

Table of Contents

Preface and Organisation

Chapter 1: Formability of Metallic Materials

A Yield Criterion Based on Mean Shear Stress W.C. Emmens and A.H. van den Boogaard	3
Mechanical Behavior of 980MPa NANOHITENTM at Elevated Temperatures and its Effect on Springback in Warm Forming T. Minote, Y. Funakawa, N. Saito, M. Fukahori, H. Hamasaki and F. Yoshida	11
Modelling Non-Quadratic Anisotropic Yield Criteria and Mixed Isotropic-Nonlinear Kinematic Hardening at Finite Strains T.J. Grilo, I.N. Vladimirov, R.A.F. Valente and S. Reese	19
Deformation Behavior of a Magnesium Alloy Sheet with Random Crystallographic Orientations T. Hama, T. Mayama and H. Takuda	27
Material Modeling and Springback Analysis Considering Tension/Compression Asymmetry of Flow Stresses N. Noma and T. Kuwabara	33
Investigation of Different Techniques to Evaluate the FLC from Experiments and FE Simulations A. Groth, E. Schedin and R. Moshfegh	41
Development of Formability, Microstructure and Martensite Reversion during Intermediate Annealing of Metastable Austenitic Stainless Steel P. Schmid and M. Liewald	49
Forming Simulation Considering the Differential Work Hardening Behavior of a Cold Rolled Interstitial-Free Steel Sheet K. Ichikawa, T. Kuwabara and S. Coppieters	56
Novel Experimental Set-Up to Test Tubes Formability at Elevated Temperatures F. Michieletto, A. Ghiotti and S. Bruschi	62
Influence of the Identification Procedure of the Yield Criterion on the Thickness Prediction of the Square Cup L. Paraianu, D.S. Comsa and D. Banabic	70
Investigation of the Hot Deformation Behavior of an Al-Mg-Sc-Zr Alloy under Plane Strain Condition J. Taendl, M. Dikovits and C. Poletti	76
Study on Instability and Forming Limit of Sheet Metal under Stretch-Bending B. Hou, S. Perdahcioglu, A.H. van den Boogaard and D. Kitting	84
Improvement in Ductility in Commercially Pure Titanium Alloys by Stress Relaxation at Room Temperature I. Eipert, G. Sivaswamy, R. Bhattacharya, M. Amir and P. Blackwell	92
Studies on Ductile Damage and Flow Instabilities during Hot Deformation of a Multiphase γ-TiAl Alloy D. Halici, H.A. Zamani, D. Prodinger, C. Poletti, D. Huber, M. Stockinger and C. Sommitsch	99
A Generalized Damage Model Accounting for Instability and Ductile Fracture for Sheet Metals J.H. Lian, X.X. Jia, S. Münstermann and W. Bleck	106
Influence of Cooling Rate on Free Interstitial Concentration in Type 430 Ferritic Stainless Steel T.J. Juuti, T. Manninen and D.A. Porter	111
Heat Treatments Analysis of Steel Using Coupled Phase Field and Finite Element Methods P. Vasconcelos, A. Giessmann, J. Dias-de-Oliveira and A. Andrade-Campos	117

Chapter 2: Forging and Rolling

Punch Wear in the Forming of Deep Holes with Pulse Ram Motion on a Servo Press R. Matsumoto and H. Utsunomiya	127
A Study of the Effects of Reversal Cycles in the Gear Rolling Process by Using Finite Element Simulations A. Khodaee and A. Melander	134
Influence of Heat Treatment on Rolling and Final Properties of Welded Steels 1.4404 and 1.4571 G. Tober, C. Ruback, M. Kuttig and P. Maier	142
Titanium Hot Stretch Forming: Experimental and Modeling Residual Stress Analysis A. Astarita, L. Giorleo, F. Scherillo, A. Squillace, E. Ceretti and L. Carrino	149
Microstructures and Crack Formation in Hot Compression Test of Ultrahigh Carbon Steel S.H. Kang, H.C. Lim and H.W. Lee	162
Warm-Forging Characteristics and Microstructural Response of Medium-Carbon High-Strength Steels for High-Duty Components P. Skubisz and L. Lisiecki	167
The Calibration of High Energy-Rate Impact Forging Hammers by the Copper-Column Upsetting Method and High Speed Camera Measurements L. Galdos, E. Sáenz de Argandoña, N. Herrero, M. Ongay, J. Adanez and M. Sanchez	173
Effect of the Kinematic Hardening in the Simulations of the Straightening of Long Rolled Profiles C. Bouffioux, R. Boman, N. Caillet, N. Rich, J.P. Ponthot and A.M. Habraken	178
Computing Flatness Defects in Sheet Rolling by Arlequin and Asymptotic Numerical Methods K. Kpogan, Y. Tampango, H. Zahrouni, M. Potier-Ferry and H. Ben Dhia	186
Intended Dishing in Ring Rolling J. Seitz, G. Schwich and G. Hirt	194
Potentials of Ceramic Die Materials for Isothermal Forging Purposes of a Titanium Alloy B.A. Behrens, M. Kazhai and T. Prüß	202
Numerical and Experimental Investigations on Fold Formation in Forged Parts B.A. Behrens, T. Matthias and M. Kazhai	212
Buckling of Long Thin Plates under Residual Stresses with Application to Strip Rolling K. Kpogan and M. Potier-Ferry	221
Surface Modifications for Optimized Forming Operations G. Braeuer, H. Paschke, M. Weber, B.A. Behrens and T. Yilkiran	231

Chapter 3: Composites Forming Processes

Hypo-Elastic vs Hyper-Elastic Constitutive Equation for Textile Materials at Meso-Scale E. Vidal-Sallé, C. Florimond, A. Charmetant and P. Boisse	243
The Effect of Mandrel Configuration on the Warpage in Pultrusion of Rectangular Hollow Profiles I. Baran, J. Hattel and R. Akkerman	250
Deformability of a Flax Reinforcement for Composite Materials B. Vanleeuw, V. Carvelli, S. Lomov, M. Barburski and A.W. van Vuure	257
A Computational Approach Based on Flow Front Shape Dynamic Behavior for the Process Characterization during Filling in Liquid Resin Infusion F. Sanchez, L. Domenech, V. Garcia, N. Montes, A. Falco, E. Cueto and F. Chinesta	265
Investigation of the Spring-In of a Pultruded L-Shaped Profile for Various Processing Conditions and Thicknesses I. Baran, J. Hattel and R. Akkerman	273
An Integral Mesoscopic Material Characterization Approach F. Härtel, P. Böhler and P. Middendorf	280
Locking and Stability of 3D Woven Composite Reinforcements S. Mathieu, P. Boisse, N. Hamila and F. Bouillon	292
Tribological Study of Polymer Composite Forming Using Model Experiments and Real Composites O. Smerdova and M.P.F. Sutcliffe	300

A Robust Monolithic Approach for Resin Infusion Based Process Modelling L. Abouorm, M. Blais, N. Moulin, J. Bruchon and S. Drapier	306
Analysis of Composite Reinforcement at Mesoscopic Scale from X-Ray Microtomography N. Naouar, E. Vidal-Sallé, J. Schneider, É. Maire and P. Boisse	316
Application of a Discrete Mesoscopic Finite Element Approach to Investigate the Bending and Folding of Fiber-Reinforced Composite Materials during the Manufacturing Process L.M. Dangora, J. Sherwood and C. Mitchell	324
Investigation of the Mechanical Properties of a Stitched Triaxial Fabric C.J. Mitchell, J.A. Sherwood, L.M. Dangora and J.L. Gorczyca	332
Improving Computational Efficiency in LCM by Using Computational Geometry and Model Reduction Techniques E. Cueto, C. Ghnatos, F. Chinesta, N. Montes, F. Sanchez and A. Falco	339
Characterizations of STF-Treated Aramid Fabrics Using Picture Frame Test H.C. Ahn, W.J. Na, S.J. Han, P. Harrison, J.K. Park, E.Y. Jeong and W.R. Yu	344
Isothermal Multisection Tooling for the Automated Preforming of Carbon Fiber Composite Structures F.N. Nezami, T. Gereke and C. Cherif	349
Analyses of Textile Composite Reinforcement Compaction at the Mesoscopic Scale Q.T. Nguyen, E. Vidal-Sallé, P. Boisse, C.H. Park, A. Saouab, J. Bréard and G. Hivet	356
Modelling and Simulation of the Coupling of Normal Pressure and Shear Force in Plain Woven Fabrics O. Döbrich, T. Gereke and C. Cherif	363
Thermoforming Simulation of Multilayer Composites with Continuous Fibre and Thermoplastic Matrix E. Guzman Maldonado, N. Hamila, P. Boisse and P. Chaudet	368
Investigation of Fibre Movement in Molten Polymer during Shaping Processes of Thermoplastic Composites B. Engel, E. Soemer, H. Foysi and F. Aldudak	375
Novel Intermediate Temperature Ceramic Composites, Materials and Processing for Siloxane Based Basalt Fiber Composites R. Gadow and P. Weichand	382
Variable Forming Tool and Process for Thermoset Prepregs with Simulation Verified Part Quality T. Hundt, C. Schmidt, B. Denkena, K. Engel and P. Horst	391
Bending Characterization of UD Composites U. Sachs, R. Akkerman and S.P. Haanappel	399
Forming Limits of Thermoplastic Composites D.J. Wolthuizen, J. Schuurman and R. Akkerman	407

Chapter 4: Friction and Wear in Material Processing

Manufacturing and Tribological Investigation of Hot Micro-Coined Lubrication Pockets A. Szurdak, A. Rosenkranz, C. Gachot, G. Hirt and F. Mücklich	417
Friction Coefficient Identification in Roll Forming Processes L. Galdos, U. Ulíbarri, I. Gil, R. Ortubay and E. Sáenz de Argandoña	425
Influence of Friction on the Loads in a Roll Forming Simulation with Compliant Rolls C. Mueller, X. Gu, L. Baeumer and P. Groche	436
Wear Behavior of WC-Co Carbides with Addition of Cr₃C₂ and Ni L. Carrino, M. Durante, A. Formisano, A. Langella, F.M.C. Minutolo and A. Caraviello	444
A First Step towards a Tribological Approach to Investigate Cutting Tool Wear G. Axel, F. Valiorgue, C. Courbon, J. Rech and U. Masciantonio	452
A Study of Mold Friction and Wear in Injection Molding of Plastic-Bonded Hard Ferrite L. Crema and G. Lucchetta	460

Chapter 5: Multiscale & Continuum Constitutive Modelling

Establishment of Stress-Strain Relationships of Tailor-Welded Tubes via DIC Method Based on Uniaxial Tensile Tests H.J. Jia, L.F. Yang and J.W. Liu	475
Microstructure Prediction during Hot Deformation Using New Dynamic Recrystallization Model and Finite Element Analysis H.W. Lee, Y.S. Lee and S.H. Kang	483
Development of the Modified Cellular Automata Sphere Growth Model for Creation of the Digital Material Representations Ł. Madej, K. Pasternak, J. Szyndler and W. Wajda	489
Modelling of the Microstructure Evolution Using Cellular Automata Framework and WorkFlow Approach R. Golab, M. Sitko and Ł. Madej	497
Re-Meshing in Finite Element Simulations of Hot Working Including a Microstructural Evolution Model M. Bambach	505
First Steps towards Parametric Modeling of FSW Processes by Using Advanced Separated Representations: Numerical Techniques D. Canales, E. Cueto, E. Feulvach and F. Chinesta	513
Numerical Study of the Impact of Constitutive Modelling on the Evolution of Necking in the Case of a Tensile Test on C68 Grade Steel L. Tabourot, P. Balland, N.A. Sene, M. Vautrot, N. Ksiksi and A. Maati	521
Influence of Contact Friction on the Experimental Determination of the Balanced Biaxial Strain-Ratio Using the Disc Compression Test H. Aretz and F. Barlat	529
Applications of Multi-Scale Models to Numerical Simulation and Experimental Analysis of Anisotropic Elastoplastic Behavior of Metallic Sheets W. Nasri, A. Gavrus, A. Kouadri-Henni and K. Sai	536
Multiscale Finite Element Simulation of Forming Processes Based on Crystal Plasticity K. Soho, F. Abed Meraim, X. Lemoine and H. Zahrouni	545
Validation of a Multi-Scale Model for Shear Deformation of an Aluminium Sheet Alloy D. Shore, M.A.R. Toledo, J. Gawad, R. Schouwenaars, D. Roose and A. van Bael	553

Chapter 6: Nano-Structured Materials and Microforming

Study of Microforging of Parallel Ribs from Metal Strip T. Stellin, R. van Tijum, M. Merklein and U. Engel	565
The Effect of Initial Grain Size on Formability of AZ31B Magnesium Alloy during I-ECAP M. Gzyl, A. Rosochowski, L. Olejnik and A. Reshetov	573
Finite Element Analysis of the Effect of Flexible Pad on the Deformation of Metal Foils in Flexible Pad Laser Shock Microforming B. Nagarajan, S. Castagne, Z.K. Wang and H.Y. Zheng	581
Using FEA in Assessing Backward Extrusion of Multiple Micro-Pins M.R. Salamat and A. Rosochowski	589
Evaluation of Tribological Properties of AlMg4.5Mn0.7 in Massive Microforming Using the Barrel Compression Test A. Schubert, S.F. Jahn and B. Müller	597

Chapter 7: Additive Manufacturing and Non-Conventional Processes

Characterization of Hybrid Components Consisting of SEBM Additive Structures and Sheet Metal of Alloy Ti-6Al-4V A. Schaub, V. Juechter, R.F. Singer and M. Merklein	609
Estimation of Material Removal by Profilometer Measurements in Mass Finishing L. Bottini, A. Boschetto and F. Veniali	615
A Vertical Type Tandem Twin Roll Caster for Clad Strip Equipped with a Scraper T. Haga, H. Tsuge, T. Ishihara, S. Kumai and H. Watari	623
Increasing Performances of En AB-46000 by Squeeze Casting A. Boschetto, L. Bottini, G. Costanza, M.E. Tata and F. Quadrini	629

Influence of Titanium Carbide Fraction on Material Properties and EDM of ZrO₂-TiC Ceramics	637
R. Landfried, F. Kern and R. Gadow	
Determination of High Strain-Rate Behavior of Metals: Applications to Magnetic Pulse Forming and Electrohydraulic Forming	643
A.C. Jeanson, G. Avrillaud, G. Mazars, J.P. Cuq-Lelandais, F. Bay, E. Massoni, N. Jacques and M. Arrigoni	
Small Diameter External Cylindrical Surfaces Obtained by Ram Electrical Discharge Machining	650
L. Slătineanu, M. Coteață, H.P. Schulze, O. Dodun, I. Besliu and L. Gherman	
Indentation Recovery of Shape Memory Foams Produced by Solid State Foaming	656
D. Bellisario, F. Quadrini and L. Santo	
Influence of Plasma Channel Change on the Surface Topology in the Electrical Discharge Machining	664
H.P. Schulze and K. Mecke	
A Non-Conventional Technique for Evaluating Welded Joints Based on the Electrical Conductivity	671
T.G. Santos, G. Sorger, P. Vilaça and R.M. Miranda	
Electrical Discharge Milling of Silicon Carbide with Different Electrical Conductivity	677
F. Zeller, N. Ojha, C. Müller and H. Reinecke	
Direct Molding of Polymers for Biomedical Applications	685
L. Santo, D. Bellisario and F. Quadrini	
Comparative Study on Parametric Analysis of μEDM of Non-Conductive Ceramics	693
N. Ojha, F. Zeller, C. Müller and H. Reinecke	
Experimental Research on Electrochemically Assisted Microturning Process	701
S. Skoczyłec, M. Grabowski and M. Spychaliski	
Resource-Efficient Machining of Hard Metals	708
O. Kroening, M. Herzig, H.P. Schulze, M. Hackert-Oschätzchen, R. Kühn, H. Zeidler and A. Schubert	
The Influence of Process Parameters on the Forming of Riblets during Riblet Rolling	715
J. Pöplau, S. Stille, T. Romans, T. Beck, L. Singheiser and G. Hirt	
Dual Electromagnetic Forming Using Single Uniform Pressure Coil	723
C. Patel and S.D. Kore	
Numerical Simulation of Laser Forming of Aluminum Sponges: Effect of Temperature and Heat Treatments	731
F. Quadrini, D. Bellisario, D. Ferrari, L. Santo and A. Santarsiero	
Qualification of ECM-Processes by Electro Impedance Spectroscopy	739
L. Labusch, C. Müller and H. Reinecke	
Fluid-Particle Separation of Magnetorheological (MR) Fluid in MR Machining Application	746
I. Ismail and S.N. Aqida	
Controlling Penetration Depth in Projection Stereolithography by Adjusting the Operation Wavelength	756
P. Lehtinen, S. Laurila, M. Kaivola and J. Partanen	
Friction Stir Welding Assisted by Electrical Joule Effect to Overcome Lack of Penetration in Aluminium Alloys	763
T.G. Santos, R.M. Miranda and P. Vilaça	
Fundamental Analysis of the Process Conditions during Electro Discharge Machining of Biodegradable Magnesium	773
F. Klocke, M. Schwade and A. Klink	
Mechanical Properties of a Metal Sandwich Panel Manufactured Using Longitudinally Laminated Forming Tools	781
A. Järvenpää, J. Lämsä, M. Hietala and K. Mäntyjärvi	
Designing and Manufacturing of a Flexible Longitudinally Laminated Sandwich Panel Forming Tool	786
J. Lämsä, A. Järvenpää and K. Mäntyjärvi	
Laser Cutting of Aluminium Sheets with a Superficial Cold Spray Titanium Coating	794
A. Astarita, S. Genna, C. Leone, F.M.C. Minutolo, V. Paradiso and A. Squillace	
A Novel Heat Treatment Line for Processing of Tailored Small Batch Steels	804
A. Järvenpää, J. Lämsä, E. Patard and K. Mäntyjärvi	

Chapter 8: Structures, Properties and Processing of Polymers (and Biomass Based Materials)

Effect of the Interdiffusion at the Polymer/Polymer Interface on the Flexural Properties of Over-Moulded Short Glass Fibre/Glass Fabric Reinforced PA6 Composites E. Lafranche, T. Renault and P. Krawczak	821
Formulation and Surface Properties of Bio-Based Polymer Films for Pharmaceutical Applications M. Brogly, A. Fahs and S. Bistac	829
Substitution of Virgin Material by Recycled Material from End-of-Life Vehicle (ELV) S.R. Epsztein, M.A.J. de Fombelle, T. Falher, D. Jouannet, T. Gallone and L. Cauret	836
Simplified Modelling of the Infrared Heating Involving the Air Convection Effect before the Injection Stretch Blowing Moulding of PET Preform Y.M. Luo, L. Chevalier, F. Utheza and X. Nicolas	844
Hot Press Moldability of Bamboo Powder without Additives S. Kajikawa and T. Iizuka	852
Performance and Lightweight Thermoplastic Materials for Automotive Application using Hollow Microspheres A.S. Doumbia, D. Jouannet, T. Falher and L. Cauret	859
Parameter Identification by Inverse Analysis Coupled with a Finite Pointset Method for Polyurethane Foam Expansion H. Abdessalam, B. Abbès, Y.M. Li, Y.Q. Guo, E. Kwassi and J. Romain	868
Investigation of Different Liquid Silicone Rubbers for Micro Pinch Valves A. Loth and R. Förster	876
Formation of the Printing Elements in the Photopolymer Material Used in Flexography S. Mahovic Poljacek, T. Tomasegovic, T. Cigula, M. Gojo and D. Milcic	883
FSI-Simulation of Liquid Supported Stretch Blow Molding (LBO): Model Validation and Study of Series Production Scenario J. Zimmer and M. Stommel	892
Basic Knowledge Models for the Processing of Bread as a Solid Foam G. della Valle, H. Chiron, L. Cicerelli, K. Kansou, K. Katina, A. Ndiaye, M. Whitworth and K. Poutanen	901
Resins Materials as Alternative Insert for the Fabrication of Micro Structured Surfaces by Micro Injection Moulding M. Sorgato, G. della Giustina, E. Zanchetta, G. Brusatin and G. Lucchetta	909
Modeling the Adhesion Bonding Mechanism in Overmolding Hybrid Structural Parts for Lightweight Applications R. Giusti and G. Lucchetta	915
Acetaldehyde Generation in Processing PET by Means of Hot Runner Systems G. Lucchetta and S. Chirico	922
Analysis of Polymer Crystallization with a Multiscale Modeling Approach R. Spina, M. Spekowius and C. Hopmann	928

Chapter 9: Energy Efficient Solutions in Material Forming

Electromagnetic Sheet Metal Feeder S. Teichrib, R. Krimm and B.A. Behrens	939
Experimental Investigation of Energy Savings during Table-Top Hemming of Aluminum Alloys S. Höhne and M. Liewald	947
Effects of Weld Line in Deep Drawing of Tailor Welded Blanks of High Strength Steels T. Mennecart, A. Güner, N.B. Khalifa and A.E. Tekkaya	955
Development of Metal Hollow Sphere Sandwich Construction and its Formability and Mechanical Property Y. Yoshida and M. Shibata	963

Chapter 10: Extrusion and Drawing

Cold Forging with Lubricated Tools	
C. Müller, L. Rudel, D. Yalcin and P. Groche	971
Increased Productivity in Hot Aluminum Extrusion by Using Extrusion Dies with Inner Cooling Channels Manufactured by Rapid Tooling	
R. Höcker, M. Haase, N. Ben Khalifa and A.E. Tekkaya	981
Use of FEM and DoE to Reduce the Forming Force during Cold Extrusion of Prismatic Cell Housings	
M. Austen, J. Noneder and M. Merklein	989
Investigation of Friction Boundary Conditions during Extrusion of Aluminium and Magnesium Alloys	
V. Sanabria, S. Müller, S. Gall and W. Reimers	997
Metal Flow Conditions in Porthole Channels of Different Size	
H. Valberg, D. Nolte and K. Yawar	1005
On the Velocity and the Strain Rate Field in Unlubricated Direct and Indirect Axisymmetric Extrusion of Al	
S. Torabzadeh Khorasani and H. Valberg	1013

Chapter 11: Incremental and Sheet Metal Forming

Applied State Space Feedback Control of a Deep Drawing Process	
S. Tommerup and B. Endelt	1023
Multiobjective Optimization of Single Point Incremental Forming: Comparison between Isotropic and Combined Hardening Behavior	
H. Arfa, R. Bahloul and H. Belhadjalah	1031
The Influence of Temperature on Zinc Abrasion in Deep Drawing Processes	
P. Sachnik, W. Volk, R. Golle and H. Hoffmann	1039
The Multi-Breakage Phenomenon in Air Bending Process	
V. Vorkov, R. Aerens, D. Vandepitte and J.R. Duflou	1047
Phase Transformation and Microstructural Behavior of New Steel Grades for Hot Sheet Stamping	
S. Bruschi, A. Ghiotti, B. Valoppi, J.D. Puerta-Velasquez, P. Drillet, M. Arribas, I. Aranguren and J. Clobes	1054
Roller Hemming Simulation: State of the Art and Application Limits	
R. Neugebauer, W.G. Drossel, M. Rössinger, A. Eckert and B. Hecht	1062
Surface and Microstructure Considerations in High Speed Single Point Incremental Forming of Ti6Al4V Sheets	
G. Ambrogio, S. Bruschi, F. Gagliardi, A. Ghiotti and L. Filice	1071
Hot Single Point Incremental Forming of Ti-6Al-4V Alloy	
M. Ortiz, M. Penalva, M.J. Puerto, P. Homola and V. Kafka	1079
Approach for Implementation of Short Cycle Stretch Forming (SCS) to Cupping Processes	
M. Schneider and M. Liewald	1096
Influence of Tooling Material and Temperature on the Final Properties of Tailor Tempered Boron Steels	
L. Galdos, E. Sáenz de Argandoña, N. Herrero, A. Sukia, R. Ortubay, X. Agirretxe and J. Intxaurbe	1102
Forming Limit Extension of High-Strength Steels in Bending Processes	
M. El Budamusi, A. Weinrich, C. Becker, S. Chatti and A.E. Tekkaya	1110
The Effects of Shape and Tool Material on Aluminum Sheet Spinning	
M. Elyasi, M. Ghafari and M. Bakhshi-Jooybari	1116
Electromagnetic Formability of an Aluminium Ice Tray	
J.K. Doley and S.D. Kore	1124
Numerical and Experimental Study of Preforming Stage in Tube Hydroforming	
S. Mojarrad Farimani, J. Gholipour Baradari, H. Champliaud, J. Savoie and P. Wanjara	1132

Chapter 12: Machining and Cutting

Development of Hole Making Technology of Bi-Layer Composite Materials Consisting of CFRP Laminates and Titanium Alloys H. Yagishita	1151
Prediction of Post-Machining Distortion Due to Residual Stresses Using FEM and a Massive Removal Approach X. Cerutti and K. Mocellin	1159
Cutting Force Model in Milling of Carbon Fiber Reinforced Plastic S. Tamura and T. Matsumura	1166
Experimental Comparison between Traditional and Cryogenic Cooling Conditions in Rough Turning of Ti-6Al-4V S. Tirelli, E. Chiappini, M. Strano, M. Monno and Q. Semeraro	1174
Comparison between Wrought and EBM Ti6Al4V Machinability Characteristics A. Bordin, S. Bruschi, A. Ghiotti, F. Bucciotti and L. Facchini	1186
Identification of Friction Law to Model Orthogonal Cutting Y. Senecaute, M. Watremez, J. Brocail and L. Dubar	1194
Fitting of Constitutive Material Parameters for FE-Based Machining Simulations for Functionally Graded Steel Components M. Tiffe, D. Biermann and A. Zabel	1202
Effects of the Flow Stress in Finite Element Simulation of Machining Inconel 718 Alloy F. Jafarian, M.I. Ciaran, P.J. Arrazola, L. Filice, D. Umbrello and H. Amirabadi	1210
Influence of Cutting Parameters and Tool Geometry on Cutting Forces and Damage on 2D and 3D Carbon/Epoxy Composites in Drilling Y. Turki, M. Habak, R. Velasco, P. Vantomme and K. Khellil	1217
Numerical Simulation of Workpiece Thermal Field in Drilling CFRP/Aluminum Alloy M. Montoya, M. Calamaz, D. Gehin and F. Girot	1226
Residual Stresses in Machining of AISI 52100 Steel under Dry and Cryogenic Conditions: A Brief Summary S. Caruso, J.C. Outeiro, D. Umbrello and A.C. Batista	1236
The Effects of Cutting Conditions on Surface Integrity in Machining Waspaloy D. Umbrello	1243
Thermo-Mechanical Behaviour of Spheroidal Graphite Iron K. Le Mercier, M. Watremez, L. Foulland, J.D. Guérin and L. Dubar	1250
Experimental Research of Micro-Textured Tool for Reduction in Cutting Force H. Kiyota, F. Itoigawa and T. Nakamura	1258
Wearing Evaluation in Nickel Super-Alloys Turning for the Development of a Predictive Model for CAM Optimization A. del Prete, R. Franchi and A. Spagnolo	1264
On the Flow Stress Model Selection for Finite Element Simulations of Machining of <i>Ti6Al4V</i> S. Imbrogno, G. Rotella and D. Umbrello	1274
Experimental Analysis of Milling Operations in Ti-6Al-4V and Co-28Cr-6Mo Alloys for Medical Devices P. Ferreira, F. Simões and C. Relvas	1282
Methods to Decrease Cut Edge Sensitivity of High Strength Steels T. Gläsner, C. Sunderkötter, A. Plath, W. Volk, H. Hoffmann and R. Golle	1294

Chapter 13: New and Advanced Numerical Strategies for Material Forming

Weak Formulations with Upwind Shift for Calculation of Free Surface Corrections and Simulation of Steady-State Forming Problems L. Fourment and U. Ripert	1311
---------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

A Discontinuous Galerkin Method for Multiphysics Welding Simulations	1319
J.S. Cagnone, K. Hillewaert and N. Poletz	
Online Prediction of Machining Distortion of Aeronautical Parts Caused by Re-Equilibration of Residual Stresses	1327
F. Poulhaon, M. Rauch, A. Leygue, J.Y. Hascoet and F. Chinesta	
Fast Plastic Integration Algorithms for Forming Process Simulations	1336
A. Halouani, Y.M. Li, B. Abbès and Y.Q. Guo	
Modelling of Inertia Friction Welding Using Finite Element Analysis and Computational Fluid Dynamics	1344
O. Muhammad, C.J. Bennett and H.P. Morvan	
An Object-Oriented Analysis of Complex Numerical Models	1356
P. Maciął, R. Bureau and C. Sommitsch	
Methods for the Numerical Modelling of the Adhesive Interlayer of Sandwich-Sheets in Case of Coupled Thermo-Mechanical FE-Analysis	1364
B. Engel and J. Brühmann	
Elastic-Plastic Reduced Order Modelling of Sheet and Profiles Bending-under-Tension	1371
J.V. Aguado, A. Leygue, E. Cueto and F. Chinesta	

Chapter 14: Inverse Analysis Optimization and Stochastic Approaches

Automatic Parameter Classification for Dimension Reduction as Basis for Robust Parameter Identification	1383
D. Steffes-Lai	
Data Exploration Approach Versus Sensitivity Analysis for Optimization of Metal Forming Processes	1390
K. Regulski, D. Szeliga and J. Kusiak	
Nickel Superalloy Components Surface Integrity Control through Numerical Optimization	1396
A. Del Prete, R. Franchi and E. Mariano	
A Fast Approach to Shape Optimization Using the Inverse FEM	1404
P. Landkammer and P. Steinmann	

Chapter 15: Innovative Joining by Forming Technologies

Basic Investigations of Non-Pre-Punched Joining by Forming of Aluminium Alloy and High Strength Steel with Shear-Clinching Technology	1413
M. Merklein, G. Meschut, M. Müller and R. Hörrhold	
Friction Stir Lap Welding of Aluminium Alloys	1421
C. Bruni, G. Quercetti and M. Pieralisi	
Influence of the Process Temperature on the Properties of Friction Stir Welded Blanks Made of Mild Steel and Aluminum	1429
C. Mertin, A. Naumov, L. Mosecker, M. Bambach and G. Hirt	
Unerring Planning of Clinching Processes through the Use of Mathematical Methods	1437
W.G. Drossel, T. Falk, M. Israel and F. Jesche	
Friction Stir Welding of Aluminum Metal Matrix Composite Containers for Electric Components	1445
J. Pakkanen, A. Huetter, C. Poletti, N. Enzinger, C. Sommitsch and J.T. Niu	
New Die Concept for Self-Pierce Riveting Materials with Limited Ductility	1452
W.G. Drossel and M. Jäckel	
Galvanic Corrosion Related to Steel/Aluminum Dissimilar Joining Tailored Blank	1460
S. Takehisa and T. Iizuka	
A New Process Chain for Joining Sheet Metal to Fibre Composite Sheets	1468
R. Plettke, A. Schaub, C. Gröschel, C. Scheitler, M. Vetter, O. Hentschel, F. Ranft, M. Merklein, M. Schmidt and D. Drummer	
Ti 6Al-4V FSW Weldability: Mechanical Characterization and Fatigue Life Analysis	1476
E. Lertora, C. Mandolfino and C. Gambaro	

Effect of Cold Plasma Treatment on Surface Roughness and Bonding Strength of Polymeric Substrates	1484
C. Mandolfino, E. Lertora and C. Gambaro	
Inverse Analysis of Forming Processes Based on FORGE Environment	1494
S. Marie, R. Ducloux, P. Lasne, J. Barlier and L. Fourment	
Forming of Automotive Parts with Nuts Clinch Process in Comparison to Welding of Nuts	1503
P. Balon and A. Świątoniowski	
Experimental and Numerical Study on Linear Friction Welding of AA2011 Aluminum Alloy	1511
G. Buffa, D. Campanella, A. D'Annibale, A. di Ilio and L. Fratini	
Hierarchical Metamodeling: Cross Validation and Predictive Uncertainty	1519
B.M. Colosimo, L. Pagani and M. Strano	
3D Numerical Simulation of Friction Stir Welding of Lap Joints Using an Arbitrary Lagrangian Eulerian Formulation	1528
S. Gastebois and L. Fourment	

Chapter 16: Heat Transfer Modelling

Numerical Investigation of Temperature and Phase Development of (Deformation-) Dilatometer Specimens	1539
S. Lutz, J. Weninger, B. Helldörfer and M. Merklein	
Thermal Study of Hot Stamping with Heated and Cooled Tooling to Obtain Tailored Properties	1545
A. Blaise, B. Bourouga and C. Dessain	
CFD Simulation of Heating a Cu Pipe with a Safe H₂/O₂ Flame	1553
L. Kjäldman and J. Syrjänen	
Thermal Modeling in Composite Transmission Laser Welding Process: Light Scattering and Absorption Phenomena Coupling	1560
A.C. Akue Asseko, B. Cosson, F. Schmidt, R. Gilblas, Y. Le Maoult and E. Lafranche	
Profile Strip Casting with Inline Hot Rolling: Numerical Simulations for the Process Chain Design	1568
M. Vidoni, A. Mendel and G. Hirt	
Experimental Study on the Identification of the Saturation of a Porous Media through Thermal Analysis	1576
M. Villière, S. Guérault, V. Sobotka, N. Boyard, J. Breard and D. Delaunay	
Thermomechanical Effects in PVTα Measurements	1584
M. Peron, V. Sobotka, N. Boyard and S. Le Corre	

Chapter 17: Semi-Solid Processes

Friction Stir Processing Multi-Run Modification of Cast Aluminum Alloy	1595
M.S. Wegłowski, M. Kopyściański and S. Dymek	
An Investigation of Phase Crystallinity in Laser Modified Yttria Stabilized Zirconia (YSZ) Thermal Barrier Coating	1601
M.S. Reza, S.N. Ajida and M.R. Mohd Toff	
Numerical Investigation of the Hot Isothermal Process and Force Size-Effect of a Clutch-Half Forming	1608
P.A. Petrov, M.A. Petrov, V. Voronkov and D. Grishin	
Numerical Investigation of the Plain-Strain Compression of a Spherical Shell	1617
M.A. Petrov and P.A. Petrov	
Numerical and Experimental Investigation of Deep Drawing of Sandwich Panels	1627
S.A. Tipalin, M.A. Petrov, B. Saprikov, N. Kosatchyov, N. Shpunction and P.A. Petrov	
Injection Tests and Effect on Microstructure and Properties of Aluminium 7075 Direct Thermal Method Feedstock Billets	1637
A.H. Ahmad, S. Naher and D. Brabazon	
Rheology of Blast Furnace Slags with Defined Concentrations of Titanium Oxides	1645
P. Migas and M. Korolczuk-Hejnak	

Chapter 18: Integrated Design, Modelling and Reliability Assessment in Forming (I-DMR)**Modelling of Thermoset Matrix Composite Curing Process**

P. Carbone, D. Aleksević, V. Ćirović and G.S. Palazzo

1667

Numerical Modeling of AA2024-T3 Friction Stir Welding Process for Residual Stress Evaluation, Including Softening Effects

M.R. Sonne, P. Carbone, G.S. Palazzo and J.H. Hattel

1675

Development of a Numerical Chain to Optimize Railway Axles with Respect to Fatigue Damage

S. Saad, V. Magnier, P. Dufrenoy, E. Charkaluk and F. Demilly

1683

Development of a Tool Design Method in Cross Wedge Rolling: Description and Applications

C. Gutierrez, P. Mangin, L. Langlois and R. Bigot

1694

Investigation of High-Strength Steel Component Subjected to Stretch-Bending: Effect of Forming History

Ø. Fyllingen, M. Langseth and O.S. Hopperstad

1702

Identification of Anisotropic Yield Criterion Parameters from a Single Biaxial Tensile Test

S.Y. Zhang, L. Leotoing, D. Guines and S. Thuillier

1710

Influence of Friction Stir Welding Effects on the Compressive Strength of Aluminium Alloy Thin-Walled Structures

R.M.F. Paulo, P. Carbone, R.A.F. Valente, F. Teixeira-Dias and G.S. Palazzo

1718

Optimal Sensor Locations for Polymer Injection Molding Process

D. Garcia, R. Le Goff, M. Gasse and A. Aussem

1724

An Optimized Loading Path for Material Parameters Identification in Elastoplasticity

E. Ferreira, J. Pinho-da-Cruz and A. Andrade-Campos

1734

Influence of a Tensile Pre-Strain on Bending of Aluminium Alloy

S. Thuillier

1742

Chapter 19: Computational Techniques and Multi-Scale Methods for Composites, Metallic Sheets and Coating Models**Testing and Modeling of Roll Levelling Process**

E. Silvestre, E. Sáenz de Argandoña, L. Galdos and J. Mendiguren

1753

The Effect of Product Size on the Pulling Force in Pultrusion

I. Baran, P. Carbone, J. Hattel, G.S. Palazzo and R. Akkerman

1763

Constitutive Modeling Based on Evolutionary Multi-Junctions of Dislocations

M.S. Pham, A.D. Rollett, A. Creuziger, M. Iadicola and T. Foecke

1771

Plastic Slip Patterns through Rate-Independent and Rate-Dependent Plasticity

G. Lancioni and T. Yalcinkaya

1777

Experimental Chemo-Mechanical Characterization and Multiscale Modeling of the Alloys Al1050, Al2024 and Al5754

R. Kebriaei, I.N. Vladimirov and S. Reese

1787

On the Use of Explicit and Implicit Exponential Map Algorithms of Finite Strain Combined Hardening Plasticity in the Simulation of Draw Bending

M.P. Pietryga, I.N. Vladimirov and S. Reese

1796

Numerical Investigation for Evaluation and Prevention of Casting Defects in TiAl Alloys

I. Peter, M. Rosso and I. Forno

1807
