Preface

1A - Transport in Non-Ionic and Ionic Crystalline Materials

Session 1 - Mass and Charge Transport Mechanisms

Studies by In Situ and Real-Time Synchrotron Imaging of Interface Dynamics and Defect Formation in Solidification Processing

B. Billia, H. Nguyen-Thi, G. Reinhart, N. Mangelinck-Noël, J. Gastaldi, T. Schenk, J. Hartwig, J. Baruchel, V. Cristiglio, B. Grushko and H. Klein 1

Electric Field-Induced Unmixing in Mixed Ferrite Spinel (Co,Fe)₃O₄

J.O. Hong and H.I. Yoo 11

Electron Transport and Dielectric Breakdown Kinetics in Pr₂O₃ High K Films

P. Fiorenza, R. Lo Nigro, V. Raineri, S. Lombardo, R.G. Toro, G. Malandrino and I.L. Fragalà 21

Diffusion Rates of ⁵¹Cr, ⁵⁴Mn and ⁵⁹Fe in MnCr₂O₄ and FeCr₂O₄ Spinel

J. Gilewicz-Wolter, Z. Żurek, J. Dudala, J. Lis, M. Homa and M. Wolter 27

Phase Transformations and Interstitial Atom Diffusion in Iron-Nitride, Iron-Carbonitride and Iron-Carbide Layers

A. Leineweber, T. Liapina, T. Gressmann, M. Nikolussi and E.J. Mittemeijer 32

Contribution to the Theory of Demixing of Yttrium in Yttria-Stabilized-Zirconia in an Electric Field

I.V. Belova, G.E. Murch, D. Samuelis and M. Martin 42

Computer Modelling of Oxygen Mobility at Ceria Surfaces and the Construction of Ceria Nanotube Models

P. Martin, S.C. Parker, D.C. Sayle and G.W. Watson 48

1B - Transport in Metals, Semiconductors, Melts, Glasses

Extraction of Diffusion Correlation Information from Tracer, Interdiffusion and Ionic Conductivity Data

I.V. Belova and G.E. Murch 54

Hydrogen Diffusion Mechanisms and Hydrogen-Dopant Interactions in Diamond

J. Chevallier, F. Jomard, C. Saguy, R. Kalish and A. Deneuve 63

Electric-Field-Enhanced Thermal Emission from Osmium-Related Deep Level in n-GaAs

M. Zafar Iqbal, A. Majid, A. Dadgar and D. Bimberg 73

Water Diffusion in Silicate Glasses and Melts

H. Behrens 79

Ionic Conductivity of Hydrated Silicate Glasses

S. Fanara, H. Behrens and R. Kappes 89

Diffusivity, Solubility and Speciation of Sulphur in Silicate Melts

J. Stelling, H. Behrens, J. Deubener, S. Mangold and J. Goettlicher 93

Influence of Elasticity of Dislocations on Thermal Motion of Trapped Liquid Pb Inclusions in Al

S.I. Prokofjev, E. Johnson, V.M. Zhilin and U. Dahmen 98

1C - Transport Through Nanoscale Systems

Heat Transport in Superlattices and Nanocomposites for Thermoelectric Applications

G. Chen 104

In Situ Ultrahigh Vacuum Transmission Electron Microscope Investigations of Dynamical Changes of Nanostructures on Silicon

L.J. Chen, W.W. Wu and C.H. Liu 111

Finite Element Modeling of Space Charge Phenomena on the Nanoscale

D.R. Franceschetti 120

Session 2 - Role of Transport in Materials Reactivity, Synthesis, Processing and Microstructure

Atom Probe Tomography: Studying Reactions on Top of the Tip

G. Schmitz, C. Ene, C. Lang and V. Vovk

126

Periodic Pattern Formation in Metal-Ceramic Reactions

A.A. Kodentsov and F.J.J. van Loo

136

Growth and Characterization of (012)- and (001)-Oriented Epitaxial Anatase Thin Films

A. Lotnyk, S. Senz and D. Hesse

146

Study on Microstructure and Magnetic Properties of TM-Mg (TM: Fe, Co) Alloys Synthesized by Mechanical Alloying

M. Chiba, H. Hotta, A. Sotoma and T. Kuji

152

Session 3 - Role of Transport in Application Engineering

Power Generation Using Oxide Thermoelectric Modules

R. Funahashi, S. Urata, T. Mihara, N. Nabeshima and K. Iwasaki

158

Synthesis and Thermoelectric Properties of Bi₂Te₃-GeTe Pseudo Binary System

H. Kohri, I. Shiota, M. Kato, I.J. Ohsugi and T. Goto

168

Diffusion and Defects in Oxides with the K₂NiF₄ Structure Type

S. Skinner

174

Carbon-Coated TiO₂ - Hybridization between Photoactivity and Adsorptivity

M. Toyoda, B. Tryba, F. Koujin, T. Tsumura and M. Inagaki

180

Molecular Simulation of Ion-Transport inside Chitosan Membranes

E. López-Chávez, M. Solorza-Guzmán and F. de Landa Castillo-Alvarado

188
