

Table of Contents

Preface and Organizing Committee

Chapter 1: Materials Science and Materials Processing

Effect of Anthracite on Preparation of Ceramsite Using Red Mud H.F. Yang, L.F. Lu, B.P. Jiang and J.L. Zhang	3
Study of Natural Bitumen Extracted from Oil Sands Y. Tileuberdi, Y. Ongarbaev, B. Tuleutaev, Z. Mansurov and F. Behrendt	8
The Study of Biodegradation of Diesel Fuels by Different Strains of <i>Pseudomonas</i> Y.O. Doszhanov, Z.A. Mansurov, Y.K. Ongarbaev, Y. Tileuberdi and A.A. Zhubanova	12
On the Modification of Hypereutectic Al-15Si Alloy Using Rare Earth Ce M. Shafei, N. Arab and K.Z. Madar	16
Evaluation on Thermo-Mechanical Fatigue Life of IN738LC Using Finite Element Analysis J.M. Lee, D.K. Lee, J.M. Koo and C.S. Seok	20
Evaluation of Influence of Cracks on DVC Coating Using Finite Element Analysis S.H. Kim, D.K. Lee, J.M. Koo and C.S. Seok	24
Durability Evaluation of Thermal Barrier Coating (TBC) at High Temperature H.W. Song, Y.S. Kim, J.M. Koo and C.S. Seok	29
Prediction of Toughness through Evaluation of Alloying Elements Distribution Pattern at Heat-Affected Zone in Submerged-Arc Welding Process of API X70 Steel M. Sharifi, N. Arab and G. Khalaj	35
Novel Thermoplastic Materials from Wastes of the Leather Industry M. Puccini, M. Seggiani, D. Castiello, G. Calvanese and S. Vitolo	41
Applications of Activated Carbon Sorbents Based on Greek Walnut S. Azat, R. Busquets, V.V. Pavlenko, A.R. Kerimkulova, R.L.D. Whitby and Z.A. Mansurov	49
The Impact of Ion Exchange on Nature of Polyacrylic Acid and Nonionic Polymer Complex Formation I. Suleimenov, G. Mun, S. Panchenko and P. Obukhova	52
Hydrophilic Interpolymer Associates as a Satellite Product of Reactions of Formation of Interpolymer Complexes I. Suleimenov, D. Shaltykova, Z. Sedlakova, G. Mun, N. Semenyakin, D. Kaldybekov and P. Obukhova	58
Synthesis, Characterization and <i>In Vitro</i> Evaluation of Strontium-Containing Sol-Gel Derived Bioactive Glass/ Biphase Calcium Phosphate Nanocomposite N. Nezafati, S. Hesarakhi and M. Badr-Mohammadi	64
Effect of Titanium Depletion of High Temperature Treated NiTi Shape Memory Alloy Wire N. Nawawi and A.S. Mahmud	70
Applied Model of Magnetization of a Granulated Material A.A. Sandulyak, A.V. Sandulyak, D.V. Oreshkin and M. Popova	76
Arc Behavior and Droplet Transfer Process of VP CMT Y.Y. Hu, S. Mu and J. Wang	81
Review on Optimization of Advanced Micro-Controlled Blending Composite Material Properties on LDPE/ CaCO₃ S. Liu, Y. Gao, T.Z. Chen and Q. Wang	86
Structuring in Systems on the Basis of Calcium Sulfate Dihydrate A.F. Buryanov, V. Petropavlovskaya and T.B. Novichenkova	91
Preparation of Magnetic Compositions of Diatomite K.B. Korzhynbayeva, S. Tazhibayeva, K.B. Musabekov, M.M. Mataev and O.Y. Zhanadilov	97
Analyses of P-S-N Curve and Fracture Morphology of Die-Casting Magnesium Alloy AZ91D Containing Mischmetal Y.L. Xu, K. Zhang, L. Han and M.F. Li	103
Morphological Comparison of PLGA/Gelatin Scaffolds Produced by Freeze Casting and Freeze Drying Methods A. Zamanian, F. Ghorbani and H. Nojehdehian	108

Study of Metal Solidification Model Based on Dissipative Structure F.S. Yang	112
Properties of Boride Layer on Boridesae 1035 Steel by Molten Salt A. Kaouka, O. Allaoui and M. Keddami	116
Corrosion Characteristics of Copper in Malaysian Bioethanol and Gasoline Blends S.K. Thangavelu, C. Piraiarasi, A.S. Ahmed and A. Farid Nasir	122
Catalyst Activity on Landfill Leachate Treatment with CWAQ Method Q.Y. Wan, Y.L. Zhang and J.B. Lin	127
Influence Factors of Cu-Fe-La/FSC Catalyst Applications in CWAQ Technology Y.L. Zhang and Y.L. Shun	133
Research on Boron Extraction Rate of Boron-Containing Slag and its Industrial Experimental Conditions L.S. Liu, W.B. Liu, H.R. Zhan and L.P. Wang	138
Study on Shape-Memory Mechanism and Properties of NR/TPI Blends G.Y. Lin, S.M. Liu and F.C. Dong	146
Experimental Tooling Design of the Jet Erosion S. Chen, J.G. He, L. Ke and Z.L. Jiang	152
Influence of the Waveform and DC Offset on the Asymmetric Hysteresis Loop in Au/PZT/Pt/Al₂O₃/SiO₂/Si Thin Films Prepared by MOCVD Method Masruroh	155
Effects of PCBM Loading and Thermal Annealing on Nanomorphology of Blend of Polymer/Fullerene Thin Films Solar Cells: Impact on Charge Carrier Mobility and Efficiency T.S. Shafai and O. Oklobia	160
A Study on PHA/PLA/Talc Ternary Composites G.Y. Tan, L.H. Zhong, X.P. Lan, X.M. Sun and Z.Y. Ou	166
Synthesis of Sandwich-Like Carbon@SnO₂@Carbon Composite Hollow Microspheres with High Rate Capability and Stability for Lithium-Ion Batteries J. Liang, D.Y. Zhang and S.J. Ding	172
Properties, Peculiarities and Applications of Powder Coatings Formed by Multi-Chamber Detonation Sprayer N.J. Vasilik, Y.N. Tyurin, O.V. Kolisnichenko, M.G. Kovaleva, M.S. Prozorova and M.Y. Arsenko	179
Study on Diallyl Phthalate Modified Phenol-Formaldehyde Resin M.Z. Bao, H.W. Yu, B.F. Bao and Y. Cao	185
Sintered Compacts of Titanium-Hydroxyapatite Used in Medicine D.I. Băilă	192
An Investigation of Mechanical Properties of Recycled EVA/Commingle Plastics K. Sanguanwong, M. Nikzad, I. Sbarski, S.H. Masood and A. Kapoor	198
Creep Behavior Prediction Research of T92 Steel Based on BP Neural Network J. Liu	203
The Effect of Fiber Treatment on the Mechanical Properties of Christmas Palm Fiber-Polyester Composites S. Kalyanasundaram and S. Jayabal	208
Synthesis of Hollow and Hierarchical NiO Nanosheets Nanotubes and their Application as Supercapacitor Electrodes X. Xu, S.J. Ding and D.M. Yu	215
Analysis of Surface Topography under Varied Conditions of Energy Input Rate in Ultrasonic Machining of Pure Titanium J. Kumar	221
Effect of Laser Beam Diameter on Cut Edge of Steel Plates Obtained by Laser Machining I. Miraoui, M. Zaied and M. Boujelbene	227

Chapter 2: Building Materials and Construction Technologies

Using Mud as a Building Material in Building Affordable Houses in Hot Climate N.S.M. Al-Faidy	235
---	-----

Use of Tannery Sludge Ash as Filler in Waterproofing Membranes M. Puccini, M. Seggiani, D. Castiello and S. Vitolo	240
Light-Weight Masonry Mortar with Hollow Glass Microspheres for Winter Conditions S. Vyacheslav, O. Dmitriy and R. Tamara	247
Interlocking Tactile Concrete Paver with Addition of Steel Fibers F.M. Silva, V.R.F. Santos, L.C.L.J. Ribeiro, M.S.G. Pires, R.C.C. Lintz and L.A. Gachet-Barbosa	253
Study of Density and Modulus of Elasticity of Lightweight Concrete with Brazilian Aggregate A.F. Angelin, L.C.L.J. Ribeiro, M.S.G. Pires, R.C.C. Lintz, L.M. Trautwein and L.A. Gachet-Barbosa	257
Temperature Cracks Controlling Technology for the Mass Concrete in Solid Sections of Lower Pylon Column F.L. Gao and Y.W. Fang	262
Seasonal Thermal Energy Storage - A Size Selection J. Milewski, M. Wołowicz and W. Bujalski	270
Planning and Control in Construction of LW3-1 Jacket S.N. Han, H. Wang, H. Wu, P.S. Sun, Y.H. Xue, R. Meng and H. Zhang	277
Joint Analysis of the Power Generation Construction Project Schedule, Cost and Quality Based on DEA H.F. Sun, L.P. Zhou and Y.Y. Wang	282
Environmental and Economic Model Life Cycle of Buildings Based on the Concept of "Green Building" V.G. Borkovskaya	287

Chapter 3: Applied Mechanics

Estimation of the Induced Hydrodynamic Periodic Forces of Marine Propeller under Non-Uniform Inflow via CFD M. Bennaya, W.P. Zhang and M.M. Hegaze	293
Free Vibration Analysis of Single and Multilayered Sandwich FGM Plates-Assessment of Higher Order Refined Theories K. Swaminathan and D.T. Naveenkumar	300
Experimental and Finite Element Analysis of Natural Modes and Frequencies of Hollow Fan Blades M.S. Nikhamkin and B. Bolotov	306
Low Cycle Fatigue and Crack Grow in Powder Nickel Alloy under Turbine Disk Wave Form Loading: Validation of Damage Accumulation Model M.S. Nikhamkin and A. Ilinykh	312
Deformation Analysis and Fracture Mechanism of Steel Casing in Oil Wells Q.J. Zhu and J. Chen	317
Comparison of the Performance of the Calibration Algorithm of Wide-Angle Lens J.E. Ha	323
Shear Stress Distributions in a Bonded Joint under Tension X.C. He	327
Stress Analysis of Bonded Joint Using Solid Element Combinations X.C. He	332
Experimental Free Vibration Analysis of Clinched Beams X.C. He, D. Zhen, H.Y. Yang, G.J. Feng, B.Y. Xing, F.S. Gu and A. Ball	338
Verification of Analytical Solution for a Problem of High-Velocity Transversal Impact on a Prismatic Beam V.V. Vershinin	343
The Force Analysis of Landing Stage and Transportation Terminal of Large Module with SPMT Trolley Y.X. She	349
Interpolation-Element for Beam on Winkler Elastic Foundation X. Li, S.P. Li, X.D. Shi and M. Ding	354

About Some Misunderstandings in the Modern Theory of the Sound Isolation and Discrete Models of Sound Transmission	
A. Zakharov	361
An Inlet Area for Particle Mixing in a Two-Dimensional Fluidized Bed Using a CFD-DEM Model	
S.S.H. Pisitsungkakarn	367
Finite Element Modeling of External Inversion and Comparison of Results with Existed Experimental and Theoretical Results	
K. Abbasi and A.S. Hamedani	374
The Analysis of Water Movement and Heat Transfer Modeling	
X.H. Lu and Y. Wang	380
Heat Modeling for Friction Stir Welding	
F.H. Cao	385
Studies on Process Parameters for Aluminum Extrusion of Slide Rails	
S.Y. Shao, W.Y. Wang and Y.A. Chen	392
A Finite Element Analysis of Cold-Formed Z-Purlins Supported by Sandwich Panels	
O. Tusnina	398
Searching Method of Optimization of Bending Reinforced Concrete Slabs with Simultaneous Assessment of Criterion Function and the Boundary Conditions	
A. Tamrazyan and E. Filimonova	404
Probability Analysis of Precision Equipment Vibration Isolation System	
V. Smirnov and V. Mondrus	410
The Thermo-Mechanical Couple Analysis Base on Assembly	
G.C. Hu and J.H. Liu	416
Numerical Simulation of Erosion and Flow Behaviour in Nozzle	
S. Chen, Z.C. Wang, J.G. He, L. Ke and Z.L. Jiang	420
Lateral Torsional Buckling of Thin-Walled Cold-Formed Steel Beams with Web Holes - Finite Element Analysis	
M. Horacek and J. Melcher	425
Prediction of Fatigue Crack Initiation in Complete Contact Fretting Fatigue	
M.H. Maslan, M.A. Sheikh and S. Arun	431
Early Degradation of Resurfacing Prostheses	
C. Cirstoiu, D. Popescu, R. Ene and M. Cîrstoiu	438
A Failed Tibial Osteotomy - The Influence of Bone Mineral Substituent	
C. Cirstoiu, R. Ene, D. Popescu and M. Cîrstoiu	445

Chapter 4: Mechanical and Electronic Engineering

Theoretical Research on Ideal Brake Force Distribution of Tractor-Semitrailer Cornering Braking	
C. Li, X.H. Li, W. Zhou and W.L. Dai	451
Enhanced Response Turbocharger Using Motor/Generator	
M.S. Thombre and P.P. Borkar	456
Hydrodynamic Efficiency Improvement of High-Specific-Speed Centrifugal Pump Impeller	
C.T. Yang	461
Selected 5-Axis Strategies for High-Speed Milling of Thin-Walled Parts	
M. Kováč and J. Peterka	466
Study on Characteristics of Passive Wheel Typed Robot	
F.Y. Lin	470
New Approach for Mobile Robot Path Planning	
F.Y. Lin	475
The Study of Vibration for Motor-Compressors	
J.H. Liu and G.C. Hu	479
Software Design of Reconfigurable Hydraulic Test System	
Y.L. Liu and Y. Qiu	483
Application of Order Analysis in the Analysis of Noise in Automobile Alternator	
G.T. Wang, Z.W. Feng, Z. Li, J.Y. Li and W.M. Hu	488

Secondary Developing and Finite Element Analysis on Screw Compressor of Automotive Air Conditioning Y.D. Song	492
A Mobile Robot Obstacle Avoidance Method Based on Improved Potential Field Method H. Wang, L.Y. Zhao and W. Chen	496
The Design and Research of the New Energy Efficient Combustion Stove J.C. Hong, T.Z. Zhang and H.X. Zhang	502
Modeling the Dynamics of Robot Motor Drive Control System A. Tuleshov, K. Ozhikenov, R. Utebayev and E. Tuleshov	510
Package of Programs for the Synthesis of Space Gear Mechanism in the MAPLE Environment D.V. Dudka, Y.M. Drakunov and A. Abduraimov	516
Performance Analysis of the Photovoltaic/Thermal Collector (PV/T) System for Different Malaysian Climatic Conditions S.M. Sultan, M.I. Fadhel and S.A. Alkaff	522
A Working of Eddy Current Transducers under Control of Ferromagnetic Pipes in Condition of Insufficient Magnetic Saturation K.Y. Hao and V. Miroshnikov	528
Ripple Carry Adder Using Two XOR Gates in QCA K. Suresh and B. Ghosh	531
Optimization Design of Auxiliary Grooves on Rotor of Permanent Magnet Synchronous Motor for Electric Vehicles S.W. Wang, X. Tian, C.Z. Sun and X.H. Ma	536

Chapter 5: Computer Technologies Application and Data Processing

Discrete Construction of Compoundly Weighted Voronoi Diagram H. Wang	545
Research on Comprehensive Optimizing for Special Vehicle Handling and Riding Based on Multi-Objective Optimization Theory J. Li, S.H. Yuan and K. Chen	549
The Visual Modeling of the Intelligent Monitoring in the Production Line Based on UML Modeling X.M. Hu, Z.H. Xu and T. Yu	558
The Evaluation of Internal Control System of Power Supply Enterprises in ERP Environment H.F. Sun and Y.Y. Wang	564
Ride Comfort Simulation of Minibus under Road Pulse Input J. Li, Y.L. Zhu, S.W. Chen and Y.G. Cui	570
Campus Card Information Query System Design and Implementation J.N. Yang and K. Lin	574
User Information Security Context-Aware Services in a Cloud Environment H. Jeong, N.J. Kim and E.I. Choi	578
Simulaion on Strap-Down Inertial Navigation System Based on Simulink/M Programming Language Y.L. Liu and X. Zhang	584
Development of Multimedia Environment for Viewing the State of Stress in a Differential Element L.M. Trautwein, L.A. Gachet-Barbosa, C.S. Yamamoto and R. Gaspar	590
Digital Maintenance and Training of Digital Manufacturing - Reliability Theory and Principle of Modern Maintenance and Monitoring Technique T.M.P. Diallo and H.S. Li	594
The Mathematical Morphology Image Edge Detection Based on FPGA H.D. Li and L.Y. Zhao	599
Multi-Focus Image Fusion Method via Multiple Wavelet Bases W.L. An and X.L. Wang	604
A Model and Decomposition Mechanism of Complex Task in MAS H. Zhang, R.F. Guo and C. Geng	609

Security and Reliability Research of Remote Access for Subsea Blowout Preventer System B.P. Cai, Y.H. Liu, Z.K. Liu, S.L. Yu, Y.W. Zhang, Q. Fan and Y.J. Zhuang	615
H_∞ Control for Generalized Discrete System and Simulation C. Fang, J.H. Shi, K.Y. Li and Z. Wang	621
Analysis of Stability for Generalized Discrete Large-Scale Systems C. Fang, J.H. Shi, S. Yu and J.F. Mao	627
