## Preface

## Chapter 1: Materials for Biomedical Application

|                                                                                                                                                                                                                       |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Comparative Study of Polymeric Laminated Composites Reinforced by Different Fibers of Prosthetic Socket by DSC and FTIR</b><br>J.K. Oleiwi, Q.A. Hamad and S.A. Abdulrahman                                        | 3  |
| <b>Effect of Polypropylene (PP) and Polyacrylonitrile (PAN) Fibers Reinforced Acrylic Resin on Compression, Hardness and Surface-Roughness for Denture Applications</b><br>H.A. Sharhan, Z.N. Rasheed and J.K. Oleiwi | 9  |
| <b>Mechanical Property Evaluation of PLA/Soybean Oil Epoxidized Acrylate Three-Dimensional Scaffold in Bone Tissue Engineering</b><br>M.H. Majeed and N.K. Abd Alsaheb                                                | 17 |
| <b>Studying the Effect of Hydroxyapatite Coating on the Properties of Alumina</b><br>O.S. Mahdi and I.K. Sabree                                                                                                       | 27 |
| <b>Synthesis, Characterization, Biological Evaluation, and Assessment Laser Efficacy for New Derivatives of Tetrazole</b><br>A.H. Dalaf, F.H. Jumaa, M.M. Aftana, H.K. Salih and I.Q. Abd                             | 33 |
| <b>Electrostatic Deposition of Bio-Composite Polymer/Hydroxyapatite Coatings on 316L Stainless Steel</b><br>G. Dhafer, M.N. Al-Shroofy and H.A. Al-Kaisy                                                              | 40 |

## Chapter 2: Nanomaterials and Nanotechnologies

|                                                                                                                                                                                                                                                                                                             |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Functionalization and Characterization of Iron Oxide with Multi-Walled Carbon Nanotubes Using Ovicides Oxidation Method in <i>Aedes aegypti</i> Eggs</b><br>M. Al Salih, S. Samsudin and R.E. Abed                                                                                                       | 49 |
| <b>Preparation of Gold Nanoparticles Doped Zinc Oxide Using Reactive Pulsed Laser Ablation in Liquid</b><br>N.K. Hassan, M.A. Fakhri, A.W. Abdulwahhab and U. Hashim                                                                                                                                        | 55 |
| <b>Fiber Optics for Sensing Applications in a Review</b><br>S.M. Tariq, M.A. Fakhri and U. Hashim                                                                                                                                                                                                           | 65 |
| <b>Correlation between Composition and Magnetic Properties of SrFe<sub>12</sub>O<sub>19</sub>/Co Nanocomposite Synthesized by the High Energy Ball-Milling Process</b><br>A.M. Semaida, M.A. Darwish, D.Y. Karpenkov, A.V. Trukhanov, V.G. Kostishyn, V.V. Korovushkin, V.P. Menushenkov and A.G. Savchenko | 77 |

## Chapter 3: Functional Materials

|                                                                                                                                               |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Significance of Niobium (V) Oxide for Practical Applications: A Review</b><br>S.R. Shafeeq, M.J. Abdul Razzaq, E.T. Salim and M.H.A. Wahid | 89 |
| <b>Effect of Aging on Corrosion Behavior of Martensite Phase in Cu-Al-Ni Shape Memory Alloy</b><br>N.M. Dawood and A.R. Abid Ali              | 96 |

## Chapter 4: Polymers and Composites

|                                                                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of ZnO, SiO<sub>2</sub> and Al<sub>2</sub>O<sub>3</sub> Doped on Morphological, Optical, Structural and Mechanical Properties of Polylactic Acid</b><br>A. Bouamer and A. Younes | 105 |
| <b>Study the Impact of Cobalt on Hardness and Adhesive Wear of NiAl-Y<sub>2</sub>O<sub>3</sub> Composite Material</b><br>H.A.H. Al-Ethari, A.H. Haleem and K.Y. Al-Dulaimi                 | 114 |

## **Chapter 5: Coatings**

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Physical and Mechanical Characterization Study of Thin Nitriding Layers Produced by Plasma on Low Alloy Steel</b><br>Y. Benarioua | 123 |
| <b>Annealing Time Effect on Intermetallic Compounds of Hot Dip Galvanizing Coating</b><br>Y. Benarioua                               | 130 |

## **Chapter 6: Building Composites**

|                                                                                                                                                      |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Experimental Investigation of the Thermal Performance of Scrap Tire Rubber-Concrete Blocks</b><br>A.L. Hashem, H.H. Balla and K. Al-Farhany       | 139 |
| <b>Effect of Adding Nano Starch Biopolymer on some Properties of Silica Fume Concrete</b><br>S.M. Atia and W.A. Abbas                                | 145 |
| <b>Mechanical Properties of High Strength SCC Made with Hybrid Steel Fibers from Discarded Bead Wires</b><br>A.M. Mezaal, K.B. Najim and A.T. Noaman | 151 |
