

Table of Contents

Preface

Chapter 1: Nanomaterials and Nanotechnologies

Atmospheric Drying Process and Properties of SiO₂ Aerogels Y.Z. Wang, X.X. Wang, L.S. Li, M. Zhou and Y.S. Wu	3
Synthesis of <i>Padina tetrastromatica</i> Seaweed Mediated Silver Nanoparticles and its Toxicological Evaluation against Brine Shrimp <i>Artemia</i> S.Y. Low, J.S. Lean, K.X. Yu, C.L. Wong and J.F. Ng	9
Biomimetic Nanocatalysts Enhance Oxidative Damage against Cancer Cells Z.J. Luo, J. Wei, J. Li, M. Wu and Y.N. Xue	15
Self-Templating Synthesized Silica Nanocapsules and Fabrication of Nanocomposite for Enhancing the Anti-Felting of Wool Fabrics C. Zhang, S. Chang, J.C. Zhan and J.J. Shen	21
Research Progress on Adsorption of Water Pollutants by Nano Materials C.X. Hu	33
Adsorptive Capacity Study of Mesoporous Carbon-Doped TiO₂ and its Application in Cu(II) Removal from Water W.K. Wang, X.Y. Yan, N.F. Zhong, R.H. Yuan and G.Q. Hu	39
Fabrication and Performance Test of Flexible Supercapacitors Based on Three-Dimensional Graphene Hydrogel Z.M. Ren, J.Y. Di, Z.K. Lei and R. Mao	45
TiO₂/ Graphene Nanotube Arrays with Enhanced Photoelectric Properties F.L. Zhang and X.X. Xue	51
ZnO Powder Nanostructures: Characterization and <i>Ab Initio</i> Study S. Oudjertli, T. Tahraoui, Y. Kouhlane, A. Daoui and M. Ibrir	57
New Approach to the Molecular Electronics of Graphene J. Niewiadomska-Kaplar	63
The Application of Aggregation-Induced Emission in Photodynamic Therapy C.X. Jin and R.X. Jin	79
Raman Spectroscopy Investigation on the Stability of C-Isotope Labeled Twisted and AB-Stacked Bilayer Graphene C.Q. Shen, R.C. Stehle and X.S. Li	85

Chapter 2: Materials and Technologies in Microelectronics

A Study of Thin Film Encapsulation on Improving Electrical Characteristics and Reliability for Flexible OLEDs Q.W. Yin, W.D. Lian, J.C. Li, J.J. Qian, S.D. Zhang and W.R. Cao	93
Numerical Study of Single Molecular Charge Sensing by FET-Integrated Nanopore Biosensor X. Zhu, X.J. Li, Y. Liu, X.S. Guo and Y.F. Zheng	99

Chapter 3: Advanced Building Materials

Influence of Cement on Concrete Mix Designs through Sustainability Indicators L. Gil, S. Ruiz, J. Rodríguez and J. Vise	107
Fabrication and Mechanical Evaluation of Geopolymeric Mortars Derived from Inorganic Industrial Waste from Peruvian Formal Mining F.A. Huamán-Mamani, F.A. Cuzziramos-Gutiérrez, G.P. Rodríguez-Guillén, M.L. Benavides-Salinas, D.M.M. Gallegos-Florez and R.S. Huacallo-Guía	113

Microstructure and Mechanical Properties of Gypsum Board Produced from Water Hyacinth Fiber P. Hankhantod, T. Phoo-Ngernkham and B. Krittacom	119
Effects of Waste Glass Powder as Pozzolanic Cement Supplementary Material for Structural Elements S. Del Pino, D. Milachay, J. Rodríguez and C. Eyzaguirre	127

Chapter 4: Materials Properties and Processing Technologies in Mechanical Engineering Production

Concept of Elastocaloric Granular Material Made from SMA Wires in Bending K. Jongchansitto, P. Jongchansitto, I. Preechawuttipong and X. Balandraud	135
Preparation of GH3536 Spherical Powder for Additive Manufacturing by Plasma Spheroidization Y. Li, M.H. Song, Y. Zhang, Y.C. Li and X.C. Zhang	141
The Performance of Zn-Ni Alloy Coating Electrodeposited from Stabilized Bath S. Anwar, F. Khan and Y.H. Zhang	149
Influence of Heating Stage Parameters on the Joint Strength of Rotary Friction Welded AISI 1045 and AISI 304 Steels: A Polynomial Model H. Firmanto, S. Candra, M.A. Hadiyat and Y. Haryono	157
Die and Punch Wear Reduction in Stamping Process by Lean Six Sigma Approach P. Karnsarn, P. Chutima and K. Suanpong	165
Development of Tensile Test Specimens for Fused Deposition Modeling M. Schwicker and N. Nikolov	175
Effect of Area Type Defect of the First Ring Groove on Damage Tolerance of Piston System during Service J.J. Tang, C. Liang and C.G. Xu	183

Chapter 7: Polymers and Composites

Research on the Preparation and Application of Chitosan Composite Membrane N. Ding	193
Preparation and Testing of Carbon Fiber Reinforced Composites Embedded with Lithium-Ion Polymer Batteries Y.X. Shang, Z.K. Lei and R. Mao	199
Preparation of a UV Curable Coating Modified by Several Inorganic Particles Y.L. Da, J.X. Liu and X.X. Xue	205
