

Table of Contents

Preface

Chapter 1: Processing of Structural Metals

Surface Machining of Stainless Steel Cardiovascular Stents by Fluid Abrasive Machining and Electropolishing C.F. Hsu, F.Y. Chang and Y.X. Huang	3
Laser Surface Polishing of Ti6Al4V Titanium Alloy in Air, Nitrogen and Argon Environments P. Jaritngam, V. Tangwarodomnukun and C. Dumkum	15
Study of Micro-Upsetting by Finite Element Simulation Based on Crystal Plasticity and Grain Boundary Strengthening Theories J.Y. Zheng and M.W. Fu	21
Prediction of Mechanical Properties of Iron and Steel Based on the Quantile Model of Generalized Radial Basis Neural Network T. Tian and S.Y. Huang	29

Chapter 2: Polymers and Composites

Aqueous Stability of Cross-Linked Thermal Responsive Tissue Engineering Scaffold Produced by Electrospinning Technique H.N.E. Yong, K.Y. Tshai and S.S. Lim	39
Degradation of Virgin and Recycled Polylactic Acid/Eggshell Composites Buried in Soil S. Budin	45
Sustainable Fabrication Technology of Composite Board by Kenaf-Polypropylene for Automobile Door Interior Applications L. Anggraini and A. Anjany	51
A Study of the Effect of Reaction Time on the Preparation of Zirconium Based UiO-66 MOF O.A. Koriem, A.H. El-Shazly and M.F. El Kady	57
Synthesis of Poly(Methyl Methacrylate) Reinforced by Graphene Nanoplates E. Kocacinar and N. Baydogan	63
Piezoelectric PVDF Nanofibrous Membrane Electrospinning Optimization Parameters A. Essam, A.H. El-Shazly and H. Shokry	71

Chapter 3: Materials for Application in Energy Storage and Electrical Devices

A Comparative Study of the Manufacturing of BPSCCO Superconducting Wire with TiO₂ Dopants S. Herbirowo, H.P. Pratama, A.H. Yuwono, N. Sofyan and A. Imaduddin	79
Titanium Dioxide-Infused Hybrid Electrolytes Based on Ionic Liquids Containing Protic Cation: Effect of Solute Concentration on the Electrochemical and Interfacial Properties J. Patricio, M.L. Budlayan and S. Arco	85
A First-Principle Study of Fe-Doped Co₃O₄ on N-Doped Graphene as Electrocatalyst C.Y. Wang	95

Chapter 4: Waste Treatment

Upcycling of Polystyrene Waste Plastics to High Value Carbon by Thermal Decomposition K. Mensah, H. Mahmoud, M. Fujii and H. Shokry	103
---	-----

A Review on Current Development of Animal Bone-Based Sorbent for Heavy Metals Removal from Contaminated Water and Wastewater S. Martini, K.A. Roni, D. Kharismadewi and E. Yuliwaty	109
Preparation of Calcium Citrate Malate Using Citric Acid and Malic Acid with Calcium Hydroxide Synthesized from Duck Eggshell R.A.S. Delos-Reyes, M.A.D. Mecaydor, A.R. Pesito and M.S.A. Razon	117
Low-Temperature Synthesis of ZnO Nanoparticles with Controlled Crystal Growth for Efficient Ultraviolet Photocatalyst J.S. Hu, Z.D. Hu, Z.Q. Wei and H. Fu	125

Chapter 5: Building Materials

A Life Cycle Assessment Study on a New Countertop Material L. Silva, E. Silva, I. Brás, I. Domingos, D. Wessel and J. Ferreira	137
Effect of Using Flue-Gas Desulfurization Gypsum and Water Treatment Sludge on Compressive Strength of Cement Mortar W. Chalerm Sakulkit and N. Supakata	143
Comparative Life Cycle Assessment of Conventional Concrete to Ash Concrete J. Ferreira, E. Silva, I. Domingos, L. Silva and I. Brás	151
