

Table of Contents

Preface

Chapter 1: Properties of Steel and Alloys

Quantitative Analysis of Yield Strength in V-Alloying Medium Manganese Steel under Different Processes

L. Ma, S. Wang, T. Jia and X.H. Gao 3

An Improved Random Forest Magnesium Alloy Prediction Method Based on Particle Swarm Optimization

Y. Zhang, S.C. Wei, B. Wang and L.W. Li 13

Effects of Solution Aging Treatment on Microstructure and Hardness of Ni30 Superalloy

Z.F. Chen, X.F. Fan, L.Q. Wang, X.D. Fu and P.X. Li 19

Chemical Composition and Microstructure Characterization of High Purity CuMn Alloy for Integrated Circuit

Y. Wang, X.Y. Wan, J.J. He, Q.X. Zhang, Y.R. Kang, N. Liu and Q.Q. Qi 25

Chapter 2: Power Semiconductor Devices and Integrated Circuits

A Novel Shield Gate 4H-SiC MOSFET with Reduced Reverse Recovery Losses

D.S. Peng and Q.Y. Feng 33

Investigation of 4H-SiC UMOSFET Architectures for High Voltage and High Speed Power Switching Applications

C.L. Hung, Y.K. Hsiao, C.C. Tu and H.C. Kuo 41

Chapter 3: Geochemistry, Materials and Technologies for Environmental Engineering and Waste Recycling

Correlation between Particle-Size Composition and Morphology of Stone Dust and Air Quality

A.Y. Aleksandrova and S.S. Timofeeva 53

Study of the Possibility of Using Na- and Ca-Differences of Zeolite for the Drinking Water Purification

S.E. Efimov and A.R. Aleksandrov 61

Ceramic Materials Using Oil Contaminated Soil

T.M. Supeliuk and L.L. Maslennikova 67

Accumulation of Microelements and Mineral Formation in Microbial Mats of Thermal Springs of Kamchatka (Far East, Russia)

E.G. Lebedeva, N.A. Kharitonova and I.V. Bragin 73

Thermodynamic Foundations for the Use of Gypsum and Magnesite Stone for the Neutralization of Heavy Metal Ions

A.B. Bobrovnik, M.Y. Slesarev and M.V. Shershneva 79

Selection of the Optimal Reagent for Low-Turbidity Water Treatment at High Permanganate Oxidability

P.G. Bykova, I.P. Dudanova and E.D. Palagin 89

Vibratory Shear Enhanced Process Membrane Filtering Technology to Overcome the Negative Effects of Concentration Polarization

A.R. Strelkov, O.V. Tsabilev and M.A. Gridneva 95

Adsorption of Nickel(II) Ions by Natural Zeolites Type

E.G. Filatova and O.I. Pomazkina 103

Preparation of Silica Nanoparticles from Waste Product of Zirconium Carbide Facility

F. Abadian-Naeini, M. Mohsennia and M. Bagherzadeh 111

Chapter 4: Materials and Technologies in Construction

The Efficiency of Non-Destructive Testing to Estimate the Damage Level of Fiber-Reinforced Concrete Exposed to High Temperatures

A.M. Nefoussi, M. Ezziane, H. Siad, R. Chihaoui, M. Mouli, M. Lachemi and K. Ayed 125

Evaluation of Modulus of Rupture of the Concrete with Addition of PET Fibers and Polypropylene

J.F.M. Sánchez, E.M.A. Guzmán, W.M. Molina, H.L.C. Garcia, J.A.P. Segovia, J.A.B. Perez, M.A. Sanchez, M.A.N. Seras and F.A.H. Ferreyra 143

Fatigue Behaviour of Offshore T-Weld Connections Repaired by Grinding and Wet Welding

G. Terán-Mendez, R.C. Melendez, L. Medina-Almazán and A.A. Hernández 151
