

Table of Contents

Preface

Chapter 1: Atomistic Studies on Deformation and Fracture

Development of Bond-Order Potentials for BCC Transition Metals V. Vitek, Y.S. Lin and M. Mrovec	3
Defects Mechanics; Three-Body Problem of Defects Interaction among Crack, Dislocations and Twin Boundary in Magnesium Y. Shibutani and D. Matsunaka	11
Temperature and Stress Dependence of Mobility of Screw Dislocation in BCC Iron H. Mori	17
Role of Localized Non-Equilibrium States in Nucleation of Plastic Deformation in Nanocrystalline Materials D.S. Kryzhevich, A.V. Korchuganov, K.P. Zolnikov and S.G. Psakhie	21
Simulating Nanoindentation of Thin Cu Films Using Molecular Dynamics and Peridynamics A. Ahadi, P. Hansson and S. Melin	25
Non-Schmid Phenomena in HCP Materials A. Ostapovets and O. Vatazhuk	29
A First-Principles Study of Phase Transition of Octahydro-1,3,5,7-Tetranitro-1,3,5,7-Tetrazocine (HMX) under Static Compression L. Zhang, S.L. Jiang and J. Chen	33
Different <i>Ab Initio</i> Approaches for Doping Descriptions: Tetragonal Deformation of Ni-Mn-Ga Alloys M. Zelený and I. Dlouhý	37
Theoretical Study of Inter-Planer Ordering of Mg-Based LPSO Structures D. Matsunaka and Y. Shibutani	41
Sample Geometry and the Brittle-Ductile Behavior of Edge Cracks in 3D Atomistic Simulations by Molecular Dynamics V. Pelikán, P. Hora, A. Machová, R. Kolman and A. Uhnáková	45
Damage Progression and Fragmentation in Atomistic, Single Crystal Copper at High Strain Rates B.D. Huddleston, D.E. Dickel, M.F. Horstemeyer, N. Williams, K. Danielson and Y. Hammi	49
Tensile Behavior of Single-Crystal Nanosized Copper Beams with Voids S. Melin, A. Ahadi and P. Hansson	53
Dynamics of Bicomponent Nanoparticle Formation under Metal Wire Explosion K.P. Zolnikov, D.S. Kryzhevich, A.V. Korchuganov and S.G. Psakhie	57
Atomistic Model Analysis of Buckling Behavior of Compressed Carbon Nanotubes Y. Umeno, M. Sato, H. Shima and M. Sato	61
Cross-Sectional Deformation in Multi-Walled Carbon Nanotubes under Hydrostatic Pressure M. Sato, Y. Yachi, I. Koike, H. Shima and Y. Umeno	65
Development of Neural-Network Interatomic Potentials for Structural Materials R. Kobayashi, T. Tamura, I. Takeuchi and S. Ogata	69
Coarse-Grained Molecular Dynamics Simulation of Fracture Problems in Polycarbonate A. Kubo and Y. Umeno	73
First-Principles Simulation on Thermoelectric Properties in Low-Dimensional Materials K. Nakamura	77
Comparison of Classical Molecular Dynamics and <i>Ab Initio</i> Modeling of Discrete Breathers in Graphene I.P. Lobzenko, G.M. Chechin and S.V. Dmitriev	81

Chapter 2: Deformation and Fracture Models Based on Crystal Defects Behaviour

Mesososcopic Description of Dislocation Patterning Using the Concept of Incompatibility of Strains	
R. Gröger and T. Lookman	87
How to Measure a Dislocation's Breakthrough Stress to Estimate the Grain Boundary Resistance against Slip Transfer Based on the DFZ-Model of Fracture	
F. Schaefer, M. Thielen, M. Marx and C. Motz	93
Shape of Small Prismatic Dislocation Loops in Tungsten and Iron	
J. Fikar and R. Gröger	97
Interaction of Dislocations at Interfaces in Multilayered Materials	
H. Koguchi and Y. Tanaka	102
A Numerical Analysis of Deformation Processes in Oxide Dispersion-Strengthened Materials - Influence of Dislocation-Particle Interactions	
T. Zálezák, F. Šiška, L. Stratil, N. Luptáková, M. Šmíd, D. Bártková, J. Svoboda and A. Dlouhý	106
Influence of Impurities on Grain Boundaries Cohesion in B2-TiMe	
S. Kulkova, A. Bakulin and S. Kulkov	110

Chapter 3: Mathematical Modeling Microstructure, Deformation and Fracture

Interpretation of Plasticity Effects Using the CJP Crack Tip Field Model	
M.N. James, C.J. Christopher, F.A. Díaz Garrido, J.M. Vasco-Olmo, T. Kakiuchi and E.A. Patterson	117
Alloying-Driven Phase Stability in Group-VB Transition Metals under Compression	
A. Landa and P. Söderlind	125
Some Issues in Relations between Microstructure and Indentation Measurements	
P. Haušild, A. Materna, L. Kocmanová and J. Matějček	131
Continuum Model of the Layered Medium with Slippage and Nonlinear Conditions at the Interlayer Boundaries	
I.S. Nikitin, N.G. Burago and A.D. Nikitin	137
Numerical Study on Localization of Phase Transformation in NiTi Shape Memory Wires	
M. Frost, P. Sedlák and P. Šittner	141
The Life Duration for Compressor Disc under Torsional Vibrations of the Blades	
I.S. Nikitin, N.G. Burago, A.D. Nikitin and P.A. Yushkovskiy	145
The Cellular Automata Theory in Fracture Mechanisms Predictions	
A. Neimitz and U. Janus	149
Higher Order Frames and Material Symmetries	
M. Kureš	153
Existence and Convergence Questions in Computational Modelling of Crack Growth in Brittle and Quasi-Brittle Materials	
J. Vala	157
Influence of the Ceramic Foam Structure Irregularity on the Tensile Response	
O. Ševeček, P. Navrátil, R. Papšík, P. Skalka and M. Kotoul	161
Fan-Hinged Shear as a Unique Mechanism of Dynamic Shear Ruptures	
B. Tarasov, M. Guzev, V. Sadovskiy and A. Losev	165
Multi-Parameter Based Stress Distribution in Vicinity of Sharp Material Inclusion Tip	
O. Krepl and J. Klusák	169
The Effect of Residual Stress on the Process of Crack Growth Rate Determination in Polymer Pipes	
J. Poduška, P. Hutař, J. Kučera, J. Sadílek, A. Frank, G. Pinter and L. Náhlík	174
Study of Influence of Residual Stresses on Crack Propagation in Particulate Ceramic Composites	
Z. Majer, L. Náhlík, K. Štegnarová, P. Hutař and R. Bermejo	178

Analysis of Micro-Cracks Using Modified Couple-Stress Elasticity under Anti-Plane Deformation J.P. Vafa and S.J. Fariborz	182
Prediction of the Traction Separation Law of Ceramics Using Iterative Finite Element Modelling V. Kozák, Z. Chlup, P. Padělek and I. Dlouhý	186
Influence of Particle Attributes on Residual Stresses in Particulate Ceramic Composites K. Štegnarová, L. Náhlík, R. Bermejo and P. Hutař	190
Model of the Damaged Medium for the Assessment of Resource Characteristics of Structural Alloys for Degradation Mechanisms that Combine Fatigue and Creep of Material I. Volkov, I. Vorobtsov, L.A. Igumnov and A. Ipatov	194
Modeling of Deformation and Failure of Heat-Resistant Alloys under Cyclic Thermal-Mechanical Loading I. Volkov, L.A. Igumnov, S. Litvinchuk and I. Markov	198
Polarizable Models in Molecular Dynamics R. Gruzdev and A.N. Soloviev	202

Chapter 4: Multiaxial Deformation and Fracture, Experiment and Modeling

Complete Williams Asymptotic Expansion near the Crack Tips of Collinear Cracks of Equal Lengths in an Infinite Plane L. Stepanova, P. Roslyakov and T. Gerasimova	209
Behavior of Lode Dependent Plasticity at Plane Strain Condition and its Implication to Ductile Fracture F. Šebek, J. Petruška and P. Kubík	213
Fretting High-Cycle Fatigue Assessment through a Multiaxial Critical Plane-Based Criterion in Conjunction with the Taylor's Point Method C. Ronchei, A. Carpinteri, G. Fortese, D. Scorza and S. Vantadori	217
Cracks Loaded by Rolling Contact - Influence of Plasticity around the Crack W. Daves and M. Kráčalík	221
Mechanical Behavior of 3D Printed Stochastic Lattice Structures G. Maliaris and E. Sarafis	225
On the Influence of Internal Void Size on the Fracture Stress of Constrained Solder Joints M. Lederer, G. Khatibi and J. Magnien	229
Prediction of Elastic Constants of Carbon Fabric/Polyurethane Composites S.F. Hwang and H.T. Liu	233
Crack Growth Studies in a Welded Ni-Base Superalloy A.H.S. Iyer, K. Stiller and M. Hörnqvist Colliander	237

Chapter 5: Micromechanisms of Fracture and Fatigue

Fatigue Crack Propagation in Haynes 230: A Comparison between Single and Polycrystal Crack Closure Levels S. Beretta, S. Foletti, S. Rabbolini and H. Sehitoglu	243
Scales of Metal Fatigue Failures and Mechanisms for Origin of Subsurface Fracture Formation A. Shanyavskiy	249
The Influence of Microstructure Heterogeneities on the Very High Cycle Fatigue Behavior of Duplex Stainless Steel U. Krupp, M. Söker, T. Waurischk, A. Giertler, B. Dönges and H.J. Christ	255
Hydrogen-Induced Ductility Loss of Austenitic Stainless Steels for Slow Strain Rate Tensile Testing in High-Pressure Hydrogen Gas S. Matsuoka, J. Yamabe and H. Matsunaga	259
Intrinsic Behaviour of Mode II and Mode III Long Fatigue Cracks in Zirconium and the Ti-6Al-4V Alloy T. Vojtek, J. Pokluda, A. Hohenwarter and R. Pippan	265

Grain Size Effect on Low Cycle Fatigue Behavior of High Strength Structural Materials R. Ebara	269
Crack Initiation in Austenitic Stainless Steel Sanicro 25 Subjected to Thermomechanical Fatigue R. Petráš, V. Škorík and J. Polák	273
Deformation and Fracture of Metallic Nanowires M.M. Aish and M.D. Starostenkov	277
Method of Threshold Stress Determination for a Local Approach to Cleavage Fracture S. Kotrechko, V. Gryshchenko, V. Kozák and I. Dlouhý	281
Micromechanism of Thermally Induced Breaking of One-Dimensional Nanocrystals S. Kotrechko, N. Stetsenko and E. Kolyvoshko	286
Numerical Determination of Fatigue Threshold from CTOD D. Camas, P. Loureiro, P. Prates and F. Antunes	290
Crystal Plasticity Simulations of Haynes 230, an Analysis of Single Crystal and Polycrystalline Experiments P.G. Luccarelli, S. Foletti, G. Pataky and H. Sehitoglu	294
Fatigue Crack Surface Topography after Plasma Nitriding Process Z. Studeny, Z. Pokorný and D. Dobrocky	298
Toughening Behavior in Alloy 617 with Long Term Ageing G.C. Chai, M. Calmunger, S. Johansson and J. Moverare	302
Surface Roughness Effects on the Fatigue Behavior of As-Machined Inconel718 H. Javadi, W. Jomaa, D. Texier, M. Brochu and P. Bocher	306
Stress Intensity Factors for Rough Cracks Loaded in Mode II S. Žák, J. Horníková and P. Šandera	310
Correlation of Fatigue Limit and Crack Growth Threshold Value to the Nanobainitic Microstructure I. Müller, R. Rementeria, F.G. Caballero, M. Kuntz and E. Kerscher	314
Study of Fracture Resistance of Nanolaminate Coatings Using Indentation and Impact Tests V. Buršíková, J. Sobota, J. Grossman, T. Fořt, L. Dupák, L. Zábranský, P. Souček, P. Vašina and J. Buršík	318

Chapter 6: Deformation, Fracture and Modeling of Materials in Biomedicine

Computational Analysis of Crack Bridging in Bioglass[®]-Based Porous Scaffolds by Using Polymer Coatings M. Kotoul and P. Skalka	325
Links between the Orientation of Vascular Smooth Muscle and Microscopical Composition of Aortic Segments Z. Tonar, P. Kočová, R. Cimrman, J. Perktold, T. Kubíková, E. Demjen, V. Liška, M. Králíčková and K. Witter	329
Fracture Mechanism of Interpenetrating Iron-Tricalcium Phosphate Composite M. Horynová, M. Casas Luna, E.B. Montúfar, S. Díaz de la Torre, L. Čelko, L. Klakurková, G. Diéguez-Trejo, K. Dvořák, T. Zikmund and J. Kaiser	333
Influence of Defects on High Cycle Fatigue Response of Ti45Nb Biocompatible Alloy M. Delshadmanesh, G. Khatibi, M. Lederer, M.J. ZEHETBAUER and H. Danninger	337
Histological Composition and Mechanical Properties of Cryopreserved Samples of Aortic and Pulmonary Valves T. Kubíková, P. Kočová, R. Fiala, J. Špatenka, J. Burkert, M. Králíčková and Z. Tonar	341
Characterization of TiNb Films on Ti Alloys for Hard Tissue Replacement V. Starý, L. Cvrček, S. Daniš, J. Krčil, J. Málek and Z. Tolde	345
{332}<113> Twinning Deformation in a Cold-Rolled Biocompatible Ti-Nb-Zr-Fe Alloy V.D. Cojocar, I. Cinca, N. Serban, D.M. Gordin, M.L. Angelescu, E.M. Cojocar and D. Raducanu	350
The Changes in Surface Morphology and Mechanical Properties of Poly(3-Hydroxybutyrate) and its Copolymer Films during <i>In Vitro</i> Degradation V. Zhuikov, A. Bonartsev, D. Bagrov, A. Rusakov, A. Useinov, V. Myshkina, T. Mahina, K. Shaitan and G. Bonartseva	354

Molecular Architecture of Natural Polysaccharide Based Thin Films Y.V. Chudinova, D.V. Kurek and V.P. Varlamov	358
Microstructural Finite-Element Analysis of Influence of Bone Density and Histomorphometric Parameters on Mechanical Behavior of Mandibular Cancellous Bone Structure P. Marcián, Z. Florian, L. Horáčková, J. Kaiser and L. Borák	362
Ni-Ti Self-Expanding Vascular Stent Configuration and Biomedical Interaction with Artery: Finite Element Analysis P. Shayanfard, P. Šandera, J. Horníková, J. Petruška, P. Šittner and J. Pokluda	366

Chapter 7: Surface and Interface Microstructure and Properties

First Principles Study of Water-Based Self-Assembled Nanobearing Effect in CrN/TiN Multilayer Coatings D. Holec, J. Paulitsch and P.H. Mayrhofer	373
Single and Multielement Coatings in a Fluidized Bed Reactor K. Anthymidis, A. Trakali and D.N. Tsipas	379
Durability of Amorphous and Crystalline BMAS Thermal Barrier Coatings Produced by Plasma Spraying L. Čelko, D. Jech, K. Dvořák, I. Šulák, L. Klakurková and K. Obrtlík	383
Formation of Thermally Sprayed Coatings on Grid-Like Structure Substrate D. Jech, L. Čelko, L. Klakurková, K. Slámečka, M. Horynová and J. Švejcár	387
Oxidation of Experimental Ti-Si-Al Based Alloys S. Tkachenko, O. Datskevich, Z. Spotz, K. Dvořák, L. Kulak and L. Čelko	391
The Influence of Plasma Nitriding Period on Nitrided Layers Thickness O. Pilch and V. Hruby	395
Anodizing of Zinc-Titanium Alloy in NaOH and KOH Baths M. Remešová, L. Klakurková, L. Čelko, L. Sládková, D. Jech and J. Kaiser	399
Nanostructural Investigation of Case Hardened Steels for Speed Gears Applications by Small-Angle Neutron Scattering (SANS) M. Rogante, V. Havránek, P. Mikula and V. Ryukhtin	403
Absorption and Diffusion of Oxygen in Ti-Al Bulk Alloys A. Bakulin, A. Latyshev and S. Kulkova	408
Tricalcium Phosphate - Magnesium Interface: Microstructure and Properties M. Casas Luna, E.B. Montúfar, M. Horynová, P. Gejdoš, L. Klakurková, S. Díaz de la Torre, J. Kaiser and L. Čelko	412
W-B-C Nanostructured Layers - Microstructure and Mechanical Properties J. Buršík, I. Kuběna, V. Buršíková, P. Souček, L. Zábranský, S. Mirzaei and P. Vašina	416
Degradation of YSZ/EUCOR TBC Coating System during High Temperature Low Cycle Fatigue Tests I. Šulák, K. Obrtlík, L. Čelko and P. Gejdoš	420

Chapter 8: Advanced Experimental and Theoretical Methods Investigation of Properties and Microstructure

Influence of the Loading Path on the Deformation Mechanisms of Magnesium Alloys K. Máthis, J. Čapek, B. Clausen and T. Panzner	427
Residual Stress Effects and Predicting Crack Growth in Weldments P. Brož	432
On the Preparation of Advanced Materials via Pulsed Electric Current Sintering Procedures S. Díaz de la Torre, L. Čelko, M. Casas Luna and E.B. Montúfar	436
Microstructure Similarities between Phases F and U in Al-Pd-Co Alloys I. Černíková, M. Adamech, L. Ďuriška, M. Drienovsky, D. Janičkovič, P. Priputen and J. Janovec	440
AFM Study of Microstructure Role in the Cyclic Plasticity of Martensitic Steel G. Seidametova, J.B. Vogt and I. Proriol Serre	444

Measurement of the Porosity of Additive-Manufactured Al-Cu Alloy Using X-Ray Computed Tomography	
A. Zatočilová, T. Žikmund, J. Kaiser, D. Paloušek and D. Koutný	448
Effective Elastic Properties of 3D Composites with Short Curvilinear Fibers: Numerical Simulation and Experimental Validation	
V.V. Mykhas'kiv and B.M. Stasyuk	452
Magneto-Mechanical Behavior of Iron during Monotonic and Cyclic Loading	
M. Smaga, L. Scherthan, H. Auerbach, J.A. Wolny, V. Schünemann and T. Beck	456
Field Measurement of Natural Electromagnetic Emissions near the Active Tectonic and Mass-Movement Fractures in Caves	
T. Trčka, R. Macků, P. Koktavý, P. Škarvada, I. Baroň and J. Stemberk	460
Influence of Carbon Admixtures to the Electrical Conductivity of Slag Mortars	
I. Kusák, M. Lunak, M. Mikova and P. Rovnaník	465
Investigation of Defects at Cu(In,Ga)Se₂ Flexible Solar Cells on Macroscopic and Microscopic Level and their Influence on Solar Cell Performance	
P. Škarvada, R. Macků and L. Skvarenina	469
Application of Electrical Measurements to Investigation of Solar Cell Microstructure Defects	
L. Skvarenina and R. Macků	473
Study of Initial Stages of Fatigue Process in Selective Laser Melting Material Using Acoustic Emission Method	
V. Kratochvilova, L. Zemanova, F. Vlasic and P. Mazal	477
Optimization of Process Field Measurement GNSS-RTK for Railway Infrastructure	
D. Bartonek, J. Bures and O. Svabensky	481
Evaluation of Acoustic Emission Events Generated at Three Point Bending of Different Concrete Specimens by Spectral Analysis	
L. Pazdera, L. Topolář, P. Daněk, J. Smutny and K. Mikulášek	485
An Initial Investigation on the Potential Applicability of Non-Destructive Methods to Assessing Joint Condition in Prefabricated Structures	
M. Manychova, O. Fuciman and L. Pazdera	489

Chapter 9: Experimental Studies on the Relation between Microstructure and Mechanical Properties

Experimental Determination of Crack Driving Forces for Small Cracks	
A. Brueckner-Foít, P. Pitz, P. Grahlmann and F. Zeismann	495
Effect of Alloying and Thermal Processing on Mechanical Properties of TiAl Alloys	
A. Chlupová, M. Heczko, K. Obrtlík, P. Beran and T. Kruml	501
Micro Mechanical Behaviors and Damage in Nickel Base Alloy and Steels during Very High Cycle Fatigue	
G.C. Chai	506
Criteria for Prediction the Interfacial Crack Growth in Concrete	
J.M. Djoković, R.R. Nikolić, J. Bujňák and B. Hadzima	514
Effect of the Load Eccentricity on Fracture Behaviour of Cementitious Materials Subjected to the Modified Compact Tension Test	
S. Seitzl, J.D. Ríos, H. Cifuentes and V. Veselý	518
High Cycle Fatigue Life of Ti6Al4V Alloy Produced by Direct Metal Laser Sintering	
R. Konečná, G. Nicoletto, A. Bača and L. Kunz	522
Surface Relief Formation in Relation to the Underlying Dislocation Arrangement	
V. Mazánová, M. Heczko, I. Kuběna and J. Polák	526
Microstructure-Based Assessment of the Corrosion Fatigue Behavior of the Creep-Resistant DieMag422 and AE42 Magnesium Alloys	
M. Klein, P. Buhr and F. Walther	530
Correlation between Dislocation Structures and Mechanical Fatigue Response of 316L Austenitic Steel Loaded with and without Mean Stress at High Temperature in Air and Water Environment	
M. Heczko, P. Spätig, H.P. Seifert and T. Kruml	534

Short-Term Stable Crack Propagation through Polyolefin Single- and Bilayered Structures - Influence of Welding, Composition and Direction of Crack Propagation	
R. Lach, T. Krolopp, P. Hutař, E. Nezbedova and W. Grellmann	538
The Influence of Plasma Nitriding Process on Mechanical Properties of 14NiCr14 Steel	
D. Dobrocky, P. Manas, Z. Pokorný and Z. Studeny	542
Microstructure Evolution of a Precipitation Hardened Cu-Ni-Si Alloy during Low Cycle Fatigue	
M. Delbove, J.B. Vogt, J. Bouquerel, T. Soreau, N. François and F. Primaux	546
Aging of the β21S Titanium Alloy	
H. Vigié, A. Soula and B. Viguié	550
The Development of Strength and Microstructure of the Resin Mortar	
M. Gruszczyński and M. Lenart	554
Analysis of Resin Mortar Shrinkage and Adhesion	
M. Lenart and M. Gruszczyński	558
Static Tensile Strength and E-Modulus Evaluation of a High-Strength Reinforcing Textile Fabrics	
I. Černý and D. Mikulová	562
A Study on the Influence of Concrete Type and Strength on the Relationship between Initial and Stabilized Secant Moduli of Elasticity	
L. Domagała	566
Low Temperature Strain Rate Sensitivity of Titanium Alloys	
H. Vigié, T. de Paula, M. Surand and B. Viguié	570
Microstructure Analysis and Mechanical Properties of Low Alloy High Strength Quenched and Partitioned Steel	
F. Forouzan, S. Gunasekaran, A. Hedayati, E. Vuorinen and F. Mücklich	574
Analysis of Selective Laser Melting Process Parameters Effect on Mechanical and Material Properties for Stainless Steel 316L	
P. Trubačová, M. Piska, J. Horníková, P. Šandera and K. Slámečka	579
Increasing of Durability of Surfaces by Plasma Nitriding Process	
Z. Pokorný, J. Kadlec, Z. Joska, Z. Studeny, M. Pospíchal and D. Dobrocky	583
An Abrasion Damage of Fly Ash Concretes Previously Subjected to Scaling	
A. Nowak-Michta	587
Combination of Experiments and Continuum Damage Mechanics Approach for Prediction of Creep Fracture in an Advanced 9%Cr Steel	
V. Sklenička, K. Kuchařová, M. Kvapilová, P. Král and J. Dvořák	591
Interaction of Creep and High Cycle Fatigue of IN 713LC Superalloy	
V. Horník, M. Šmíd, P. Hutař, L. Kunz and K. Hrbáček	595
Study of Phase Transformation of Medium Carbon Steel after Hot Plastic Deformation	
R. Kawulok, I. Schindler, P. Kawulok, J. Dänemark, P. Opěla and S. Rusz	599
Creep Processes in MAR-M247 Nickel-Base Superalloy	
M. Kvapilová, K. Kuchařová, K. Hrbáček and V. Sklenička	603
Influence of Extension of Load Spectrum on Estimation of Residual Fatigue Lifetime of Railway Axle	
P. Pokorný, P. Hutař and L. Náhlík	607
Laboratory Controlled Rolling of Microalloyed Steel for Production of Seamless Tubes	
P. Kawulok, R. Jurča, I. Schindler, S. Rusz, R. Turoň, P. Opěla and R. Kawulok	611
Influence of Fillet Welded Joints Subjected to Cyclic Bending on Fatigue Crack Growth in S355 Steel	
J. Lewandowski and D. Rozumek	615
Influence of the Microstructure on the Fatigue Cracks Growth in the Joint Zirconium-Steel Made by Explosive Welding	
M. Prażmowski, D. Rozumek and H. Paul	619
Alkali Activated Binders Based Concrete Specimens: Length Change and Fracture Tests	
V. Bílek Jr., H. Šimonová, I. Havlíková, L. Topolář, B. Kucharczyková and Z. Keršner	623
Corrosion-Mechanical Behavior of T91 and 14-19Cr ODS Steels Exposed to Flowing Lead-Bismuth	
A. Hojna, H. Hadraba, F. di Gabriele, R. Husak, I. Kuběna, L. Rozumová and D. Marušíková	627

Joining Low Temperature Co-Fired Ceramics, Al₂O₃ and SiC Substrates for Higher Operating Temperature Applications J. Somer, M. Klíma, P. Machac and I. Szendiuch	631
Mechanical Properties and Microstructures of Narrow Gap Orbital Welded P91 Steel M. Junek, M. Svobodová, J. Janovec and J. Horváth	635
The Changes in Mechanical Properties of Austenitic Creep Resistant Steels SUPER 304H and HR3C Caused by Medium-Term Isothermal Ageing J. Horváth, J. Janovec and M. Junek	639
