 1: Material Properties, Materials Machining and Polishing

Analysis and Experimental Investigation of Grinding Force in Ultrasonic Vibration Mill-Grinding of Brittle Materials G.C. Qiao, G.J. Dong and M. Zhou	3
Analysis on Corrosion Resistance of the Cast Manganese Steel by Shock Excitation and Rotation Method J.L. Wang, H.F. Wang and L. Pang	9
Dynamic Modeling and Simulation Analysis for Rotary Ultrasonic Machining of SiCp/Al Thin-Walled Structure M. Wang, G.J. Dong and M. Zhou	15
Effect of the Impact Load on Joining Region of the Friction Stir Jointing for 7022 Aluminum Alloy H.F. Wang, J.L. Wang, W.W. Song, D.W. Zuo and X.L. Duan	21
Research on Flow Field Simulation and Experiment of Numerical Control Electrochemical Turning X.Q. Fu, J.Y. Xian, M. Kang and M.H. Xiao	25
Research on Noise Test and Distribution Model of Different Groove Inserts in Dry Milling Process Y.N. Cheng, H.T. Wang, H. Zhao, M.Y. Wu and L. Liu	31
Research on Response of Copper to Micro Laser Shock Peening under 2-D Pressure Model Y.J. Fan, K.T. Yin and Y.M. Zhu	37
The Research on the Cutting Properties of Nano TiN Modified TiC-Based CERMETS Cutters H.D. Yang, H. Zhang, J.L. Hu and Z.H. Qing	45
Simulation of Fully Sintering Dental Zirconia Milling Process Based on Discrete Element Method H.B. Wu, Q.P. Sun and D.W. Zuo	49
Study of the Statistical Models with Contact Parameters of Machine Tool Guideway Rough Surface Y.H. Hu, S.G. Chen, L. Wang and Z.X. He	55
Analysis on the Wear Resistance of the Cast Manganese Steel by Shock Excitation and Rotation Method J.L. Wang, H.F. Wang and L. Pang	63
Modeling and Analyzing the Temperature Field in EACVD Integration System L.H. Liu	69
Design of a 5-Axis CNC Machine Tool Applied to Dental Restoration X.B. Lei, F. Xie and J.W. Zhao	75
Design of Biomass Fuels Molding Equipment Y. Wang, H.J. Qiao, W. Shen and T. Zhang	81

Chapter 2: Fatigue and Stress in Structures

Design of Acoustic Emission Monitoring System for Defects of Hull Plate Z.Y. Xu, J. Huang, Y.Y. Cai and S.Y. Gao	91
Finite Element Analysis of Contact Stress in the Meshing Process for Internal Gear Pairs with Few Teeth Difference Y.G. Wei, S.D. Dai and X.J. Zhang	97
Study on the Mathematical Model of the Milling Force and Residual Stress W.W. Song, H.F. Wang, J.L. Wang and X.L. Duan	103
Topology Optimization in Support of Spaceborne Device Based on Variable Density Method B.H. Wu, B.J. Pang and Z.Q. Deng	109

Chapter 3: Manufacture and Automation, Mechanisms Applications

Optimization of Contour Path in Pattenless Casting Manufacturing Technique W.D. Yang	117
Profile Modification of Involute Spur Cylindrical Gear Pair Used in Timing Transmission System of Automobile and its Dynamic Simulation Y.G. Wei, Y. Yang, T.J. Lin and M.C. Gao	123
Singularity Analysis of 6-PUS Vertical Parallel Mechanism C.Q. Wang and H.T. Wu	129
Study in Virtual Assembly of Hull Block on DELMIA B.C. Li and Y. Liu	135
Lightweight Design of PLATE ShearS Bed Based on Topology Optimization and Test Methods Y. Wang, K. Li, B.P. Cui and Z.F. Zhang	143
The Develop of Automatic Jet Electroplating Machining Gear Tool Y. Yang, M. Kang, X.Q. Fu and Y. Wang	151
Design of Control System of GPS-Based Tower Clock H. Wei, G.P. Zhou and J.W. Ding	157
Design Optimization of 2TPS/2TPR Parallel Manipulator Based on GA Y.M. Wang, H.J. San and L. Jiang	163
Study on the Method of Planetary Gear Trains Based on Topological Theory Y.F. He and Y.M. Wang	169

Chapter 4: Other Topics

Risk Warning of High-Tech Enterprise Independent Innovation Based on Chaotic Neural Network Z.Y. Wu, H.M. Chen and X.H. Qi	179
Bone Scaffold Forming Filament Width Prediction of LDM Based on the Improved BP Neural Network Y.Y. Liu, Z.Z. Han, S.H. Fang, D.L. Liu, Y. Liu and Q.X. Hu	187
Construction of the Growth-Ability Structural Model for Enterprises in the Agricultural Products Processing Industry X.H. Qi, W. Wang and Z.Y. Wu	193
