Reviewers and Committees

Preface

Study on Composite Material Mechanics Model of the Cement Loop Damage Mechanism in Destroyed Casing Well M.Z. Jiang, Y.X. Dai, G.L. Zhou and Y.P. Cao	1
Gear Reliability Design Using Probability Finite Element Method Based on Response Surface S.X. Sun, M. Yan, P. Bai and L. Han	7
Collaborative Optimization for the Cold Extrusion Die and Process Parameters of Wheel Hub Bearing Rings B. Meng, H.W. Wu, G.J. Bao and Q.H. Yang	13
Influence Factors on the Junction Line Entering for High-Temperature Alloys in Resistance Seam Welding Y.P. Chen, W. He and F.Q. Zhu	19
Stochastic Finite Element of Structural Vibration Based on Sensitivity Analysis W.H. Mo	25
Analysis of Weld Formation Mechanism and Weld Pool Dynamic during Moving Laser-MIG Hybrid Welding Z.G. Gao	33
Numerical Analysis for Dynamic Characteristics of New Launcher with Coupled Rigid and Flexible Motion Y.Z. Wang	44
Optimal Design of Drive System in Wind Power Generation Acceleration Gearbox Based on Matlab S.B. Yang, J.F. Zhang, J.G. Wang and X.Q. Deng	50
The Optimum Design for the New-Typed Auto-Eliminate Backlash Mechanism in Gear Transmission Q.Q. Liu, Z.F. Xiang, J.G. Wang and J. Wu	57
Optimal Design of Structural Vibrationbased on Stochastic Finite Element W.H. Mo	65
Inverse Mode Problem in the Discrete Model of Circular Plate Axial Symmetry Vibration Q.S. Wang, Y. Wang and L.H. Zhang	71
Research on Evaluation Index System for Green Manufacturing Based on PSR Model and Life Cycle Q.S. Wang, X.L. Yuan, D.Y. Cao, C.Y. Ma and K. Zhang	79
Temporal Inference and Simulation in Collaborative Design Process Based on Time Petri Net Y.Z. Guo and J.C. Zeng	85
T-S Fuzzy Model-Based Fault Diagnosis of PEM Fuel Cell Engine R. Quan, S.H. Quan and L. Huang	92
A Study on Objective Functions for Springback Control in Multi-Objective Optimization of Sheet Metal Forming Process X.A. Yang and F. Ruan	98
Strength Analysis of Dual-Chamber Hydrodynamic Coupling Based on One Way FSI D.S. Zhang, J.Y. Zhao, Z. Xu and Z.X. Wang	105
Study on the Difference of Frontal Impact Response among People of Different Sizes L.B. Cao, C.Z. Cui, N.Y. Zhu and H. Chen	111
Streaming Potential Induced by Canaliculi Fluid Flow: A Fluid-Filled Thick-Walled Cylinder Osteon Model Subjected to Axial Loading X.G. Wu and W.Y. Chen	117
Analytical Analysis Method for Number of Spare Parts of Typical Systems J. Xing, P. Bo and L. Hai	123
Design and Implementation of Two Axis Tool Table Control L. Kang, L. Yang, J. Yang and Y. Li	131

Design and Implementation of Device Cooperation Middleware for Earthquake Precursor P. Deng, J.W. Zhang, H.Y. Liu and M. Jia	137
A Spatial 3-DOF Translational Compliant Parallel Manipulator D.C. Zhu and Y.P. Feng	143
Application and Non-Homogeneous Index Grey Model NIGM(1,1,k) Z.M. He, Y.X. Luo and B. Zeng	148
Analysis and Improvement of Random Number Generating Algorithm Y.F. Li and Q.F. Zhao	153
Fusion Method for True Value Estimation of Manufacturing Quality under Condition of Poor Information (Part I: Theory) X.T. Xia, L.L. Gao and J.F. Chen	157
Fusion Method for True Value Estimation of Manufacturing Quality under Condition of Poor Information (Part II: Experiment) X.T. Xia, J.F. Chen and L.L. Gao	162
Performances of the Hybrid Active Desiccant Wheel System with Type III Desiccant Y.Z. Zuo, S.L. Wen and X.Y. Li	167
Surface Analysis of Electrical Arc Residues in Fire Investigation Y. Wu, W. Gao, M. Di and C.Z. Zhao	172
Research on a Kind of New Green Precision and Micro-Manufacturing Technology H.Q. Bao, C.T. Wang and B.K. Han	177
An Experimental Study on Oil-Air Lubrication of Sliding Friction Element L. Cai, J.L. Wang and H.T. Zheng	181
An Approach for Construction of Fault Trees Using Rough Set and Fuzzy Clustering Algorithm J.L. Tu, R.X. Duan and D.C. Dong	186
Design on Parameterized Drafting System of Centrifugal Fan J. Zhu, L. Chen and P.Y. Xi	192
Semi-Rigid Analysis of Extended End Plate Connections Based on Correlation and Sensitivity J.R. Pan, Z. Wang, C. Su and L. Wang	197
Finite Element Analysis of C Axis of High-Power Direct-Drive Bi-Rotary Milling Head M. Yan, P. Zheng, Y. Li and X.F. Gao	202
Finite Element Analysis on Structural Stress of 8×8 InSb Infrared Focal Plane Array Q.D. Meng, X.L. Zhang, X.L. Zhang and W.G. Sun	207
Finite Element Analysis on Structural Stress of 64×64 InSb Infrared Focal Plane Array Q.D. Meng, X.L. Zhang, X.L. Zhang and W.G. Sun	212
Real-Time Soft Shadow Generating in Three-Dimensional Scene L. Xiao, C. Liu and X.L. Qu	217
For the Shipbuilding Enterprise Model of Intelligent Recommendation Services W. Zhang, X.H. Pan and X.K. Fang	222
Study on Aging Characteristics of Warm Mix Asphalt: Using Softening Point as a Parameter of the Aging Kinetics Model J.P. Zhang, J.Z. Pei, S.C. Xu and Y.F. Bi	227
Analysis of the Gearing Theoretic between Plastic Helical Gear and Steel Worm Y.S. Hao, B.N. Yue and X.X. Zhu	232
Experimental Study on Slab Track Passenger Transportation Special Line Roadbed Power Response M.Y. Ma, K. Wu and C.H. Gu	238
Weld Performance of Joint of Beam to CFST Column with Interior Strengthening Ring J.R. Pan, Z. Wang and X.S. Sun	242
Simulation Research of Saw Angle Adjustment System for Sliding Table Saw Based on MATLAB P.L. Cheng, Y.S. Tan and Y.D. Xu	247
Study on Two Kinds of Pneumatic Booster Valves Y. Shi, M.L. Cai and P.P. Liao	252
The Effects of the ACL Reconstruction Tunnel(s) on Patellofemoral Contact R.Y. Huang, Q. Xu and Y.G. Xu	260

Adaptive Multiple Impedance Control Based on Passivity W.J. Li, B.L. An and H.K. Zhang	265
Solution for a New Sub-Problem in Screw Theory and its' Application in the Inverse Kinematics of a Manipulator Y.S. Tan, P.L. Cheng and A.P. Xiao	271
The Complex Dynamical Behaviors of Lateral Vibration of Tire Y. Li, S.G. Zuo, L. Lei, X.W. Yang and X.D. Wu	276
Investigation on Machining Characteristics for Tangential Ultrasonic Vibration Assisted Grinding W.F. Lang and H.L. Zhang	282
Numerical Analysis of Structural Reinforced Concrete Elements under Severe Impulsive Loads W.B. Sun	287
Investigation of the Tribological Properties of Si₃N₄ Ceramic Pair Lubricated by Emulsion with Different Functional Group Z.Y. Wu, S.H. Wang, X.L. Tian and S. Zhang	292
A Peak Identification Method of Vibration Signal on Diesel Engine Cylinder Head in the Absence of TDC Signal Z.Q. Zhu, W.M. Zhang, X.M. Zhang and Y.P. Shi	296
Misfire Diagnosis of Diesel Engine Based on Short-Time Vibration Characters Z.Q. Zhu, J. Yang, X.M. Zhang and X.L. Li	301
The FNN Quilting Process Deformation Prediction Model L.X. Tang, B. Bin and K. Han	306
Study on the Intelligent Controller of DTC System at Low Speed W.P. Cui, Y. Liu and X.L. Qu	311
Evolutionary Optimization on Turning Linkage of Automobile in Simulated Annealing F. Chen and J. Zhu	317
Design and Experiment Research of a Non-Contact Optical Fiber F-P Ultrasound Sensor for Detecting Surface Defects N. Shan	322
Carbonation Test Study on Low Calcium Fly Ash Concrete H. Xu, Z.Q. Chen, S.B. Li, W. Huang and D. Ma	327
Rolling Element Bearing Condition Monitoring and Diagnosis H.B. Lin and K. Ding	332
Researches into Influence of Process Parameters on FDM Parts Precision A.H. Peng and Z.M. Wang	338
Co-Service Manufacturing System Integrated OPC UA/FDT for Complex Equipments & Field Devices B. Shen, D.J. Qi, L.Q. Fan and H. Meier	344
Microstructure and Properties of Super Plastic Diffusion Bonded 00Cr25Ni7Mo3N Duplex Stainless Steel Joint X.H. Chen, C.X. Jiang, X.P. Ren, H.L. Hou and H. Li	350
Thermal Cracking Meso-Characteristic of LuHui Granite Y. Zhang and Y.S. Zhao	355
Study on Simulation Reliability Test of Machining Center X.P. Zhang, J.Z. Shang and Z. Wang	360
Element Characterization of AlZnO by Laser Induced Breakdown Spectroscopy (LIBS) D.Q. Yuan, M. Zhou and J.T. Xu	365
Geometrically Nonlinear Analysis of Long Span Composite Girder Cable-Stayed Bridge with Three Towers under Live Load M.Y. Liu and F. Wang	371
Numerical Investigation on Aerodynamic Performance for Guiding VAWT with Combined Blades Q.K. Wang	376
Elasto-Plastic Cellular Automaton Simulation of Fracturing Process in Single Pre-Fractured Rocks under Uniaxial Compression H.Y. Yao and P.Z. Pan	383
Reliability Analysis of Supply Chain Based on GO Methodology X.L. Ren and G.B. Zhang	387

An Elastic Dynamic Analysis of a Nonhomogeneous Moderately Thick Plate Using the Meshless Local Petrov-Galerkin Method P. Xia, W.G. Mao and W.J. Hu	393
Crashworthiness Optimization Using Response Surface Method Based on Uniform Design T. Yoshino, T. Xu, T.S. Xu and P. Cheng	399
Research of Simplified B Pillar Model for Roof Crashworthiness T. Xu, L. Hao, Y.W. Li and Q. Li	404
Investigations on Twisted Blade for Axial Microfan Q.K. Wang	410
Optimization of Generator Structure and Additional Anode Access Method of MDAM System X.L. Tian, J.F. Yang, B.G. Zhang, F. Guo, Y.T. Mao and A.B. Yu	417
Dynamic Properties Analysis of Electromagnetic Gear Driving System H.H. Chen and J. Chen	422
The Interaction between a Dislocation and Circular Inhomogeneity in 1D Hexagonal Quasicrystals Y.Q. Hu, P. Xia and K.X. Wei	429
Thermal Paints Color-Temperature Intelligent Interpretation C.W. Ma	435
Discharge Flow Ripple of Axial Piston Pump with Conical Cylinder Block L. Li, J. Ke, J. Xu and W. Yong	440
Chaotic Calculation and Prediction on Volume Deformation of MgO Concrete Based on Lyapunov Exponent J.W. Song and X.P. Cai	446
Modeling and Simulation of PCB Assembly under Board-Level Drop Impact F. Liu and G. Meng	451
Defect Detection in Seven-Wire Steel Strands Using Single Magnetostrictive Transducer with Two-Layer Coil Z.H. Liu, J.C. Zhao, B. Wu and C.F. He	456
Artificial Neural Network Analysis Method of Concrete Performance Based on Virtual Data Samples J.W. Song and Y. Shi	462
Study on Bifurcation of Rigid Rotor Roller Bearings System Considering Nonlinear Dynamic Behavior L. Cui and J.R. Zheng	467
The Study of Corner Echo Inspection with Bulk and Creeping Waves Effect in Ultrasonic Testing	472
A Novel 3-D Topography Model for Micro-Manufacturing Process Simulations D.L. Xu and J. Zhang	477
Behavior-Based Fuzzy Control of Obstacle Avoidance for Indoor Mobile Robot D.H. Chen and Y.M. Liang	482
Intelligent Fault Diagnosis Method Based on Reliability Analysis R.X. Duan, J.L. Tu and D.C. Dong	487
Study on Discharge Characteristics of Piezoelectric Self-Adaptive Micro-EDM System Y.J. Zhu, Q.H. Zhang, X.Z. Fu and G.H. Bao	492
A Fast Collision Detection Algorithm in Virtual NC Machine Tool J.X. Tian, Z. Liao and L. Xiao	497
Optimization of Maximum Entropy Model of Bayesian Prior Distribution Based on HPSO Z.M. Wang and Y. Dai	502
Modeling and Estimating Thermal Error in Precision Machine Spindles J. Han, L.P. Wang and L.Q. Yu	507
A New Vehicle Speed Estimation Method Based on the Longest Radial Crack on Windshield J. Xu, M.Y. Zhu, B.H. Liu, Y.T. Sun and Y.B. Li	512
Study on an Integrated Child Safety Seat L.B. Cao, H. Chen, X.J. Ren and Z.G. Ou Yang	517
Modeling and Simulation of Hydraulic AGC System for 1100mm Cold Rolling Mill Q.M. Gao, J.F. Li and G.Q. Zhao	523

Measures for Improving Reliability of the Machining Center X.P. Zhang, J.Z. Shang and Z. Wang	527
Experimental Investigation on Dynamic Characteristics of a FEAD System: Affected by Serpentine Belt Length X.K. Zeng and W.B. Shangguan	533
The Application of Pseudo-Excitation Method to the Ride Comfort Research of Wheel-Loader C.Y. Chi, S.C. Qin, D.W. Yu and W.J. Zhang	538
Optimization of the Rollers System of Aluminum Strip Rolling Mill Based on the Stochastic Vibration B.Y. Xu, Y.L. Liu, X.D. Wang, F. Dong and Z.C. Kang	544
Proposal of Power Determination and Measurement of Compressible Air C. Liu and M.L. Cai	551
The Comparison of Isotropic and Anisotropic Diffusion Techniques for Image Denoising C.Y. Liu, C.Y. Zhang, H.Z. Yuan and X.L. Qu	557
Design and Optimization of High-Viscosity and High-Density Drilling Fluid Separation System R.B. Xu, X.G. Liu and F.Q. Tu	562
Transient Thermal Analysis of Spiral Bevel Gears under Loss of Lubrication Y.T. Yan, Z.L. Sun and R.J. Guo	566
A Trajectory Privacy Preserving Method in Peer-to-Peer LBS System Y.H. Guo, Y.M. Guo, Y.J. Guo and C.M. Wang	571
Boiling in Microchannels with Refrigerant Mixtures Z.C. Hu, H.G. Ma, X.N. Song and Q. Wang	576
Static and Dynamic Characteristic Analysis of XDK650X Engraving and Milling Machine S.G. Chen, H.L. Zhao, Z.H. Wu, G.P. Zhang, B. Wang and Q.F. Wang	582
Research on the Degradation of VOCs under Visible Light Irradiation Via Nano-Coating J.Y. He and K.J. Wang	587
Computer Simulation on Intensity Distribution of UV Irradiation System J.Y. He and Z.P. He	591
Virtual Fatigue Test of Auto Parts Based on Non-Structural Road Driving Simulation N. Cong, X. Chen, J.Z. Shang and K.S. Liang	595
Research on Optimization of Air Blowing System W.Q. Xu and M.L. Cai	600
Based on Continual Development of Remanufacture for Heavy Duty Caterpillar Engines and its Remanufacturing Technology Z.H. Cai, P. Zhang and Z.J. Liang	605
Mechanical and Tribological Properties of Multi-Element CrTiAlN Coatings for Dry Cutting Deposited by Magnetron Sputtering Technologies Z.H. Cai, P. Zhang and J.W. He	610
Tool Overhang Effect on Cutting Force in High Speed Milling Z.Y. Zhao, Y.B. Du, L.M. Zhang and B. Liu	616
Analysis of Structure Capital Impact on Knowledge Flow within Supply Chain F.B. Lu and W.Y. Zhang	621
Design and Implementation of Data Interchange Platform for Earthquake Precursors P. Deng, J.W. Zhang and Q. Gong	626
Modeling and Analysis of Process Parameters on State Variables in WEDM of TiB₂ Nanocomposite Ceramic M. Reza, S. Yazdi, H. Dehghan and H. Amini	631
Experimental Study of Dynamic Fracture Behavior of PVB Laminated Glass by High-Speed Photography M.Y. Zhu, B.H. Liu, Y.T. Sun, J. Xu, X.F. Yao and Y.B. Li	636
Numerical Simulation of Riveting Process H.S. Zhang	641
Parameters and Experiments on the Precision Forming Process of Spline Cold Rolling Z.Q. Liu, J.L. Song, H.P. Qi, Y.T. Li and X.D. Li	646
Association Rules Mining in Manufacturing J. Tan and Y.Y. Bu	651

Time-Wavelet Energy Spectral Analysis for Fault Diagnosis of Rolling Element Bearings Z.P. Feng, J. Zhang, R.J. Hao, F.L. Chu and X.J. Li	655
A Wireless Sensor Network Based Vibration Monitoring System: Architecture, Principle and Validation Z.P. Feng, C.Z. Zhang, B. Xie, J.W. Cao and X.J. Li	661
Investigation of Machinability in Minimum Quantity Lubrication Milling of GH4169 Aerospace Superalloy S.M. Yuan, L.T. Yan, W.D. Liu and Q. Liu	666
A Monitoring and Diagnosis System for Heavy Duty Diesel Engines: Design, Implementation and Application Z.P. Feng, L. Liu and P. Wang	671
Structure Improvement of the S Beam Based on the Safety of SUV J. Wu, L.B. Cao, T.Z. Chen, C.C. Hu, B.H. Jiang and H. Chen	675
Simulation and Analysis of EDM Notch Process Based on Killing and Activating Elements C. Liu, L.L. Zhang, Y.J. Zhang and F. Qin	681
AFMXPS and Raman Study on Low Temperature Ammonia Plasma Treatment of Carbon Fiber N.S. Zhu, S.N. Ma and C.H. Hu	686
Genetic Algorithm Based Product Innovation Design Methods and its Application in Bag Design X.D. He, H.Y. Li, J.W. Wu and X.J. Liu	691
Nonlinear Transient Analysis of Butt Welding Based on Finite Element Method J.Y. Zheng, W. He and R.J. Shen	696
Research on Innovative Product Design Method and Support System for Man-Machine Cooperation X.Y. Liu, Y. Yin and L.P. Zhou	701
A Policy-Oriented Reputation BDI Model J. Hu and Y. Yu	707
Overview of Policy-Oriented and Trusty Multi-Agent System Research R.F. Li and J. Hu	712
Porous Media Modeling with Integrated Approach and Application in Water Flow Simulation Y. Liang, L. Chen and X.L. Yan	717
Using Particle Swarm Optimization Based Neural Network for Modeling of Thrust Force Drilling of PA-6/Nanoclay Nanocomposites M. Reza, S. Yazdi, M.R. Razfar and M. Asadnia	722
Application and Technology of Generalized Green Computing J.B. Deng, J.L. Hu, J.B. Wu and H.H. Chi	727
Viscosity Variation of Polymer Solution through Low Permeability Cores L.J. Zhang, X.A. Yue, H.W. Chen, J. Zhang and T.S. Chen	732
Numerical Calculation for Subsonic Compressible Supercavitating Flow over Disk-Cavitator Q.C. Meng, Z.H. Zhang and J.B. Liu	737
Research on the Efficient Cylinder Cutting on CNC Boring Machine Combining with Self-Made Welding Cutter J.C. Feng, Y.D. Wu, C. Zhu, L.J. Yang and L. Li	743
Simulation and Analysis of Crashworthiness of Thin-Walled Structures X.Y. Zhang, L.L. Zhang, B.F. Zhang and C. Ma	747
Finite Element Analysis of a Flexible Ferris Wheel G.M. You, J.M. Ding, H.Z. Yang and Z.J. He	751
Use of D-InSAR Technique for Monitoring Ground Subsidence in the Yanzhou Coal Mining Area (China) Z.Y. Wang and J.Z. Zhang	756
The Design of Ternary Joint Robot Fingers without Drive Based on the Topological Graph of Kinematic Chain W.C. Zhou and B. Wu	761
Wave Propagation in Coarse Grain Structure in UT Inspection	765

China Logistics System Reconfiguration under the System Resource Constraint after the Financial Crisis	
J.H. Zhao, H.B. Li, Q. Chen and F. Luo	770
Effect of the Content of Sn on Microstructure and Mechanical Properties of Bi5Sb Solder Alloy	
K. Tang, Y.F. Yan, K.L. Zhao, Y.Y. Sheng and L.F. Feng	774
Dynamic Buckling of Composite Bars Subject to Axial Impact	
C. Kang, Z.J. Han, G.Y. Lu and S.Y. Zhang	780
Decomposition Model Based on Optimal Power Flow in Interconnected Electricity Networks	
Q.R. Wang and L.Z. Zhang	785
Study on Co-KZr₂(PO₄)₃-Type Crystalline Purple Ceramic Pigments	
X.Y. Gu, W.Q. Luo and Y.X. Chen	790
New Method for Pipeline Leakage Measurement in Pneumatic Industry	
L. Huang, M.L. Cai and J.W. Wang	795
Method of Subjective Lexicon Creation for Chinese Sentiment Analysis	
J. Zhang and H. Jin	801
Method of the Safety Early Warning on Hazard Installations	
J. Zhang	806
Sealing Structure Design and Analysis of Non-API Pipe Connection	
Z.Q. Xu, X.Z. Yan and X.J. Yang	811
Study on the Enrichment Degree of Coalbed Methane Based on the Fuzzy Comprehensive Evaluation	
X.Z. Yan, B.H. Wang and X.J. Yang	815
FEM Simulation on the Structural Reliability of Beam Pumping Unit Based on the Methods of Monte-Carlo	
X.J. Yang, Y.L. Yan, Z.Q. Xu and X.Z. Yan	820
Electro-Hydraulic Servo Control Based on CMAC Neural Network for Excavating Robot	
Q.L. Dai, H.L. Dai and X.H. Qu	825
Corrosion and Oxidation Resistance of Electroless Ni-P-Al₂O₃ Composite Coatings on Carbon Steel	
W.C. Sun, M.F. Tan, J.H. Lu, L. Zhang and Q. Zhou	831
Research on Optimization for Pneumatic System's Air Supply	
D.W. Kong, M.L. Cai and T.Y. Sun	836
Study on Physical Mechanism of Metal Magnetic Memory Technique	
D.B. Wu, M.Q. Xu and J.W. Li	841
An Integrated Management Control Information System for Mine Production Based on Three-Tiered Structure	
Z.G. Ji and L.X. Liu	845
The Study on Horizontal Evaluation for Low-Tech Manufacturing Industry in Chinese	
Z.G. Ji and G.F. Niu	850
Detection of Crack Growth Rate in 45 Steel by Metal Magnetic Memory	
D.B. Wu, M.Q. Xu and H.Y. Xing	855
Development of Wireless Resistance Strain Gage Based on ATmega16	
C.X. Liu and D.L. Gong	859
Incorporating Stakeholder Perspectives into Collaborative Product Design	
Z.J. Rong, K.S. Chen and B.S. Ying	864
A Research of Apparatus and Optimal-Control Theory on Precision Seeding in Forestry	
G.H. Lv, J.H. Liu, D. Wang and N.K. Wang	869
Research and Development of Multi-Function Excavator Drill with Hydraulic Rotary Cutting and Pneumatic Impacting	
Y.X. Luo, Y.G. Li, H.S. Li and H.J. Wen	874
A Study on the Structures and Properties of B-Bearing Cast Steel for Wear Resistance	
Z.Q. Jiang, X.L. Feng and X.Z. Feng	878
Investigation of Granulated Metal Fabricated by Short Flow Casting Technology	
Z.Q. Jiang, X.L. Feng and X.Z. Feng	883

Investigation and Application of Cold Extrusion Forming Process in Die Structure Design of Plug Extremity Z.Q. Jiang, X.L. Feng and X.Z. Feng	888
Numerical Analysis of Friction Distribution in the Rod Rolling Process L.C. Yang, S.L. Qing, X. Huang and Y.P. Luo	893
A Secure and Efficient Buyer-Seller Watermarking Protocol L.Y. Fu, D.F. Hu, X.L. Wang and J.L. Chen	898
Ball-End Cutter Machining Process Analysis in Five-Axis Milling Z. Li and B. Yan	903
A Method of WAV Broadcast Using the I2S of LPC2300 Series ARM Chipset J.J. Song, J.A. Liu, J.Q. Tan and J.S. Huang	909
A Multi-Layer Trust Management in Open Networks Y.M. Guo and Y.J. Guo	915
Scene Detection in Videos Using Mutual Information S.N. Huang and Z.Y. Zhang	920
An Efficient Genetic Simulated Annealing Association Rules Method J.J. Cen, G.H. Gao and Y.J. Wang	927
An Efficient Multi-Hop Clustering Routing Algorithm in Wireless Sensor Networks L.J. Xu, G.H. Gao and X.Y. Li	932
P2P Technology Application and Research of Grid Computing G.H. Gao, L.J. Xu and X.F. Yang	937
Preparation and Mechanics Properties of MR Elastomers Based on Silicone Rubber H. You, Q. Bai, Y.C. Liu and L.W. Ning	942
Transient Performance Simulation of Single-Cylinder Engines Based on Tribology Behaviors J. Zhao, B. Tang, Y.B. Tang, K.P. Qi and E.L. Ma	946
Coupled Vibration Analysis of a Fluid-Filled Pipe by Wavenumber Prediction J. Yan, S.L. Zhang and J. Zhang	951
Investigation on Energy Absorption Characteristics of PVB Laminated Windshield Subject to Human Head Impact B.H. Liu, M.Y. Zhu, Y.T. Sun, J. Xu, D.Y. Ge and Y.B. Li	956
Porting of EtherCAT Soft Master and Developing of a New Type of Open Motion Controller C.M. Ma, J.W. Yang and R.Y. Fei	961
Entire Contact Design Theory for High Performance Drum Brake Y.Q. Xu, Q.W. Zhang, L.L. Wang and S.J. Jin	966
Software Design of On-Line Measuring System H.Q. Sun, M. Yang and J.H. Cui	971
Mechanical Property Analysis of Micro-Contact Resistance of Surface Coating Y.Q. Xu, L.L. Wang and F.H. Lin	976
Design Task Decomposition in the Servo Press S.R. Yu and Y.W. Lu	981
Life Cycle Assessment in Different Product Design Stages - A Coffee Pot Case Study S.R. Yu and R.B. Zhang	988
Bearing Fault Diagnosis Based on Multi-Sensor Information Fusion with SVM X.J. Li, D.L. Yang and L.L. Jiang	995
Rotor Crack Detection Based on Multi-Vibration Signal Fusion Collected from the Basement of Machinery Using SVM and Statistical Characteristics Methodology X.J. Li, K. Wang, L.L. Jiang and T. Zhang	1000
Research on Feature Extraction Experiment for Acoustic Emission Signal of Rotor Crack Fault K.F. He, X.J. Li and X.C. Li	1005
Research on Arrangement of Sensors on Rotating Machinery Base Based on ANSYS J.G. Wu, X.J. Li and B.H. Yao	1010
Mechanical Response of Laminate (Glass/Epoxy) at Different Periods of Environmental Conditioning (Saturation and Ageing) A. Naceri	1015

A Heuristic Optimized Algorithm for Energy Optimization in Wireless Sensor Networks Z.F. Yang and A.W. Fan	1019
An Improved Elliptic Curve Digital Signature Algorithm A.W. Fan and S.X. Lu	1024
Research on Adjustment System for Electrohydraulic Proportional Variable Displacement Pump A4VSO H.G. Ding, J.Y. Zhao and L. Zhao	1028
Development of Intelligent Forming Dies with In-Process Defect Detection System for Sheet Products T. Nonaka, Y. Sakata, Y. Marumo, Y. Okinishi, T. Horinouchi, I. Ogawa and S. Watanabe	1034
Tolerance Allocation and Maintenance Optimal Design for Fixture in Multi-Station Panel Assembly Process A. Cui and H.P. Zhang	1039
Bayesian Neural Network Approach to Detecting Temper Embrittlement of 30Cr2MoV Rotor Steels Y.Z. Fan, R.N. Ma and A. Du	1046
Research on the Information Extraction of the Whole Machine Simple Model and Characteristics Reproduction Q.F. Wang, H.L. Zhao, Z.H. Wu, G.P. Zhang, D.H. Mu, S.G. Chen and W.G. Zhou	1052
An Effective EMD-Based Feature Extraction Method for Boring Chatter Recognition X. Li, Z.H. Yao and Z.C. Chen	1058
Study in the Modeling Methods of Multi-Batch Experiment Data and Technology of Error Correction E.M. Miao, X. Wang, P.C. Niu and Y.T. Fei	1064
The Composition Kinematic Reliability of Path Mechanism J.F. Zhang	1070
Ultrasonic Transducer Design via APDL Optimization X.H. Zhang and G.H. Li	1076
An Increment Transfer Matrix Method for the Torsional Vibration Response of Steam Turbo-Generator Shaft System C.B. He, C. Xing and J. Shen	1082
Simulation on Vibration of Engine Crank-Connecting Rod Mechanism with Manufacturing Errors Using ADAMS Y.M. Shao and L.H. Wan	1088
Modeling the Horse's Musculo-Skeletal System: A Step Towards the Design of Bionic Motorcycle Frame Y.M. Shao, R.L. Simon and B.H. Gueye	1092
Large Wind Turbine Dynamic Modeling and Simulation A. Wu, W.L. Sun and P.P. Wang	1098
Working Space Analysis and Simulation of Modular Service Robot Arm Based on Monte Carlo Method B. He, X.L. He, L.Z. Han, J.T. Cao, M. Li and Y.Z. Tian	1104
The Design of Embedded Wireless Monitoring System Based on ZigBee Technology W.D. Wei	1109
Vibration Qualitative Properties of Nonhomogeneous Membrane L. Wu, Q.S. Wang and D.J. Wang	1114
Study on Joint Characteristics and the Stability of the Flexible Manipulator Considering the Control Performance W.G. Shen and J.T. Yun	1119
Research on Low Temperature Performance of Epoxy Asphalt Mixture S. Luo and Z.D. Qian	1124
Determination the Modifier Content in SBS Modified Asphalt Based on Infrared Spectroscopy Technique K. Zhong, D.W. Cao and S. Luo	1129
Influence of Micro-Addition Chromium on the Valence Electron Structure and Toughness of Fe₂B Phase R.N. Ma, Y.Z. Fan, X.M. Cao and M. Wen	1135

Investigation on Harmonic Response of Pneumatic Vibration Isolation System with Single and Double-Frequency Excitations Y.C. Zhong, Q.J. Yang and G. Bao	1140
Surface Texture's Role in Assessing Surface Integrity of Machined Parts Q.R. Zeng, G. Liu, L. Liu and R.T. Tong	1145
RFID-Based Optimization Method for Inventory Control Strategy Y.B. Wu, Y. Tao, X.H. Pan and P.C. Wu	1149
Application of Reverse Engineering Technology in Constructing Prototype Surface D.M. Yu, X.J. Li, Y. Xiong and Z.H. Gao	1154
User's Preference Aggregation Based on Parallel Interactive Genetic Algorithms Y.N. Guo, Y. Lin, M. Yang and S.G. Zhang	1159
Performance of Wood-Polymer Composite Prepared by <i>In Situ</i> Synthesis of Terpolymer within Wood Y.F. Li, B.G. Wang, Q.L. Fu, Y.X. Liu and X.Y. Dong	1165
Evaluation on Emergency Management System in Supply Chain Based on Trapezoidal Fuzzy Order Weighted Average (FOWA) Operator S. Lu and Z.P. Zhao	1170
Empirical Study of the Influencing Factors of Supply Chain Risks S. Lu	1175
Optimization Models and Heuristic Method Based on Simulated Annealing Strategy for Traveling Salesman Problem X. Hao	1180
Financial Management of the Company for Financial Crisis T. Zeng	1185
E-Commerce Model Based on Grid Computing X. Hao	1190
Framework Construction of Condition-Based Maintenance System Y. Wang, J.Y. Qiao and L. Ma	1195
The Dynamic Balancing Performance of the Machinery Based on Virtual Prototyping Technology H. Wang and Y.J. Pan	1200
Research on Electrohydraulic Servo Proportional Speed Regulation System for Anti-Explosion Hydraulic Hoisters J.Y. Zhao, H.G. Ding and L. Zhao	1205
Reliability Modeling and Simulation of Mechanical Equipment Undergoing Maintenance L.P. Huang, W.H. Yue and Z.L. Gong	1211
Contour Features Based Comfort Evaluation Criterion on School Chair Surface Y. Jiang, J. Hong and W. Wang	1217
Computer-Aided Working Space Design for Driller Control Cab B. Chen and L. Deng	1223
A DSP-Based Design for Generating Limited White Noise Wave M. Ma, R.J. Shen, B. Fang, M.W. Sun and W. He	1228
Fault Diagnosis Method Based on Supervised Incremental Local Tangent Space Alignment and SVM G.B. Wang, X.Q. Zhao and Y.H. He	1233
Computer Aided Geometric Tolerance Specification in 3D-CAD System G.W. Li, W.M. Zhang, P.Z. Li and Y.Z. Zhu	1238
Study on Nonlinear Energy Pumping of the Vibration System with Cubic Damping Absorber S.M. Tang, S.J. Zhu and J.J. Lou	1243
Research on Semi-Passive Shunted Piezoelectric Membrane for Sound Isolation with FEM W.Q. Zhang, X.Y. Wu and W. Cao	1248
The Analysis of Energy and Environmental Efficiency Based on Input-Output Model W. Deng	1253
The Design of Electronic Engineering Budget Software Based on Construction Drawing Recognition Technology Z.M. Hu and J. Tang	1258

Improvement of Oxidation Resistance of A NiAl Eutectic Alloy Doping with Dy G.Y. Zhang, J.L. Wang, Y.M. Chen, L.F. Liu and Y.J. Guo	1263
General Fractal Dimension Calculation of Vibration Signal Based on Correlation Integral B.C. Wang and Z.H. Ren	1269
CFD Research on Aerodynamic Performance of Complicated Resistance Muffler L. Wang, Y.Q. Zhou and Z.H. Wang	1274
Design and Analysis of Slide Valve Used in Water Hydraulic Servo Valve Based on Flow Field Simulation X.H. Wang, J. Zheng, W. Li and S.W. Sun	1279
Feature Description for Streamlined Structure G.W. Liu	1284
The Research on Robust LQ Control Applied to Uncertain Vibration Isolation System Q.H. Zeng, Q.W. He and J.J. Lou	1289
Study on the Mechanical Properties of the Hydropneumatic Fender J.J. Lou, D.Z. Chen, S.J. Zhu and X.Q. Wang	1294
Kinetic Analysis of a Cylindrical Shell Partially Treated with Constrained Layer Damping X. Zhang, J.J. Lou and S.C. Ding	1299
Design and Development of Vehicular Monitoring System for Passenger Car Based on Protocol SAE J1939 G.H. Zhang and J.F. Sun	1305
A Novel Literature Retrieval Model of Digital Library Based on Wiki Technology G.F. Zhao	1309
Research on Control Power and Self-Sensing Technology for GMM Self-Sensing Actuator X.H. Wang, S.Q. Hu, Q.Y. Ya, S.W. Sun and X.X. Cao	1314
5-Gram Unified Event Model X.Y. Zou	1319
The Measurement of Dynamic Stress for The Top-Cutter Machine of Cotton C.M. Xu, C.Y. Wang, F. Chen, M. Lei, Y.X. Jiang and H.D. Teng	1323
Parameters Variation of Electronic Components in Fuze under High Stress Fields B. Li, H.X. Zhang and Y. Zhang	1328
Auricle Bracket Rapid Prototyping Optimization and Process Control X.M. Cheng, J.Y. Shen and C. Liu	1333
Relations of Low-Carbon Steel Surface Layer Hardness of Hard Facing and Welding Techniques Z.G. Ni	1338
QoS Parameters of Grid Services and Service Matchmaking F.G. Chen	1343
The Design of College Network System Z.Y. Zhu and L.F. Bai	1347
Key Problem in Support Vector Machine Model X.L. Qu, M.A. Dai and Z.H. Li	1351
The Realization of Design of Agile Commerce Based on Web Service X.L. Qu, M.A. Dai and Z.H. Li	1355
Research and Implementation of Fast Image Fractal Coding Algorithm X.L. Qu, M.A. Dai and Z.H. Li	1360
Technology of High-Speed Milling Process and Programming Optimization for Beverage Bottle Hollow Mold Y. Deng and B.B. Xia	1365
Mechanism of Early Cracking and Serviceability of Precast Reinforced Concrete Bridge Deck Slabs J. Huang and L.Q. Tang	1369
Modal Aanalysis of the Composite Material Blade J.H. Li, C.M. Fu and W.G. Mao	1374
Structure Analysis and Optimization of the Rotor of a Vertical Motor Based on Virtual Prototyping C.M. Fu, W.G. Mao and J.H. Li	1379

The Granule Mechanic Model for Numerical Simulation of Coal Stream in Coal-Fired Power Plant	
H.C. Peng and Q. He	1383
Fretting Fatigue Behavior of Riveted Al 6XXX Components	
J.X. Luo and C. Tang	1388
Design and Manufacture of Three Dimensional Integrated Braided Composite Tube with Flange	
G.W. Chen and J.L. Li	1393
Effects of Heating Period of Time on Tensile Property of Plain Woven Fabric/Epoxy Resin Laminated Composites at High Temperature	
G.W. Chen, G.F. He and J.L. Li	1397
Numerical Method for Earthquake-Induced Pounding between Girder and Shear Key. I: Theory	
W. He	1402
Fracture Test and Analysis of Notched Bars Fabricated from Q235 Steel at Room Temperature	
W.Z. Wang, W.F. Liu and X.T. Wang	1406
Research of Finite Element Simulation for Diesel Intake Port	
L.F. Zhang, D. Chen and M.W. Liu	1415
Optical Transmittance and Band Gap of Electrodeposited Cu₂O/ITO Layers	
F. Hu, Z.Y. He, X.H. Li and Y.H. Hu	1421
A Fair Algorithm of Congestion Control to Improve HSTCP	
D.E. Guo, B. Jin and Y. Shen	1425
Study on Fretting Wear Behavior of Medium Carbon Steel Used in Steel Worm Gear Pair	
Z.J. Li, D.T. Zhang and M. Shao	1431
Analysis on Fuzzy Evaluation of Green Design Based on Life Cycle	
Y. Zhang	1436
Compressive Strength and Splitting Tensile Strength of Steel Fiber Reinforced Ultra High Strength Concrete (SFRC)	
J. Zhang, C.W. Yan and J.Q. Jia	1441
Experimental Study on Early Anti-Cracking Properties of Polyvinyl Alcohol Fiber Reinforced Cementitious Composites	
S.G. Liu, C. He, C.W. Yan and X.M. Zhao	1445
An Artificial Immune System for Frequency-Variable Air Conditioner	
X.P. Liu, D.M. Zhao and B. Wang	1449
Characterization and Tribological Behavior of Ni-Base Alloy Coatings Prepared by Electro-Spark Deposition	
Y.F. Tan, B. Cai, G.L. Jiang, T. Xu, C.H. Zhou and H. Tan	1453
Microstructure and Tribological Properties of Ni-Co/SiC Coatings Prepared by Occlusion Electroplating for Grinding Tools	
Y.F. Tan, B. Cai, Y.Q. Tu, T. Xu, H. Tan and C.H. Zhou	1457
Research on Abrasive Wear Resistance of Cemented Carbide Welding Coatings for Debris-Ejecting Blade of Driller	
Y.F. Tan, X.L. Wang, G.L. Jiang, B. Cai, H. Tan and C.H. Zhou	1462
Effects of Additional Mass on Modal Experimental Analysis of 3-Dimension and 5-Direction Braided Composites	
Y. Gao and J.L. Li	1467
Synchronous Suspension Control Study for Spherical Reluctance Driving Joint with Magnetic Levitation	
L. Zen, J. Wang and Y.Y. Xu	1471
Permanent Deformation Behavior of Composite Structure Asphalt Concrete	
P.L. Li, Z.Q. Zhang and B.G. Wang	1477
The Nonlinear Dynamic Behavior of Double-Disk Isotropic Rotor System with Rub-Impact	
Y. Zhang and W.M. Wang	1483
Investigation on the Subsynchronous Vibration Fault Diagnosis and Control for Centrifugal Compressor	
W.M. Wang and W.Z. An	1488
Study on the Automation Method of Regular Expression to Finite Automaton	
Q. Cao, X.Y. Huang, K.K. Wang and J. Yin	1493

A New Simulating Model of Wireless Channel - Rayleigh-Normal Model A.F. Zhang, Z. Liao and X.L. Qu	1497
Equivalent Elastic Modulus of the Open-Cell Cellular Solids Y.A. Kang and J.C. Tan	1501
Geographic Profiling Methods: Improvement and Combination H.J. Chu, Y. Wu, W.Y. Lin and Y.H. Wan	1507
The Study on Organizational Change and Efficiency Based on Virtual Manufacturing Y. Wang and Z.B. Wang	1512
Study on Electron Beam Welding of AZ61 Magnesium Alloy H. Ye, H.L. Yang and Z.L. Yan	1516
ANN Modeling for the Drop Impact Dynamics of Mobile Hard Disk S.Y. Yang, D.S. Liu, Z.J. Wen and Y.F. He	1521
Research on Comprehensive Utilization of Waste Rubber and Aged Asphalt Z. Ding, C. Shen, J. Jiang and S.Y. He	1526
Energy Absorption of Ultra-High Molecular Weight Polyethylene Fiber-Reinforced Laminates at High Strain Rates B.B. Shi, Y. Sun, L. Chen and J.L. Li	1532
Implementation of the JPEG on DSP Processors S.J. Li, X.L. Qu and Q. Li	1536
Design about the Laser Marking Machine of Two-Work Location Z.J. Zhang and X.P. Mao	1540
Numerical Simulation of Agitated Flow Field of Submersible Mixer Based on Computational Fluid Dynamics W.X. Xu and S.Q. Yuan	1545
The Quick and Simple Algorithm for Circular Interpolation J.Y. Zhang	1549
Analysis of Three-Axis Turntable for Motion Simulation Based on Virtual Prototyping H.L. Chen, X. Qiao, X.W. Yang and C.Y. Wu	1554
Finite Element Analysis and Optimal Design for Mold Shelf of Powder Molding Press J. Liu, X. Zhou, G.Y. Zhou and X.L. Dong	1559
Dynamic Characteristics Research for Mechanical Timing Mechanism in Ammunition by Simulation R.C. Song, L.F. Zhang, J.B. Wang, C.Q. Liu and L.Q. Ma	1563
The Research and Implementation of Particle Effects Algorithm in Virtual Environments C. Liu, L. Xiao and X.L. Qu	1568
Design and Characteristic Analysis for Indexing Mechanism of Rotation Worktable G.Z. Cheng and Y.B. Cheng	1573
Influence of Homogenizing Annealing Process on Microstructure and Mechanical Properties of as-Cast Mg-Gd-Y-Zr Magnesium Alloy L.J. Dong, Q.Y. Yang and X.Y. Huang	1578
Numerical Study on Process of Breaking Rock with TBM Cutter in Different Cutting Orders J.Q. Tan, Q. Tan, Y.M. Xia, Z.J. Xu and X.L. Qu	1583
Design and Implementation of UDDI Registry Center Q.D. Wang and X.L. Qu	1587
Design and Implementation of Conference Management System Based on ASP Q.D. Wang and X.L. Qu	1592
Prediction of Pressure Drop of a Wave-Plate Gas-Liquid Separator by CFD Y.G. Luan, T. Wang and H.O. Sun	1596
Investigation of Laser Welding on Vehicle Safety Parts Q. Wu, Y. Tang, Y.Q. Yang, Y.Z. Li and X.I. Qu	1601
Heating Current Control in Electric Hot Minipore Drilling Hard-to-Cut Material Y. Tang, Q. Wu, B.Y. Ye, X.F. Hu, Y.Z. Li and X.I. Qu	1605
Research of Installing Small Reactors on Neutral Points of 500 KV Autotransformers and the Analysis of Overvoltage Y.J. Li	1609
Calculating Methods on Remained Measure of Repairing Mold in Green Product Design J.A. Liu, K.X. Wei, X.L. Qu, L.X. Tan and Y.R. Tao	1614

The Granulation Technique of Rice Straw and its Mechanical Equipment Design J.Q. Tan, J.A. Liu, X.B. Song, M. Dai and Z.J. Xu	1620
Research on Indeterminacy Causal Inductive Automatic Reasoning Mechanism K.J. Liang, L.F. Bai and X.L. Qu	1625
Research on Stress-Strain Field and Fatigue Lifetime of the Hot Stamping Die L. Zhang, G.Q. Zhao and H.P. Li	1630
Full Field Response Prediction Technique in Dynamic Design Q.J. Wang, W.Z. Qu and L. Xiao	1635
Effect of Transition Curve on Gear Bending Strength L.P. Wang, Y.Q. Xu, L.L. Wang and Q.W. Zhang	1640
Research on Dynamic Disturbances Induced Catastrophic Failure of Deep Rock Mass Based on Synergetics P. Shao, Y.Q. Wu, D.B. Yang, G.X. Ren and Z.Y. Fan	1645
Study on Aging Strengthening Behavior of ZK60 -2.0%Nd-1.0%Y Alloy A.R. Wu, L.J. Dong, W.G. Gao and X.L. Zhou	1651
The Robust Design of Four-Bar Linkage with Clearance Based on Sensitivity Analysis Y.C. Yuan, Y.L. Liu and Y. Li	1656
Application of Ground Penetrating Radar to Rock Failure Analysis in High Risk Tunnels L.W. Zhang, H.F. Sun, S.C. Li, D.H. Qiu and D.Y. Zhang	1661
On High Pressure Squeeze Pack Numerical Simulation of Unconsolidated Sandstone Based on Discrete Element W.Z. Wang and X.Z. Yan	1666
Research on Fracturing Mechanism of Ground-Drive Screw Pump Polish Rod W.Z. Wang and H.W. Wang	1671
Experimental Research on the Thermal Insulation and Flame Retardancy Performance of WPC Wallboard Made of Paper-Aluminum-Plastics Wastes S. Gao, Q.Y. Li and Y.W. Zhang	1676
ICAN Series Functional Module Theory in Lifting Moment Restriction System J.S. Huang, L. Tu, J.A. Liu, L.X. Tan and X.L. Qu	1681
Effects and Mechanism of Titanium Modification on Shrinkage Cavity and Porosity of Cast Steel H.T. Wang, H.S. Yu and H.Z. Xu	1687
Load Analysis of Crankshaft of Axial Three-Cylinder Hydraulic Confined Piston Engine H.X. Zhang, T.Z. Zhang and Q.H. Zhao	1692
Dynamic Analysis for the Wind Turbine Generator Blades W.L. Sun, H.P. Chen and A. Wu	1697
The Dynamic Research on Flexible Impeller of the Large Wind Generators W.L. Sun, C.Y. Dang and L.Y. He	1702
Comparative Study of Drill Pipe Erosion Wear in Gas Drilling and Mud Drilling X.H. Zhu, S.H. Liu and H. Tong	1708
Analysis of Flow Field on Hydraulic Unit of the Water Injection Pump by 3-D Numerical Simulation H. Tong, X.H. Zhu, F.C. Deng and S.H. Liu	1713
Optimal Design of Slip Dog Based on the Elasticoplasticity Contact Analysis X.H. Zhu, Y. Wang, F.C. Deng, L.P. Tang and H. Tong	1718
Fatigue Propagation Lifetime Prediction of Rotary Kiln Weld Shell Y.P. Shen, G.F. Bin and S.L. Wang	1724
Design Theory of Profile Connection and Overview of Manufacturing Technology Y.Y. Zheng, J.L. Rao and L. Wu	1730
Design of an Images Security System F. Huang and X.P. Liu	1735
Design of Multi-Channel Data Acquisition System Based on PXI 6281 F. Huang and J.K. Zhao	1739
Research on Education of Creativity and Innovation F.F. Lei	1742
Tool Wear Monitoring in Milling Processes Based on Cointegration Modeling Y.H. Cui, G.F. Wang and D.B. Peng	1746

Bifurcation Control for a Kind of Non-Autonomous System with Time Delay C.Z. Qian, Z.W. Wang, C.W. Dong and Y. Liu	1752
Research on Dynamic Characteristics of 750KW Wind Turbine Flexible Blades Y.P. Wang, W.L. Sun and Q. Zhao	1757
The Numerical Simulation of Aerodynamic Performance for Wind Turbines' Blade Wheel D.D. Dai, W.L. Sun and Q. Zhao	1761
Cotton Picker Picks Roller Motion Simulation and Dynamics Analysis W.L. Sun, X.L. Li and C.B. Fu	1765
Algorithm Research for Non-Preemptive Scheduling on Multiprocessor T.W. Liu, L.F. Bai, T.N. Zhang and X.L. Qu	1770
Study on Additional Electrical Current on Machinability of Free-Machining Steels in Turning Y.C. Lin and Y.L. Chen	1775
Effects of Cr Doping on the Structural and Electrochemical Properties of V_6O_{13} Y.C. Liu, Z.G. Zou and F. Long	1780
Preparation of Graphene with Ultrasound-Assisted in the Process of Oxidation H.J. Yu, Z.G. Zou, F. Long, C.Y. Xie and H. Ma	1784
BDA Models and Application for Recognizing the Headstreams of Mine Waterburst W. Wan and L. Jie	1788
The Performance Validation of Linear Programming Algorithm Based on Integrated Benchmark S.H. Chen and G.F. Yan	1794
Finite Element Analysis of Vertical Continuous Collapse of Six-Story Frame Structure Y.M. Zhang, C.J. Sun, Y.P. Su and J.Y. Su	1800
Corrosive Wear Behavior of Several Materials Coupled with Si_3N_4 in the Molten Zinc R.N. Ma, A. Du, J.J. Wu and X.M. Cao	1804
On-Line Measuring Principle of Ferrous Ion in Fluxing A. Du, R.N. Ma, Y.Z. Fan, X.M. Cao, S.J. Li and S.P. Zhao	1810
Effect of Cryogenic Minimum Quantity Lubrication (CMQL) on Cutting Temperature and Tool Wear in High-Speed End Milling of Titanium Alloys Y. Su, N. He and L. Li	1816
Cognates and Spherical Hinge Replacement of Spatial RSSR Mechanism N.Z. Lu, Z.Y. Zhang and D.F. Chen	1822
Study on Turning Parameter Optimization of Austenitic Stainless Steel D.W. Li, H.T. Chen, M.H. Xu and C.M. Zhong	1829
Optimal Design of Engine Variable Stretching for Valve Stem of 157FMI C.D. He and P.X. Yang	1834
Finite Element Modal Analysis of the Quick Positioning System of Wire Bonders Q. Bai, K.X. Wei and S.S. Zhu	1840
Study on the Mechanical Performance of Glass Fiber 2D Woven Fabric Laminated Composites with Different Splicing Shape and Interval Length G.L. Zhang, F.Y. Wang, J.L. Li, G.W. Chen and L. Chen	1845
Dynamic Characteristics of Vibrating Screen with Determinate Structure and Statically Indeterminate Structure J.X. Yan, C.S. Liu and L.L. Zhao	1850
Study on the Tensile Strength Loss Rate of Glass Fiber 2D Woven Fabric Reinforced Laminates with Ladder Splicing F.Y. Wang, G.L. Zhang, L. Chen, G.W. Chen and Q. Zhou	1855
Modeling and Simulation on Light Axial Piston Pump W.S. Ding and H.Y. Wu	1859
Knowledge Representation Method of Product Principle Solution Based on Semantic Network Model X.Y. Chen and B. He	1865
Numerical Simulation for the Milling of Alluminum Alloy Thin-Wall Workpiece with Two and Four Flutes Helical Cutter P. Yuan and H.Y. Dong	1870

Properties of the Plasma Sprayed NiCrAlY+ (ZrO₂+CaO) Graduated Coating on 1Cr18Ni9Ti Steel	1876
C. Fei, H. Zhou, J.Q. Chen and F.X. Lu	
Flywheel Energy Storage Used in Enhancing the Construction Machinery Engine Speed Stability	1881
H.R. Gu, S.J. Jiao, C.Y. Xiao, Y.M. Liu and F.C. Wang	
Studies on Ground Environmental Vibration Induced by Urban Rail Transit	1886
L.C. Dong, G.Y. Li, Y.J. Yang and X.X. Tao	
Dynamic Deformation of Railway Tunnel Bedding Structure	1891
L.C. Huang, C.Y. Zhou, Y. Cheng and W.K. Li	
The Effects of Concrete Strength Grade on Concrete Impermeability and Gas-Proof	1896
Y. Zhao, H.Y. Peng and J.X. Ye	
A Study on the De-Noising of the Passive Sonar in Underwater Robot Based on the Gabor	1901
F. Li, X.L. Qu and Y.X. Zhang	
Simulation of Suspension-Tire System Model Based on Rear Axle of Twist Beam	1906
X.D. Wu, S.G. Zuo, L. Lei, Z.W. Yang and Y. Li	
A Lightweight Distributed Computing System Based on JavaScript Technology	1911
J. Tang	
Dry Sliding Behaviors of PDCPD Nanocomposite Prepared by RIM	1916
B.L. Pan, C.F. Zhang and Y.Q. Zhang	
Artificial Intelligence Optimization on Automobile Drive Axle Assembly	1920
P.Y. Xi and L. Chen	
Application of Time-Frequency Distribution and FRFT in Modal Parameter Identification	1925
J.L. Fan and Z.Y. Zhang	
Developing MCDM Approach Based on GRA and TOPSIS	1931
Q.B. Wang and A.H. Peng	
Analysis and Experimental Investigation of Chatter Suppression in High-Speed Cylindrical Grinding	1936
X.L. Shen, L.X. Zhang, H. Long and Z.X. Zhou	
Transverse Stiffness and Guiding Characteristics Analysis of Compliant Linear Guided Mechanism	1941
Q.K. Zhou, Z.Y. Zhang, D.P. Fan and H.J. Hong	
Performance Analysis on Electrical Aided Turbocharged System	1946
Y.K. Fang and L. Chen	
Prediction of Fuel Consumption per 100km for Automobile Engine Based on Gaussian Processes Machine Learning	1951
X. Xu and Y. Zhao	
Research on Dynamic Tension Control Theory for Heavy Scraper Conveyor	1956
J.G. Shi, J. Mao and X.H. Wei	
Grid-Based Platform for Mining Association Rules	1961
Y.Q. Chang, G.P. Hou and H.Y. Deng	
Design Task Decomposition in the Servo Press	1966
S.R. Yu and Y.W. Lu	
Tribological Properties of Polydicyclopentadiene Filled with Chemically Treated Expanded Graphite	1973
C.F. Zhang, B.L. Pan, J.C. Liu, Y.Q. Zhang and Y.Z. Zhang	
Application with Theory of Vibration Equivalence on Reliability Test Bed of Train Brake System	1978
X.Y. Wang, M.L. Wu and Z.K. Chen	
RFID-Based Optimization Method for Inventory Control Strategy	1983
Y.B. Wu, Y. Tao, X.H. Pan and P.C. Wu	
Numerical Simulation of Relationship between Equivalent Elastic Modulus of Porous Titanium Alloy / HA Coating Composite and Fraction Dimension	1988
Y.Y. Gao, L.Y. Gong and H.A. Zhang	
Modeling and Dynamic Analysis for Rigid-Flexible Coupling Nonlinear Floating Raft Vibration Isolation System	1994
X. Zhang, Q.W. He and X. Yu	

Parameter Design of Heave Compensation System of Deep-Sea Mining Based on Dynamic Vibration Absorber and its Experimental Study L.J. Li, S.J. Liu and J.Y. Zuo	1999
A Study on the Modelling and Simulation of Part Motion in Vibratory Feeding L. Han and J.X. Gao	2006
The Globally Asymptotic Stability of Reaction-Diffusion Cellular Neural Networks with Time Delays Y.P. Luo and Y.J. Cao	2011
Expectation Value Calculation of Grid QoS Parameters Based on Algorithm Prim K.J. Liang, L.F. Bai and X.L. Qu	2016
Synergistic Corrosion Resistance of Cerium Film and Silane Film on Hot-Dip Galvanized Steel H.J. Wu and F.Y. Yang	2021
