

# Table of Contents

## Preface

## Chapter 1: Composite Materials and Structures

### Mechanical Properties and Hydrophilicity of High-Density Polyethylene/Attapulgit Composites

Z.L. Ma, J.C. Chen, C.H. Tsou, Y.M. Wang, X.Y. Tian and C. Gao 3

### The Mechanical and Thermal Properties of MWCNT/ZnO/Polyethylene Composites

X. Li, L. Yuan, Y.J. Zhang, Y.L. Yao, C.H. Tsou and Y.L. Sun 9

### Cellulose Nanofibers/Polycarbonate Nanocomposite

Y.F. Shih, Z.Z. Lai, W.L. Tsai, J.Y. Xu and N.Y. Wu 15

### Synthesizing Aluminum Matrix Composites by Combining a Powder Metallurgical Technique and an *In Situ* Method

R. Apakashev, M. Khazin and S. Krasikov 20

### Failure Analysis of Multi-Layered Thick-Walled Composite Pipes Subjected to Torsion Loading

T.Y. Wang, M. Menshykova, O. Menshykov and I. Guz 25

### Dynamic Behavior Analysis of the Sandwich Beam Structure with Magnetorheological Honeycomb Core under Different Magnetic Intensities: A Numerical Approach

U. Sharif, B.B. Sun, P. Zhao, D.S. Ibrahim, O.O. Adewale and A. Zafar 31

## Chapter 2: Materials Processing and Manufacturing

### Micro Electrical Discharge Machining Thermal Effect on Micro-Cracks Generation on Silicon Material

X.Z. Song 41

### Influence of Dressing Parameters on Roundness Tolerance in Cylindrical External Grinding SKD11 Tool Steel

T.T. Nguyen, X.T. Hoang, K.K. Bui, N.H.T. Tran, N.A. Tuan and V.N. Pi 50

### Study on the Influence of Amplitude on Ultrasonic Assisted Grinding of Hard and Brittle Materials

X.Z. Li, B. Dai, J.K. Xu, L. Tong, M.X. Wang and S. Wang 57

### Experimental Research on Surface Roughness of Ultrasonic Assisted Grinding on 7075 Aluminum Alloy

S. Wang, L. Tong, G.J. Chen, M.X. Wang, B. Dai and J.K. Xu 62

### Fatigue Property of Welded T-Shaped Joints Using the Structural Stress Method

H.B. Yang, P. Wang and H.L. Qian 68

### Study the Surface and Chip Formation of Wood Materials by Milling Method

N.H. Loc and T.Q. Hung 74

## Chapter 3: Functional Materials and Structural Metals

### Synthesis of Samarium Cobalt Oxide Nanosheets and Nanoflowers on Nickel Foam via Electrochemical Route

L.P.M. Buizon and M.C. Marquez 85

### Characterization and Hydrogen Storage Capacity Analysis of Dip Coated Lithium Aluminium Hydride Thin Films

C. Choawarot, V. Siritwongrungron, J. Hongrapipat, S.S. Pang and M. Messner 90

### The Study of Chitosan Solution Coating on Water Barrier Property of Seedling Paper Bag Made from Water Hyacinth

N. Khamsao, K. Waengwan, S. Konchai, P. Patthong, B. Phadungchob, S. Kruawan, N. Khiewbanyang and T. Wutisart 97

|                                                                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>New Formulation of TiO<sub>2</sub>- ZnO Slurry for Facial Foundation Sunscreen Cream Application</b><br>N. Pijarn, W. Jankasemsook, S. Suwantha and J. Intaraprasert | 103 |
| <b>Factors Influencing Dephosphorization of Low Carbon Steel in Converter</b><br>Z. Liu, S.S. Cheng and L. Wang                                                         | 111 |
| <b>A Review of Corrosion Resistance Alloy Weld Overlay Cladding Material for Geothermal Applications</b><br>R.G. Tayactac and E.B.O. Ang                                | 120 |
| <b>Cytotoxicity of Ti/SS316/Mg Particles on Human Osteoblasts</b><br>N. Wang, S.T. Dheen, J.Y.H. Fuh and A.S. Kumar                                                     | 128 |
| <b>Stimulated Axion-Like Bipolariton Generation in the Globular Photonic Crystal</b><br>V. Filatov, V. Gorelik and S. Pichkurenko                                       | 134 |

## **Chapter 4: Building Materials**

|                                                                                                                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Sustainable Construction through Characterization of PET Bricks in Urban Areas</b><br>J. Castro, Z. Chávez, C. Pool, A. Amarillo and M. Chauca                                                                                                                      | 143 |
| <b>Effects of Black Scoria on Mechanical Properties and Thermal Insulation Properties of Building Materials</b><br>S. Alraddadi                                                                                                                                        | 151 |
| <b>Prototype of Prefabricated Brick with Special Passes for Functional and Safe Electrical and Sanitary Installations on Confined Masonry</b><br>A. Vera, R. Rosales and M. Chauca                                                                                     | 158 |
| <b>Sustainable Local Materials: A Study of Adobe Bricks in Saudi Arabia</b><br>H. Azouqah, N. Alomar, L. Kaadan, M. Sonbul, H. Abdulaziz and W. Labib                                                                                                                  | 163 |
| <b>Palm Kernel Ash and Eggshell Ash as Partial Replacement of Cement in Interlocking Brick Production</b><br>G. Vasudevan and H.T. Cong                                                                                                                                | 174 |
| <b>Palm Kernel Shell as Partial Coarse Aggregate Replacement in Asphalt Mixture: Optimum Binder Content and Volumetric Properties Investigation</b><br>S.Z.M. Asri, F.H. Khairuddin, C.P. Ng, N.A. Misnon, N.I.M. Yusoff and A.N.H. Ibrahim                            | 179 |
| <b>Physical Properties of Sustainable Concrete Bricks with Glass and Polyethylene Terephthalate Scales Wastes as Replacements for Coarse Aggregate</b><br>F. Rosell, J.C. Nieto, R.J. Cuicapuza, L.M. Isla, V.C. Valenzuela, J.T. Rivera, R.V. Salazar and N. Moggiano | 186 |

## **Chapter 5: Strength and Load-Bearing Capacity of Structure Members of Buildings**

|                                                                                                                                                                                                                |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Numerical Simulation of Steel Concrete Composite Floor System</b><br>M.M.H. Talukder, M.M. Mouri, A. Singha and M.S. Rahman                                                                                 | 195 |
| <b>Strength Analysis of Single-Symmetry Ratio for Single-Symmetry I-Beam</b><br>W.T. Hsu, K.Z. Ho, Y.X. Liu and S.T. Chung                                                                                     | 202 |
| <b>Modeling the Shear Strength of FRP-Strengthened Rc Beams Using Artificial Neural Networks</b><br>N. Alrouh, M. Maalej and S. Barakat                                                                        | 207 |
| <b>Ultimate Shear Strength of Component Model of Composite Beam with Perfobond Shear Connector</b><br>K. Suzuki, A. Suzuki and Y. Kimura                                                                       | 214 |
| <b>Axial Capacity Prediction of Concrete-Filled Steel Tubular Short Members Using Multiple Linear Regression and Artificial Neural Network</b><br>M.N. Uddin, L.Z. Li, R.K.M. Khan, F. Shahriar and L.W.T. Sob | 220 |
