

# Table of Contents

## Preface

<b>Natural Materials for Thermal Insulation and Passive Cooling Application</b> A.L. Pisello and F. Rosso	1
<b>Potential of Cork Cement Composite as a Thermal Insulation Material</b> S.R. Karade	17
<b>Experimental Investigation on Lightweight and Lime Stabilized Earth Composites</b> S. Liuzzi and P. Stefanizzi	31
<b>Innovative Sustainable Materials – Structural Stability Check of Various Waste Mix Concrete Material</b> A.R. Gupta and S.K. Deshmukh	47
<b>Current State of Modern Rammed Construction: A Case Study of First Peoples House after Seven Years Exposure</b> A. Kailey and G. Rishi	63
<b>Material Characteristics and Building Physics for Energy Efficiency</b> M.A. Kamal	77
<b>Construction Materials and Green Building Certification</b> E. Giama and A.M. Papadopoulos	89
<b>Flexural Behavior of Ferrocement Plates Incorporating Steel and PET Fibers</b> C. Marthong and D.K. Sarma	97
<b>Building Operational Energy Optimization Technique Waste Filled Cavity Wall</b> A.R. Gupta and S.K. Deshmukh	107
<b>The Impact of Changing Trends in Material Selection on Embodied Energy of Buildings in the Context of Kerala, India</b> K.S. Rakesh and T.K. Jayasree	123
<b>Self-Compacting Concrete Formulation by Measuring Excess Paste Volume</b> A. Mebrouki, N.E. Bouhamou and F. Mostefa	133
