## Preface

## Chapter 1: Materials Synthesis, Treatment and Characterisation

<b>Technological Justification of the Possibility of Applying Wear-Resistant Coatings to Strengthen Machine Parts</b> D.N. Permyakov, V.I. Astashchenko and S.D. Kugul'tinov	3
<b>Composite Chrome Coatings in Aluminum Production</b> A.N. Baranov	8
<b>Investigation of the Diffusion Zone Formation Mechanisms during the Production of Functional Steel-Aluminium Compositions by Arc Processes</b> R.S. Mikheev, I.E. Kalashnikov and P.A. Bykov	14
<b>Ensuring the Quality of Self-Tapping Screws by Replacing the Thermochemical Treatment Line</b> O.S. Molochkova, E.Y. Zvyagina and N.Y. Abarovich	21
<b>Studying the Structure and Properties of the Material of Screws for Spinal Osteosynthesis</b> E. Nikolaeva, A. Chapyshev and A. Spitsyn	27
<b>Mechanical Similarity Principle for Measurement Metal Hardness</b> A.V. Shaparev, I.A. Savin and S.N. Ptichkin	33
<b>Mechanical Properties of Titanium Alloys at Operating and Pressure Shaping Temperatures Depending on the Aluminum and Molybdenum Equivalents</b> Y.B. Egorova, L.V. Davydenko and I.M. Mamonov	38
<b>Self-Healing of PVD-Coatings</b> O.V. Kudryakov, V.N. Varavka and I.V. Kolesnikov	44
<b>Influence of Environment at Laser Processing on Microhardness of Amorphous-Nanocrystalline Metal Alloy</b> I.S. Safronov, I.V. Ushakov and V.I. Minaev	50
<b>Laser-Induced Vacancies-Relief Ordered Structures on Titanium Surface</b> I.F. Uvarova	56
<b>Criteria for Evaluating the Manufacturability of Steels when Cutting with an Edge Tool</b> V.I. Astashchenko, G.F. Mukhametzhanova and A.G. Shagiev	62
<b>Effect of Surface Tension of Intrapore Fluid on Physicochemical Properties of <math>\text{Al}_2\text{O}_3 \cdot n\text{H}_2\text{O}</math></b> D. Maiorov, Y. Velyaev and K. Yakovlev	68
<b>Mechanisms of Plastic Deformation during Laser Heat Treatment of ARMCO Pure Iron</b> V.N. Varavka, O.V. Kudryakov and I.S. Morozkin	74
<b>Study of the Behavior of SS34 in a Free and Heat-Treated State</b> O.A. Nasibullina	80
<b>Determination of the Thermodynamic Stability of Intermetallic Compounds in Technical Aluminum</b> M.P. Kuz'min, M.Y. Kuz'mina and S.N. Fedorov	86
<b>The Impact of Ferro- and Superparamagnetic Nickel Particles on the Magnetism of YBCO Superconducting Ceramics</b> V.S. Volosatova, A.S. Kuz'mina and M.P. Kuz'min	92
<b>Transport Properties of Ferromagnet/Superconductor and Superparamagnet/Superconductor Heterostructures Based on Ni/YBCO</b> N.A. Svinkin, A.S. Kuz'mina and M.P. Kuz'min	98
<b>Modeling the Structural Strength of Materials on Disk Laboratory Specimens</b> E. Zenkov and L. Tsvik	104
<b>Viscosity of Microdestruction of Multilayer Composite and Method of its Revealing</b> I.V. Ushakov and A.D. Oshorov	110
<b>Structural and Surface Properties of Silicon Dioxides Obtained by Extraction from Sulfuric Acid Solutions of Nepheline Decomposition</b> D. Maiorov and Y. Velyaev	116

<b>On the Problem of Getting a Correct Crack Shape in Fracture Toughness Specimens of Low-Carbon Steel</b> E.D. Nazarova, V.Y. Filin and I.A. Galchun	122
<b>Physical Aspects of Laser Steel Processing in the Magnetic Field</b> A.V. Brover, G.I. Brover and I.A. Topolskaya	128
<b>Interaction of Ferromagnetically Ordered Clusters with Dislocations in Austenite and Twinning</b> V.N. Pustovoit and Y.V. Dolgachev	134
<b>The Effect of Hole Manufacturing Technology on the Strength of Orthogonally Reinforced Fibrous Composites</b> D.D. Vlasov, N.A. Tatus' and A.N. Polilov	140
<b>Evolution of Phase Composition and Thermal Expansion during Heating of VT23 Titanium Alloy</b> F.V. Vodolazskiy, A.G. Illarionov and M.A. Ryzhkov	147
<b>FEM Simulation of Sclerometric Test of Nickel Aluminide Layered Coatings</b> A.I. Bogdanov, V.P. Kulevich and V.G. Shmorgun	154
<b>Correlation of the Chemical Composition and Structural Characteristics in the Partially Substituted Spinel Ferrites</b> D.P. Sherstyuk, V.E. Zhivulin and D. Vinnik	160
<b>On the Issue of Safety of Multilayer Protective Angle Pieces for Metal Products Packaging</b> L.G. Kolyada, A.P. Ponomarev and E.V. Tarasyuk	166
<b>Synthesis, Structure and Properties of Barium Ferrites <math>\text{BaFe}_{11}\text{M}_1\text{O}_{19}</math> (M= Al, Ti and Mn) Ceramics</b> K.P. Pavlova, I.A. Solizoda and D. Vinnik	172
<b>Investigation of the Effect of Thermocyclic Treatment on the Mechanical Properties of Steel</b> Y. Bakhracheva	178
<b>Composite and Metal Structural Elements Joint Strength</b> A.M. Kokurov	184
<b>Multi-Walled Carbon Nanotubes in Electrolytic Chromium Plating</b> I.A. Dyakov and I.S. Safronov	189
<b>Structural Features of Ni-Based Self-Fluxing Alloy Protective Layers, Produced by Non-Vacuum Electron Beam Cladding, Reinforced with Titanium-Based Particles</b> T. Zimoglyadova, K. Skorokhod and D. Cherkasov	194
<b>Oxidation Resistance of "Ni-Cr-Si-B-Alloy + Nb + B" Protective Layers, Produced by Non-Vacuum Electron Beam Cladding Technique</b> T. Zimoglyadova, A. Ruktuev and E. Rudenya	200

## Chapter 2: Technologies in Pyrometallurgy and Electrometallurgy

<b>How the Chemistry of Raw Materials Affects Aluminum Produced in Cells with Prebaked Anodes</b> N.V. Nemchinova and A.Y. Lazko	209
<b>Ducat Deposit Concentrate Pyrometallurgical Processing Technology</b> A.V. Nikanorov and E.Y. Azarov	214
<b>Phase Diagrams of Me-O-C Systems to Study Metallurgical Processes</b> S.S. Belskii, I.I. Aponchuk and L.V. Molokova	221
<b>Investigation of the Impurities Formation during the Silicon Melt Crystallization</b> A.A. Tyutrin and A.A. Vasilyev	227
<b>Study of Manganese Recovery in the <math>\text{CaO-SiO}_2\text{-MgO-Al}_2\text{O}_3\text{-MnO-Fe}_2\text{O}_3</math> System by Thermodynamic Simulation</b> V.A. Salina and V. Zhuchkov	233
<b>Protection of Cast Iron Sections of Gas-Collecting Bell of Soderberg Electrolysis Cell</b> V.A. Sokolnikov and A.A. Tyutrin	238
<b>Research of Ferronickel Manufacturing Process by Selective Reduction of Poor Iron-Chromium-Nickel Ores</b> V.A. Bigeev, M.V. Potapova and I.V. Makarova	244

<b>Experimental Determination of the Main Parameters of the Refining Process of Rough Ferronickel, Obtained by Iron-Chromium-Nickel Selective Reduction</b> V.A. Bigeev, M.V. Potapova and I.V. Makarova	250
<b>Laboratory Assessment of the Technogenic Raw Materials Briquettes Effect on the Arc Furnace Electric Mode</b> D.K. Egiazaryan, A.V. Sivtsov and M.M. Tsimbalist	256
<b>Impact of Initial Titanium Magnetite Ore Material Composition on Fluxed Pellet Metallurgical Properties</b> B.P. Yur'ev and V.A. Dudko	262
<b>Technology and Equipment for Sintering of Iron-Ore Materials by Adding Brown Iron Ores as Pulp during Sinter Mix Pelletizing at Ural Steel, JSC</b> D.R. Ganin, D.A. Dolganov and E.A. Fuks	267
<b>Analysis of the Granulometric Composition of the Feedstock Influence on Mechanical Properties of Iron Ore Pellets</b> V.I. Bobkov and E.V. Morgunova	272

### **Chapter 3: Modern Problems of Foundry Production**

<b>Features of Casting Magnesium Alloys in Chill Mold</b> R.V. Gavariev and K.N. Gavarieva	287
<b>The Effect of Cooling Rate on Structure, Basic Mechanical and Special Properties of Complex Alloyed Manganese Cast Iron</b> M.G. Potapov, B.B. Zaritskiy and N.A. Kuts	292
<b>Development and Introduction of a New Composition of Wear-Resistant Cast Iron with Improved Performance Properties for Castings of Pump Parts</b> M.G. Potapov, B.B. Zaritskiy and N.A. Kuts	304
<b>On the Issue of Casting Copper Alloys in Chill Mold</b> R.V. Gavariev and K.N. Gavarieva	313
<b>Control of Compacted Graphite Iron Production Process by Using the Thermal Analysis System</b> A.A. Tokarev, D.A. Boldyrev, B.A. Kulakov and L.I. Popova	319
<b>Investment Casting for Oil and Gas Complex</b> L.G. Znamenskii, T.V. Stepanova and O.V. Ivochkina	326

### **Chapter 4: Metal Forming**

<b>Study of the Influence of Geometric Parameters on the Destruction Possibility of Aluminium Alloys during Pressing in Equal-Channel Step Matrix</b> A.B. Naizabekov, S.N. Lezhnev and E. Panin	335
<b>Local Thickenings and Thinnings of Hot Rolled Strips</b> S.M. Belskiy and I.I. Shopin	340
<b>Bauschinger Effect, Masing Principle and Hencky Theorem for Bending Moment at Repeated Alternating-Sign Bending of Steel Sheet</b> V.N. Shinkin	346
<b>New Die Design for High-Pressure Torsion</b> A. Volokitin, I. Volokitina and E. Panin	352
<b>Change in Mechanical Properties During Drawing of Wire from Ni 99.6</b> L.V. Radionova, R.A. Lisovskiy, A.S. Svistun and I.N. Erdakov	358
<b>Roller Drawing of Simple Profiles from Hard-to-Form Alloys</b> L.V. Radionova, A.E. Sarafanov and O.O. Siverin	364
<b>Investigation of Causes of Wall Thinning during Stamping of Halves of Stamped-Welded Elbows</b> K. Torgonin and V.V. Shirokov	370
<b>Studying on the Internal Quality of Steel at Various Stages of Production: Slab-Rolled Metal</b> A.A. Khlybov and E.L. Vorozheva	377

## Chapter 5: Technologies of Welding Production

<b>Design and Manufacturing Technology of Round Samples for Studying the Effect of Defects on the Mechanical Properties of Welds</b> E.D. Kozhukhar and A.R. Ruban	387
<b>Kinetics of the Formation of Bimetallic Compounds and the Distribution of Energy Components in the Explosion Welding Process</b> V.I. Kuz'min, V.I. Lysak and E.V. Kuz'min	393
<b>Modeling of High Module Power Sources Systems Safety Processes</b> I.V. Savchenko, A.A. Shapoval and I. Kuziev	399

## Chapter 6: Additive Manufacturing

<b>Assessment of Fracture Mechanisms and Temperature of Ductile-Brittle Transition of Metals Obtained on the Basis of 3D Printing Using Neural Network Modeling and Fractal Analysis</b> M.S. Anosov, D.A. Ryabov and D.A. Shatagin	407
<b>Optimization of 3D Printing Modes for Electric Arc Surfacing Using a Digital Twin of the Process</b> D.A. Shatagin, M.S. Anosov, A. Galkin and N. Klochkova	414

## Chapter 7: Industrial Ecology and Waste Recycling

<b>Hard Alloys Recycling as a Promising Direction of Technological Equipment for Machine-Building Production</b> V.D. Kulynych, A.A. Shapoval and V.V. Drahobetskyi	423
<b>Methods for the Determination of Chloride-Ion in Soils from the Territory of Nearby Metallurgical Enterprises: Guidelines for Selection</b> S.A. Bogomolova and I.V. Muravyeva	429
<b>The Optimization of Sc Recovery from Red Mud Obtained by Water-Leaching of Bauxite-Sintering Product</b> J.A. Napol'skikh, A.A. Shoppert and I.V. Loginova	436
<b>Influence of Particle Size Distribution of Wood Waste Pyrolysis Product on Productivity and Purification Efficiency</b> I.A. Nasyrov, D.D. Fazullin and G.V. Mavrin	442
<b>The Use of Silicon Production Waste as an Effective Additive in the Manufacture and Machining of Various Materials</b> M.V. Konstantinova, E.A. Guseva and N.A. Astafeva	448
<b>Production Tests of the Don Water Purification and Disinfection Technology</b> I.V. Pchel'nikov, A.I. Vergunov and A.Y. Cherkesov	454
<b>Analysis of the Leaching Stage Effect on the Vanadium Extraction from Technogenic Raw Materials</b> M.V. Shubina and E.S. Makhotkina	462
<b>Process Development for Integrated Use of Metallurgical Production Wastes</b> B.P. Yur'ev and V.A. Dudko	467
<b>Mathematical Models for an Energy Intensive Multistage Roasting Process of Pelletized Industrial Waste from Apatite-Nepheline Ores</b> V.I. Bobkov, M.V. Chernovalova and A.M. Sokolov	473
<b>Expanding the Application Scope of Fine Dust from Petroleum Coke Calcining Furnaces in Aluminum Production</b> A.A. Tyutrin, A.E. Burdonov and K.S. Bushuev	482
<b>Choosing the Reagent to Leach Fluorine from Spent Pot Lining of Aluminum Electrolysis Cells</b> N.V. Nemchinova, A.N. Baranov and A.E. Barauskas	488
<b>Improvement of the Technology of Fluorine Recovery from Solid Waste of Primary Aluminum Production</b> A.V. Nikanorov	493

**Radial-Shear Rolling as a New Technological Solution for Recycling Bar Scrap of Ferrous Metals**

S.N. Lezhnev, A.B. Naizabekov and E. Panin

498
