Preface

Effect of Air Humidity on the Mechanical Properties of *In Situ* Polymerized Cyclic Butylene Terephthalate Matrix Composites

G. Balogh and T. Czigány 1

Cold Deformation Effect on Microstructure and on the Hydrogen Permeability of Low Carbon Al-Killed Steels

F. Enikő-Réka 7

Hot Ductility Variations of ST52-3 Continuously Cast Steel within the Cast Strand

V. Gonda, Z. Csepeli, I. Kardos, B. Verő and J. Csizmadia 13

Mechanochemical Phenomena during Fine Comminution of Clay Minerals for Ceramic Bricks and Roof-Tiles

L.A. Gömze 19

Investigation of the Weldability of the Self-Reinforced Polypropylene Composites

Z. Kiss, Á. Kmetty and T. Bárány 25

Study of Aluminium-Titanate Based Ceramics in $\text{Fe}_2\text{O}_3\text{-Al}_2\text{O}_3\text{-TiO}_2$ System

T. Korim 31

The Transformation of Added Vegetal Waste Materials during Clay Brick Firing

F. Kristály, L.A. Gömze and I. Papp 37

Correlations between Combustion Type Additives and Expansion after Extrusion of Clay Bricks

F. Kristály and I. Kocserha 43

Fatigue Crack Growth Examinations on Austenitic Stainless Steel in Corrosive Environment and at Elevated Temperature

J. Lukács 49

The Role of the External and Internal Reinforcing on the Structural Integrity of Industrial and Transporting Steel Pipelines

J. Lukács, G. Nagy and I. Török 55

Fatigue of Laserbeam Welded Joints of High-Carbon Steel Strips

A. Magasdi, J. Ginzstler and J. Dobránszky 61

Examination of Tile Industrial Usability of High-Quartz Content Clay

V. Orosz, I. Kocserha, R. Géber and C. Paróczai 67

Injection Molding of Degradable Interference Screws into Polymeric Mold

Á. Oroszlány, P. Nagy and J.G. Kovács 73

A Method for the Approximate Determination of the Specific Material Properties of Metals under the Extreme Conditions of Fast Deformation

Z. Pálmai 79

The Effect of Pre-Electron Beam Irradiation of HDPE on the Thermal and Mechanical Properties of HDPE/PET Blends

F. Ronkay, L. Mészáros, G. Jánoki and T. Czvikovszky 85

The Effect of Electron Irradiation on the Mechanical Properties of MWCNT/Carbon Fiber Reinforced Hybrid Nanocomposites

G. Szabéni and G. Romhány 91

Rapid Tooling Technologies in the Processing of Thermoplastic Polymers

A. Szenti, F. Tuba and N.K. Kovács 97

An Experimental Study on the Effect of Aqueous Hypophosphite Pre-Treatment Used on an Aluminium Alloy Substrate before Electroless Nickel Plating

G. Szirmai, J. Tóth, T.I. Török and N. Hegman 103

Alloying Effects on Wetting Ability of Diluted Ag-Based Melts on Ceramic Substrates

Z. Weltsch and A. Lovas 109

Investigation of Noble Metal Nanoparticles (Ag, Au, Pd, Pt) Produced by Chemical Reduction

Á. Bajáki, J.L. Lábár, Á. Csanády, O. Geszti, H. Hargitai and F.H. Karman 115

Development of Multifunctional Silicon Nitride Based Nanocomposites C. Balázs	121
Aptitude for Cold Rolling of Laser Welded Joints and their Environment in the Case of Steel Sheets G. Buza, D. Janovszky, I. Zupkó, K. Tomolya, M. Sveda, T. Naszrai, C. Puskás, O. Szabados and Z. Kálazi	127
Flame Retardant Polyethylene Terephthalate Fibers Added with Melamine Based FR Additive G. Czél, A. Kelemen and D. Solyom	135
Development of Polymer Coatings for Coronary Stents D. Domján, L.M. Molnár, E. Bognár and T. Balázs	141
MEMS-Compatible Hard Coating Technique of Moveable 3D Silicon Microstructures Z. Fekete, P. Fürjes, T. Kárpáti, G.A.B. Gál and I. Rajta	147
Evaluation of Cooling Characteristics of Quenchants by Using Inverse Heat Conduction Methods and Property Prediction I. Felde and T. Réti	153
Processing of Nano Hydroxyapatite from Eggshell and Seashell G. Gergely, F. Wéber, M. Tóth, A.L. Tóth, Z.E. Horváth and C. Balázs	159
Hetero-Modulus Nanoparticles Reinforced Corundum Matrix CMC with Extreme Wear and Thermal Shock Resistances L.A. Gömze and L.N. Gömze	165
Unique Features of Ultrafine-Grained Microstructures in Materials Having Low Stacking Fault Energy J. Gubicza, N.Q. Chinh, J.L. Lábár, Z. Hegedűs and T.G. Langdon	171
Effect of the Infiltration Pressure on the Properties of Composite Wires I. Kientzl, J. Dobránszky and Á. Németh	177
The Change of the 3D Printing Product Mechanical Properties in the Function of Different Post-Treatment N.K. Kovács and J.G. Kovács	183
Nano-Mechanical and Surface Morphological Properties of TiN Coating Produced by PVD on Tool Steel T. Kovács	191
Third Neighbor Analytic Tight-Binding Solutions for Electronic Structure of Carbon Nanosystems I. László	197
Nano-Micro Pigment Composites for High Performance Paints M. Mara, Á. Csanády, G. Tolnai, P. Németh, I. Bertóti, I.E. Sajó, K. Papp and H. Hargitai	203
Role of the Laser Focus Position in the Laser Beam Cutting of Thin Stainless Steel Sheets G. Meszlényi, J. Dobránszky and Z. Puskás	209
Electrospinning – A Candidate for Fabrication of Semiconducting Tungsten Oxide Nanofibers Á.K. Nagy, J. Pfeifer, I.E. Lukács, A.L. Tóth and C. Balázs	215
The Workability of Bulk Nanostructure Material T.S. Ben Naser and A. Ree	221
Infiltration Characteristics of Carbon Fiber Reinforced MMCs I.N. Orbulov and Á. Németh	229
Tribology Study of Silicon Nitride-Based Nanocomposites with Carbon Additions J. Pfeifer, G. Sáfrán, F. Wéber, V. Zsigmond, O. Koszor, P. Arató and C. Balázs	235
Alloying and Amorphization by Surface Mechanical Treatment A. Revesz and L. Takacs	239
Analysis of the Polymer Coatings of Coronary Stents from the Aspect of Drug Absorbing and Eluting B. Robák, P. Szabadits, E. Bognár, Z. Puskás and A. Toldy	245
Effect of Crucible Diameter and Wall Roughness on the Melt Flow Generated by Rotating Magnetic Field A. Rónaföldi, J. Kovács and A. Roósz	251
Production of Polymer Nanofibers Containing Hydroxyapatite by Electrospinning M. Tóth, G. Gergely, I.E. Lukács, F. Wéber, A.L. Tóth, L. Illés and C. Balázs	257

Production of Single Crystal Thermoelectric Bismuth Telluride Alloys S.I. Vallasek, Z. Veres, A. Roósz, J. Szőke, P. Szirovicza and P. Bárczy	263
Dynamic Mechanical Tests on Magnesium Catalyzed Cast Polyamide 6 Composites Having Different Additives M. Andó, G. Kalácska and T. Czigány	269
Investigation of the Influence of Surface Strengthening Technology on the Material of Railway Car Wheel Axles T. Berecz and L. Balogh	277
Stent Retention Measurement E. Bognár, T. Balázs, G. Ring, B. Szabó and P. Nagy	283
Measuring of Equibiaxial Tension of Rubber-Like Materials by Optical Method A. Bojtos, A. Huba, L. Zentner and U. Risto	289
Qualitative and Quantitative Analysis of Boron Content Precipitates by FEG-SEM and EDS Methods É. Dénes, A.L. Tóth and F. Enikő-Réka	295
Effect of Texture on Hydrogen Permeability in Low Carbon Al-Killed Steels F. Enikő-Réka and P.J. Szabó	301
Grain Boundary Investigation of AISI 304 Type Steel Using EBSD Z. Gaál, P.J. Szabó, J. Ginsztler and L. Dévényi	307
Mechanical Testing of Si₃N₄/SiC/Graphite Ceramic Composites Z. Koncsik, M. Berkes Maros and L. Kuzsella	313
Laser Treatment of Cast Iron Engine Cylinder Bore with Nanosecond Laser Pulses K. Májlínger and P.J. Szabó	319
Magnetic Detection of Creep Deterioration I. Mészáros	325
Measuring the Heparin Binding Capability of Polyurethane-Coated Stainless Steel Stents with a Label-Free Biosensor Z. Puskás, Á.I. Toldy and J. Ginsztler	331
Trackability and Flexibility of Coronary Stents P. Szabadits and J. Dobránszky	337
Compositional and Stress-Sensitive Factors during the Thermopower Characterization of Single Phase Crystalline and Glassy Alloys A. Szabó, Z. Weltsch and A. Lovas	343
Grain Boundary Engineering of Metals by Thermo-Mechanical Treatment P.J. Szabó	349
Nondestructive Inspection of Ductile Cast Iron by Measurement of Minor Magnetic Hysteresis Loops G. Vértesy, T. Uchimoto, T. Takagi and I. Tomáš	355
Textiles Dynamically Influenced Drapability B. Al-Gaadi, M. Halász and P. Tamás	361
On Modeling of Portevin - Le Chatelier Effect P.B. Béda	367
Study of Non-Monotonicity of Forming Processes Using Finite Element Analysis K. Bobor and G. Krallics	373
Parameter Identification Methods for Generalized Maxwell Models: Engineering Approach for Small-Strain Viscoelasticity G. Bódai and T. Goda	379
Approximation of the Temperature and Time Dependence of the Stress versus Rupture Life Curves by Power Functions Z. Dudás	385
Creation and Use of Continuous Cooling (CC) Transformation Diagrams Based on Measured Data and T-t Elements Z. Dudás	393
On the Relation between the Matensite Start Stress and the Temperature in Single Crystalline Cu-11.5wt%Al-5.0wt%Ni Shape Memory Alloy T.Y. Elrasasi, L. Daróczy and D.L. Beke	399
Simulation of Phase Transformations Driven by Short Range Diffusion by Cellular Automaton S. Gyöngyösi, A. Tóth and P. Barkóczy	405

Dynamic Model of Rolling Mill's Electro-Hydraulic Gap Adjustment System A. Kővári	411
Real-Time HIL Closed Loop System of Rolling Mill's Electro-Hydraulic Gap Adjustment A. Kővári	417
Calculation of the Immiscibility Gap by ESTPHAD Method T. Mende and A. Roósz	423
Modelling of Normal Magnetization Curves of Soft Magnetic Alloys I. Mészáros and G. Vértesy	429
Mathematical Modeling on Welding Phenomena B. Palotás	435
Diffusion of Carbon in the Centerline Region of Continuous Cast Slabs M. Réger, B. Verő, I. Kardos, F. Enikő-Réka and G. Kaptay	441
Classification of Fullerene Isomers Using Local Topological Descriptors T. Réti, I. László, E. Bitay and T. Došlić	447
Modeling of Distribution of Visible and Non-Visible Graphite Nodules Embedded in the Surface Layer of Ductile Cast Iron T. Réti, M. Réger, Á. Csizmazia and I. Czinege	453
Shape Features of 2D Figures Z. Szakál and I. Zsoldos	459
3D Milling by Micro Electrical Discharge Machining B.Z. Farkas and M. Takács	467
Characterization of Mineral Materials as Asphalt Fillers R. Géber and L.A. Gömze	471
Optimization of the Mixing Ratio of Two Different Clays Used for Ceramic Roof Tiles R. Géber, I. Kocserha, V. Orosz, A. Simon and C. Paróczai	477
Laser Welding of Steel Plates with Divided Beam Z. Kálazi, Z. Meiszterics, V. Janó, O. Szabados, Z. Magyar and G. Buza	483
Demand of Energy for Chip Removal A. Kári-Horváth and I. Valasek	489
Effects of Extruder Head's Geometry on the Properties of Extruded Ceramic Products I. Kocserha and F. Kristály	499
Reduction Possibilities of Electrical Losses in Plastic Working Equipments A. Kővári and I. Kádár	505
Investigation of Laser Brazing of Aluminium T. Markovits	511
Investigation and Application of High Performance Concretes V. Sugár, M. Takács and V. Ovári	517
Investigation of the Applicability of the Thermo Photo Analysing Method in Die Casting Technology M. Tokár, L. Tóth, T. Rick and T. Mende	523
