

## Table of Contents

### Preface

<b>Structural Ceramics for High Temperature Applications</b> M.H. Van de Voorde	1
<b>A Computer Model to Simulate the Synergistic Effects of Erosion and Corrosion</b> M. Stautner, F.H. Stott and G.C. Wood	31
<b>A New Approach to the Interpretation of the Oxidation Processes in Si<sub>2</sub>N<sub>2</sub>O Based Ceramics</b> J. Persson, P.O. Käll and M. Nygren	49
<b>Characterization of Partially Stabilized Zirconia Thermal Barrier Coatings</b> E.Y. Lee, R.R. Biederman, Y.H. Sohn and R.D. Sisson	61
<b>Ceramic Oxide-Coated Silicon Carbide for High Temperature Corrosive Environments</b> J.R. Price, M. van Roode and C. Stala	71
<b>Microstructural Instability during High Temperature Creep of an Oxide-Dispersion-Strengthened 13 % Chromium Ferritic Steel</b> R.W. Evans, J. Preston, B. Wilshire and E.A. Little	85
<b>Preliminary Study on Oxychloridation of Silicon-Based Ceramics</b> H. Chu, P.K. Datta, J.S. Gray, M.J. Pomeroy, S. Hampshire and A. Flannery	91
<b>Pressureless Sintering of Silicon Carbide Particle-Reinforced Silicon Nitride Matrix Composite Ceramics</b> Y.J. Song and S. Hampshire	99
<b>Recent Advances in the Assessment of the High Temperature Performance of Low Alloy Steel Components</b> J.D. Parker	109
<b>Oxidation Behaviour of Certain Co-Based Alloys Containing Refractory Metals</b> H.L. Du, J.S. Gray, P.K. Datta, B. Lewis and A. Matthews	117
<b>Atmospheres for Sintering Ceramic Matrix Composites Containing Silicon Carbide</b> W.B. Hanson, R.M. Bower and A. Hendry	127
<b>Glass Formation and Crystallisation in Oxynitride Systems</b> J. Lonergan, V. Morrissey, R. Flynn, M.J. Pomeroy and S. Hampshire	145
<b>The Behaviour of Nitrogen in 9% Cr Martensitic Stainless Steels</b> F. Bahrami, K.C. Laing and A. Hendry	153
<b>Steel-Reinforced Sialon Matrix Composites</b> A.C. Smith, H.J. Edrees and A. Hendry	165
<b>Heat-Treatment of Ln-Si-Al-0-N Glasses</b> H. Mandal, D.P. Thompson and T. Ekström	187
<b>Ceramics in IC Engines</b> S.G. Timoney	205
<b>The Development of Sintered High Speed Steels for Wear Resistant Automotive Components</b> J.D. Bolton, M. Oliveira and I.M. Martins	215
<b>Assessment of Aluminium-Lithium Alloys for Spacecraft Applications</b> B. O'Brien and E. Cleary	229
<b>Fatigue and Creep of Particulate Reinforced Aluminium Based Metal Matrix Composites at Elevated Temperatures</b> J.C. Healy, J.G. O'Dwyer and D.M.R. Taplin	239
<b>Aspects in Sheet-Forming Characterisation of Advanced Composites</b> A.M. Murtagh, A.J. Mulholland, M.R. Monaghan and P.J. Mallon	263
<b>Development of Powder Processing Routes for the Production of Mainline Bearings for Aero-Gas Turbine Engines</b> C.S. Wright, A.S. Wronski, Y. Bienvenu, L. Fontaine, D. Girodin, J. Kinder, O. Faral and R. Wahling	279
<b>Ageing of a Structural Epoxy Adhesive</b> M.P. Zanni-Deffarges and M.E.R. Shanahan	287

<b>NdFeB in Automotive Applications</b> A.Z. Liu, I.Z. Rahman, M.A. Rahman, M. O'Riordan and E. Petty	295
<b>An Evaluation of Repairs to Graphite/Epoxy Composite Structures in Aircraft Applications</b> C. Culligan and P.J. Mallon	303
<b>Repair of Thermoplastic Composites Using Induction Heating</b> B. Rodgers and P.J. Mallon	313
<b>Investigation of the Effects of Plastic Media Blasting (PMB) on Advanced Composites</b> J.J. Lennon and P.J. Mallon	323
<b>The Use and Impact of Electronic Ceramics in our Technology Today</b> C.P. Ward	331
<b>Analytical Techniques in the Manufacture of Multilayer Ceramic Capacitors</b> N. Carr	351
<b>Calixarenes - A Novel Class of Surface Active Molecules and Carriers for Conducting Species</b> C.B. McArdle, S.J. Harris, J. Guthrie and V. Casey	359
<b>Organic LB Films as Thin Layer Insulator Materials</b> C. Anderson, N.M.D. Brown, B.J. Meenan, J.B. McMonagle and B. O'Brien	365
<b>Characterisation of Semiconductor Materials Using Raman Scattering</b> G.M. O'Connor, T.J. Glynn and G.P. Morgan	373
<b>Charge Transport Processes in Electroactive Polymer Films</b> M.E.G. Lyons, H.G. Fay and T. McCabe	381
<b>The Preparation and Properties of Tin Oxide Thin Films Deposited by Reactive Evaporation</b> V. Casey and M.I. Stephenson	417
<b>Excision of Surface Mount Devices Using an Nd: YAG Laser</b> A. Flanagan, T.J. Glynn, R.M. Redfern and P.G. Lowe	425
<b>CuO-Based Ceramics Phase Equilibrium Diagrams</b> A. de Pretis, M.D. Grillone, L. Podda and F. Ricciardiello	433
<b>Light Modulated Temperature Sensor</b> J.B. Hull, P.J. Grassham and D.W. Clegg	437
<b>Recent Developments in Sol-Gel Processing</b> J.L. Woodhead	447
<b>Solution Sol-Gel Mullite</b> M.C. Kelleher, T.C. Kelly and J. Corish	453
<b>Solid Materials as Reagents and Catalysts</b> B. Kartheuser, T. Curtin, E. McCullagh, J.B. McMonagle and B.K. Hodnett	469
<b>Metal Oxide Based Amperometric Chemical Sensors: Theory and Applications</b> M.E.G. Lyons, D.E. McCormack, A. Michas, C.H. Lyons and P.N. Bartlett	477
<b>Physical Properties of Nb Coatings for Biomedical Applications</b> L.P. Ward and P.K. Datta	505
<b>Fatigue in the Artificial Hip Joint: Examination of a Retrieved Cement Mantle</b> T. Culleton and D. Taylor	523
<b>Absorbents for the Removal of Chromium from Tannery Effluents</b> T.F. O'Dwyer and B.K. Hodnett	529
<b>Gas Evolution Reactions at Conductive Metallic Oxide Electrodes for Solid Polymer Electrolyte Water Electrolysis</b> A. Michas, F. Andolfatto, M.E.G. Lyons and R. Durand	535
<b>Mechanical Testing of Ceramics and Ceramic Matrix Composites: An Overview</b> G. Higgins, B. O'Brien and A. Sun Wai	551
<b>Fatigue Analysis: The Distinction between Cracks and Notches</b> P. Byrne, D. Taylor and L. Jianchun	569
<b>High Strain Rate Constitutive Equation for Steel and Copper at Room Temperature</b> A.M.S. Hamouda and M.S.J. Hashmi	575
<b>The Effects of Physical Ageing on the Long-Term Fracture Behaviour of Polystyrene</b> J.C. Arnold	583
<b>An Analysis of the Thermal Induced Stresses in a Thermoplastic Composite Component</b> M.B. Mulhern, P.F. Murphy, M.R. Monaghan and P.J. Mallon	593

<b>An Optical Method for the Non-Destructive Evaluation of Silicon Nitride Ceramics</b> F. McLysaght and J.A. Slevin	605
<b>Rheology of Carrier Media Used in Abrasive Flow Machining</b> J.B. Hull, D. O'Sullivan, A.J. Fletcher, S.A. Trengove and J. Mackie	617
<b>Rheology of Liquid Crystal Polymer Blends</b> J.B. Hull, M. Hawksworth and A.A. Collyer	627
<b>Strength Testing of Ceramics and Ceramic-Metal Joints</b> B. O'Brien and F. Stapleton	635
<b>Short Fatigue Cracks</b> J. Li and D. Taylor	647
<b>Fractographic Analysis of Flexural Failures in Thermally Aged APC-2 Laminates</b> A. Carew and M. Buggy	653
<b>The Environmental Stress Cracking Behaviour of Thermoplastic Toughened Phenolics</b> A.R. Eccott, D.H. Isaac and J.C. Arnold	673
<b>The National Programme in Advanced Materials Technology</b> A.D. Kennedy	681
