

# Table of Contents

## Preface

## Chapter 1: Functional and Specialized Materials

<b>Germ-Reducing Titanium Dioxide - Silicone Rubber Composites</b> T. Fischer, S. Suttor, S. Mansi, M. Ahrens and M. Eblenkamp	3
<b>Research on Microstructure and Hardness of Laser Cladding Using the Mixed Powder of Nano-TiC and Ni-Based Alloy</b> W. Zhang, Q.H. Feng and W.Z. Zhang	9
<b>Acoustic Metamaterial Design Method Based on Green Coordinate Transformation</b> X. Xie, X.M. Wang and Y.L. Mei	15
<b>Fabrication on a Recycled and Wide-Band Absorber by 3D Printing</b> Y.G. Xu, D.L. Zheng, B. Wang, T. Liu and L. Zhou	25
<b>Monitoring CNT-Based Composite Laminates under Monotonic and Cyclic Flexural Loading</b> M. Wang, G.D. Wang and N. Li	31
<b>Effects of Material Emissivity on the Radiative Characteristics of Solid Surface</b> Y. Zhou, R. Duan, X.J. Zhu, J. Ma and X. Li	38
<b>Cooling Rate and Microstructural Investigation of Rapidly Solidified Spherical Mono-Sized Copper Particles</b> Y.Y. Hu, J.F. Wang, C. Li, Y.Y. Gao and J.Q. Li	42
<b>Skin Coating Design of Stealth Aircraft Based on Infrared Characteristic Analysis</b> K.F. Wu, Y. Zhou, J. Ma and J. Lin	50
<b>Anti-Cavitation Approach in a Bio-Inspired Throttle Valve: A Study of Using Rubber-Like Materials</b> V. Pooneeth, X. He, H.H. Wang and M.M. Kamoleka	55
<b>A Simplified Approach to the Failure Probability Assessment of Thermally Stable Diamond Composite Rock Cutting Tips</b> Y. Sun, X.S. Li and H. Guo	62

## Chapter 2: Materials and Technologies for Fiber Production

<b>Study on the Dispersion of Aramid Pulp in Epoxy Resin System</b> X.M. Ding, H.J. Kong, M.M. Qiao, Z.F. Hu and M.H. Yu	71
<b>Relationship between Crystallization Behavior and Mechanical Performance of F-III Fibers under Different Tensions in Supercritical Carbon Dioxide</b> X.M. Ding, H.J. Kong, M.M. Qiao, Z.F. Hu and M.H. Yu	77
<b>Study on the Crystallization Behavior of PAN Fibers during Hot-Drawing Process in Supercritical Carbon Dioxide Fluid with Different Strain</b> M.M. Qiao, H.J. Kong, X.M. Ding, Z.F. Hu and M.H. Yu	84
<b>Detection of Graphene Materials in Fibers</b> W.D. Li, T.G. Ma and Z.P. Mao	90

## Chapter 3: Materials and Components for Application in Optoelectronics and Electronics

<b>Characteristic Enhancement of InGaN-Based Light Emitting Diodes Grown on Pattern Sapphire Substrates</b> H.Y. Wang, G. Jin and Q.L. Tan	99
<b>Low Energy-Consumption Inverted Orange Organic Light-Emitting Diodes with Reduced Efficiency Roll-Off</b> K.P. Liu, M.Y. Chen, Y. Zhao, S.H. Pan, C.Y. Peng, W.X. Lan and B. Wei	104

<b>High-Performance Red Phosphorescent Organic Light-Emitting Diodes Based on a Gradient-Doped Emitting Layer</b> F.Y. Liu, B. Wei and G. Chen	110
<b>Enhanced Optical Absorption of Dual-Diameter Structured Silicon Nanoholes Array</b> Y. Liu, N. Meng, Y.W. Kuang, S.C. Wang, Z.C. Ni, Q.Z. Wei, Y.S. Liu, Y.L. Ma, D.B. Zhang and X.F. Yang	116
<b>The Potential of Graphene in Electronic Applications</b> Z.K. Sun	121

## **Chapter 4: Machining and Manufacturing Process**

<b>Investigation of Cutting Performance for NAK80 Hardened Steel under Different Assisted Machining Systems</b> S.Y. Lin and Z.K. Wang	133
<b>Effect of Initial Residual Stress on Machining Deformation of a Casing Part</b> B.H. Li, W.B. Zhou, H.B. Deng and H.J. Gao	139
<b>Effects of Gases Temperature on the Viscosity and Flow Velocity of Melt in the Gas-Assisted Extrusion Forming of Plastic Micro-Tube</b> Z. Ren and X.Y. Huang	145
<b>FEM Analysis for Asymmetric Bending Roll of Roll Process in Four-High Mill</b> F.Y. Jia, J.S. Wang and J.W. Liu	151
<b>Effects of Substrate Parameters on the Residual Stress and Deflection of Ti-6Al-4V Walls in Additive Manufacturing Process</b> S.G. Chen, Y.D. Zhang, Q. Wu and H.J. Gao	156

## **Chapter 5: Building Materials and Structural Mechanics**

<b>Durability Test on the Bond Strength between SFRP Layer and Masonry Surface</b> M. Jing and W. Raongjant	165
<b>Comparison Experimental Study on Retrofitting Methods of Partially Damaged Timber Columns</b> W. Raongjant and M. Jing	173
<b>Study on Dynamic Mechanical Properties of Carbon Fiber Reinforced Concrete</b> G.J. Liu, E.L. Bai, J.Y. Xu, B.X. Meng, T.J. Wang and S. Chang	180
