

Table of Contents

Preface

CONTENTS

GLOSSARY OF SYMBOLS USED

1. Methods of Preparation - Typical Microstructures

D.G. Morris 1

1.1 Powder Methods 2

1.2 Multilayers and Laminates 13

1.3 Severe Plastic Deformation 15

1.4 Coating Methods 17

2. Theoretical Considerations and Modelling. 2.1 Grain Size Dependence of Strength and Hardness: Dislocation Models

D.G. Morris 19

2.2 The Importance of Diffusion on Grain Boundaries, Creep, and Grain Boundary Sliding 27

2.3 Atomistic Modelling of Mechanical Behaviour 30

2.4 Ductility and Toughness 33

3. Experimental Studies of Mechanical Behaviour. 3.1 Elastic Properties. 3.2 Strength and Hardness

D.G. Morris 42

3.3 High Temperature Behaviour 57

3.4 Ductility and Toughness 61

3.5 Fatigue Behaviour 69

3.6 Wear Properties 70

4. Conclusions

D.G. Morris 74

ACKNOWLEDGEMENTS
