

# Table of Contents

<b>Committees</b>	iv
<b>Preface</b>	v
<b>Progresses on the Fatigue Reliability Research of China Railway Vehicles in Recent Decade</b> Z.Y. Shen, Y.X. Zhao, B. Yang and W.H. Zhang	1
<b>Learning from History: The Reliability of Experts and Expert Systems</b> M.N. James	15
<b>Some Fundamental Aspects of Redesign and Remanufacture of High Temperature Components</b> S.T. Tu	25
<b>Effect of Non-Metallic Inclusion Size and Residual Stresses on Gigacycle Fatigue Properties in High Strength Steel</b> K. Shiozawa and L. Lu	33
<b>The Analysis on the Low Cycle Fatigue Behavior of a Directionally Solidified Superalloy with Recrystallized Surface Layers</b> H.J. Shi, X.F. Ma, D.W. Jia, H.F. Zhang and L.S. Niu	43
<b>A Statistically Load-Weighted Probabilistic Fatigue Life Model</b> L.Y. Xie and W.Q. Lin	51
<b>Determination of the Probabilistic Fatigue S-N Curves Including Super-Long Life Regime for a Railway Axle Steel</b> Y.X. Zhao, B. Yang and M.F. Feng	57
<b>Measurement on Scale-Induced Fatigue Behaviour for Railway Axle</b> Y.X. Zhao, B. Yang and M.F. Feng	65
<b>Thermal Stability of CoTi-Substituted Manganese-Zinc Ferrites</b> H.N. Ji, Z.W. Lan, Z. Yu, L.Z. Li, Z.Y. Xu and S.J. Wu	71
<b>Damage Constitutive Model and Failure Mechanism of Lead-Free Solder in CBGA Package</b> W.N. Hao, G.Z. Chai and J. Zhou	77
<b>On Deformation of the Injection Mold Core</b> J.J. Jia, Z.H. Ge and Y. Li	85
<b>Damaged Structural Vibration Analysis Using the Hamiltonian Matrix Perturbation Theory</b> L. Liu and F.Z. Xuan	91
<b>Study on Temperature-Dependent Tensile Strength of Short-Fiber-Reinforced Elastomer Matrix Composites</b> D.S. Zhu, B.Q. Gu and Y. Chen	97
<b>Reliability Analysis of Corrosion Fatigue Crack Growth for 2024-T3 Aluminum Alloy</b> S. Ge, Z. Li, J.G. Zhang, Y.C. Xiao, G.Q. Liu and B.S. Bao	105
<b>Modeling of Fatigue Crack Growth Based on Two Cyclic Plasticity Models</b> W.F. Tu, X.G. Wang and Z.L. Gao	111
<b>Fatigue Fracture Behavior of Bearing Steel GCr15 in Very High Cycle Regime</b> J.W. Zhang, K. Shiozawa, L.T. Lu, W. Li and W.H. Zhang	119
<b>Dynamic Characteristics of the Coupled System of the High Pressure Rotor and the Radial Driveshaft of a Turbofan Engine</b> Y.S. Fan, S.M. Wang and Z. Yang	127
<b>Application of Lubrication Theory to Near-Dry Green Grinding – Feasibility Analysis</b> C.H. Li, Y.L. Hou, S.C. Xiu and G.Q. Cai	135
<b>Reduction of Friction and Calibration Pressure by Section Preform during Hydroforming of Tubular Automotive Structural Components</b> C. Han, S.J. Yuan and L.N. Sun	143
<b>Study on the Mechanical Fatigue Life Estimated of Pistons</b> Y.X. Wang, H.Y. Shi and Y.Q. Liu	151
<b>Dynamic Response Analysis for Structures with Interval Parameters Based on Affine Arithmetic</b> Z.Q. Zhu and J.J. Chen	157

<b>Investigation into Leakage Behavior of Bolted Flanged Connection with Octagonal Gasket</b> H.Q. Zhou and B.Q. Gu	165
<b>Research on System of Quality Assessing and Defects' Information Managing of Strip Steel Surface</b> X.J. Zhao and S.Y. Luo	173
<b>Modulus Prediction for 2D PWF Composites</b> X. Cheng and J.J. Xiong	181
<b>Journal Bearing Wear Monitoring via On-Line Visual Ferrography</b> T.H. Wu, J.H. Mao, G.N. Dong, H. Xu and Y.B. Xie	189
<b>Finite Element Analysis on Fatigue Stress History of a Railway Bogie Bolster</b> J.C. Peng, Y.X. Zhao, L.Y. Yu and A.G. Yang	195
<b>Coding and Decoding of Topological Entities in Constraint-Based Variational Design</b> T. Wu, Y.S. Xi, Z. Li and Y.L. Wan	201
<b>A Framework to Integration Development Process</b> J. Mi	209
<b>Process Planning Dynamic Model Based on HOOPN for Top-Down Collaborative Assembly Design</b> Y.D. Yang, Z.H. Li and S.T. Zhang	215
<b>A Novel Methodology to Manage Uncertainty for Multidisciplinary Design and Optimization in Conceptual Design</b> X.Y. Shao, X.Z. Chu, L. Gao and H.B. Qiu	225
<b>Radial Clearance is Key Factor Affecting Roller Bearing Life Prediction in Tri-Cone Bit</b> C.G. Bu	233
<b>An Aircraft Tooling Cooperative Design Model Based on Neuron-Endocrine-Immunity Working Principle</b> Y.G. Li, Z.Y. Pan, R.J. Yan and J.B. Jian	239
<b>Research on Workflow Modeling Methods for Collaborative Product Development</b> H.B. Qiu, Y. Wang, P. Jiang and L. Gao	247
<b>Research on Tolerance Analysis System Based on 3D Collaborative Design Platform</b> X.Y. Shao, K. Lin, L. Gao and H.B. Qiu	253
<b>The Parameter Selection System of Vehicle Overall Design Based on Cooperation and Specialty</b> L. Zhang, X.Y. Shao, L. Gao and W. Tao	261
<b>Integrated Fuzzy Analysis and Group Decision Making Method for Collaborative Product Development</b> H.B. Qiu, C.Y. Zhang, P. Jiang and X.Y. Shao	267
<b>Dynamic Reliability Sensitivity Analysis of Torsion Bar</b> X.G. Wang, Y.M. Zhang, Y.F. Yan and B.Y. Wang	275
<b>All Set Theory in the Fuzzy-Random Heat Conduction Structure</b> C.H. Liu and F.Z. Xuan	283
<b>Research on the Rollover Safety of Fuel Cell Bus</b> Y.K. Gao and F. Sun	289
<b>Destroy Probability of Ship Defensive Structure Subjected to Underwater Contact Explosions</b> J. Zhang, X.H. Shi, D.H. Xu and S. Wang	297
<b>Robustness Analysis of Responses of Structures with Uncertain Parameters</b> Y.D. Chen and S.H. Chen	303
<b>Test Method of the <math>\epsilon_{rms}</math>-N Curves of Laminated Composite Beams</b> C. Shao, S. Ge, H. Tao and C. Bathias	311
<b>Research on Simulation of Fatigue Reliability Based on Rainflow Counting Range</b> G.W. Yang and S.N. Xiao	317
<b>The Influence of HAZ on Fatigue Life of 16Mn Steel</b> G. Chen, X.M. Luo, X. Chen and W.H. Zhang	323
<b>Integrity Stable Reliability Analysis of Stochastic Structure System under Multiple Stochastic Loads</b> W.G. An, G.P. Tian, L. Zhou and L. Wang	329
<b>Reliability Analysis for Rubbing in Cracked Rotor System</b> C.Q. Su and Y.M. Zhang	337

<b>ExProMod, a Product Development Support Tool</b> L. Ding, J. Matthews, C. McMahon and G. Mullineux	345
<b>Rapid Prototyping of Constraint-Based Production Flows in Outsourcing</b> S. Saniuk and A. Saniuk	355
<b>Manufacture of Fine <math>AL_2O_3</math> Granules as Catalyst Carrier by an Extrusion/Spheronization Method</b> R.S. Zhang, J.Z. Pan and L.W. Wang	361
<b>Determination of the Maintenance Tasks for Aircraft Structural Significant Items Based on CBR Method</b> D.Y. Geng	367
<b>Research on PLM System Interoperability with a Feature-Object-Based Approach</b> Y.S. Ma	373
<b>Methodology to Support a Collaborative DFX Process with Integration of PDM and Expert System Tools</b> E.D. Ramón-Raygoza, D.A. Guerra-Zubiaga and M. Tomovic	381
<b>A New Up-and-Down Estimate Method for Sensitivity Test</b> W. Huang, S. Zhang, G.H. Liu and Z.S. Lu	389
<b>Study and Application of Driving Cycle for City Bus</b> H.T. Sun, X.G. Song and T.L. Wang	395
<b>Optimization Analysis for Fuel Cell Bus Body Structure in Multi-Load Cases</b> Y.K. Gao and P. Liu	401
<b>Valve Parameters Design and Performance Test of Hydro-Pneumatic Spring with Trapezium Throttle Slice</b> C.C. Zhou and W. Xu	409
<b>Power Train-Vehicle Modeling to Simulate Shifting Transients of Off-Highway Vehicles</b> L.C. Mou and G.F. Yin	415
<b>Integration of Axiomatic Design and Design Structure Matrix for Product Design</b> D.B. Tang, G.J. Zhang and S. Dai	421
<b>Functional Evolution Process Modeling and Management for Conceptual Product Design</b> D.B. Tang, M.J. Xu and M. Wan	429
<b>Development of Assistive Medical Device Based on Reverse Engineering and Biomechanics</b> G.Q. Shang, C.H. Sun and X.F. Chen	437
<b>Design of Personal Positioning for Coal Mine Based on Mesh</b> W.H. Gao, J. Ma and L. Kang	443
<b>Product Design of a Precision Recycle-Process Tool for Displays' Color Filters of TFT-LCDs</b> P.S. Pa	449
<b>Rolling-Leveling Assistance in Ultrasonic Electrochemical Finishing of External Cylindrical Surface</b> P.S. Pa	455
<b>Robust Optimization Design of Compensative Pulley Block of Luffing Mechanism Using the Compromise Decision Support Problem</b> X.F. Cheng	463
<b>A Port-Based Approach to Configuration Design of Mechanical Products</b> D.X. Cao, X.J. Zhang, Q.L. Jia and L.X. Nan	471
<b>Theoretical Research on Inheriting Degree in Appearance Design of Brand Products</b> Z. Gao, X.M. Ji and C.Q. Zhang	479
<b>Jig Grinding, an Effective Method in Ball Lock Punches Production</b> R.A. Mahdavinjad	489
<b>Function-Oriented Designing and Generating Technology for the Point-Contact Tooth Surfaces of Spiral Bevel and Hypoid Gears</b> X.C. Wu, C. Li, R.P. Zhang and H.B. Zhang	495
<b>Study of Electro-Hydraulic Converter with Strong Restoring-Motion</b> X.Y. Zhang, C.L. Dang, L. Chai and C.P. Jiang	503
<b>Numerical Simulation of Fuel Processor for Fuel Cell Vehicles</b> C. Li, X.C. Wu and L. Jiang	509
<b>Reliability Analysis of Uncertain Nonlinear System Subject to Correlated Failure</b> X.F. Zhang, Y.M. Zhang and X.Z. Huang	515

<b>Fatigue Life Prediction of a Railway Bogie Frame</b> R. Deng, W.M. Zhai and S.N. Xiao	523
<b>Experimental Investigation and Elastic-Plastic Analysis on Connection Strength of Zirconium Tube-Tubesheet Joints</b> B. Yuan, Y.Z. Wang, X. Ma, Y.Y. Zheng and S.T. Tu	529
<b>The Quantitative Assessment of Domino Effects Based on Stochastic Petri Nets</b> S.Y. Bao, J.X. Zhu, L.J. Wang, N. Jiang and Z.L. Gao	537
<b>Fuzzy Reliability-Based Optimal Design for the Primary Cylinder of Giant Hydraulic Forging Press</b> Y.J. Deng and Z.W. Liu	545
<b>Chi-Square Optimization Parameter Estimation for Incomplete Data Distribution</b> H. Mao and Q. Li	553
<b>Probabilistic Cyclic Stress-Strain Relations of a Cast Steel for Railway Bogie Frame</b> B. Yang, Y.X. Zhao, J.C. Peng, L.Y. Yu and W.D. Shao	557
<b>Hardware Design of Diesel Generator Sets Digital Control System Based on DSP</b> C.L. Dang, L. Chai and X.Y. Zhang	563
<b>Reliability Analysis of Damaged Piezoelectric Structure</b> D. Zhang, W.G. An and X.S. Lu	569
<b>Reliability Assessment Methods of Complicated Mechanical Product Based on Statistical Learning Theory</b> X.Y. Shao, J. Wu, Y.Q. Lv and C. Deng	575
<b>A New Approach for Multi-Criteria ABC Analysis</b> R. Jiang and X.N. Yuan	581
<b>Research on Multi-Attribute Decision Making Using Grey Relation Analysis, Information Axiom and Fuzzy Preferences</b> X.F. Cheng	587
<b>Research on DSM for Simulation of Concurrent Product Development Process</b> X.M. Qian and D.B. Tang	595
<b>Research on Product Model Based on Object-Oriented Method</b> X.M. Qian and D.B. Tang	601
<b>Identification of the Optimal Design and its Production Process for One-of-a-Kind Production</b> G. Hong, P. Dean, W. Yang, Y.L. Tu and D. Xue	607
<b>The User Research in New Product Development</b> Z.H. Huang and W. Su	619
<b>A Primary Research and Exploration on Choosing Green Material in Product Design</b> L.J. Li, Z.H. Huang and Q.L. Xiong	627
<b>Optimization of Groove-Hole Distribution with Equidistant and Unequal Diameter on Air-Cushion Belt Conveyor</b> J.F. Li and S.L. Zhang	635
<b>Green Pump Development Based on the Analysis of Unsteady Flow</b> C.L. Shao, B.Q. Gu and Y. Chen	643
<b>Development of a New Kind of Sealing Composite Material Reinforced with Carbon and Glass Hybrid Fibers</b> Y. Chen and B.Q. Gu	651
<b>Modelling to Reduce the Configuration Phase Time of Machine Design</b> J. Matthews, L. Ding, B. Singh, G. Mullineux and T. Medland	659
<b>Integrated Modeling Towards Collaborative Product Development</b> D.X. Cao, Y.H. Han, J. Yang, G. Yang and C.X. Cui	669
<b>Development of a New Flux for Aluminium Gas Welding</b> J.I. Achebo and A.O.A. Ibhadode	677
<b>Structure Design and FE Analysis of a Newly Basketball Wheelchair</b> L. Lei, T.M. Guan and L.J. Shan	685
<b>Research on Fuzzy Information Modeling Process of Quality Function Deployment</b> Z.H. Ren, X.P. Li, J.S. Dai and B.C. Wen	691
<b>Harmonious Design Method for Product Development</b> X.P. Li, Z.H. Ren, W. Sun, C.F. Li and B.C. Wen	697

<b>Classification Syllogism in the Farm Vehicle Design Based on the Kansei Engineering</b> Z. Li, Y. Jin and J. Hou	703
<b>Analysis of Nonlinear Characteristics of Double-Crank Ring-Plate-Typed Pin-Cycloid Gear Planetary Drive</b> L.J. Shan, W.D. He and T.M. Guan	711
<b>A Service-Oriented Collaborative Design Platform for Concurrent Engineering</b> W.S. Xu, J.Z. Cha and M. Sobolewski	717
<b>Reliability-Based Optimization Robust Design of Electronic System</b> T.X. Zhang	725
<b>Hybrid Fatigue Analysis Method for Railway Carbody Structure</b> B.R. Miao, W.H. Zhang, S.N. Xiao, D.C. Jin and Y.X. Zhao	733
<b>Fatigue Scatter Factor of Whole Life and Reliability of Aircraft Structure Service Life</b> C.L. Yan and K.G. Liu	739
<b>Theory of Active Reliability-Based Design for Predetermined Life of Structures</b> C.L. Yan and K.G. Liu	745
<b>Probabilistic Critical Fatigue Safety State of the RD2 Type Axle of China Railway Freight Car</b> Y.X. Zhao, B. Yang, M.F. Feng, Y. Li, M.J. Liu and G.X. Song	751
<b>Probabilistic Critical Safety Wheel Wear Sizes of Chinese Railway Freight Cars</b> Y.X. Zhao, B. Yang, M.F. Feng, Y. Li, M.J. Liu and G.X. Song	759
<b>Damage Analysis of Glass-to-Metal Diffusion Welded Joints</b> X.H. Shen and X. Ling	765
<b>Reliability Design Method for Interference Joint in Mechanical Engineering</b> S.C. Xiu, Q. Feng and S.Q. Gao	773
<b>Failure Analysis of a Die for Cold Precision Forging of Bevel Gears</b> J.S. Jin, J.C. Xia, X.Y. Wang and H. Liu	779
<b>A Study on Optimal Inspection Strategies of Reliability Systems with Parallel-Chain Precedence Constraints under Failure States</b> Z.W. Bao, H.Y. Li and L.R. Cui	787
<b>Product Reliability Assessment Method Combining Degradation Data and Lifetime Data</b> B.H. Peng, J.L. Zhou and J. Feng	795
<b>Study on Service Life of Last Stage Blade with Damped Structure in Large Power Steam Turbine</b> D. Zhang and Y.H. Xie	803
<b>Online Forecast of Fatigue Life in Welded Grider of Bridge Crane</b> C.H. Liu, X.T. Liu, H. Huang and L.H. Zhao	809
<b>A Method for the Calculation of the Mean Time To Failure (MTTF) of Repairable System</b> J.X. Zhu, L.J. Wang, S.Y. Bao, W.P. Wang and Z.L. Gao	813
<b>Analysis and Study of Ergonomics on Virtual Maintenance of Civil Airplane Based on DELMIA</b> W. Wang, Y.C. Sun and F.F. Kong	821
<b>Fatigue Failures of the 353130B Type Roller Bearings on China Railway Freight Cars</b> L. Chen	829
<b>Delivery Quality Product in Value Chain: A Case Study to Rebuild Broken Quality System in Piecewise Organization</b> T.P. Tsai, J.F. Yu, J. Stracener and F.C. Wang	835
<b>Study on Reliability of Chaotic System of Nonlinear Grid Coupling Based on Adaptive Control</b> Y.F. Yin, S.L. Wang and G. Hang	845
<b>Damage Equivalent Method of Fatigue Reliability Analysis of Load-Sharing Parallel System</b> G.B. Hao and L.Y. Xie	853
<b>Composite GM (1, 1) Model for Treating Data of Constant Stress Amplitude Accelerated Life Tests</b> Y. Qian, Y.H. Zhou and J.C. Pei	859
<b>Reliability Analysis of Condition Monitoring Systems under Fuzzy Environment</b> P.X. Yi, S.Y. Liu, Y.M. Hu and W. Liu	863

<b>A Reliability-Based Approach to Assess Fatigue Behaviour Based on Small Incomplete Data Sets</b>	
C.Y. Luo, J.J. Xiong and R.A. Shenoi	871
<b>A Method of Fuzzy Probability under Small Sample</b>	
H. An, W.G. An, Y.L. Zhao and Z.J. Song	879
<b>Reliability-Based Sensitivity Design of Mechanical Components with Arbitrary Distribution Parameters</b>	
Z. Yang, Y.M. Zhang and L.S. Zhu	885
<b>The Reliability Virtual Experiment Based on Deep Groove Ball Bearing</b>	
C. Li and Z.L. Sun	893
<b>Disk Brake Element Chatter Analysis and Strength Evaluation for Railway Vehicle System</b>	
H. Gao and H.Y. Dai	901
<b>Failure Mechanism of Electromigration in Solder Joint</b>	
Y.D. Lu, X.Q. He, Y.F. En and X. Wang	905
<b>Influence of Partial Slip Conditions on Rolling Contact Fatigue of 1070 Steel</b>	
L.J. Lu, X.G. Wang, L.J. Zhuang, Z.L. Gao and Y.Y. Jiang	911
<b>Two Models for Predicting Fatigue Crack Growth</b>	
B.X. Qiu, Z.L. Gao, L.J. Lu, X.G. Wang and Y.Y. Jiang	917
<b>Management System on Fatigue Reliability Database of Chinese Engineering Materials</b>	
J.H. He, Y.X. Zhao and B. Yang	925
<b>Finite Element Analysis on the Fatigue Stresses of a Railway Vehicle Roller Bearing</b>	
F. Lin and Y.X. Zhao	935
