

Table of Contents

Preface and Committee

Chapter 1: Advanced Composites, Special Materials and Technologies, Applied Materials

Effects of Anti-Clogging in Ultra-Soft Soils Using Different Composite Filter Material Y. Zhou, L.Y. Zhang and Z.H. Lu	3
Research on Heat Resisting Epoxy Resin System for Liquid Composite Molding Q.Q. Wu, J.Y. Xiao, J. Liu, S.L. Xing and J.S. Yang	8
The Crystal Structure and Ionic Conductivity of Layered Composite of SDC-YSZ-SDC F. Rahmawati, A. Syahroni and D.G. Syarif	15
Degradation Mechanism of Glass/Polyester Composite Exposure to Acidic and Alkaline Solutions at Room Temperature B. Nabila, H. Hassiba, A. Benyahia Ali and A. Sérier	20
Synthesis and Characterization of Aluminium 2219 Reinforced with Boron Carbide and Molybdenum Disulfide Metal Matrix Hybrid Composites G.S. Shiva Shankar and S. Basavarajappa	28
Analysis of Cooling Curves, Microstructure and Properties of Chill Cast Al-B₄C Composites K.V. Sreenivas Rao and S. Sanman	32
The Preparation of Fluorocarbon Thermal Insulation Coating with Different Fillers X.F. Ye, D.C. Chen, M.L. Chang, Q.H. Liang and Q.P. Lu	36
Thermogravimetric Analysis and Chemical Kinetic for Regeneration of Sodium Carbonate Solid Sorbent P. Chaiwang, B. Chalermsinsuwan and P. Piumsomboon	40
Hybrid Nanocomposite Material for EMI Shielding in Spacecrafts F. Tariq, M. Shifa, M. Tariq, S. Kazim Hasan and R.A. Baloch	46
Effects of Design Parameters for Clay Brick Kiln Using Computational Fluid Dynamics and Experimental Design W. Ratanathavorn, S. Charoenjai, S. Janbuala, B. Chalermsinsuwan and K. Poochinda	51
Influence of Graphene Nanoplatelet Filling in Thermoplastic Natural Rubber Antistatic Nanocomposite Using Combination of Solution and Melt Mixing Method T. Siriyyong, W. Keawwattana and J.K. Kim	57
Tribological Properties of MWCNTs Strengthened Aluminum Composite Fabricated by Induction Melting M. Mansoor and M. Shahid	62
Structural, Elastic and Optical Properties of Ag-Doped Rutile TiO₂ W. Mahmood	66
First Principles Calculations on Cu-Doped TiO₂ W. Mahmood	70
A Novel Preparation of Carbon Foams Derived from Albumen B.Y. Zhang, X. He, K.Y. Xu and T.L. Bu	75
Thermal Property Evaluation of Chilled Aluminum-Alumina MMC B.C. Suresh and S.B. Arun	79

Chapter 2: Solid State Materials, Alloys, Reinforced and Functional Materials

Development and Property Evaluation of Chilled MMC Prepared with LM25 as Matrix and SiO₂ (Glass) Particulates as Dispersoids R. Suresh	85
Experimental Studies on CNT Reinforced Aluminum Matrix Nanocomposites K.V. Sreenivas Rao and S. Sanman	89

Deformation Behavior of Cu-8wt%Ag Alloy during Equal Channel Angular Pressing	93
Y. Shen, C.T. Ren, G.Q. Zhang, M. Xie, M. Wen, Q.B. Cheng and W.M. Guan	
Vacuum Brazing Incoloy 800 Using the Copper Foil	99
C.Y. Wang and R.K. Shiu	
Effect of Grain Refinement on Shape Memory Properties of Cu-Al-Mn SMAs	104
U.S. Mallik and V. Sampath	
The Influences of Ru Seed Layer Microstructure on Structural Properties of CoCrPt-SiO₂ Perpendicular Media	
J.M. Zhang, Y. Sheng, C.J. Wang, Z.L. Tan, J. Bi, W.M. Guan and M. Wen	108
Oxygen Impurity in Germanium Single Crystals Determination by Infrared Spectrometry	
A.F. Shimanskii, O.I. Podkopaev and V.N. Baranov	115
Morphological Transformations of Top Electrodes on YMnO₃ Caused by Filamentary Resistive Switching in the Oxide Matrix	
A. Bogusz, D. Blaschke, D. Bürger, O.G. Schmidt and H. Schmidt	120
Phase Transitions and Elementary Processes in Shape Memory Alloys	
O. Adiguzel	124
Effects of Aluminum Addition on Microstructural Characteristics in Modified Coated Nickel-Based Superalloy, GTD-111, by Arc Melting	
P. Wangyao, A. Meechoorit, P. Pattaraumpornchai and S. Asavavisithchai	129
Preparation of LiMn₂O₄ Microstructure by Low Temperature Solid-State Reaction for Cathode Material	
D. Purwaningsih, R. Roto, Narsito and H. Sutrisno	134
Morphological and Dimensional Properties of Colloidal Silver Nanoparticles Prepared under Microwave Irradiation	
Harjono and Y. Yulizar	138
Electrochemical Oxidation of Dissolved Carbon Monoxide on Rotating Disk Electrodes and Micro-Electrodes	
A.S. Lin, J. Chen and T. Huang	144
Coal Fly Ash as a Dual Site Material for Cr(VI) Adsorption: Comparation between Single Site and Dual Site Isotherm Models	
W. Astuti, T. Sulistyaningsih and D.S. Fardhyanti	149
Characterizations of Indium-Doped Cu₂SnSe₃ Bulks Made by Reactive Sintering at 550 °C	
W. Wubet and D.H. Kuo	153
Die Soldering Phenomenon on the H13 Tool Steel with Shot Peening and Nitriding Surface Treatment	
M.A. Mochtar, D.M. Nurjaya and R. Aldila	157
Structural and Electrical Properties of Silver-Doped Zinc Oxide Nanorods Array	
S.F. Lee, L.Y. Lee and Y.P. Chang	164
Femtosecond Laser Pulses Operation in Crystal under High-Power Diode Pumping	
B.M.K. Prasad and A. Bawankar	169
Recovery of Magnesium Oxide from Kimberlite Tailing of Panna Diamond Mines	
K. Kumar and S.K. Sharma	173
Effect of Aging on Phase Transition Behavior of Ti₅₀Ni₁₅Pd₂₅Cu₁₀ High Temperature Shape Memory Alloys	
S.u. Rehman, M. Khan, L. Ali and S.I.H. Jaffery	177
Influence of Ingate Thickness and Pouring Temperature on Structure and Fluidity of Cast Hyper-Eutectic Al-18%Si Alloy	
M. Ramadan	181
Synthesis of Metal Doped BiFeO₃ Nanoparticles and their Dielectric and Magnetic Properties	
B. Ahmmad, M.A. Basith, K. Koike, S. Kubota and F. Hirose	187
A First Principle Study of the Massive TMR in Magnetic Tunnel Junction Using Fe₃Al Heusler Alloy Electrodes and MgO Barrier	
W. Rotjanapittayakul, T. Archer, S. Sanvito and W. Pijitrojana	192
Quaternary Ammonium Modified Silica for Gold(III) Sorption	
Ngatijo, Nuryono, Narsito and B. Rusdiarso	198
Recovery of Nanoparticles of Metal Values from Spent Metallized Graphite Brushes and Slip Rings	
M.A. Rabah	203

Influences of Temperature and Strain Rate on Microstructure of Manganese Aluminum Bronze Alloy	208
N. Wannaprawat, S. Suranuntchai, S. Thuanboon and V. Uthaisangsuk	
Effect of Thermomechanical Treatment (TMT) on Hardness, Impact Toughness of Different Grades of Low Alloy Steels	212
M.M. Tash, S.A. Alkahtani and K.A. Abuhasel	
Correlation between Alloying Elements and Aging Parameters and Hardness and Machinability of Aluminum-Silicon Alloys Using Minitab Software	217
M.M. Tash, K.A. Abuhasel and S.A. Alkahtani	
The Influence of Temperature on the Galvanic Corrosion in Multi-Material System in Seawater	225
C.L. Wang and J.H. Wu	
Surface Treatments of Titanium Alloy for Preparing Laminated Composite Material	229
S.V. Sibileva, A.L. Botanogov, N.V. Trofimov and L.V. Zaharova	
The Impact of Generalized Stacking Fault Energy on the Mechanical Properties of Shuffle Dislocation in Zigzag Single-Walled Carbon Nanotubes	233
H.L. Zhang and L.M. Tong	
The Influences of Annealing Temperatures on the Properties of HfO₂ Thin Film and the Fabrication of SiO₂/HfO₂ Distributed Bragg Reflector	238
W.C. Tzou, H. Kuan and K.Y. Chuang	

Chapter 3: Chemical and Biomaterials

The Multiband Fractal Antenna on Polymer Substrate Prepared by Using Inkjet Print Technology Based on Silver Nanoparticles	245
J. Matyas, R. Olejnik, K. Vlcek, P. Slobodian, P. Urbanek, P. Krcmar and L. Munster	
Exploration of Using Deep Eutectic Solvents to Separate Methyl Palmitate from Simulated Biodiesel Mixtures	249
B.K. Tang, Y.J. Lee and K.H. Row	
Extraction of Astaxnathin from <i>Portunus trituberculatus</i> Using Ionic Liquids as Additives of Extraction Solvents	252
Y.R. Lee, S.B. Woo and K.H. Row	
Novel β-Cyclodextrin Functional Monomers and its Application for Molecularly Imprinted Polymers	256
F. Feng, Z.M. Liu and Z.G. Xu	
Surfactivity of a Series of Nonionic Fluorocarbon Surfactant – Perfluorousnonenyl Polyethylene Glycol Ether	261
H.X. Shi, H.M. Zhou, H.M. Shen and H.K. Wu	
Synthesis of Magnesium Based Layered Hydroxide Salt and its Chemical Heat Storage Properties	268
S. Yamashita, Y. Sugie and H. Kita	
Environmentally Friendly Catalyst of Zirconium Pillared Saponite for Solvent Free Esterification of Menthol	272
I. Fatimah	
Development of the Synthesis of Chromium and Molybdenum – Amino Acid Complexes: A Green Chemistry Approach	276
K.S. Budiasih, C. Anwar, S.J. Santosa and H. Ismail	
Model of <i>Phanerochaete chrysosporium</i> Growth and Multisubstrate Degradation on the Biological Pretreatment of Water Hyacinth	280
E. Sari, S. Syamsiah, H. Sulistyo and M. Hidayat	
Sonochemical Co-Precipitation Synthesis of Gallic Acid-Modified Magnetite	286
M. Rahmayanti, S.J. Santosa and Sutarno	
Adsorption of Remazol Brilliant Blue R (RBBR) by C-4-Ethoxy-3-Methoxyphenylcalix[4]Resorcinarene Triphenylphosphonium Chloride	290
R. Wulandari, Jumina and D. Siswanta	
Kinetics of Enzymatic Hydrolysis of Cellulose Using <i>Aspergillus niger</i>	294
A. Mulyaningtyas, R. Ningsih, S. Syamsiah, Sarto and W.B. Sediawan	
Photocatalytic Degradation of Methylene Blue Using Visible Light Active N-Doped ZnO	299
H. Sudrajat and S. Babel	

Experimental Investigation of Mueller Matrix of a Bidispersed Foam Using Polarised Light Scattering	303
S.Y. Qian and J.J.J. Chen	
Enhanced the Negative Charges of <i>Antheraea pernyi</i> Silk Fibroin by Methylglyoxal Modification	307
J. Li, C. Zhang, Y. Zhang, Y.N. Yu, J.W. Luo and M.Z. Li	
Graphene Based Polymer Strain Sensors for Non-Destructive Testing	314
A. Deepak, N. Srinivasan, V. Karthik, S. Ramya, V. Ganesan and P. Shankar	
Steam Reforming of Glycerol for Hydrogen Production over Ni Catalysts Supported by CeO₂-Al₂O₃ Xerogel	318
K. Kamonsuangkasem, S. Therdthianwong and A. Therdthianwong	
Preparation, Surface Activity and Application of Fluoro-Spreading Agent	322
H.X. Shi, Y.T. Fu, H.M. Shen and H.K. Wu	
Saccharose as a New Space Holder Material for Porous Titanium Implant Formation	330
G. Adamek, J.K. Koper and J. Jakubowicz	
Preparation of Magnetite-Mg/Al Hydrotalcite through Hydrothermal Process and Subsequent Calcination	336
T. Sulistyaningsih, S.J. Santosa, D. Siswanta and B. Rusdiarso	
The Effect of Thermal Cycling on the Agglomeration of Fuel Cell Electrocatalysts	340
N. Wongyao, A. Therdthianwong and S. Therdthianwong	
Characterization of Thermal Conductivity and Viscosity of Nanofluids with Aqueous Base Fluids	344
K.S. Nah and Y.M. Hung	
Potentiodynamic Polarization Studies of Glycerin in Platinum Electrodes	348
J.C. Beltrán-Prieto, R. Slavík and K. Kolomazník	

Chapter 4: Earth, Building and Construction Materials

Mechanical Behavior of Multi-Pylon Steel Cable-Stayed Bridge	355
M.G. Zeng, C.Y. Dai and Q.T. Su	
Artificial Weathering Analysis and Mechanical Behavior of Geotextiles Used for Coast Erosion Control and Beach Restoration	361
R. Ríos-Soberanis, R. Rodriguez-Laviada and E. Perez-Pacheco	
Parametrical Investigations on Concrete-Jacketed RC Columns with Pre- and Post-Corrosion Damage	368
S.S. Wang	
Performance Analysis of Fine Mineral Fillers in Gypsum Plasters	373
A. Pustovgar, I. Ivanova, S. Nefedov, A. Adamtsevich and S. Pashkevich	
Sound Absorption Analysis of Micro Perforated Panel with Ladder Change Type Cross Section	379
Z.H. Ma, X.H. Li, X.L. Gai, J.J. Zhao and B. Zhang	
Design Proposal for Concrete Cover Separation in Beams Strengthened by Externally Bonded Tension Reinforcement	385
S.S. Wang	

Chapter 5: Materials Processing Engineering, Surface and Coating

Surface Roughness Optimization in Turning Operation Using Hybrid Algorithm of Artificial Bee Colony with RSM	393
M. Ahsan Habib, M.A.U. Patwari, K.A. Khan and A.N.M. Amanullah Tomal	
Effect of Cutting Parameters on Tool Life: Case Study Twist Drill	397
H. Vaghefpour, A. Dahar and K. Zabeh	
Identification of Friction Characteristics and Flow Stress of 0.45% Carbon Steel during Cutting Process	402
N. Wahab and H. Sasahara	
Development of Vacuum Levitation Melting Technology in China	406
B. Li, S. Zhang, J.P. Xu and W. Zhang	

Thermal Stress Cleaving of Si-Wafer: Investigation of Fracture Initiation during Laser Beam Irradiation	412
A.M. Saman, T. Furumoto, A. Hosokawa and T. Ueda	
Effect of Heat Treatment on the Microstructure of Plasma Spray SUS316L Stainless Steel Coating	419
J. Wang, N. Shinozaki, Z.S. Zeng and N. Sakoda	
Effect of Na₂SO₄-V₂O₅ Mixture on Y₂O₃ Stabilized ZrO₂ Thermal Barrier Coatings Exposed at High Temperature	423
I.N. Qureshi, M. Shahid and A.N. Khan	

Chapter 6: Modelling Analysis and Simulation for Materials

Numerical Simulation of Solidification Processes of Copper Alloys by Vacuum Continuous Casting	431
C.H. Chiang and C.T. Cheng	
Dissimilar Welding Simulation of 316L and Low Alloy Steel Using the SYSWELD Simulation	438
Y.C. Liu, T.C. Cheng, C. Yu and R.K. Shiue	
Constitutive Modeling of Flow Stress of MAB Alloy	442
A. Aungsusiripong, S. Suranuntchai and V. Uthaisangsuk	
The Simulation of Laser Cleaning of Magnetic Head with Different Temporal Pulses	446
N. Rungcharoen, M. Wannapapra and W. Pijitrojana	
Effect of Thick Wall on Transport Profile inside Pipeline Using Computational Fluid Dynamics Simulation	453
W. Rukthong, W. Weerapakkaro, U. Wongsiriwan, P. Piumsomboon and B. Chalermsinsuwan	
Deflection Simulation of Ionic Polymer Metal Composites (IPMC) Actuators for Bionic Knee Joints	459
M. Farid, Z. Gang, T.L. Khuong, N.U. Rehman and S. Adnan	
Mathematical Modeling of the Drying Process of Chrome Shavings	463
J.C. Beltrán-Prieto, N.H.B.S. Long and K. Kolomazník	
Suppression of Thermocapillary Effect in Evaporating Thin Film of Micro Heat Pipes	467
E. Lim and Y.M. Hung	
Mathematical Formulation of the Global Coefficients of Transmission and Reflection of Ultrasonic Waves in Bi-Phase Porous Medium	471
G. Freiha, H. Othman and M. Owayjan
