

Table of Contents

Preface

Chapter 1: Properties Analysis and Processing Technologies of Structural Metals

Misorientation Angle Study on Cleavage Fracture Propagation Surfaces of a Grade a Ship Steel, through Charpy and Four-Point Double-Notch Bend Tests R. Cuamatzi-Meléndez, M. Salazar-Martínez and F. Juarez-López	3
Numerical Study of Drilling Parameters with Al 356 Alloy Using Bacterial Foraging Optimization P. Pitchipoo, M. Athi, M. Annamalai, J. Kadarkarai and R. Sivaprakasam	23
Investigation of Hydrogen Embrittlement Effect on Microstructure Mechanical Properties and Fracture of Low-Carbon Steels M.E. Mamassi, D. Ioannidou, S. Deligiannis and P. Tsakiridis	35
Effect of Artificial Aging in the Microstructure and Corrosion Performance of Superduplex UNS S32750 Stainless Steel A.P. Dall'Oglio, W. Haupt, K. Riffel and R. Gonçalves e Silva	49
Fatigue Behavior of Medium Entropy Alloys AlCrFe₂Ni₂ and AlCrFe₂Ni₂Mo_{0.1} - A Comparison with Super Duplex Steel 1.4517 S. Hemes, S. Gein, N. Navaeilavasani and U. Hecht	61

Chapter 2: Materials and Technologies of Environmental Engineering

Silica Xerogel Modified with Cetyltrimethylammonium Bromide as an Effective Adsorbent for Methyl Orange Dye G.V. Buzato, P.H.P. Olívio and A.L. Souza	85
Study on the Optimization and Experimental of Fly Ash and Sludge in Ecological Slope Protection Substrate H.T. Wang, Y. Zhang, L.L. Liu, Y. Xin and K. Ren	97

Chapter 3: Polymer Materials Treatment and Chemical Production

Study of the Methanol Conversion into Dimethyl Ether Obtained in the Process of Biomimetic Methane Monooxidation by Hydrogen Peroxide G. Nahmatova, L. Gasanova and T. Nagiev	119
Experimental Study of the Possibility of Butt Friction Stir Welding on Polyethylene Pipes D. Bouha, L. Gaidi, A. Kaou, B. Moulai Ali, E.B. Ould Chikh, H.M. Meddah and A.K. Bouha	129

Chapter 4: Computational Approaches in Materials Research

A Quantum Chemical Study on the Bonding Mechanism, Electronic Structure, and Optical Properties of Cellulose and Polyaniline Nanohybrid A.A.Z. Munio, A.A.G. Pido, R.V.B. Janayon and L.C.C. Ambolode II	143
Exploring the Electronic Topology and Binding Mechanism of Acetic Acid Adsorption on Nitrogen and Boron Co-Doped (5, 5) SWCNT A.A.G. Pido, N.A. Rangaig, A.A.Z. Munio, M.A. Gabule, R.V.B. Janayon, A.L. Liwagon, M.D. Janayon, J.C. Canata and C.P. Dulpina	155
Calculation of Gibbs Free Energy of Iron Based Alloys Using Miedema's Model and Comparison with Experiment A.K. Kadhim	165
