

Table of Contents

Laser Scattering Measurement of Microdefects on Silicon Oxide Wafer T. Ha, T. Miyoshi, Y. Takaya and S. Takahashi	3
Characterisation of Surface Properties by a Multi-Function TPM X.P. Liu and J. Zhang	9
Development of an Evanescent Light Measurement System for Si Wafer Microdefect Detection S. Takahashi, R. Nakajima, T. Miyoshi, Y. Takaya and K. Takamasu	15
An Embedded FBG Sensor for Dynamic Strain Measurement for a Clamped-Clamped Composite Structure H.Y. Ling, A.K.T. Lau, L. Cheng, J. Wei, R.S. Thomson and M.L. Scott	21
A Thermovision Method for Studying Deformation Kinetics of Materials and Structure Elements E.S. Lukin and A.M. Ivanov	27
Damage Detection of Composite Structures Using Dynamic Analysis L.H. Yam, L. Cheng, Z. Wei and Y.J. Yan	33
Investigation of Nonisothermal Crystallization Behaviors of Poly and Silica Nanocomposites Using Differential Scanning Calorimetry L.X. Kong and Z. Peng	39
Ellipsometric Detection of Transitional Surface Structures on Decapped GaAs(001) A.V. Vasev and S.I. Chikichev	45
Temperature Effect on the Stability of CuO Nanofluids Based on Measured Particle Distribution H. Chang, C.H. Lo, T.T. Tsung, Y.Y. Cho, D.C. Tien, L.C. Chen and C.H. Thai	51
Determination of Young's Modulus of Micromechanical Silicon Films Using an Acoustic Excitation and Optical Detection Resonance Method Y.M. Liu, W.J. Tian and S.J. Zhang	57
A High Precision AFM for Nanometrology of Large Area Micro-Structured Surfaces J. Aoki, W. Gao, S. Kiyono and T. Ono	65
A Study on the Mechanism of a New High Speed Scanning Miniature Nano-Measurement Probe K.C. Fan and Y.J. Chen	71
Use of Fiber Interferometer for AFM Cantilever Probe Displacement Control N.C. Shie, T.L. Chen and K.Y. Cheng	77
Determining the Radial Modulus of DNA Measured by VPSFM Y.H. Chen, X.J. Li, X.F. Zhou, J.L. Sun, W.H. Huang and J. Hu	83
Pitch Calibration by an Active Temperature Controlled Traceable Atomic Force Microscope and a Laser Diffractometer C.J. Chen, S.P. Pan and L.C. Chang	89
Micro-Force Calibration with an All-Coil Magnetic Levitation S.W. Hsu and T.L. Chen	95
Effect of Residual Stresses on a Micromachined Z-Axis Vibrating Rate Gyroscope A.P. Qiu, Y. Su, S.R. Wang and B.L. Zhou	101
A Measurement System for Step Imprint Lithography H.Z. Liu, B.H. Lu, Y.C. Ding, D.C. Li, Y.P. Tang and T. Jin	107
Design and Simulation of a DETF for Use in a Resonant Gyroscope Y.L. Zhu, S.R. Wang and A.P. Qiu	113
Micro Angle Measurement for a Scanning Stage Q.G. Liu, M. Li, D.C. Li, Z.G. Li and X.T. Hu	119
Defocusing Detection of Geometric Sizes in Micro-Machining X.H. Qu, X.H. Zhao and S.H. Ye	125
A Biological Sensor for Detecting Foreign Bodies Using a Balloon Probe H. Shimizu, S. Kiyono, W. Gao and H. Shoji	133
A Resonant Frequency Measurement System for Osseointegration Trans-Femoral Implant W. Xu, F. Shao and D. Ewins	139

Innovative 3D Dental Measurement for Tooth Model Restoration	145
L.C. Chen and Z.Q. Xu	
An Intelligent CO₂ Sensor for Private Homes	151
M. Gürtnar, N. Neumann and F. Schneider	
A Hybrid Optical Correlator Used as an Intelligent Instrument	159
S. Chang and C.P. Grover	
A Mobile Shearography System for Non-Destructive Testing of Industrial and Artwork Components	165
M. Kalms and W. Jueptner	
A High Precision Three-Dimensional Optical Sensor Using Fourier Transform Profilometry	171
H.Y. Sung, L.F. Tien, C.Y. Lin, C.Y. Lo, Y.R. Lin, Y.M. Lin and T.H. Tao	
Development and Verification of a Confocal Fabry-Perot Interferometer for Broad Band Ultrasound Detection	177
J.H. Shaw, J.Y. Lee, L.H. Chow and H.C. Shih	
Laser Feedback Interferometers Based on Orthogonally Polarized He-Ne Lasers	183
S.L. Zhang and Y.C. Ding	
A Two-Color Heterodyne Interferometer Based on Diffraction Grating for Displacement Measurement	189
G.H. Wu, Z.J. Cai and L.J. Zeng	
A New Method for the Development of Frequency Standards for the Optical Wavelength Range of 243nm	195
E.K. Izrailov and V.F. Ezhov	
Optical Measurement Technologies and Systems for Industrial Applications	201
Y.V. Chuguy	
Influence of the Size of Round Objects on the Output Signal of Laser Measuring Scanner	209
R. Jabłoński	
A Study on the Multi-Wavelength Drop Analysis Technology	215
G. Hao, Z.R. Qiu, G.X. Zhang and A.P. Zhang	
Accurate Estimation of Phase Distribution on Reference Plane in Grating Projection Measurement	221
M.R. Zhao, Y.C. Lin, X.B. Niu and D.M. Cheng	
Measurement of Core Position of Fiber Array by a Calibrated Mask Method	227
S.W. Hsu, Y.D. Jiaan and M.S. Huang	
Detection of Random Defects on Highly Reflective and Complex Surfaces	233
X.H. Qu, Y. He, G.X. Jia, J.M. Ding and S.H. Ye	
Automatic Laser Monitoring for Dam Safety	239
K.D. Yue, X. Zhou and J. Gao	
An Application of the Kalman Filter in a Laser Tracking Measurement System	245
X.R. Chen, P. Cai and W.K. Shi	
A Scanning Multi-Probe Straightness Measurement System for Alignment of Linear Collider Accelerator	253
W. Gao, J. Yokoyama, S. Kiyono and N. Hitomi	
Measurement of the Straightness of a Leadscrew-Driven Precision Stage	259
Y. Arai, W. Gao, S. Kiyono and T. Kuriyagawa	
A Circular Profile Measurement Method Using Software Techniques	265
E. Okuyama and K. Mitsui	
A High Precision Circuit Based on Digital Techniques for Roundness Measurement	271
W.Q. Zhao, J.B. Tan, Z. Xue and Z.D. Feng	
A Circle Contour Measurement Technique Based on Randomized Hough Transform Using Gradient Information	277
J.W. Cui and J.B. Tan	
A Coaxiality Measurement Method for Hole Using Non-Diffracting Beam Technology	283
X.B. Zhang, X.Q. Jiang and Z. Li	
Effects of Rotation Angle on the Circular Test of Geometric Errors	289
H.L. Liu	
Theoretical Analysis and Basic Experiments for the 3D Displacement Measurement Using Ring-Shaped Laser Beam	295
S. Usuki, K. Enami, M. Hiraki, S. Takahashi and K. Takamasu	

High Resolution Ultrasonic Distance Measurement Systems Using Pulse Compression and Their Applications	301
H.F. Schweinzer and H. Elmer	
A Multi-Range Fiber-Optical Non-Contact Displacement Micrometer	307
G.J. Hwang and W.H. Ko	
A Study of the Deformation Measurement of 3D Displacement Field	313
S.R. Lee, Z.S. Luo, H.S. Chiou, B.G. Wang and L.S. Liu	
A Displacement Sensor Based on Differential Frequency Measurement	319
D.L. Peng, X.H. Zhang and X.K. Liu	
Development of a Sensitive Probe for Coordinate Measuring Machines	325
M. Watanabe and R. Furutani	
A Portable 3D Vision Coordinate Measurement System Using a Light Pen	331
S.G. Liu, K. Peng, F.S. Huang, G.X. Zhang and P. Li	
A High Precision Dynamic Autocollimator	337
M.Z. Shen and S.T. Liao	
Three-Dimensional Slit Width Measurement for Long Precision Slot Dies	343
M. Furukawa, W. Gao, H. Shimizu, S. Kiyono, M. Yasutake and K. Takahashi	
Comprehensive Inspection of Geometric Parameters of Running Freight Car Wheel Pairs	349
A.N. Baybakov, V.M. Gurenko, S.P. Yunoshev, S.V. Plotnikov, V.V. Sotnikov and K.P. Kascheev	
A New Method for the Measurement of Dynamic Angular Errors of a Photoelectric Shaft Encoder	355
X.D. Cao, T.Q. Fan and L.H. Geng	
Dynamic Measurement of Bearing Radial Clearances	361
Y.X. Chen and S.N. Yang	
Detection and Control of Synchro-Operation of Long-Stroke Cylinders in a Deep Ocean Mining Heave Compensation System	367
B.H. Wu, T.B. Xiao, D.P. Zou and J.J. Long	
An Ultraprecision On-Machine Measurement System	375
H. Ohmori, Y. Watanabe, W.M. Lin, K. Katahira and T. Suzuki	
Process Analysis and Characterization of ASNSS Using Automatic On-Line Measurement	381
L.C. Chen, J.Y. Sun, T.T. Tsung, H. Chang and H.M. Lin	
A Plastic Film Thickness On-Line Detecting System	387
Y.Z. Ma, S.H. Ye, F. Duan and Y. Zheng	
A Real-Time and On-Line Visual System for Seamless Steel Pipe Linearity Measurement	393
C.J. Liu, X.Y. Yang, J.G. Zhu and S.H. Ye	
A Structured-Light-Based On-Line 3D Measurement System and Software Development	399
X.Y. Yu, F.B. Zhang, H.J. Yuan and Z.G. Lang	
Effects of Key Parameters on the Performance of a New In-Process Optical Measurement Method	405
Z. Tao and Y. Gao	
Anti-Vibration Characteristics of a Lateral Shear Interferometer for On-Machine Surface Measurement	411
X. Liu, Y. Gao, S. To and W.B. Lee	
Application of Wavelet Analysis for Online Measurement of Crude Oils	417
X. Li, Z.L. Ding and F. Yuan	
On-Line Industrial 3D Measurement Techniques for Large Volume Objects	423
J.G. Zhu, S.H. Ye, X.Y. Yang, X.H. Qu, C.J. Liu and B. Wu	
Advances in Micro and Nano-Scale Surface Metrology	431
L. Blunt, X. Jiang and P.J. Scott	
2D and 3D Surface Texture Comparisons Using Autocorrelation Functions	437
J. Song, L. Ma, E. Whitenton and T. Vorburger	
Spline Filters for Surface Texture Analysis	441
M.P. Krystek	
Web-Based Virtual Measurement, Analysis and Evaluation Software Development for 3D Surface Topography	447
C. Anthony, L. Ma and J. Zhou	

Texture Extraction and Identification of 3D Engineering Surfaces	453
W. Zeng, X. Jiang, Y. Gao and T. Xie	
Combination of M-Estimation and Gaussian Filtering for Characterizing 3D Engineering Surfaces	459
H.F. Li, X.Q. Jiang and Z. Li	
A Comparative Study of the Current 3D Motif Combination Methods	465
J. Guo, Y. Gao and T. Xie	
A New Three-Dimensional Profilometer for Surface Profile Measurement Using Digital Fringe Projection and Phase Shifting	471
L.C. Chen, S.H. Tsai and K.C. Fan	
A Two-Dimensional Surface Profile Imaging Technique Based on Heterodyne Interferometer	477
K.W. Wang, Z.J. Cai and L.J. Zeng	
A Laser Sensor Technique for Measuring 3D Surfaces Based on the Polarized Heterodyne Astigmatic Principle	483
L.R. Qiu and X.M. Ding	
Development of a Large Range Nanometer Level Profilometer with Controlled Contact Force	489
L. Yang, Y. Gao, X.Z. Wang and T. Xie	
Instantaneous Measurement of 3D Profiles by Projecting Coded Grating	495
A.L. Tian, B. Li, M.T. Huang and Z.D. Jiang	
A 3D Profile Parallel Detecting System Based on Differential Confocal Microscopy	501
Y.H. Wang, X.F. Yu and Y.T. Fei	
Artificial Life for Pavement Distress Survey	507
Q. Wang and H. Zhang	
Detection of Vortex Frequency in Gas Flow with Ultrasound	515
V. Hans and C. Filips	
Design, CFD Investigation and Implementation of a Novel Diverter Mechanism for Water Flow Measurement	521
Y.L. Ho, J.Y. Chen, J.H. Shaw and C.T. Yang	
Determination of the Jetting Force of a Jet Actuator	527
L. Zhao, S.X. Yang and H. Ren	
Performance Characterization of Pressure Sensors Using an Improved Pressure Square Wave Generator	533
T.T. Tsung, L.L. Han, L.C. Chen and H. Chang	
A High Sensitivity Pressure Sensing System with Fiber Bragg Grating Using the Transverse Strain Characteristics of a Straight Bourdon Tube	539
M.X. Jiao, E.G. Zhao, Y.M. Liu and R.L. Qi	
A Polarized Optical Fiber Pressure Sensor with a Sampling Reference Optical Path	545
Y.Q. Huang, Y.X. Lin, Z.L. Huang, L.M. Zhu and Y.M. Chen	
A New Sensing System for Dynamic Pressure Measurement under Severe Conditions	551
Z.T. Wu, Q.S. Wang and Z.D. Jiang	
An Ultra-Precision Air-Pin Sensor and Its Dynamic Characteristics	557
H. Zhang, S.X. Deng, H.Q. Wang and S. Chen	
An Automatic Sorting System Based on Pneumatic Measurement	563
Y.H. Wang, S.Q. Hu and Y. Hu	
An Optical Fiber Temperature Sensor Based on Spectrum Measurement	569
Z.G. Li and B.G. Wang	
A White Light Interference Distributed Optical Fiber Temperature Sensor	575
X. Zhou, J. Gong, Y. Liu and J. Zhou	
A Novel Non-Gyro Inertial Measurement Unit	583
M. Ding, Q. Wang, G. Shen and P. Zhao	
Design of an Intelligent Multi-Gyro Measurement Device	589
J.P. Wang, W. Zhou, W.F. Tian and Z.H. Jin	
An X-Y Stage with a Plane Cross Grating Metrology System	595
X.Z. Wang, Y. Gao, J. Guo and T. Xie	
A Fast Search Coil Sensing Method for Tracking Systems	601
Z.J. Cai and L.J. Zeng	

Design of a Two-Degree of Freedom Beating Machine S.L. Zhang and L.J. Zeng	607
Evaluation of Thrust Force and Positioning Accuracy of a New Linear Motor X. Chen, K. Takamasu and M. Nikaidou	613
Intelligence and Metrological Reliability of Measuring Transducers Built in Equipment R.E. Taymanov and K. Sapozhnikova	619
Measurement of Finishing Errors for Evaluation of Dynamic Characteristics of NC Machine Tools S.C. Kim, C.H. Lee and B.H. Lee	625
Evaluation of Dynamic Parameters for Underdamped Grinding Machines Y. Gao and S. Tse	631
Measurement and Analysis of the Dynamic Characteristics of a High Speed Painting Automizer Z. Yang, Y. Gao, T. Huang and D. Zhang	637
Combination of ICA and SOM for Classification of Machine Condition Patterns S.X. Yang, W.D. Jiao and Z.T. Wu	643
Observation of Scattered Evanescent Waves M. Ozaki and R. Furutani	649
Electromagnetic Field Analysis and Measurement for High Speed Attraction Type Magnetic Levitation Vehicle Systems D.X. Chen, M.C. Pan, F.L. Luo, Z.W. Kang, W.G. Tian and Y.Y. Hu	655
A DDS Waveform Generator for Electromagnetic Non-Destructive Testing X.H. Cao, F.L. Luo, F.T. Bai and Y.H. Zhang	661
Eddy Current Testing Using a Model Based Measurement Method F.L. Luo, Y.Y. Hu and Z.W. Kang	667
Power System Frequency Tracking Using an Adaptive Lattice Notch Filter S. Zhang, D. Li and J. Sun	673
A Least Square Method for Measurement and Optimisation in Selected Physical Experiments I. Frollo, P. Andris, I. Strolka and L. Bačiak	681
3D Digital Measurement of Large Scale Objects Based on Viscous Target B. Wu, J.G. Zhu, X.Y. Yang, T. Xue and S.H. Ye	687
Surface Reconstruction Based on Laser Scan Data Y.P. Luo, Z.D. Jiang, B. Li and Y.G. Wang	693
Improving Measurement Accuracy Using Image Super-Resolution D.S.H. Ling, H.Y. Hsu, G.C.I. Lin and S.H. Lee	699
Digital Image Processing for a Liquid Signature Analyzer System with CCD Camera H.X. Chen, Z.R. Qiu and G.X. Zhang	705
Sub-Pixel Edge Detection for Precision Measurement Based on Canny Criteria S.H. Xie, Q. Liao and S.R. Qin	711
An Application of the Fractal Theory in the Design of Heat Sink for Precision Measurement Instrument S.R. Lee, Z.G. Li, B.G. Wang and H.S. Chiou	717
Online Calibration for a Stereo Vision Measurement System Z.J. Yu, S.Y. Ma, R.S. Che, Q.Z. Wang, W. Tian, Z.H. Li and J.Z. Li	723
A New Ellipse Recognition Algorithm for CCD Camera C.K. Sun, X. Zhang, Z. Wang and S. Ye	729
A Rapid Calibration Method for the Laser Scanning 3D Measurement System Z. Xu, L. Tao, C.K. Sun and Y. Zheng	735
Error Evaluation of Aspheric Surfaces and Calibration of the Test Instrument Q. Hao, Q.D. Zhu and Y.T. Wang	741
Order Tracking Filtering for Rotating Machinery Diagnosis Based on Zero Phase Distortion Digital Filtering S.R. Qin and Y. Guo	747
An Application of the AGC Technology for Sensor Signal Processing X.K. Liu, D.L. Peng, X.H. Zhang and X.H. Cheng	753
