

Table of Contents

Preface

Study on the Mechanics State of Concrete under Penetration and the Deceleration of Projectile T. Deng and T. Ge	1
Innovation Status and Trends of Korea Nano-Sensor Technology from a Perspective of Patent Analysis J. Zheng, X.P. Lei and Y.H. Zhao	7
Study of Depth-Dependent Tetragonal Distortion of GaN Epilayer with Tri-Layer AlGa_N Interlayer Growth on Si(111) B.F. Ding and Y.Q. Chai	11
Magnetic Confinement of Plasmas Generated by Coaxial Twinned Electron Cyclotron Resonance (ECR) Discharge G.S. Chen, R.H. Tong and A.H. Zhang	18
Research on Carbon Dioxide Corrosion of Cement Stones of Oil Well Casings under High Temperature and High Pressure P. Wang, Z. Qu and J.B. Zhang	24
Application of High Performance Concrete with Compound Admixtures of Fly Ash and Perlite Powder in Pavement of Highway L.H. Yu, H. Ou and S.X. Zhou	29
Study on the Experiment of Adsorption Cadmium (II) with Insoluble Starch Xanthate X.L. Song and H. Qian	34
Study on Treatment of Cr (VI)-Containing Wastewater with Nitric Acid Modified Activated Carbon X.L. Song and H. Qian	38
Measurements of Shearing Property of High N Alloy Steel at Super High Strain Rates X.A. Chen, S.C. Song and T.H. Wang	42
Effect of Seismic Characteristics on Seismic Energy Response of Bridge Y. Li, H. Bai and T. Wang	46
Seismic Energy Response Analysis for Bridge Structures of Passenger Dedicated Line Y. Li, Y.M. Zhang and H. Bai	51
Study on Dynamic Performance of Novel Isoprene Rubber Synthesized with Homogeneous Rare-Earth Catalyst System N.Q. Liu, S. Wang, C.X. Bai, Y.F. Yang and M. Tian	55
The Experimental Study of Natural Sedimentation in Heavy Oil D. Feng, L. Liu, P. Wang, H. Zhang and X. Xie	60
The Experimental Study on the Performance of Anchor Material of Mooring System for Deepwater Drilling D. Feng, Z.J. Liao, P. Wang, C. Yang and Q. Luo	65
The Impact on Asynchronous Motor during High Voltage Power Quick Switching Process X.S. Zhou, J.C. Zhou and Y.J. Ma	70
The Study of Chaos Control in Power System X.S. Zhou, X.F. Liu and Y.J. Ma	74
Research of Photovoltaic Grid System Voltage Stability Based on the Bifurcation Theory Y.J. Ma, C. Liao and X.S. Zhou	79
The Effect of Surface Coating on Thermal Manikin's Stability K. Yang and M.L. Jiao	84
A Coordinating Procedure for Tracing Static Bifurcation Points of Voltage Instability X.S. Zhou, H.X. Zhai and Y.J. Ma	90
Fabrication and Wear Behavior Investigation of the Carbon/Epoxy Composites Based on Wood Using Artificial Neural Networks H. Vafaeenezhad, S.M. Zebarjad and J.V. Khaki	95
Study of Asphalt Thermal Stability Based on Microscopic Analysis Techniques J. Chen, W.J. Yuan and Z.D. Chen	103
Mechanochemical Synthesis and Characterization of FeNi-Al₂O₃ Nanocomposites S.A. Sajjadi, H. Beygi and M. Zare	109

Research on Compression and Bending Resistance Characteristics of Logs X.C. Yang and J.Y. Luo	117
Fuzzy Logic Modeling of Porous Carbon Body Fabrication from Cellulose Based Materials H. Vafaeenezhad, S.M. Zebarjad and J.V. Khaki	122
Research and Assessments of Geomagnetically Induced Currents Y.J. Ma, D.F. Wu and X.S. Zhou	129
A Sensitivity Study of Structure Behavior of Strengthened Beams for Buried High-Pressure Steel Bifurcation Y.T. Lu, Z.Z. Shen and L.Q. Xu	133
Temperature Characteristic of Immobilization Proteins on Pt Surface Based on Silicon Substrate X. Ju, D.Z. Wen, P. Wang, Y.J. Ding and C.H. Feng	138
Design of Reconstruction and Extension Projects of the Wastewater Plant of an Ordnance Repairing Factory J.M. Li and C. Liang	144
Adsorption of Zn(II) from Aqueous Solutions by Thiol-Functionalized MCM-48 X.N. Hu, Y. Han, J.Y. Li, J.Y. Wu, J.R. Chen and M.J. Tang	148
Application of Bailey Method for Aggregate Grading Design of Continuous Dense Gradation Asphalt Mixture W. Zhu, H.Z. Li, S.R. Ma and D.B. Liu	154
Rapid Deposition of Hydroxyapatite on Mg-Alloy by Biomineralization Method C.Y. Xu, Q. Wang, H.Y. Ban and W. Xu	160
3D-FEM Stability Analysis of Fault Fractured Zone of Road Tunnel J.X. Lai, C. Liu and F. Zhou	166
Excavation Effect of Tunnel Slope Reinforced with Anti Sliding Pile in Cold Regions Based on 3D-FEM J.X. Lai, H.B. Fan and Z.C. Dong	170
Citric Acid on the Hydration Mechanism of Cement B.G. Ma, J. Xiao and H.B. Tan	174
Survey on Micro-Grid Technology Y.J. Ma, L.G. Shi and X.S. Zhou	180
Design of Matrix Converter Vector Control System Based on DSP and CPLD X.J. Jiang and E.L. Liu	184
Experimental Study on Anti-Shear Properties of Floor Heave Control Anchor of Deep Soft Rock K.H. Zeng, H.Y. Ju and C.G. Wang	190
Nitrogen Concentration in N-Implanted Gold on the Formation of Gold Nitride J.H. Yang	195
The Mix Design of Low Strength High Flowing Concrete with Low Cement Content Prepared by Manufactured Sand Z.A. Liu, M.K. Zhou and X. Chen	201
Microstructure of Magnesium-Aluminum Metal Matrix Composites Reinforced with 2wt.% SiC Particles R.L. Zhang, X.R. Liu, T.W. Zhou and J.L. Yang	207
Regulation Behavior of Microwave Reflectivity in Magnetorheological Fluids J.J. Fan and N.H. Yu	213
The Influence Factor of Removal Humic Acid from Wastewater Using Cucurbiturils Q. Yang, Y.L. Yang, W.D. Wang, M. Ge and D. Li	217
Application of Stress Intensity to Design of Bi-Materials with a Wedge X.C. Ping, X. Li and X.X. Xu	223
Finite Element Simulation Model for High Temperature 4H-SiC Devices H. Habib, N.G. Wright and A.B. Horsfall	229
Application Conditions on Acoustic Emission (AE) Technique Monitoring Coal and Rock Dynamic Disasters in Mines J.G. Li and H. Liu	235
Research on Coating Dispersion of Liquid Wear-Resistant Decorative Paper Z.J. Hu and X.J. Zhang	241

Evaluation of Low Temperature Performance for Diatomite Modified Asphalt Mixture Y.B. Zhang, H.Z. Zhu, G.A. Wang and T.J. Chen	246
Relativity Analysis on the Detection Methods of Compaction Degree for Expressway Subgrade G.J. Zhao	252
Abrasive Wear Behaviour of MoB/CoCr Cermet Coatings under Different Parameters X. Chen	258
Development in Wear Resistance of Fe-0.7Cr-0.8Mn Milling Balls through <i>In Situ</i> Reinforcing with Low Weight Percent TiC H. Beygi, M. Shaterian, E. Tohidlou and M.R. Rahimipour	262
Tensile Properties of Steel Fiber-Reinforced Reactive Powder Concrete after High Temperature W.Z. Zheng, H.Y. Li, Y. Wang and H.Y. Xie	270
A Numerical Method to Analyze some Simple Planar Frames Subjected to Concentrated Loads with Elastic Large Deflection T.J. Cao	277
Dynamic Stability Analysis of Viscoelastic Beam under the Follower Forces R.H. Zhuo, S.W. Yan and L.Y. Zhang	283
Study on the Effect of Shield Tunnel Construction on Underground Pipeline Deformation by Experiment and Monitoring L.J. Liu, L.Y. Zhang, J.X. Lan and M.L. Wang	289
Study on Wear and Friction Resistance of CrTiAlMoN Coatings Deposited by Magnetron Sputtering T. Wang, G.J. Zhang and B.L. Jiang	295
Research on Effect of Erbium Salt in the Anodization of Aluminum X.Z. Liu, L.W. Zhu, G. Wang, L.L. Song and X.Y. Tang	300
Preparation of Controlled-Release Tablets of Sasanquasaponin Using Broomcorn-Stalk and its Performance X.Z. Liu, Y.X. Song, Z.F. Lai, L.L. Guo and L.L. Song	304
Research on Wear Behavior of NBR by 45 Steel in Crude Oil Medium Z. Wang and S.J. Wang	308
Reliability Analysis of Subgrade Bearing Capacity of Gravity Foundation of Wind Turbine Based on JC Method Z.Q. Cheng, P. Yang and H.B. Jiang	314
Building the Mathematical Model of Elastic Deformation for Rolls System by Four-High Mill Strip Rolling with a Composite Back-Up Roll Y.G. Dong, M.J. Wang and Y.L. Su	320
Finite Element Analysis of Horizontal Reinforcement Ratio's Effect on Seismic Performance of Autoclaved Aerated Concrete Block Masonry H.G. Wu, H.L. Luo and J. Gu	326
Effect of Nano SiO₂ on the Performance of Asphalt Emulsion and its Residue Y.S. Yang, W.Y. Fan, Z. Wang, Q.Q. Zhang and G.Z. Nan	331
Analysis Acid Corrosion Behavior of Epoxy Coating under Stress X.E. Yan and X.B. Su	336
State of the Art Stainless Steel Provides Improved Properties for Widely Varying Applications Q.M. Song and D. Wert	341
Experimental Research on Cutting Temperature of Cemented Carbide Tools during Cutting Austenitic Manganese Steel G.Q. Han and Z.Z. Zhang	347
An Research on Self-Fused Alloy Coating by High Frequency Induction Treatment G.Q. Han and Z.Z. Zhang	351
The Analysis on Track-Memory of Omnidirectional Fire Robot S. Fang, Y. Xu, S.P. Liu and Z.W. Zhang	355
An On-Line Fatigue Life Monitoring System for Boiler Drums Based on the Inverse Problem of Heat Conduction Method P. Wang, B. Li and S.L. Wang	361

Study of Mastic-Aggregate Interfacial Adhesion in Cement Emulsified Asphalt Mixture Based on the Discrete Element Method (DEM)	367
Z.J. Wang, R. Wang, Q. Wang and G.Y. Yang	
Preparation and Characterization of Cu₂O Thin Films by Electrodeposition	371
X.J. Yu, A.M. Zhang, J. Zhang, J. Zhao, B.H. Yao and G.J. Liu	
Study and Application of Homogeneous Rare Earth IR/NR Blends in Tread Compound of All-Steel TBR Tire	375
D.J. Li, S.D. Song, N.Q. Liu, S. Wang, Z.H. Wang and J.S. Yang	
Electrochemical Research on Cl⁻ which Destroys the Surface Passivation Film of T23 in Supercritical Water Tubes	383
W. Su, Y.C. Li, F. Yu, G.H. Lu, Y. Chen, Q.H. Meng and W.X. Wang	
Optimisation of 4H-SiC Enhancement Mode JFETs for High Performance and Energy Efficient Digital Logic in Extreme Environments	391
H. Habib, N. Wright and A.B. Horsfall	
An Investigation of Environmental Reduction Factor for GFRP Bar Used as Concrete Reinforcement in China	399
J.W. Huang	
Study on Rational Width of Entry Protection Coal-Pillar in Large Mining Height Working Face	404
X.F. Wang, D.S. Zhang, T.F. Cui, J.L. Wang and W. Zhang	
Investigation of Surface Coating Preparation of High-Aluminum Bronze Alloy by Induction Remelting Process	410
X.T. Yang, Z.P. Wang, Y. Lu and X. Li	
Meshing Efficiency of Globoidal Indexing Cam Mechanism with Steel Ball	414
X.Y. Feng, Z.S. Fu and C.L. Yu	
Investigation of Microstructure and Machinable Mechanism of the B₄C/BN Composites Fabricated by Hot-Pressing Process	420
T. Jiang	
The Effects of Adding TiC Powders to VANADIS 4 Tool Steel by HIP Treatment	426
S.H. Chang, T.P. Tang, J.K. Chen and C.M. Liu	
Kinetics Study on Non-Isothermal Crystallization of Amorphous Alloy Mg₆₅Cu₁₅Ag₁₀Y₁₀	432
X.J. Wang, T.D. Xia and X.D. Chen	
Influence of Zinc on the Microstructure and Brittle Phases of Friction Stir Welded Joint of Al / Ti Dissimilar Alloys	439
Y.H. Chen, L. Yu and Q. Ni	
A Research on the Forward Slip Coefficient in Alloyed Bar Rolling by the Round-Oval-Round Pass Sequence	444
J.F. Song and Y.G. Dong	
New Reactive Compatibilizer B Preparation and its Application in Polystyrene Ether/Nylon 66 Alloy	449
Y.T. Zhang, Y. Li, L. Li and X.W. Qu	
Study on <i>In Situ</i> Monitoring of the Surrounding Rock Pressure of the Shallow Large-Span Tunnel in the Tunnel Construction Process	454
X.Z. Li, S.C. Li, Y.Y. Li and S.C. Li	
Synthesis and Antibacterial Activity of Acetyl Ferrocene Hydrazine Hydrazone and its Metal Complexes	459
Y.T. Liu, Z.P. Yang and D.W. Yin	
Free Surface Processing Parameters such as the Curvature Analysis	463
M.H. Wang, X.P. Li, Y. Sun and L. Sun	
Study on SBS Modified Asphalt Emulsion and Aggregate Adhesion of CA Mortar	467
B.J. Liu, S.Y. Ning and Y.X. Yang	
The Experimental Study on the Road Asphalt Fumes Inhibitors	472
S.L. Qian and F. Wang	
Thermo-Chemical Analysis of a Calcination Furnace to Produce Cathode Material for the Secondary Batteries	477
D.F. Li, M.Y. Hwang, Y.G. Kim, C.H. Jeon, J.H. Song, Y.T. Kim and Y.H. Chang	
Crash Simulation of Straddle-Type Monorail Vehicle Body and Human Injury Research	486
X.X. Wen, Y.T. He, Z.X. Du and X.X. Zhang	

Orthogonal Experiment Study on the Hydrogen Desorption Properties of NaAlH₄ and LiAlH₄	491
X.P. Zheng, X. Feng, X.B. Lin and S.L. Liu	
Study of Destabilization Mechanism of Concrete Component Based on Catastrophe Theory	499
Y.F. Liao, Y. Xu and X.Q. Ma	
Strong Interlocked Skeleton Dense Gradation for Cement-Fly Ash Stabilized Crushed-Stones	507
D. Li and Y.J. Jiang	
Evaluation of Fast Neutron Inserted to RPV Materials and Management of RPV Lifetime for PWR Power Plant	514
S.H. Yang, Y.X. Chen, Y. Hu, Y.S. Sun, G.P. Quan, H.X. Wan, Z.M. Jin, S.C. Shi, B. Cao and D.G. Lu	
Research of the Connecting Form about the Spherical Shell and the Nozzle	520
C.X. Luo	
Cluster Glass Behavior of Doped Cobaltite Nd_{0.80}Sr_{0.20}CoO₃	524
Y.Y. Yang	
Experimental Study on Seismic Behaviors of Structural Insulated Panel Shear Walls under Cyclic Loading	529
H.F. Yang, W.Q. Liu, W.D. Lu and S.A. Yan	
Composite Polymer Materials and the Details Made of them for Cotton Machines and Mechanisms	535
N. Abed-Negmatova, J. Negmatov, G. Gulyamov, A. Yuldashev, S. Eminov, S. Bozorboev, A. Aripova, S. Negmatov and D. Xojimuradov	
Developing of Effective Multipurpose Polymer-Bitumen Compositions	539
S. Negmatov, B. Rahmonov, B. Sobirov, A. Abdullaev, Y. Salimsakov, J. Negmatov, M. Negmatova, R. Soliev and D. Mahkamov	
Effective Technology of Obtaining the Carboxymethyl Cellulose from Annual Plants	541
G. Rahmonberdiev, M. Murodov, K. Negmatova, S. Negmatov and A. Lysenko	
Effective Composite Chemical Reagents Based on Organic and Inorganic Ingredients for Drilling Fluids Used in the Process of Drilling Oil Wells	544
K. Negmatova, S. Isakov, N. Kobilov, M. Negmatova, J. Negmatov, J. Haydarov, G. Sharifov and S. Rahimov	
Effective Composite Materials for Friction Pairs of Working Bodies of Cotton Machines	548
D. Musabekov, N. Abed-Negmatova, G. Gulyamov, A. Shernaev, D. Khodjimuradov and S. Negmatov	
An Online SMC-Based Adaptive Wavelet-Neural Controller for Uncertain Nonlinear Systems with only Output Measurement	551
C.S. Chen	
GFRP Bar Reinforced Concrete Bridge Deck: Stress in GFRP Bar under Ultimate Design Loads	557
J.W. Huang
