ISBN(softcover): 978-3-03835-523-6 ISBN(eBook): 978-3-03826-993-9

Table of Contents

Preface and Committees

Chapter 1: Designing and Manufacturing in Mechanical Engineering

Teaching Industrial Robot Manipulators by Easy to Use Interface Systems
G. Capi, D. Hossain, S.I. Kaneko and K. Bode 3

A New Design Concept for Wind Turbine Airfoil
K. Ye, Z.Y. Ye and Z. Qu 8

Evaluation and Improvement of Performance Parameters for a Mechanical System Used in Minirobotics
V.C. Contoloru and S. Dumitru 15

Effect of Link Tolerance and Joint Clearance on End-Effector Positioning of the 3-PSP Manipulator Using Taguchi Method
F.H. Sheikhha and A. Akbarzadeh 20

Flanged Connections of Steel Tubular Sections under High Bending Stresses: A Comparison between Two Thickness Design Methods
A.M. Velten and R.L.U.d.F. Pinto 25

Design of Passive Weight Compensation for a Robotic Manipulator
P.A. Uriza and C.F. Rodriguez 30

A FEM Frontal Impact Study of Square-Section Tubes with Different Structural Solutions for Vehicle Safety
C.F. Maia, G.S.M. Lima, F.G.L. Amorim, E.Q.N. Vera and A.M. Pasqual 36

Experimental Determination of Tyre Lateral Force: Application to Tyre Cornering Stiffness
H. Georgieva and L. Kunchev 41

Passive Safety Analysis for the Commercial Vehicle Cab after Weight-Reduction Design
J. Chen, H.Y. Wang, Q. Wang and X.L. Tao 48

Simulating Torsional Slip in V-Band Clamp Joints
S.M. Sahboun and S.M. Barrans 53

Performance Evaluation of a Variable Geometry Gas Turbine in a CHP Plant
A. Tesfamichael Baheta, S.I. Gilani and S.A. Sulaiman 59

Design of Walking Mechanism for All-Terrain Mobile Platform
F.L. Zhou, X.J. Xu, C.Y. Pan and H.J. Xu 64

Gantry Robot for Mobile Observation
S.H. Jamaludin, M.N. Mansor, A.K. Junoh and A. Idris 70

Assessment of a FEM-Based Formulation for Horizontal Axis Wind Turbine Rotors Aeroelasticity
A. Calabretta, C. Testa, L. Greco and M. Gennaretti 75

Combined Compliance Method of the Variable Cross Section Flexure Hinge and its Verification
Q.L. Liu and X.X. Wang 85

Continuous Improvements Analysis in Energy Efficiency of Steering Power Systems to Light Vehicles
J.A. Silva, G.C.L. Nacif and L. Cabezas-Goméz 92

Cascading Analysis Using Discrete Element Method in Rotary Drum Coolers
R. Huebner, L. Barreto Pereira and R. Nacife Carneiro 97

Analysis of Developing of Renewable Energy Sector in Europe and 2020 Targets
S. Tilvaldyev, J. Flores-Garay, A. Villanueva Montellano, D. Cornejo Monroy and A. Flores Ortega 102

Chapter 2: Dynamics and Vibration of Machines and Mechanisms

Optimization Method Research for Stiffened Thin Wall Structure's Vibration Suppression Based on Parametric Modeling Technique
W. Jin, B.J. Mou, H. Huang and H.B. Fu 113

Effect of the Transverse Shear Deformation on the Free Vibration of Rotating Blades Modeled as Thin-Walled Composite Beams
S. Yilmaz, S. Eken and M.O. Kaya 119

Dynamics of Landing a Spacecraft on a Small Celestial Body with Conditional Operation of Pinch Engines
D.H. Chen, V.P. Kazakovtsev and V.V. Koryanov 125

Dynamic Model Updating of Satellite Structure Using Vibration Test Data
Y.Q. Feng and Z.Y. Wang 129

Noise and Vibration Measurements for the Assessment of Damping Efficiency in Power Transformers
G. Kmita, M. Kozupa, G. Bustreo, M. Hrkac, R. Zannol and K. Kolber 135

An Investigation of Internal Viscous Damping Effects on the Vibration of a Microbeam Made of Functionally Graded Materials
E. Maleki, K. Sherafatnia, A. Pasharavesh and A. Zabihollah 140

Modal Analysis as the Base of Dynamic Analysis
K. Monkova, P. Monka, A. Cizikova, F. Murgas, J. Rehor and M. Edl 148

Chapter 3: Fluids and Thermal Engineering

Design and Analyses of a Propeller for Underwater Vehicles Using Computational Fluid Dynamics
E. Gungor and I.B. Ozdemir 155

Experimental Study of Defluidization by Continuous Water Injection into a Gas-Solid Fluidized Bed Using Pressure Fluctuation Measurements
F. Tramontin Silveira Schaffka, G.K. Tramontin and M.R. Parise 160

Determination of the Diameter of a Cylinder to Insertion in a Low-Speed Wind Tunnel Based on EFD and CFD
G.L.F. de Vasconcellos, M.D. de Queiroz, L.F.R. Ledo, S.d.M. Hanriot and C.B. Maia 165

Computational Fluid Dynamics Simulation of Steel Bars Cooling by Free Convection and Thermal Radiation
P.H. Terenzi Seixas, P.C.S. Silva and R. Huebner 170

Evaluation of Spray Drying Behavior by Model Simulation
D.H.d.S. Chaves, M.A.d.S. Birchal and V.S. Birchal 175

A Practical Solution for Reducing Critical Height in Drain Sink Problem during Ladle Teeming Process
R. Schor, V.P. Monken, R. Coelho and L.S. Oliveira 180

Numerical Simulation of Solid Propellant Rocket Exhaust Plume Considering Two-Phase Flow Effects
Y.J. Ma, F.T. Bao, H. Xu and L. Sun 185

Numerical Analysis of Pressure Swirl Atomizer
M. Kahraman, G. Komurgoz and I. Ozkol 190

Optimal Design of Wind Boosters for Low Speed Vertical Axis Wind Turbines
N. Korprasertsak and T. Leephakpreeda 195

Investigation of Phase Change Material as a Potential Replacement of EGR Cooler
S. Bhaskar, W.A. Katib and D. Senthilkumar 200

Fluid Dynamic Simulation and Optimization of Compact Heat Exchangers with Louver Fins
D.A.C. de Souza, L.C. Gómez and J.A. da Silva 205

Chapter 4: Researching and Designing of Internal Combustion Engine

Numerical Validation of the Ethanol Spray Produced by a Direct Injection Injector for Different Pressure Conditions
F.G.L. Amorim, M.E. Guzzo, L.M. Reis, R.O. Coelho and R.M. Valle 213

Ethanol Lean Combustion Characteristics of a GDI Engine
R.B.R. Costa, C.A.J. Gomes, F.J.P. Pujatti, R.M. Valle and J.E.M. Barros 219

Numerical Analysis of an Internal Combustion Engine Using One-Dimensional Code
F.C. Radicchi, J.M.G. Vieira, L. Fonseca, R.M. Valle and J.E.M. Barros 224

Macroscopic Analysis of Spray Development Using Direct Injection for Studying Ethanol Fuel Behavior
M.E. Guzzo, C.A.J. Gomes, R.B.R. Costa, R.M. Valle and J.E.M. Barros 229

Numerical Analysis of a Torch-Ignition System for an Internal Combustion Engine
F. Radicchi, R. Braga, R.A. Coelho, R.B.R. Costa and R.M. Valle 234

Design and Fabrication of Supercharging an Engine Using Vehicle Suspension
S. Maniyath, R. Rajan, S.S. Vaisakh, M. Pramith, N.K. Sarath, S. Arjun Krishna and A.S. Arjun 239

Chapter 5: Instrumentation, Monitoring, Control Systems and Automatics

Adaptive Fuzzy Autopilot for a Scale Ship Model
A. Ramos and J. Contreras 249

Satellite Attitude Control System Using a Spherical Reaction Wheel
H. Paku and K. Uchiyama 256

A New Iterative Identification and Control Method of Closed-Loop Power System Based on Ambient Signals
M. Yu and C. Lu 261

Fault Detection in Navigation System of ALV Based on Symmetrical Behavior of Control Channels
S.M.M. Hasani, A.M. Khoshnood and J. Roshanian 266

Tool Condition Monitoring Using the Electromotive Force from the Chip-Tool Thermocouple
R. Roberto Ingraci Neto, R. Luis Fragelli, A. Alves Fiocchi and L.E. de Angelo Sanchez 271

Elimination of the Collision States of the Effectors of Industrial Robots by Application of Neural Networks
E. Prada, L. Baločková and M. Valášek 276

Formation Control of Quadrotor UAVs by Vision-Based Positioning
W.Y. Kim, J.W. Kwon and J.W. Seo 282

Mapping by Optimization of the Minimum Volumetric Error in Coordinate Measuring Machines
B. di Giacomo and C.A.G. de Morais 287

Optimal Control Procedure Application for Dynamic Response of Adaptive Aircraft Wings Modeled as Thin-Walled Composite Beams
K. Yildiz, S. Eken and M.O. Kaya 292

Stability Analysis of the Microsatellite Attitude Control System
M. Moldabekov, S. Yelubayev, K. Alipbayev, A. Sukhenko, T. Bopeyev and D. Mikhailenko 297

Calibration of Positional Errors in Coordinate Measuring Machines and Machine Tools Using a Laser Interferometer System
B. di Giacomo and C.A.G. de Morais 303

Selection of Input Parameters for Multivariate Classifiersin Proactive Machine Health Monitoring by Clustering Envelope Spectrum Harmonics
A. Smith, F.S. Gu and A. Ball 308

Size Determination of Immersed and Embedded Cylindrical Rods by Inversion of Acoustic Scattering Data
K. Mohammadreza and M. Sadraei 314

Real-Time 2D Surface Profile Mapping of Biological Tissue with Force Feedback in Robot-Assisted Minimally Invasive Surgery
A.R. Hassan Beiglou and J. Dargahi 319

Development of a Tool Changer for a Reconfigurable Machine Tool
I. McLaren and I. Gorlach 324

The Development of Flight Test Real-Time Trajectory Measurement System
H.L. He 329

Chapter 6: Materials and Materials Processing in Mechanical Engineering

***In Situ* X-Ray Diffraction Measurements of the Apparent Modulus of Human Dental Tissue in the Vicinity of the Dentine-Enamel Junction (DEJ)**
T. Sui, S.Q. Ying, N. Baimpas, G. Landini and A.M. Korsunsky 339

Application of High-Strength Gradient Cutting Ceramics with a Multifunctional Coating for Heavy Machining of Hard-to-Cut Materials
A.A. Vereschaka, B.Y. Mokritskii, D.A. Pustovalov, A.S. Vereschaka, J.I. Bublikov and D.N. Litkin 344

Improving Efficiency of End Mills by Deposition of Modifying Nano-Scale Multilayer Composite Coatings
A.A. Vereschaka, B.Y. Mokritskii, D.A. Pustovalov, A.S. Vereschaka, J.I. Bublikov and G.V. Oganyan 351

Tensile Behavior of Unidirectional Carbon Reinforced Composites for Aerospace Structures under Varying Strain Rates
H.A. Khan, M. Nigar and I.A. Chaudhry 357

Experimental Study on Material Removal Capability with Vibration-Assisted WEDM
P. Radhakrishnan, L. Vijayaraghavan and N. Ramesh Babu 362

Multi-Cycle Nanoindentation Studies on TiN/TiAlN Nano-Multilayer Coating: Effects of Mechanical Properties and Coating Structure
K. Khlifi, H. Dhifelaoui, L. Zoghlami and A. Ben Cheikh Larbi 367

Si Particle Size-Controlled Al-17 Mass% Si Alloy and Tool Wear in Cutting Al-17 Mass% Si Alloy by Polycrystalline Diamond Compact Cutting Tool
T. Wada 372

Tool Wear of Aluminum/Chromium/Tungsten-Based-Coated Cemented Carbide in Cutting Hardened Steel
T. Wada and H. Hanyu 377

Preparation of Pb(II)-Imprinted-Carboxymethyl Chitosan-Pectin-BADGE Film as Sorbent for Pb(II) Ion
B. Hastuti, Mudasir, D. Siswanta and Triyono 384

Application of Oyster (Anadara Inflata) Shell Chitosan as Adsorbent for Heavy Metal Cu(II) Ion
S. Hadi, B. Hastuti and N.T. Setiawati 390

Wear Behaviour of Cryogenic Treated M2 Tool Steel under Dry Sliding Condition
S.A. Sonawane, V.K. Tripathi and S.D. Ambekar 395

Further Analysis on Silver Ions Migration
X. Gong and C. Duan 402

The Spontaneous Growth of Pb Whisker from the $Pb_{60}Sn_{40}$ Solder Layer on the Au Coating
Z.B. Wang, Y.W. Zhang, W. Zhang, Y. Chen, X. Gong and M. Meng 406

Environmental Effects on the Static and Fatigue Behaviours of Hemp Fibre under Tensile Loading
A.D. Ngo, T.N. Ho and K. Sefrioui Manar 410

Epoxy Resin as a Binder in the Preparation of Rutile Coated Electrodes
F.C. Lage, L.S. Oliveira, A.S. Franca and A.Q. Bracarense 419

Research on Wear Mechanism of Solid Lubrication Bearing in Vacuum Environment
X.M. Lai, J.C. Han, P. Gao, J.J. Qu, Y. Li, C.L. Tan and J. Jiang 424

Predicting Mechanical and Thermal Behavior of Multiphase Composite Containing Phase Change Material (PCM) by Micromechanical Approaches
S. Barboura, J. Meddour, M. Haboussi, M.S. Kachi and L. Royon 430

Comparative Study of Effect of Cryogenics Heat Treatment and Case Hardening on the Wear Property of 20MnCr5
S.D. Ambekar, S. Kadam and S.A. Sonawane 435

Intellectualization of Surface Layers, Working under Cyclic Loading and Reversing Friction
Z. Blednova and P.O. Rusinov 440

Experimental Investigation of Machining Factors in Metal Turning Operation Using Shainin's Variables Search Method
C. Saikaew, T. Channongwang, T. Kumpoo, T. Chummuangpug and M. Leesai 447

Comparative Evaluation of Efficiency of Metal-Cutting Tool by Method of Pendulum Scribing
B.Y. Mokritskii, D.A. Pustovalov and A.A. Vereschaka 452

Additive Manufacturing for Aerospace Application
M.Q. Chu, L. Wang, H.Y. Ding and Z.G. Sun 457

Analysis of Buckling of Sandwich Plates with Viscoelastic Core Using Layerwise Theory
A. Ranjbaran, M.R. Khoshravan and M. Kharazi 462

FE Study of the Chips Morphology when Drilling Process
N. Glaa, K. Mehdi and M.B. Jaber 470

Analysis of Wood Biomass in Bubbling Fluidized Bed Reactors
J.C.C. Campos, A.J.K. Leiroz and M.T. Resende 475

Evaluation of the Potential of Fruit Peel Biomass after Conventional and Microwave Drying for Use as Solid Fuel
A.T. Charbel, B.D. Trinchero, D.D. Morais, H. Mesquita and V.S. Birchal 480

Toolholder Internally Cooled by a Phase Change Fluid in Turning of SAE XEV-F
R. Roberto Ingraci Neto, R. Luis Fragelli, A. Alves Fiocchi, V. Luis Scalon and L.E. de Angelo Sanchez 486

Chapter 7: Computational Techniques for Simulation and Numerical Analysis

Numerical Analysis of the Trajectory of a Basketball Considering Lift and Drag
T.R. Nikhilesh and P. Kulkarni 493

Bespoke Part Library for an SME for Enhanced Design Efficiency
S. Barrans, G. Eyre and M. Goddard 500

A Generalized Elasto-Plastic Micro-Polar Constitutive Model
L. Gori, R.L. da Silva Pitangueira, S. Silva Penna and J.S. Fuina 505

Chapter 8: Researching and Designing in Aerospace Engineering

Critical Mach Number for Flow around Circular-Arc Airfoil
V.A. Frolov 513

Third Order ENO Scheme on Non-Uniform Grid for Supersonic Flows II
Y. Moisseyeva, A. Naimanova and A. Beketaeva 518

Unsteady Aerodynamic Characteristics of the Pitched Supersonic Biplane
C.X. Zhao, R.H. Hua, Z.Y. Ye and Y.W. Jiang 523

Aircraft Ditching Loads Simulation Tool
A. Bonanni, L. Vandewaeter, C. Havill, P. Kanyoo, D. Taunton, J.I.R. Blake, E. Cropper and S. Hancock 531

Numerical Study of the Particle Dispersion on a Supersonic Shear Layer
A. Makasheva, A. Naimanova and Y. Belyayev 536

Research on Simulation and Experiment of Dynamic Aeroelastic Analysis on Wing Structure
P.K. Nguyen, K. Mori, T.K.D. Hoang, V.H. Nguyen and H.A. Nguyen 541

Investigation of Vortex Structures for Supersonic Jet Interaction Flowfield
A. Beketaeva, A.H. Abdalla and Y. Moisseyeva 546

End of Life and Beginning of Life Thermal Analysis of a Micro Satellite
M. Turkmenoglu 551

Design of a Solar Powered, Unmanned, Low Altitude, High Endurance Airship
O.S. Sonmez and H.N. Alemdaroglu 556

Aircraft Configuration Improvement Study from Aerodynamic and Structure Standpoints
L.M. Fragola Barbosa, R.L.U. de Freitas Pinto and B. Oliveira Hargreaves 565

The Application of Stewart Platform in Spacesuit Upper Torso Active Fit Design
Y.F. Li and W.X. Zhang 571

A Modified Discriminance in Performance Reliability Simulation of Solid Rocket Motor
H. Xu, F.T. Bao, C. Cheng and B.H. Wang 576

Actuation System Design for a Morphing Aileron
G. Amendola, I. Dimino, A. Concilio, R. Pecora and F. Amoroso 582

Numerical Investigation of Surface Curvature Effects on Aerofoil Aerodynamic Performance
X. Shen, T. Korakianitis and E. Avital 589

A Simple and Robust Subsonic Boundary Layer Method to Be Used with the Panel Method for Wing Calculations Using a Wing Strip Approach
R.F.F. Reis, G.A. Santana, P. Iscold and C.A. Cimini 596

Inverse Design Method for a Supersonic Ring Wing Based on the Busemann Concept
C.X. Zhao, Z.H. Chen and Z.Y. Ye 602

Numerical Experiment of Flow Characteristics of Parallel Arrangement Two Symmetrical Airfoils
Y. Yokoi 609

Deterministic Algorithms to Estimate Spacecraft Angular Velocity from Single Vector Measurements
K. Zhai 615

Drogue System Reliability Analysis Using Weibull Analysis
I. McAndrew, E. Navarro, O. Godsey and B.G. Usaf 622

A "Laminar + Transition Criteria" Model for Hypersonic Three-Dimensional Boundary Layer Transition Prediction
L. Zhou, C. Yan, Z.H. Hao and W.X. Kong 627

A Contact Nonlinear Thermo-Structure Fully-Coupled Simulation for Nozzle Based on One-Time Adhesive Failure
L. Sun, F.T. Bao, N. Zhang and H. Xu 632
