

Table of Contents

Preface and Conference Organizers

Chapter 1: Mechanic Manufacturing System and Automation

A Balance Ability Evaluation Method Based on Multidimension Passive Motion Excitement from 6-PSS Robot J.Z. Xiao, X.C. Yang, H.R. Wang and K. Liu	3
A BP Decoding Algorithm Based on Nodes Residual for LDPC Codes and its Hardware Implementation Z.X. Wang, X.C. Wang and F.Q. Zhu	7
A Dual Fuzzy Neuro Controller Using Genetic Algorithm in Civil Aviation Intelligent Landing System K.J. Xu, G.M. Zhang and Y. Xu	11
A Photovoltaic MPPT Strategy by Modified Fuzzy Control B. Fu, L. Yu, Q. Cheng, X.C. Cai and X. Xing	15
A Recognition Algorithm for M-QAM Based on Amplitude Distribution L.Y. Tan, Q. Wang, X. Yan and K.Y. Qin	20
A Rotor Flux Observer Based on Nonlinear Quadrature Double Compensation B. Fan, X. Li, J.X. Pu, J.W. Ma and J.W. Zhang	25
A Self-Calibration Algorithm for Concentric-UCA in the Presence of Mutual Coupling H. Chen, Y. Wu and M. Zhao	30
ADAMS-Based Double Wishbone Suspension Motion Simulation and Optimization J.H. Liang and L.L. Xin	34
ADAMS-Based Dynamic Simulation on Driving Axle Gear Meshing Y. Wang	38
ADAMS-Based Vibrating Subsoiler System Simulation Analysis L.L. Xin, J.H. Liang and L.C. Qiu	42
Adaptive Fuzzy Velocity-Based Routing for MANET C.L. Li, H.X. Zhang, B.B. Hao and J.D. Li	46
Adaptive Sliding Mode Controller Design for a Nonlinear Inverted Pendulum with Unknown Physical Parameters and its Experiment Q. He and J.K. Liu	50
Algorithm Research of Cutter Location Path for Five-Axis NC Machining Based on Equal-Parametric W.T. Chen, F.C. Xia and H.N. Tu	54
Algorithm Study of Face Recognition on Improved 2DLDA S.P. Li, Y. Cheng, H.B. Liu and L. Mu	58
An Effective CS-BP Algorithm for 2-D DOA Estimation Y.Y. An and S.S. Bai	62
An Improved DV-Hop Algorithm Based on Entropy for WSN J. Chen and X.P. Liu	66
An Improved Method of Mathematical Model on Current Controlled Magnetic Levitation Ball System X. Du and Y.B. Zhang	70
An Intelligent Atrial Fibrillation Wireless Monitoring System Based on Nonlinear Blind Source Extraction Algorithm K. Xu, Y.H. Shao and G. Wang	74
Analysis and Sensitivity Evaluation of AE Signals and Vibration Signals for Fault Diagnosis of Low-Speed Rotating Machinery H.Y. Jiang and P. Chen	79
Application of Arithmetic Operations Method in Single Pair-Pole Magnetic Encoder Y.F. Zeng and R. Li	85
Controllability of Discrete-Time Multi-Agent Systems with Leaders via Switching Topology B. Liu, W.N. Hu and J. Zhang	92

Controlling Chaos in Permanent Magnet Synchronous Motors by Cascade Adaptive Approach W. Wei, M. Zuo, T.Q. Jiang and Z.W. Liu	96
Dam Deformation Monitoring Model Based on Neural Network with Ant Colony Optimization Algorithm B.W. Wei, Z.K. Xu and H.Z. Liu	101
Delay Loop Current Control Methods of Shunt Active Power Filter G.Y. Liu and S.P. Su	105
Delay-Dependent Non-Fragile Robust Guaranteed Cost Control for Switched Systems with Multiple Time Delays N. Zhang, M.C. Fu and T. Zou	109
Diagnosis for Vibration Fault of Steam Turbine Based on Modified Particle Swarm Optimization Support Vector Machine Z.B. Shi, Q.G. Song and M.Z. Ma	113
Dynamic Location Allocation Optimization for PDP Panel Aging Stereoscopic Warehouse J.Q. Zhang, F.M. Bao and J.F. Zhang	117
Eye Statement Recognition for Driver Fatigue Detection Based on Gabor Wavelet and HMM H.Y. Yang, X.H. Jiang, L. Wang and Y.H. Zhang	123
Face Detection Method Based on SSR Algorithm K. Song, L. Wang and Z.K. Liu	130
Face Recognition Method Based on the Fuzzy Neural Network X. Pan	134
High Accuracy Algorithm of Airborne Interferometric Synthetic Aperture Radar S.T. Han, G.S. Tang, Y.F. Mao, L. Chen and M. Wang	138
High Altitude Airship Flight Control System Design and Simulation Y.H. Fan, X. Li and Y.F. Yu	142
Human ADL Signal Transmission System Optimization Method Using Bayesian Network Based on Wireless Sensor Network Y. Sun	146
IMC-PID Design with Time Delay Compensation for Multivariable System Based on V-Norm Decoupling L.T. Cao, Q.B. Jin, W. Su, T.S. Fan and G.H. Yu	150
Improved EEMD Applied to Rotating Machinery Fault Diagnosis L. Chen, G.S. Tang, Y.Y. Zi and F. Fan	154
Improved Wavelet Algorithm on Image Denoising Processing Z.X. Lin	160
Intelligent Built-in Test Fault Diagnosis and Prediction for Mechatronics Equipment M.W. Guo, S.H. Ni and J.H. Zhu	164
Intelligent Control Method of Ground to Air Missile Based on FCMAC G. Li, H. He, G. Fang and J.F. Wu	168
Intelligent Information System Design on Water Quality Monitoring, Water Bloom Prediction and Emergency Treatment Decision-Making C. Chen, X.Y. Wang, Z.W. Liu, Z.Y. Zhao and X.K. Wang	172
Intelligent Temperature Control of Ceramic Kiln Based on Data Fusion Technology Y.H. Zhu and J. Wan	177
Median Morphological Filter Design Based on the PSO Algorithm Y.L. Zhu and C. Huang	181
Method of Parallel Active Power Filter Compensation on 3-Phase 3-Wire Nonlinear Unbalanced Load System W.X. Zou and S.H. Liu	185
Monitoring of Winding Deformation of Power Transformer by Using Nanosecond Pulses H.L. Liu, Y.B. Zhan, X. Lei, Y.Y. Wang, H.R. Zeng and J. Li	190
New Estimations of Bounds for the Chu Chaotic System J.G. Jian and W.W. Wang	196
NIR Detection of Alcohol Content Based on GA-PLS Y.F. Bao, X.F. Wang, G.L. Liu, G. Li and L. Lin	200

Regulation of PID Controller Parameters Based on Ant Colony Optimization Algorithm in Bending Control System	
Y.Z. Yu, X.Y. Ren, C.Y. Deng, J.J. Yu, S.Z. Li and J.J. Shi	205
Requirements of Level Arm Measurement Precision in Airborne Gravity	
Y.M. Huang, K.D. Zhang, S.K. Cai and M.P. Wu	211
Research about Separation of the Surface Geometry Error for Large-Scale Holes Based on Wavelet Transform	
W.J. Xie	220
Research on BIT Intelligence Maintenance Decision of Weapon Materiel	
J.X. Huang and Y.Q. Bian	224
Research on Scene Matching Algorithm in the Vision-Aided Navigation System	
Y.L. Du	229
Research on the Magnitude Time Series Prediction Based on Wavelet Neural Network	
Y.L. Chen, Y. Chen and Q. Huang	233
Research on the Marine Corrosion Model of Ferrous Metal Based on PLS and Grey Relational Analysis	
X.Y. Zhang and H.Y. Zhang	237
Research on the Suppression of Input Power Disturbance for Single-Phase Photovoltaic Grid-Connected Inverter	
K. Chen, S.L. Tian and Y.H. Cheng	243
Research on Ultra-Low-Bit-Rate Speech Coding Algorithm for Underwater Speech Communication	
Y. Li, J.S. Jiang and X.F. Ma	247
Research on Cutting Depth Effect in Cutting Process	
Z.W. Dong, X.H. Wan, S.J. Li and S.Y. Liu	251
Reusable Design of CAN Bus Controller IP Core	
Y.L. Hu and L. Xu	255
Review of the Tele-Calibration Technology	
T.C. Fang, S.L. Wu, J. Wang and Z.H. Wang	261
Robotic Waist Mechanism Driven by Dielectric Elastomer Actuators	
S. Guo, Z.Y. Wang, J. Li and W. Shi	265
Robust Adaptive Control Based on Specified Region Pole Assignment for Flexible Hypersonic Vehicle	
Z.G. Feng	270
Robust Fault Detection for Singular Stochastic Systems	
A.Q. Zhang	276
Selection and Optimization in Vibration Isolation Structure of Marine Podded SSP Propulsion	
G.C. Zhang, H.D. Pang and J.Q. He	280
Solutions of Single Point of Failure in Intrusion Detection System	
Y.J. Cai, X.Y. Cheng and Y. Pan	285
Solving Collaborative Manufacturing Resources Optimization Deployment Problems Based on Improved DNA Genetic Algorithm	
S.Z. Nie and Y.H. Zhong	289
Solving Decision Problems with Mathematical Expectation	
M. Zhang and J.H. Wen	293
Spectral Data Modeling Based on Feature Extraction and Extreme Support Vector Regression	
S.W. Liu, D. Yan, Z.H. Liu and J. Tang	297
Spectral Properties of Broadband Pumped Optical Parametric Amplification	
H.B. Xu	301
Spline Function Method Analysis Nature Frequency of Annular Foundations	
X.Y. Gao, R.X. Jing and J.H. Song	307
Study on Data Acquisition and Measurement System of Occupant Restraint Test Bed	
Z.H. Bai, Z. Xu, Q. Yan and Q.B. Zhang	314
Study on Driving Characteristics of Discrete Rod by Different Initiation Styles	
J.F. Wei, Y. Li and S.S. Wang	318

Study on Electromagnetic Exciting Force Characteristics and Electromagnetic Noise of Permanent Magnet DC Motor M.L. Liu, T.D. Yu, S.M. Cui and D. He	323
Study on Four Parameters Estimation's Methods of Time-Series Model in Modeling the Signal of a Quartz Flex Accelerometer X. Zhong, C.H. Zhao and J. He	329
Study on Technology of Human Body Surface Reconstruction Based on Reverse Engineering X.N. Jing and X.J. Li	333
The Algorithm of VLBI Wide-Band Correlation and CE-2 Broadband Signal Processing M. Wang, G.S. Tang, X.M. Luo, L. Chen and L. Liu	338
Type II Sleep Mode Operation for IEEE 802.16e Based WiMAX J.B. Xue, S.B. Li, T. Zhang and W.H. Wang	343
Unsteady Characteristics over Dynamic Delta Wings M.L. Zhang, Y.R. Yang and Z.Y. Lu	350
Variance Based Identification of Phase Transition in Duffing Oscillator for Weak Signal Detection Y. Chang, C.W. Li and Y. Hao	354

Chapter 2: Material Science and Technology in Manufacturing

A Damage-Coupled Time-Dependent Multi-Axial Fatigue Failure Model for Solder Alloy 63Sn-37Pb Y. Luo and Q. Gao	361
Adiabatic Shear Fractures and Fragments of Cylindrical Structures under Internal Explosive Loading L. Ma, Y. Hu, J. Xin and G.D. Deng	367
Analysis of Copper Wires Residues in Fire Investigation Y. Wu and D.C. Han	373
Comprehensive Testing Instrument on External Characteristics of Magnetically Controlled Shape Memory Alloy J. Lu and C.W. Lin	377
Contact Analysis of Sealing Rings for Welding Bellows Mechanical Seal A. Shavkat, M. Ahmat, K. Ismayil and M. Ghenni	381
Effect of Porous Structural Parameters on Ultrasonic Attenuation Capacity of Porous Al Alloy with High Specific Strength W. Xu and X.D. Tang	386
Granular Structure Merging Algorithm Based on Category Theory H. Li and X.P. Ma	390
Influence of Pressure Amplitude on Formability in Pulsating Hydro-Bugling of AZ31B Magnesium Alloy Sheet L.F. Yang, L. Yi and C. Guo	397
Mechanics Analysis of the Vibrating Subsoiler System Considering Material Acting Force L.L. Xin, J.H. Liang and L.C. Qiu	403
Preparation and Characterization of Molecular Imprinted Polymers of Tetracycline Antibiotics by Mixed-Templates G.L. Gong, L. Jia, H. Li and X.J. Qi	407
Primary Modeling and Survey of 4H-SiC Based Metal-Semiconductor-Metal Ultraviolet Sensor with Novel Electrode Structure B. Chen, Y.T. Yang, X.R. Xie and N. Wang	411
Research on Molten Iron Vertical Flow Rate and Level Based on Dynamic Infrared Radiation and Time Intervals C.X. Liu, W. Jin and J.J. Liu	417
Research on Nonlinear Stiffness Characteristics of Hydro-Pneumatic Spring J.W. Zhang, S.Z. Chen and L. Yang	421
Research on Performance of Sasobit Warm Mix Asphalt and Influence of Aging Using DSR H. Zhao	426

Research on the High Temperature Properties of Sasobit Warm Mix Asphalt Mortar S. Ye and B. Guo	430
Surface Roughness Measuring System Design for Cutting Workpiece Based on Machine Vision Technology M. Zhu, Q.Y. Zeng, K. Wu, T. Hong and X.F. Zheng	434

Chapter 3: Sensor, Test and Signal Processing

A Cellular Intrusion Detection Framework for Packet Dropping Attacks in Wireless Sensor Networks X. Tong, L. Chen and Y. Li	441
A Detection Circuit to Faint Signal for Difference Absorption Gas Sensor Y.J. Wang, J.X. Chen, Y.Y. Kang, L.K. Yang and Y.T. Wang	446
A Frequency Tracking Method Based on Improved Adaptive Notch Filter for Coriolis Mass Flowmeter H.Y. Yang, Y.Q. Tu and H.T. Zhang	450
A Natural Image Compression Approach Based on ICA and Visual Saliency Detection L.J. Duan, C.X. Ke, C.P. Wu, Z. Yang and J. Miao	457
A New Method Based on HMMs and K-Means Algorithms for Noise-Robust Voice Activity Detector B. Luo, Z. Pei, L. Xu and D.L. Hu	461
A New Referenced Signal Detection Method Adaptive to Multi-Objective Control of Active Power Filter G.Y. Liu and S.P. Su	465
A Novel Corner Detection Based on Improved SUSAN Model Z.H. Yang, X.L. Han and F.F. Guo	469
A Novel Method for Measuring the Open-Circuit Loss and Short-Circuit Loss of Distribution Transformers Online X. Li, M.Y. Chen and S. Cheng	473
A Novel Precision Strain Measuring Circuit with Double-Channel Method J. Cao, N. Zhang, J.W. Zhang, M.B. Li and X.M. Zhang	478
A Novel Skin Image Detection Method Based on GMM and GAs K.M. Mao, Z.L. Zhu, H.Y. Jiang and Z.F. Deng	482
A Side-Coupled Optical-Fiber Liquid Level Sensor C.R. Zhao, L. Ye, J.F. Ge and Y. Cheng	487
A Simplified Cascaded Modular Structure for the Implementation of MVDR Detector Z.J. Li, C.T. Zhu and S.P. Chen	491
A Skew Detection Algorithm for PDF417 Based on Feature Point J.H. Li, P. Li, X.D. Li and Y.W. Wang	495
An Adaptive Wavelet Shrinkage and its Application in Image De-Noising T.J. Cao	500
An Automatic Singing Evaluation System Y.X. Liu, Z.Y. Jin, J. Jia and L.H. Cai	504
An Autonomous Predictive Centroiding Algorithm for Star Sensor B.H. Li, J. Li and X.J. Chen	510
An Energy-Balanced Clustering Routing Protocol for Wireless Sensor Networks P.P. Xiao, Y.T. Tian and W.L. Chen	516
An Image Hided-Data Detection Method Combining Markov Chain and Support Vector Machines H.M. Zhao and L. Zhu	520
An Imaging Processing Method for Linear Array ISAR Based on Image Entropy Q. Gao, X. Wei, Z.N. Wang and D.T. Na	525
Application of Bidimensional Empirical Mode Decomposition to Medical Liquid Opacity Detection J. Wan, Y.P. Diao, D.M. Yan, Q. Guo and Z.S. Qu	530
Applying Ad Hoc Network on Unknown Environment Detection H.T. Wang, Z.P. Jia and Q. Zhao	534

Blind Separability of Reverberation and Target Echo Based on Spatial Correlation X.K. Li and Q.Y. Wang	538
Calibration of Pressure Sensor in Automobiles Based on ZMD Chip Z.M. Wang and Y.Z. Zhou	544
Comparison of Single-Layer and Multi-Layer Laser Scanners for Measuring Characteristic X. Li, G.M. Xiong, Y.W. Hu, W.B. Li, Y. Jiang, J.W. Gong and H.Y. Chen	548
Comparison of Synchronizing Speed Limitations of Networked Lorenz Oscillators when Coupling Strength Tends to Infinity G.Q. Liu and X.M. Xu	553
Component Spectrum Recognition for Mixed Gas Based on SVM P. Bai, J.Z. Ji, P. Liu and D.T. Geng	557
Design and Application of a Measuring and Diagnosing System Based on Networked Virtual Instrument G.S. Chen, G. Niu and S.S. Ma	561
Design and Fabrication of an Electromagnetic Stress Sensor Z.Y. Sun, J.X. Leng and X.W. Liu	567
Development of Fault Diagnosis System for Telemetry Equipment Based on the Virtual Instrument Technology B. Lai and H.Q. Jia	571
Development of Ultrasonic Automatic Testing System for Flaws of Rotary Parts H.W. Ma, M. Dong, Y. Chen and Q.H. Mao	575
Difference Absorption Optical Fiber Methane Gas Sensor Based on FBG Y.Y. Kang, Y.J. Wang, L.K. Yang and Y.T. Wang	580
Effect of Image Motion and Vibration on Image Quality of TDICCD Camera Z.L. Wang, X.X. Zhuang and L.Q. Zhang	584
Fusion of Infrared and Visible Image Based on Target Regions for Environment Perception Y.F. Niu, S.T. Xu and W.D. Hu	589
Identification the Low-Frequency Oscillation Stakeout of Power System by Wide-Area Measurement System Y. Liu, Q. Huang and D. Chen	594
Image Displacement Detection under Low Illumination Using Joint Transform Correlator with Wavelet Denoising Q. Li, P. Ge, H.J. Feng and Z.H. Xu	602
Inter-Pulse Spectroscopy Based on Room-Temperature Pulsed Quantum-Cascade Laser for N₂O Detection M. Wang, J. Chen, N. Liu and Y. Wang	607
Measurement and Analysis of the Circuit Delay of CEI System G.S. Tang, L. Li, L. Zeng, L. Chen and L. Zhou	611
Measurement of Tracking Accuracy of Antenna Using Precise Geostationary Satellite Orbit Y.J. Wang, A.W. Zheng, Y.Q. Fu and Y.Q. Liu	616
Measurements and Predictions of Steady-State and Transient Temperature Distributions of a Gasoline Engine H.B. Chen, Z.C. Yuan, W. Lu and J.L. Cai	620
Multi-Node Spectrum Sensing Based on a Novel Dempster-Shafer Theory Z.D. Yin and S. He	625
Multi-Robot Control System Based on Wireless Network W.X. Huang, S.L. Tan and Y.Q. Li	629
Multi-User Detection of DS-CDMA Based on Improved-FastICA X.Z. Liu, D.W. Feng and T.S. Zhang	633
An Application Study to the Ciphers Weighed in Faithful Transmission L. Luo, Q.H. Dai, C.X. Xu and S.Q. Jiang	637
Neighbor-Based Adaptive Listening and Sleeping Scheme for Wireless Mesh Sensor Networks J. Fan, J.F. Hao, J. Li and J.B. Xie	642
Node Deployment of Wireless Sensor Networks in Long Narrow Area X.G. Sun, J.S. He, M.X. Yang and X.L. Sun	648
On-Line Oil Monitoring Sensors Fusion for Aircraft Health Management Y.S. Wang, M.J. Zhang and D.F. Liu	652

Online Temperature Detecting System in Hot Machining Process L.M. Zhao, Z. Hou, D.P. Jia and Q.K. Wei	657
Portable Fault Testing Device of Electronic Instrument Based on PC 104 Bus K. Feng, B.S. Lu, H.L. Li and J. Han	661
Practical Technologies Research of Line Structured Light Three-Dimensional Profile Measurement at Low-Cost L. Fu, T. Cheng and Y.D. Zhou	665
PZT Sensors and their Application in Structural Health Monitoring X. Sun	669
Reducing False Negatives in Intelligent Intrusion Detection Decision Response System H.M. Kai, X.J. Liu, Y.F. Liu and L. Zhou	676
Research of Active Detection Technology Using Vector Array on Small Platform X.L. Sheng, J. Lu, C.Y. Sun, J.D. Mei, L.X. Guo and J.W. Yin	682
Research of DC Current Measurement Technology Based on Optical Fiber Thermometry D.P. Jia, Y. Wang, S. Lin and Q.K. Wei	686
Research on FBG Spectral Optimization with Particle Swarm Optimization Algorithm Z.X. Wu, Q. Qiao, F. Wu and L.L. Cai	690
Research on High Precision and Non-Contact Measuring System for Geometric Parameter of the Irregular Shape Y.H. Cheng, L.B. Bai and L. Nie	694
Research on Note Location of Wireless Sensor Network in Logistics Transportation S.F. Yao, G. Yao and J. Zhang	698
Research on Operational Model of New-Generation GPS Based on Dynamic Description Logic X. Xia, Y.R. Zhong, Y.C. Qin and L.J. Ji	702
Research on Temperature Monitoring System for Electrical Equipment Based on Wireless Sensor Networks D.P. Jia, L. Qiu, S. Lin and J.H. Yang	706
The Analysis of Miss Distance Sensitivity to Target Maneuvers for the Terminal Guidance System Y. Yao, X.D. Wang, B.Q. Yang and J. Guo	710
The Application of Multiple Attribute Decision Making on Radio Signal Searching G.H. Liu, L.Z. Yi, Z. Pei and D.L. Hu	714
The Detection of Soil Parameters by Portable near Infrared Spectrometer Y.F. Li, D.C. Wang, D.Y. Zhang and D.Z. Zhu	718
The Route Algorithm of Post-Disaster Road Monitoring System X.G. Sun, J.S. He, X.L. Sun and Q.G. Yang	727
The Safety Monitoring of Colliery Equipments Based on Data Mining Technology S.F. Zhao and L.C. Chen	731
The Study of Low-Power Consumption Heat Meter Based on MSP430 W.G. Zhao and X.S. Zhao	735
The Study of the Dual-Wavelength Fiber-Optic Temperature Sensor X.M. Lei	741
Video Signal Capture and Processing Card Based on H.264 Hardware Encoder X.E. Ye and X. Chen	745
Voice Activity Detection with Decision Trees in Noisy Environments D.L. Hu, L.Z. Yi, Z. Pei and B. Luo	749
Voltage Dip Analyzing Method for Multiple Faults Condition in Complex Power Network D.X. Wang, J. Le, X. Lei, C.X. Yang, X. Zheng and K.P. Liu	753

Chapter 4: Fault Diagnose and Electronmechanical Control

A Control Method of Hypersonic Vehicle Based on the Structured Singular Value Theory G. Li, L.W. Xu, H. He and X. An	761
A Control System of Binocular Eyes Based on DSP TMS320F2812 S.R. Xie, J.S. Miao, H.Y. Li, Y.M. Zhou and J. Luo	765

A Cooperative Co-Evolutionary Controller for AC Induction Motor J. Sun, Q. Wang and J.X. Xiao	771
A Fluid-Driven Path Controllable Drilling Device with 3-DOF Hydraulic Steering System F.Y. Zhou, M.S. Deng, M.R. Jin, Q. Li and X. Fu	775
A Hybrid Intelligent Excitation Control for Ship Power Station Z.P. Shen, C. Guo and Y.T. Wang	780
A SPWM Control Method for Dual Buck Half Bridge Inverter Based on the Direction of Inductor Current X.J. Zhang and Y.X. Song	784
A Study of MRife Algorithm and CSB Algorithm on Frequency Online Estimation H.F. Wu and T. Zhao	789
A Study of Processing of the Leakage Signal for Single Antenna LFMCW Radar Altimeter G.Q. Zeng, F. Zhang and Z.M. Wei	794
A Study on an Effective Motion Tracking Algorithm L. Gao	799
Analysis on Application of HCCI Technology for Hybrid Electric Vehicles J. Wu and H.Y. Zhang	803
Application of Disturbance Rejecting Fuzzy Controller in Electric Arc Furnace X.H. Liu and Z.J. Zhao	807
Application of Fuzzy PID for the Ventilation and Air Conditioning System of Subway Station J. Wang, F. Wang, Y. Jiang, Z.X. Chen and S.T. Yan	811
Based on Fuzzy PID Control's Research of Control of Concentration of Sub-Nanometer Wood Flour D.Z. Guo, C.M. Yang, Y. Ma and Y.J. Liu	815
Direct Torque Control of Permanent Magnet Synchronous Motor Based on Fast Terminal Sliding Mode D.J. Zhang, N.N. Zhang, Y.Q. Wang and K.W. Liu	819
Distributed High-Precision Field Testing System of Construction Machinery Based on CAN Bus X.Q. Yang, Y.M. Gao, X.L. Wang and J. Han	825
Driving Belt Conveyor Based on Long-Term Transmission Inverter S.Y. Lei, J.S. Li, G.D. You and H. Li	829
Dual Mode Braking System Design of a HEV Y.T. Luo, Q.Y. Sun and D. Tan	834
Effect of Yaw Angle Error in an Aircraft's Aerial Triangulation H.X. Wang, Q.S. Liu, H.W. Wang and X. Wang	842
Electric Vehicle Forecasting for China from 2011 to 2050 Based on Scenario Analysis S.J. Fu and Y.L. Ren	846
Engine Failure Data Analysis Method Based on Weibull Distribution Model Y.K. Gu and J. Li	850
Error Analysis of Mechanism with Clearances and Fuzzy Control K.R. Huang	855
Failure Modes and Countermeasures of Working Device of a Heavy Vehicle H. Zhou, R.Y. Jiang and J.S. Peng	859
Fault Diagnosis of CNC Machine Using Hybrid Neural Network J. Du, X.G. Yan and N.S. Wei	865
Fault Diagnosis of Power Quality Y.L. Ou	870
Flipping PTS-OFDM System without Side Information Y.Z. Li, J. Guan, L.Q. Huang and J. Zhang	874
FPGA-Based Design of Resource-Efficient Digital down Converter S.L. Cui and X. Li	878
Fuzzy Control System of Titanium Dioxide Hydrolysis Process R.F. Zhou, D.X. Shuai, Y. Tang and X.T. Zhang	882
Fuzzy Depth Control of Small Cylindrical Object Navigating near Free-Surface Z.Y. Shao, Y. Chen, D.Y. Fang and S.S. Feng	886

Fuzzy Immune PID Control for 6-DOF Parallel Platform D.Q. Zhu, W.H. Xie and L. Sun	890
H_∞ Control of Flexible Joint Robot via T-S Fuzzy Model F. Wang and X.P. Liu	894
Hardware-in-Loop Electronic Throttle System Based on Simulink N. Chen and P.C. Zhu	898
Local Stiffness and Dexterity Analysis of a 3-SPS-S Orientation Fine-Tuning Manipulator for Segment Assembly Robots in Shield Tunneling Machines Y.W. Zhang, B. Wei, G.H. Cui and N. Wang	904
Localization Algorithm Based on DV-HOP for Wireless Sensor Network Y. Hu and X.M. Li	909
Nonlinear Analysis of Transmission Tower Structure by Three FEM Models W. Yi and X.H. Liu	914
Nonlinear Behaviors of Giant Magnetostrictive High Power Ultrasonic Transducer H.Q. Zeng and G.X. Zeng	918
Nonlinear Resonant Generator for Harvesting Energy from Human Wrist Vertical Shaking K. Sun, G.Q. Liu and X.Y. Xu	923
On-Line Fault Intelligent Monitoring Diagnosis System of Blower R.F. Zhou, D.X. Shuai, Y. Tang and X.T. Zhang	928
Partial Discharge Pattern Recognition of Power Transformer by Using Information Fusion X.G. Chen, Y.Y. Zhao, C.F. Zhang and X.X. Tian	933
Penetration Acceleration Signal Overload Rigid Separation Base on Local Mean Decomposition H.Y. Hao, Y.B. Wang, M.J. Liu and X.F. Li	938
Petroleum Instrument Fault Analysis Based on the Data Mining Fault Dictionary Method H.Q. Jia	942
Pinning Synchronization of Complex Dynamical Networks with Time Delay J. Zhang, B. Liu, Z.M. Zhao and Q.X. Li	946
PLC Control System Design for Automated Storage and Retrieval System J.Q. Zhang, F.M. Bao and M.H. Li	950
Presentation, Implementation and Application of a High Speed Hamming Distance Generator B.T. Shan and Y.S. Wang	956
Real-Time Database System Implementation of Railway Signal Power Source Remote Monitoring Z.J. Qu and L. Liu	961
Real-Time Simulation Study for a Series Hybrid Electric Vehicle X.D. Liu, Q.W. Fan, B.G. Zheng and J.M. Duan	965
Research and Implement of Measuring the Errors of Transformers with Actual-Burden Using Programmable Digital Synthesizing Three-Phase Power Supply Y.J. Lu and Y.B. Lu	970
Research for CAN Node Fault Rapid Detection Based on OSEK Network Management H.X. Zhao, D. Wei, L.D. Qu, D. Chen and B. Hao	975
Research of De-Couple Control System for near Space Vehicle with High Maneuver and Couple S.B. Ni, W.J. Hu and S. Xiong	979
Research of Dynamic Compensation for Hysteresis Nonlinear X.J. Wang and J.S. Tang	985
Research of Flow and Pressure Pulsation in Aircraft Deicing System M.L. Wu, B. Chen and Z.W. Xing	990
Selection of Optimal Measure Project for Automatic Test System X.F. Zu, Y.Q. Han and G. Liu	994
Self-Optimized Nonlinear PID Controller for Networked Chaotic Systems to Synchronize onto Arbitrary Orbit G.Q. Liu and X.M. Xu	998
Semi-Physical Acoustic Vision Simulation System of Autonomous Underwater Vehicle T.D. Zhang, S. Ma, L. Wan and Y.J. Pang	1006

Shaping Law and Motion Design in NC-ECM under Effect of Twiste Angle R. Wu, D.W. Zhang and J. Sun	1010
Significance Tests on Design Factors Affecting the Frequency Performance of Spherical Cymbal Transducer S.L. Wu, Q. Zhang and J.L. Xiong	1015
Storage Test Techniques and Wireless Transmission Based on Embedded System H. Wu, T. Han and C. Wang	1020
Study on a Control Method Used in the Semi-Active Suspension Y.T. Zhao, S.Z. Chen and Z.Z. Feng	1025
Study on Control Parameters in the Acceleration of Axial Flow Blood Pump X. Xie, J.P. Tan, H.T. Liu, Y.L. Liu, W. Tan and Z. Tan	1031
Study on Control Technique of Dynamic Hysteresis for Active Inverter C.W. Lin, L. Ma and H.M. Wang	1035
Study on Load Characteristics of a Mini Permanent Magnet Synchronous Generator for Wind Power Y. Li, I.S. Kim, S.Y. Park and Y.D. Shen	1039
Study on Operation Control Strategy of Single Piston Hydraulic Free-Piston Diesel Engine F. Guo, Y. Huang, C.L. Zhao, J. Liu and Z.Y. Zhang	1044
Study on Overhead Crane Anti-Swing System with Self-Adjustable Fuzzy Control D. Ye, W. Jin and D.C. Li	1050
Study on Quantitative Detection of Pesticide Residue Based on Spectroscopy Technology of Differential Absorption M.F. Zhao, J.G. Hu, X.L. Quan, J.H. Liu and X.M. Cao	1054
Study on Soft Sensor Modeling and Optimization Control of Biological Fluidized Bed Swage Disposal X.Y. Wang, M. Liu, Z.W. Liu, Z. Su, X.F. Lian and X.D. An	1059
Superheated Steam Temperature Control Based on Improved Recurrent Neural Network and Simplified PSO Algorithm L.Y. Ma, Y.P. Ge and X. Cao	1065
Switched Control Strategy for Networked System with Multi-Rate Input Sampling D.S. Luo and L. Zhou	1070
Target Fusion Algorithm for Remote Sensing Image Recognition Y.M. Zhang and L. Ma	1075
Target Tracking Approximation Algorithms Based on Particle Filters and near-Linear Curve Simplified Optimization in WSN X. Gao, Y.T. Yang, D. Zhou, J.X. Zhang and C.C. Chai	1079
Temporal Feature Characterization via Dynamic Hidden Markov Tree Y.H. Zhang, Z.F. He, Y.S. Zhang and X. Wu	1085
The Application Research on Image Fusion Technology in Tires Sorting Control C.Q. Liu, L.G. Chen and J.F. Li	1089
The Construction and the Management of Electric Vehicle Charging Network X. Fu and J. Yao	1093
The Construction of Network Virtual Laboratory for Measurement and Control Technology of Panzhihua University K. Huang	1097
The Fault Diagnosis of Automotive Airbag Assembly Process Based on Self-Organizing Feature Mapping Network SOM D.J. Zhang, N.N. Zhang and K.W. Liu	1101
The FPGA Implementation of NLMS Adaptive Interference Cancellation Algorithm J. Dai, G.L. Zhang and K. Zhao	1105
Vehicle-Classification Based on Edge Extraction and Background Difference C. Yang and Z.J. Dai	1109
Vibration-Based Structural Damage Identification Using Grey Forecasting Model W.Z. Chen, B.W. Wang and X.Y. Huang	1114

Chapter 5: Model and Optimization and Simulation

Application of Knowledge Based Engineering in Building Mould Standard Components H.H. Huang and L.Y. Wang	1121
Application of Optimal Fitting in the Static Thrust Line Measurement of Solid Rocket Motor C.F. Zhang, Q.J. Yan and J. Zhang	1126
Braking Distance Estimation by Simulation M. Bartunek, O. Moravčik and P. Schreiber	1131
Brief Introduction of Brake Line Pressure and Brake Torque Transmission Model R.G. Wang, B. Wang and H.W. Sun	1135
Development and Validation of Offset Deformable Barrier Model with Beam Element L.B. Cao, W.T. Cheng, X.N. Shi, J. Chen and L. Quan	1139
Development of Configuration Software Interface for Engineering Vehicle Supervisory Control and Management H.B. Yuan and H.F. Xiang	1143
Heat and Mass Transfer Finite Element Simulation of Clay Ceramic Prototype in High-Temperature Drying F. Meng, H.O. Zhang, G.L. Wang and X.C. Ping	1147
Kinematic and Modal Simulation Analysis of the Bionic Eye Based on Spherical Parallel Mechanism (SPM) J. Luo, Q.M. Guo, H.Y. Li, C.J. Huang and S.R. Xie	1151
Knowledge-Based Classification Method for Urban Area Objects Feature Extraction Based on LIDAR Points H.G. Xu, T. Li and F. Wu	1157
Modal Sensitivity Analysis for Series Harmonic Resonance in Power System C.X. Yang, K.P. Liu, D.X. Wang, D.L. Li and K.Y. Wang	1163
Modeling and Simulation of Diesel Propulsion System in Maneuvering Navigation Condition H.Y. Wang and H.Y. Tang	1168
Modeling, Analysis and Optimization of Three Degree of Freedom Automobile Handling and Stabilities Model L.Y. Yu, W.Z. Zhao and Y. Jin	1173
Modeling and Simulation of a Novel Hydraulic Disc Brake for Truck-Mounted Drilling Rig X.D. Wu and W. Liu	1177
Modified Projective Synchronization of Chaotic Systems with Unknown Parameters M.X. Yan and L.P. Fan	1182
Optimization Design of Excitation Strategy on Vibrating Wire Sensor H. He, J.H. Sun, D.C. Tian and N. Li	1186
Optimization for Dynamic Performance of the Fiber Optical Voltage Transformers H. Li, L. Bi, X.J. Feng, B.J. Li and C.X. Zhang	1191
Optimization of Vehicle Tailpipe Hook Stiffness P.C. Zhu and G.F. Tan	1197
Research on Extracting Cyclostionary Statistics of Amplitude-Modulated Signals Based on Cumulant T.J. Shang, X.J. Fu, L. Liu, Z.P. Feng and N.L. Hu	1202
Research on Mathematic Model and Measuring Method of Moving Beam Attitude in Large Forging Hydraulic Press H. Chen, J.P. Tan, J.L. Gong, X.Y. Cao and J.N. Zhou	1213
Research on the Energy Saving Potential of Official Cars in China Q.L. Liu and W. Chen	1217
Simulation and Analysis on Vehicle Frontal Crash Based on Virtual Proving Ground K. Chen, X.F. Tong and X.F. Wang	1222
Simulation and Research on Maximum Efficiency of Permanent Magnet Synchronous Motor Driving System J.F. Cui, L. Li and H. Yan	1226
Simulation and Control System of Camera Robot L. Zhang and S.T. Yan	1230
Study on the Date Generation Process of Chinese Thermal Power H.L. Chen and T. Qin	1234

Study on the Mathematical Simulation of Galvanic Coupling IBC with Different Signal Transmission Paths	
K. Zhang, Y. Song, B.Z. Kang, F.Z. Shang and Q. Hao	1238
The Dynamics Analysis of Full Mounted Converter Vessel Tilting Mechaism	
Y.K. Gu, X.X. Tong and X.C. Luo	1242
The End-Point Ingredient Prediction of Low Carbon Ferrochrome Smelt Based on the Working Condition	
N.N. Zhang, K.W. Liu and B.D. Zhang	1246
The Model and Algorithm of Doppler Radar Speed Measurement System	
R. Yang, J. Zhang, Y.L. He and Y. Huang	1250
The Model and Simulation of Hydraulic Non-Sinusoidal Vibration System on Billet Caster Crystallizer	
X.W. He, Y. Wang, Q.B. Tang and X.B. Jia	1257
The Optimal Attitude Controller Design and Simulation of Three-Axis Dual Rotor Helicopter	
C.Z. Xu and T. Zhang	1265
The Principal Component Analysis of Signal Characteristic Parameters	
G.H. Li, Z. Pei, R. Chen and D.L. Hu	1269
The Simulation Analysis of Structure Type Effect on Cutting Process	
S.J. Li, X.H. Wan, Z.W. Dong and Y. Yuan	1273
The Simulation Analysis of Tool Orthogonal Rakes Affecting Metal Cutting	
X.H. Wan, Z.W. Dong, S.J. Li and S.Y. Liu	1277
Track Initiation Based on Extended Trellis and Randomized Hough Transform	
Y.H. Zhang, X.H. Su and P.J. Ma	1281
Wood Board Defects Sorting Based on Method of Possibilistic C-Means Improved Support Vector Data Description	
Y.Z. Zhang, C. Tong, H.L. Yu and J. Cao	1288
Study of Vehicle Engine Transient Emissions	
H.L. Fu, Y.C. Zhou, Z.X. Hou and Y. Zuo	1292

Chapter 6: Computer Aid Design

Analysis of OCR Design and Implementation for GUI Modeling	
Y.M. Wu and Z.F. Liu	1303
Development the Cam Design System Based on VC++	
Z.Z. Ma and X.L. Wang	1308
Finite Element Analysis of Impact Plunger and Drill Rod and Optimization Design for Drill Rod of YC70 Hydraulic Impactor	
G.P. Yang, F.L. Zhu, W.L. Yin and Y. Cheng	1312
Finite Element Analysis of the Screen Box of the Combined Vibrating Screen Based on ANSYS	
N.Q. Guo, W. Liu and W.P. Huang	1316
Information Complexity of Monte Carlo Integration in Multivariate Functions with Mixed Smothness	
L.Q. Duan and P.X. Ye	1321
Research on an Improved Self-Correcting Location Algorithm for Wireless Local Region	
Z. Zhang, M. Jiang, G.C. Wan and X.W. Liu	1325
Software Design for Centralized Monitor of Chang'E-1 Operational Simulator	
A.W. Zheng, J.P. Zhou, Y.P. Ma and Y.H. Ga	1329
Software Design of Networked Virtual Instrument System	
G.S. Chen, Y.M. Lv and M.F. Xia	1334

Chapter 7: Design and Practice

Automobile Panel Reverse Engineering Design Based on NURBS Surface Reconstruction Technique	
H.Y. Zhang and P. He	1341

Automobile Stamping Parts Quality Inspection and Analysis Based on ‘Geomagic Qualify’ Software	
H.Y. Zhang, L. Bi and H. Zhang	1345
Based on FE Method to Research Resistant Rutting Ability of Pavement Structure in Heilongjiang Province	
P. Cao, D.C. Feng and R.X. Jing	1349
Colorful Limit Fractal Patterns with Evolving Planar Symmetry from Dynamics	
J. Lu and Y.R. Zou	1355
Comparison of Detrending Methods in Frequency Domain Analysis of R-R Interval Series	
L.P. Li, C.C. Liu, K. Li and C.Y. Liu	1359
Design and Implementation of a Simulation System for Armored Communication Countermeasure Training	
Z.N. Wang, Q. Gao, X. Wei and S.H. Yin	1363
Design and Implementation of a Voltage Booster Circuit for High-Pressure Injector Drives in GDI Engines	
W.C. Tsai	1367
Design and Implementation of H.264/SVC Decoder Forecast Module on ASIC	
X. Chen, Z.Z. Wu, S.L. Xie and J.H. Liu	1371
Design and Precision Analysis of Muzzle Angle Measurement System	
J.P. Zhou, X.Y. Wu, P.F. Zhang and G.H. Gu	1378
Design and Realization of High-Speed and Real-Time Signal Processing System Based on FPGA	
X.C. Wang, Y.H. Peng, M. Cheng and K.H. Yue	1382
Design and Simulation of High Altitude Air-Launched Automatic Underwater Vehicles	
C.J. Pan and Y.Q. Guo	1386
Design of H_{∞} Robust Control for Shunt Active Power Filter Based on the Mixed Sensitivity Method	
C.X. Jia, C.L. Wang and Q. Huang	1392
Design of a Sliding Mode Control with a Nonlinear Continuous Time-Varying Switching Surface	
G. Li and L.H. Liu	1399
Design of Elastic Cell in Pressure Sensor	
F. Ye and Z.M. Wang	1405
Design of Monitoring System for Frequency Converter Sets Based on PCI Bus	
X.Y. Yang, P.Y. Cheng and X.Q. Li	1409
Design of the Environment Multi-Parameters Recorder Based on MSP430 SCM	
Q. Wang, S.X. Liu, X.S. Zhao and W.J. Jiang	1413
Design of the Transpire Freight Impact Test System Based on ASTM D6537	
Z.F. He, Z.L. Zhan and Y.H. Zhang	1417
Design on Piezoelectric Converter for Electronic Safety System	
H.B. Xiao, S.X. Xing and F.Y. He	1421
Dynamic Optimization Design of Engine Crankshaft	
Z.Q. Cui, T. Zhang, X.H. Wang and Z.H. Xu	1426
Dynamic Properties on Double Driving Articulated in-Pipe Robot Inspecting System	
J. Chen, T. Chen and Z.Q. Deng	1430
EEG Signal Classification by Global Field Power	
L.J. Duan, X.B. Wang, Z. Yang, H.Y. Zhou, C.P. Wu, Q. Zhang and J. Miao	1434
Error Analysis for Correlation Algorithm Based Servo Valve Frequency Characteristic Measurement	
H.Y. Chang, J.Z. Wang, J.B. Zhao and S.K. Wang	1438
Error Analysis of Triangular Laser Measurement System	
L.W. Yu and D. Zhang	1443
Error Comparison of Different Acoustic Infinite Element	
R.L. Yang and L. Gao	1448
Experiment Study and Design of Measurement System of the Total Electrical Field on the Ground Level under HVDC Transmission Lines	
X.R. Zhao, T.B. Lu and Y.H. Dong	1452

Experimental Research of Solar Wall in Building Application L. Qiu, Y. Zou, L. Huang and G. Ren	1456
Experimental Research on a Certain Light Truck Cab Suspension System Effect on Ride Comfort C. Dai and J.H. Liang	1460
Study on Balance Scheduling Based on the Gasholder Level Prediction for Blast Furnace Gas System in Steel Industry Y. Liu, J. Zhao, Z. Lv and W. Wang	1464
Sustainability-Oriented Product Modular Design Using Design Structure Matrix (DSM) Method J.H. Yan and C.H. Feng	1468
The Design of Constant-Flow Bump Control System Based on BP Neural Network Z.P. Wu and Y.B. Chen	1472
The Design of Electric Power Optical Cable Circuit Automatic Monitoring System Based on PC Computer B. Song and W.D. Gao	1476
The Research and Design of Portable Leaf Disease Spots Image Acquisition System K. Song, Z. Wang and F.J. Shen	1480
The Research of Companding Transform for Peak-to-Average Power Ratio Reduction of OFDM Signals X.Y. Zhang, W.D. Wang, L.L. Pei and Y.B. Duan	1484
The Research of Spectral-Line Monitoring of Transformer Vibration Q.L. Ding, J. Chen and L.Q. Liu	1489
The Research of Static Friction Coefficient Measure Technology and Calibration Method for Traffic Engineering X.F. Ma, D.H. Guo and Y.H. Lu	1493
The Research of Subsea Electronic Module for Subsea BOP B.P. Cai, Y.H. Liu, Z.K. Liu and X.J. Tian	1497
The Design and Implementation of a Communication Mechanism of Centralized Body Control Module Y.L. Hu, K. Wang and B. Sun	1501
