

# Table of Contents

## Preface

## Chapter 1: Atomistic Studies on Deformation and Fracture

<b>Development of Bond-Order Potentials for BCC Transition Metals</b>	
V. Vitek, Y.S. Lin and M. Mrovec	3
<b>Defects Mechanics; Three-Body Problem of Defects Interaction among Crack, Dislocations and Twin Boundary in Magnesium</b>	
Y. Shibutani and D. Matsunaka	11
<b>Temperature and Stress Dependence of Mobility of Screw Dislocation in BCC Iron</b>	
H. Mori	17
<b>Role of Localized Non-Equilibrium States in Nucleation of Plastic Deformation in Nanocrystalline Materials</b>	
D.S. Kryzhevich, A.V. Korchuganov, K.P. Zolnikov and S.G. Psakhie	21
<b>Simulating Nanoindentation of Thin Cu Films Using Molecular Dynamics and Peridynamics</b>	
A. Ahadi, P. Hansson and S. Melin	25
<b>Non-Schmid Phenomena in HCP Materials</b>	
A. Ostapovets and O. Vatazhuk	29
<b>A First-Principles Study of Phase Transition of Octahydro-1,3,5,7-Tetranitro-1,3,5,7-Tetrazocine (HMX) under Static Compression</b>	
L. Zhang, S.L. Jiang and J. Chen	33
<b>Different <i>Ab Initio</i> Approaches for Doping Descriptions: Tetragonal Deformation of Ni-Mn-Ga Alloys</b>	
M. Zelený and I. Dlouhý	37
<b>Theoretical Study of Inter-Planer Ordering of Mg-Based LPSO Structures</b>	
D. Matsunaka and Y. Shibutani	41
<b>Sample Geometry and the Brittle-Ductile Behavior of Edge Cracks in 3D Atomistic Simulations by Molecular Dynamics</b>	
V. Pelikán, P. Hora, A. Machová, R. Kolman and A. Uhnáková	45
<b>Damage Progression and Fragmentation in Atomistic, Single Crystal Copper at High Strain Rates</b>	
B.D. Huddleston, D.E. Dickel, M.F. Horstemeyer, N. Williams, K. Danielson and Y. Hamm	49
<b>Tensile Behavior of Single-Crystal Nanosized Copper Beams with Voids</b>	
S. Melin, A. Ahadi and P. Hansson	53
<b>Dynamics of Bicomponent Nanoparticle Formation under Metal Wire Explosion</b>	
K.P. Zolnikov, D.S. Kryzhevich, A.V. Korchuganov and S.G. Psakhie	57
<b>Atomistic Model Analysis of Buckling Behavior of Compressed Carbon Nanotubes</b>	
Y. Umeno, M. Sato, H. Shima and M. Sato	61
<b>Cross-Sectional Deformation in Multi-Walled Carbon Nanotubes under Hydrostatic Pressure</b>	
M. Sato, Y. Yachi, I. Koike, H. Shima and Y. Umeno	65
<b>Development of Neural-Network Interatomic Potentials for Structural Materials</b>	
R. Kobayashi, T. Tamura, I. Takeuchi and S. Ogata	69
<b>Coarse-Grained Molecular Dynamics Simulation of Fracture Problems in Polycarbonate</b>	
A. Kubo and Y. Umeno	73
<b>First-Principles Simulation on Thermoelectric Properties in Low-Dimensional Materials</b>	
K. Nakamura	77
<b>Comparison of Classical Molecular Dynamics and <i>Ab Initio</i> Modeling of Discrete Breathers in Graphene</b>	
I.P. Lobzenko, G.M. Chechin and S.V. Dmitriev	81

## **Chapter 2: Deformation and Fracture Models Based on Crystal Defects Behaviour**

<b>Mesoscopic Description of Dislocation Patterning Using the Concept of Incompatibility of Strains</b>	
R. Gröger and T. Lookman	87
<b>How to Measure a Dislocation's Breakthrough Stress to Estimate the Grain Boundary Resistance against Slip Transfer Based on the DFZ-Model of Fracture</b>	
F. Schaefer, M. Thielen, M. Marx and C. Motz	93
<b>Shape of Small Prismatic Dislocation Loops in Tungsten and Iron</b>	
J. Fikar and R. Gröger	97
<b>Interaction of Dislocations at Interfaces in Multilayered Materials</b>	
H. Koguchi and Y. Tanaka	102
<b>A Numerical Analysis of Deformation Processes in Oxide Dispersion-Strengthened Materials - Influence of Dislocation-Particle Interactions</b>	
T. Záležák, F. Šiška, L. Stratil, N. Luptáková, M. Šmid, D. Bártková, J. Svoboda and A. Dlouhý	106
<b>Influence of Impurities on Grain Boundaries Cohesion in B2-TiMe</b>	
S. Kulkova, A. Bakulin and S. Kulkov	110

## **Chapter 3: Mathematical Modeling Microstructure, Deformation and Fracture**

<b>Interpretation of Plasticity Effects Using the CJP Crack Tip Field Model</b>	
M.N. James, C.J. Christopher, F.A. Díaz Garrido, J.M. Vasco-Olmo, T. Kakiuchi and E.A. Patterson	117
<b>Alloying-Driven Phase Stability in Group-VB Transition Metals under Compression</b>	
A. Landa and P. Söderlind	125
<b>Some Issues in Relations between Microstructure and Indentation Measurements</b>	
P. Haušild, A. Materna, L. Kocmanová and J. Matějíček	131
<b>Continuum Model of the Layered Medium with Slippage and Nonlinear Conditions at the Interlayer Boundaries</b>	
I.S. Nikitin, N.G. Burago and A.D. Nikitin	137
<b>Numerical Study on Localization of Phase Transformation in NiTi Shape Memory Wires</b>	
M. Frost, P. Sedláček and P. Šittner	141
<b>The Life Duration for Compressor Disc under Torsional Vibrations of the Blades</b>	
I.S. Nikitin, N.G. Burago, A.D. Nikitin and P.A. Yushkovskiy	145
<b>The Cellular Automata Theory in Fracture Mechanisms Predictions</b>	
A. Neimitz and U. Janus	149
<b>Higher Order Frames and Material Symmetries</b>	
M. Kureš	153
<b>Existence and Convergence Questions in Computational Modelling of Crack Growth in Brittle and Quasi-Brittle Materials</b>	
J. Vala	157
<b>Influence of the Ceramic Foam Structure Irregularity on the Tensile Response</b>	
O. Ševeček, P. Navrátil, R. Papšík, P. Skalka and M. Kotoul	161
<b>Fan-Hinged Shear as a Unique Mechanism of Dynamic Shear Ruptures</b>	
B. Tarasov, M. Guzev, V. Sadovskiy and A. Losev	165
<b>Multi-Parameter Based Stress Distribution in Vicinity of Sharp Material Inclusion Tip</b>	
O. Krepl and J. Klusák	169
<b>The Effect of Residual Stress on the Process of Crack Growth Rate Determination in Polymer Pipes</b>	
J. Poduška, P. Hutař, J. Kučera, J. Sadílek, A. Frank, G. Pinter and L. Náhlík	174
<b>Study of Influence of Residual Stresses on Crack Propagation in Particulate Ceramic Composites</b>	
Z. Majer, L. Náhlík, K. Štegnerová, P. Hutař and R. Bermejo	178

<b>Analysis of Micro-Cracks Using Modified Couple-Stress Elasticity under Anti-Plane Deformation</b>	182
J.P. Vafa and S.J. Fariborz	
<b>Prediction of the Traction Separation Law of Ceramics Using Iterative Finite Element Modelling</b>	186
V. Kozák, Z. Chlup, P. Padělek and I. Dlouhý	
<b>Influence of Particle Attributes on Residual Stresses in Particulate Ceramic Composites</b>	190
K. Štegnerová, L. Náhlík, R. Bermejo and P. Hutař	
<b>Model of the Damaged Medium for the Assessment of Resource Characteristics of Structural Alloys for Degradation Mechanisms that Combine Fatigue and Creep of Material</b>	194
I. Volkov, I. Vorobtsov, L.A. Igumnov and A. Ipatov	
<b>Modeling of Deformation and Failure of Heat-Resistant Alloys under Cyclic Thermal-Mechanical Loading</b>	198
I. Volkov, L.A. Igumnov, S. Litvinchuk and I. Markov	
<b>Polarizable Models in Molecular Dynamics</b>	202
R. Gruzdev and A.N. Soloviev	

## Chapter 4: Multiaxial Deformation and Fracture, Experiment and Modeling

<b>Complete Williams Asymptotic Expansion near the Crack Tips of Collinear Cracks of Equal Lengths in an Infinite Plane</b>	209
L. Stepanova, P. Roslyakov and T. Gerasimova	
<b>Behavior of Lode Dependent Plasticity at Plane Strain Condition and its Implication to Ductile Fracture</b>	213
F. Šebek, J. Petruška and P. Kubík	
<b>Fretting High-Cycle Fatigue Assessment through a Multiaxial Critical Plane-Based Criterion in Conjunction with the Taylor's Point Method</b>	217
C. Ronchei, A. Carpinteri, G. Fortese, D. Scorza and S. Vantadori	
<b>Cracks Loaded by Rolling Contact - Influence of Plasticity around the Crack</b>	221
W. Daves and M. Kráčalík	
<b>Mechanical Behavior of 3D Printed Stochastic Lattice Structures</b>	225
G. Maliaris and E. Sarafis	
<b>On the Influence of Internal Void Size on the Fracture Stress of Constrained Solder Joints</b>	229
M. Lederer, G. Khatibi and J. Magnien	
<b>Prediction of Elastic Constants of Carbon Fabric/Polyurethane Composites</b>	233
S.F. Hwang and H.T. Liu	
<b>Crack Growth Studies in a Welded Ni-Base Superalloy</b>	237
A.H.S. Iyer, K. Stiller and M. Hörmqvist Colliander	

## Chapter 5: Micromechanisms of Fracture and Fatigue

<b>Fatigue Crack Propagation in Haynes 230: A Comparison between Single and Polycrystal Crack Closure Levels</b>	243
S. Beretta, S. Foletti, S. Rabbolini and H. Sehitoglu	
<b>Scales of Metal Fatigue Failures and Mechanisms for Origin of Subsurface Fracture Formation</b>	249
A. Shanyavskiy	
<b>The Influence of Microstructure Heterogeneities on the Very High Cycle Fatigue Behavior of Duplex Stainless Steel</b>	255
U. Krupp, M. Söker, T. Waurischk, A. Giertler, B. Dönges and H.J. Christ	
<b>Hydrogen-Induced Ductility Loss of Austenitic Stainless Steels for Slow Strain Rate Tensile Testing in High-Pressure Hydrogen Gas</b>	259
S. Matsuoka, J. Yamabe and H. Matsunaga	
<b>Intrinsic Behaviour of Mode II and Mode III Long Fatigue Cracks in Zirconium and the Ti-6Al-4V Alloy</b>	265
T. Vojtek, J. Pokluda, A. Hohenwarter and R. Pippin	

<b>Grain Size Effect on Low Cycle Fatigue Behavior of High Strength Structural Materials</b>	269
R. Ebara	
<b>Crack Initiation in Austenitic Stainless Steel Sanicro 25 Subjected to Thermomechanical Fatigue</b>	273
R. Petrás, V. Škorík and J. Polák	
<b>Deformation and Fracture of Metallic Nanowires</b>	277
M.M. Aish and M.D. Starostenkov	
<b>Method of Threshold Stress Determination for a Local Approach to Cleavage Fracture</b>	281
S. Kotrechko, V. Gryshchenko, V. Kozák and I. Dlouhý	
<b>Micromechanism of Thermally Induced Breaking of One-Dimensional Nanocrystals</b>	286
S. Kotrechko, N. Stetsenko and E. Kolyvoshko	
<b>Numerical Determination of Fatigue Threshold from CTOD</b>	290
D. Camas, P. Loureiro, P. Prates and F. Antunes	
<b>Crystal Plasticity Simulations of Haynes 230, an Analysis of Single Crystal and Polycrystalline Experiments</b>	294
P.G. Luccarelli, S. Foletti, G. Pataky and H. Sehitoglu	
<b>Fatigue Crack Surface Topography after Plasma Nitriding Process</b>	298
Z. Studeny, Z. Pokorný and D. Dobrocky	
<b>Toughening Behavior in Alloy 617 with Long Term Ageing</b>	302
G.C. Chai, M. Calmunger, S. Johansson and J. Moverare	
<b>Surface Roughness Effects on the Fatigue Behavior of As-Machined Inconel718</b>	306
H. Javadi, W. Jomaa, D. Texier, M. Brochu and P. Bocher	
<b>Stress Intensity Factors for Rough Cracks Loaded in Mode II</b>	310
S. Žák, J. Horníková and P. Šandera	
<b>Correlation of Fatigue Limit and Crack Growth Threshold Value to the Nanobainitic Microstructure</b>	314
I. Müller, R. Rementeria, F.G. Caballero, M. Kuntz and E. Kerscher	
<b>Study of Fracture Resistance of Nanolaminated Coatings Using Indentation and Impact Tests</b>	318
V. Buršíková, J. Sobota, J. Grossman, T. Fořt, L. Dupák, L. Zábranský, P. Souček, P. Vašina and J. Buršík	

## Chapter 6: Deformation, Fracture and Modeling of Materials in Biomedicine

<b>Computational Analysis of Crack Bridging in Bioglass®-Based Porous Scaffolds by Using Polymer Coatings</b>	325
M. Kotoul and P. Skalka	
<b>Links between the Orientation of Vascular Smooth Muscle and Microscopical Composition of Aortic Segments</b>	329
Z. Tonar, P. Kochová, R. Cimrman, J. Perktold, T. Kubíková, E. Demjen, V. Liška, M. Králičková and K. Witter	
<b>Fracture Mechanism of Interpenetrating Iron-Tricalcium Phosphate Composite</b>	333
M. Horynová, M. Casas Luna, E.B. Montúfar, S. Díaz de la Torre, L. Čelko, L. Klakurková, G. Diéguez-Trejo, K. Dvořák, T. Zikmund and J. Kaiser	
<b>Influence of Defects on High Cycle Fatigue Response of Ti45Nb Biocompatible Alloy</b>	337
M. Delshadmanesh, G. Khatibi, M. Lederer, M.J. ZEHETBAUER and H. Danninger	
<b>Histological Composition and Mechanical Properties of Cryopreserved Samples of Aortic and Pulmonary Valves</b>	341
T. Kubíková, P. Kochová, R. Fiala, J. Špatenka, J. Burkert, M. Králičková and Z. Tonar	
<b>Characterization of TiNb Films on Ti Alloys for Hard Tissue Replacement</b>	345
V. Starý, L. Cvrček, S. Daniš, J. Krčil, J. Málek and Z. Tolde	
<b>{332}&lt;113&gt; Twinning Deformation in a Cold-Rolled Biocompatible Ti-Nb-Zr-Fe Alloy</b>	350
V.D. Cojocaru, I. Cinca, N. Serban, D.M. Gordin, M.L. Angelescu, E.M. Cojocaru and D. Raducanu	
<b>The Changes in Surface Morphology and Mechanical Properties of Poly(3-Hydroxybutyrate) and its Copolymer Films during <i>In Vitro</i> Degradation</b>	354
V. Zhuikov, A. Bonartsev, D. Bagrov, A. Rusakov, A. Useinov, V. Myshkina, T. Mahina, K. Shaitan and G. Bonartseva	

<b>Molecular Architecture of Natural Polysaccharide Based Thin Films</b> Y.V. Chudinova, D.V. Kurek and V.P. Varlamov	358
<b>Microstructural Finite-Element Analysis of Influence of Bone Density and Histomorphometric Parameters on Mechanical Behavior of Mandibular Cancellous Bone Structure</b> P. Marcián, Z. Florian, L. Horáčková, J. Kaiser and L. Borák	362
<b>Ni-Ti Self-Expanding Vascular Stent Configuration and Biomedical Interaction with Artery: Finite Element Analysis</b> P. Shayanfard, P. Šandera, J. Horníková, J. Petruška, P. Šittner and J. Pokluda	366

## Chapter 7: Surface and Interface Microstructure and Properties

<b>First Principles Study of Water-Based Self-Assembled Nanobearing Effect in CrN/TiN Multilayer Coatings</b> D. Holec, J. Paulitsch and P.H. Mayrhofer	373
<b>Single and Multielement Coatings in a Fluidized Bed Reactor</b> K. Anthymidis, A. Trakali and D.N. Tsipas	379
<b>Durability of Amorphous and Crystalline BMAS Thermal Barrier Coatings Produced by Plasma Spraying</b> L. Čelko, D. Jech, K. Dvořák, I. Šulák, L. Klakurková and K. Obrtlík	383
<b>Formation of Thermally Sprayed Coatings on Grid-Like Structure Substrate</b> D. Jech, L. Čelko, L. Klakurková, K. Slámečka, M. Horynová and J. Švejcar	387
<b>Oxidation of Experimental Ti-Si-Al Based Alloys</b> S. Tkachenko, O. Datskevich, Z. Spotz, K. Dvořák, L. Kulak and L. Čelko	391
<b>The Influence of Plasma Nitriding Period on Nitrided Layers Thickness</b> O. Pilch and V. Hruby	395
<b>Anodizing of Zinc-Titanium Alloy in NaOH and KOH Baths</b> M. Remešová, L. Klakurková, L. Čelko, L. Sládková, D. Jech and J. Kaiser	399
<b>Nanostructural Investigation of Case Hardened Steels for Speed Gears Applications by Small-Angle Neutron Scattering (SANS)</b> M. Rogante, V. Havránek, P. Mikula and V. Ryukhtin	403
<b>Absorption and Diffusion of Oxygen in Ti-Al Bulk Alloys</b> A. Bakulin, A. Latyshev and S. Kulkova	408
<b>Tricalcium Phosphate - Magnesium Interface: Microstructure and Properties</b> M. Casas Luna, E.B. Montúfar, M. Horynová, P. Gejdoš, L. Klakurková, S. Diaz de la Torre, J. Kaiser and L. Čelko	412
<b>W-B-C Nanostructured Layers - Microstructure and Mechanical Properties</b> J. Buršík, I. Kuběna, V. Buršíková, P. Souček, L. Zábranský, S. Mirzaei and P. Vašina	416
<b>Degradation of YSZ/EUCOR TBC Coating System during High Temperature Low Cycle Fatigue Tests</b> I. Šulák, K. Obrtlík, L. Čelko and P. Gejdoš	420

## Chapter 8: Advanced Experimental and Theoretical Methods Investigation of Properties and Microstructure

<b>Influence of the Loading Path on the Deformation Mechanisms of Magnesium Alloys</b> K. Máthis, J. Čapek, B. Clausen and T. Panzner	427
<b>Residual Stress Effects and Predicting Crack Growth in Weldments</b> P. Brož	432
<b>On the Preparation of Advanced Materials via Pulsed Electric Current Sintering Procedures</b> S. Diaz de la Torre, L. Čelko, M. Casas Luna and E.B. Montúfar	436
<b>Microstructure Similarities between Phases F and U in Al-Pd-Co Alloys</b> I. Černičková, M. Adamech, L. Ďuriška, M. Drienovsky, D. Janičkovič, P. Priputen and J. Janovec	440
<b>AFM Study of Microstructure Role in the Cyclic Plasticity of Martensitic Steel</b> G. Seidametova, J.B. Vogt and I. Proriol Serre	444

<b>Measurement of the Porosity of Additive-Manufactured Al-Cu Alloy Using X-Ray Computed Tomography</b>	448
A. Zatočilová, T. Žíkmund, J. Kaiser, D. Paloušek and D. Koutný	
<b>Effective Elastic Properties of 3D Composites with Short Curvilinear Fibers: Numerical Simulation and Experimental Validation</b>	452
V.V. Mykhas'kiv and B.M. Stasyuk	
<b>Magneto-Mechanical Behavior of Iron during Monotonic and Cyclic Loading</b>	456
M. Smaga, L. Scherthan, H. Auerbach, J.A. Wolny, V. Schünemann and T. Beck	
<b>Field Measurement of Natural Electromagnetic Emissions near the Active Tectonic and Mass-Movement Fractures in Caves</b>	460
T. Trčka, R. Macků, P. Koktavý, P. Škarvada, I. Baroň and J. Stemberk	
<b>Influence of Carbon Admixtures to the Electrical Conductivity of Slag Mortars</b>	465
I. Kusák, M. Lunak, M. Mikova and P. Rovnaník	
<b>Investigation of Defects at Cu(In,Ga)Se<sub>2</sub> Flexible Solar Cells on Macroscopic and Microscopic Level and their Influence on Solar Cell Performance</b>	469
P. Škarvada, R. Macků and L. Skvarenina	
<b>Application of Electrical Measurements to Investigation of Solar Cell Microstructure Defects</b>	473
L. Skvarenina and R. Macků	
<b>Study of Initial Stages of Fatigue Process in Selective Laser Melting Material Using Acoustic Emission Method</b>	477
V. Kratochvílova, L. Zemanova, F. Vlasic and P. Mazal	
<b>Optimization of Process Field Measurement GNSS-RTK for Railway Infrastructure</b>	481
D. Bartonek, J. Bures and O. Svabensky	
<b>Evaluation of Acoustic Emission Events Generated at Three Point Bending of Different Concrete Specimens by Spectral Analysis</b>	485
L. Pazdera, L. Topolář, P. Daněk, J. Smutny and K. Mikulášek	
<b>An Initial Investigation on the Potential Applicability of Non-Destructive Methods to Assessing Joint Condition in Prefabricated Structures</b>	489
M. Manychova, O. Fuciman and L. Pazdera	

## Chapter 9: Experimental Studies on the Relation between Microstructure and Mechanical Properties

<b>Experimental Determination of Crack Driving Forces for Small Cracks</b>	495
A. Brueckner-Foit, P. Pitz, P. Grahlmann and F. Zeismann	
<b>Effect of Alloying and Thermal Processing on Mechanical Properties of TiAl Alloys</b>	501
A. Chlupová, M. Heczko, K. Obrtlík, P. Beran and T. Kruml	
<b>Micro Mechanical Behaviors and Damage in Nickel Base Alloy and Steels during Very High Cycle Fatigue</b>	506
G.C. Chai	
<b>Criteria for Prediction the Interfacial Crack Growth in Concrete</b>	514
J.M. Djoković, R.R. Nikolić, J. Bujňák and B. Hadzima	
<b>Effect of the Load Eccentricity on Fracture Behaviour of Cementitious Materials Subjected to the Modified Compact Tension Test</b>	518
S. Seitl, J.D. Ríos, H. Cifuentes and V. Veselý	
<b>High Cycle Fatigue Life of Ti6Al4V Alloy Produced by Direct Metal Laser Sintering</b>	522
R. Konečná, G. Nicoletto, A. Bača and L. Kunz	
<b>Surface Relief Formation in Relation to the Underlying Dislocation Arrangement</b>	526
V. Mazánová, M. Heczko, I. Kuběna and J. Polák	
<b>Microstructure-Based Assessment of the Corrosion Fatigue Behavior of the Creep-Resistant DieMag422 and AE42 Magnesium Alloys</b>	530
M. Klein, P. Buhr and F. Walther	
<b>Correlation between Dislocation Structures and Mechanical Fatigue Response of 316L Austenitic Steel Loaded with and without Mean Stress at High Temperature in Air and Water Environment</b>	534
M. Heczko, P. Spätič, H.P. Seifert and T. Kruml	

<b>Short-Term Stable Crack Propagation through Polyolefin Single- and Bilayered Structures - Influence of Welding, Composition and Direction of Crack Propagation</b>	538
R. Lach, T. Krolopp, P. Hutař, E. Nezbedova and W. Grellmann	
<b>The Influence of Plasma Nitriding Process on Mechanical Properties of 14NiCr14 Steel</b>	542
D. Dobrocky, P. Manas, Z. Pokorný and Z. Studeny	
<b>Microstructure Evolution of a Precipitation Hardened Cu-Ni-Si Alloy during Low Cycle Fatigue</b>	546
M. Delbove, J.B. Vogt, J. Bouquerel, T. Soreau, N. François and F. Primaux	
<b>Aging of the β21S Titanium Alloy</b>	550
H. Vigié, A. Soula and B. Viguier	
<b>The Development of Strength and Microstructure of the Resin Mortar</b>	554
M. Gruszczyński and M. Lenart	
<b>Analysis of Resin Mortar Shrinkage and Adhesion</b>	558
M. Lenart and M. Gruszczyński	
<b>Static Tensile Strength and E-Modulus Evaluation of a High-Strength Reinforcing Textile Fabrics</b>	562
I. Černý and D. Mikulová	
<b>A Study on the Influence of Concrete Type and Strength on the Relationship between Initial and Stabilized Secant Moduli of Elasticity</b>	566
L. Domagała	
<b>Low Temperature Strain Rate Sensitivity of Titanium Alloys</b>	570
H. Vigié, T. de Paula, M. Surand and B. Viguier	
<b>Microstructure Analysis and Mechanical Properties of Low Alloy High Strength Quenched and Partitioned Steel</b>	574
F. Forouzan, S. Gunasekaran, A. Hedayati, E. Vuorinen and F. Mücklich	
<b>Analysis of Selective Laser Melting Process Parameters Effect on Mechanical and Material Properties for Stainless Steel 316L</b>	579
P. Trubačová, M. Piska, J. Horníková, P. Šandera and K. Slámečka	
<b>Increasing of Durability of Surfaces by Plasma Nitriding Process</b>	583
Z. Pokorný, J. Kadlec, Z. Joska, Z. Studeny, M. Pospíchal and D. Dobrocky	
<b>An Abrasion Damage of Fly Ash Concretes Previously Subjected to Scaling</b>	587
A. Nowak-Michta	
<b>Combination of Experiments and Continuum Damage Mechanics Approach for Prediction of Creep Fracture in an Advanced 9%Cr Steel</b>	591
V. Sklenička, K. Kuchařová, M. Kvapilová, P. Král and J. Dvořák	
<b>Interaction of Creep and High Cycle Fatigue of IN 713LC Superalloy</b>	595
V. Horník, M. Šmíd, P. Hutař, L. Kunz and K. Hrbáček	
<b>Study of Phase Transformation of Medium Carbon Steel after Hot Plastic Deformation</b>	599
R. Kawulok, I. Schindler, P. Kawulok, J. Dänemark, P. Opěla and S. Rusz	
<b>Creep Processes in MAR-M247 Nickel-Base Superalloy</b>	603
M. Kvapilová, K. Kuchařová, K. Hrbáček and V. Sklenička	
<b>Influence of Extension of Load Spectrum on Estimation of Residual Fatigue Lifetime of Railway Axle</b>	607
P. Pokorný, P. Hutař and L. Náhlík	
<b>Laboratory Controlled Rolling of Microalloyed Steel for Production of Seamless Tubes</b>	611
P. Kawulok, R. Jurča, I. Schindler, S. Rusz, R. Turoň, P. Opěla and R. Kawulok	
<b>Influence of Fillet Welded Joints Subjected to Cyclic Bending on Fatigue Crack Growth in S355 Steel</b>	615
J. Lewandowski and D. Rozumek	
<b>Influence of the Microstructure on the Fatigue Cracks Growth in the Joint Zirconium-Steel Made by Explosive Welding</b>	619
M. Pražmowski, D. Rozumek and H. Paul	
<b>Alkali Activated Binders Based Concrete Specimens: Length Change and Fracture Tests</b>	623
V. Bílek Jr., H. Šimonová, I. Havlíková, L. Topolář, B. Kucharczyková and Z. Keršner	
<b>Corrosion-Mechanical Behavior of T91 and 14-19Cr ODS Steels Exposed to Flowing Lead-Bismuth</b>	627
A. Hojna, H. Hadraba, F. di Gabriele, R. Husak, I. Kuběna, L. Rozumová and D. Marušáková	

<b>Joining Low Temperature Co-Fired Ceramics, Al<sub>2</sub>O<sub>3</sub> and SiC Substrates for Higher Operating Temperature Applications</b>	
J. Somer, M. Klíma, P. Machac and I. Szendiuch	631
<b>Mechanical Properties and Microstructures of Narrow Gap Orbital Welded P91 Steel</b>	
M. Junek, M. Svobodová, J. Janovec and J. Horváth	635
<b>The Changes in Mechanical Properties of Austenitic Creep Resistant Steels SUPER 304H and HR3C Caused by Medium-Term Isothermal Ageing</b>	
J. Horváth, J. Janovec and M. Junek	639
