

# Table of Contents

## Preface

## Chapter 1: Metals Properties, Coatings and Tribology

|  |    |
|--|----|
| <b>Study of Thermal Stability of Superhydrophobic Properties of Coatings Formed on Magnesium Alloy</b><br>K.V. Nadaraia, D.V. Mashtalyar, S.N. Suchkov, V.V. Mostovaya, I.M. Imshinetskiy, S.L. Sinebrukhov and S.V. Gnedenkov | 3  |
| <b>Investigation on the Performance of Al7075 Alloy Surface Repaired by Cold Spray Coating Technology</b><br>K. Kiliçay and S.C. Dayi  | 9  |
| <b>Influence of Oxidation Temperature on Structure and Mechanical Properties of Titanium</b><br>T. Chen and S. Koyama  | 15 |
| <b>Effect of Solution Treatment on Cavitation Erosion Resistance of Duplex Stainless Steel Surfacing Layers</b><br>Z.R. Wang, Y.F. Bao, Q.N. Song, K. Yang and Y.F. Jiang  | 21 |
| <b>Using Atomic Force Microscopy to Evaluate Microstructure for Direct Metal Laser Melted Titanium</b><br>G. Wong and C. Sharp   | 26 |
| <b>Sliding Friction and Wear Behavior of GCr15 Bearing Steel at Different Temperatures</b><br>D.Y. Wang, R.C. Xu, D.X. Xia, S.R. Wang, Y.C. Pei, Z.H. Liu and Z.P. Han   | 35 |

## Chapter 2: Grinding and Finishing Processes

|  |    |
|--|----|
| <b>Studying the Influence of Dressing Parameters on the Surface Roughness when Conducting the External Grinding of SKD11 Steel</b><br>T.N. Giang, K.K. Bui, Q.C. Dang, D.N. Nguyen, X.T. Hoang and V.N. Pi                           | 45 |
| <b>Research on Surface Quality by Ultrasonic Vibration-Assisted Face Grinding of Cemented Carbide</b><br>G.J. Chen, J.K. Xu, J.Q. Wang, J.D. Wang, L. Tong and H.D. Yu   | 52 |
| <b>Determining the Optimum Set of Dressing Parameters Satisfying Minimum Surface Roughness when Conducting the Internal Grinding of Hardened SKD11 Steel</b><br>L.X. Hung, T.N. Giang, Q.H. Tran, N.H. Linh, D.N. Nguyen and V.N. Pi | 58 |
| <b>Research on Surface Roughness Prediction Model of Ultrasonic Assisted Grinding by Response Surface Method</b><br>H.D. Yu, M.X. Wang, J.K. Xu, L. Tong, G.J. Chen, B. Dai and S. Wang  | 66 |
| <b>Study on Finishing of Polychlorotrifluoroethylene Resin by Magnetic Abrasive Finishing Process with Renewable Abrasive Particles</b><br>J.Y. Xu and Y.H. Zou  | 72 |

## Chapter 3: Functional Materials

|   |    |
|---|----|
| <b>Elimination of Oxygen Defects in In-Si-O Film and Thin Film Transistor Performance</b><br>E.K. Palupi and A. Fujiwara                                | 81 |
| <b>Graphene Oxide as a Substrate for Biosensors: Synthesis and Characterization</b><br>M. Adel, A.H.A. Abdel-Wahab, A. Abdel-Mawgood and A. Osman Egiza | 87 |
| <b>Influence of Force Chains Behaviors on Strength of Al/W/PTFE Granular Composite</b><br>L. Tang, D. Hu, S. Zhou, C. Ge, H.F. Wang and J. Liu          | 94 |

## Chapter 4: Materials and Technologies in Electrochemistry and Environmental Protection

|   |     |
|---|-----|
| <b>Optical Absorption and Photoconversion Characteristics of WO<sub>3</sub> Nanofiber Photoanodes Prepared by Electrospinning with Different Calcination Temperatures</b><br>R. Bojarus, T. Yuangkaew, T. Thammabut, M. Horprathum, P. Jaroenapibal and N. Triroj | 103 |
| <b>Studies on the Performance of Two Dimensional AlSi as the Anodes of Li Ion Battery</b><br>S. Hao   | 109 |
| <b>Rapid Removal of Methylene Blue in Water Using Polymer-Based Biochar Nanocomposite-Coated Filters</b><br>E.C.R. Lopez, N.M. Saporsantos, W.V.R. Magbalon, R.C. Aquino, M.L.K.S.J. Celebre and J.V.D. Perez   | 116 |
| <b>Value-Added Utilization of Banana Peel (<i>Musa acuminata</i>): Adsorption Fatty Acid and Extending the Life of Activated Carbon</b><br>W.D.P. Rengga, B. Triwibowo, J.T. Putra, A. Nugroho, S. Kadarwati and S. Subiyanto                                     | 125 |

## Chapter 5: Polymers and Composites

|  |     |
|--|-----|
| <b>Fabrication and Measurement of Flexible Polymer Aerogel and Factors Affecting its Thermal Conductivity</b><br>J.Z. Wang, J. Du and Y.B. Wang                                      | 133 |
| <b>Effect of the Environment on the Characteristics of a Polymer</b><br>S. Redjala, S. Azem and N.A. Hocine  | 139 |
| <b>Mechanical Characterization and Fracture Analysis of Epoxy Resin Composites Reinforced with Quasi-Unidirectional Salago Fibers</b><br>J.D. Lopena and J.C. Millare                | 145 |
| <b>Grass Waste Derived Cellulose Nanocrystals as Nanofiller in Polyvinyl Alcohol Composite Film for Packaging Application</b><br>W.H. Danial, R.M. Taib, M.A.A. Samah and Z.A. Majid | 151 |
| <b>Earth Bricks with Halloysite Nanoclay: Research and Experimentation for the Sustainability of Materials</b><br>C. Sposito and F. Scalisi  | 159 |
| <b>Mild Reaction of Highly-Oriented Collagen Fibril Arrays with Simulated Body Fluid</b><br>Y.D. Chai, Z.Z. Liu, D. Noda and M. Tagaya   | 166 |
| <b>Developing a HEC/CMC-Reduced Graphene Oxide Hydrogel Nanocomposite for Seawater Desalination</b><br>T. Tumolva, K.C. Madamba, I.G. Nunag and V.G. Villanueva                      | 173 |

## Chapter 6: Computational Modelling

|  |     |
|--|-----|
| <b>Computational Revolutions in Lattice Thermal Conductivity</b><br>L.I. Ranasinghe and C.H. Hsu   | 181 |
| <b>Creep Parameters Determination by Omega Model to Norton Bailey Law by Regression Analysis for Austenitic Steel SS-304</b><br>M. Sattar, A.R. Othman, S. Kamaruddin, M. Azad Alam and M. Azeem | 188 |
| <b>Processing of C<sub>f</sub>/SiC Composites through Two-Channel Temperature-Control CVI: I, Modeling</b><br>P.F. Wang, S.F. Luo, H. Zhang, S. Zhang and L.L. Zheng                             | 198 |
