## Preface

## Chapter 1: Applied Mechanics and Advances in Mechanical Engineering

|                                                                                                                                                                                |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>The Research of Thermal Error Compensation Technology for Turning Center Based on Grey System theory</b><br>H.Y. Sun, X.C. Qiao and J.G. Yang                               | 3  |
| <b>Dynamic Optimization of Hydrostatic Supported Worktable System with Circular Oil Recess</b><br>H.L. Ye, P. Wen and X.L. Zheng                                               | 8  |
| <b>Study on Method to Achieve Position of Amphibious Vehicle Navigating on Water</b><br>T. Wang, X.M. Yao and X.Y. Yang                                                        | 12 |
| <b>The Study on CNC Machine Tools Reform and Error Analysis</b><br>X.P. Liu and D.M. Zhao                                                                                      | 16 |
| <b>Simulation for Transient Performance of Steering of 8×8 Wheeled Vehicle Based on ADAMS</b><br>C.G. Liu, G.B. Yang, Z.L. Liao, Y.Y. Zhang and Y.L. Yan                       | 19 |
| <b>Simulation for Controllability and Stability of 8×8 Wheeled Vehicle Based on ADAMS</b><br>Z.L. Liao, G.B. Yang, C.G. Liu and B.B. Pang                                      | 23 |
| <b>The Modeling and Simulation of UAV Pneumatic Launch System</b><br>X.L. Liu, C.N. Xia and S.G. Ma                                                                            | 27 |
| <b>Modal Analysis for the Tower of Large Scale</b><br>J. Zhou, J.S. Ma, H.Y. Deng, M.Y. Zhang and B.J. Wu                                                                      | 31 |
| <b>Reliability Analysis on the Chassis Hydraulic System in Hydraulic Loader</b><br>X.G. Li, W.H. Wang, W.F. Zhang and Y.F. Wang                                                | 35 |
| <b>The Topological Synthesis Design of Hybrid Electrically Variable Transmission</b><br>R. He, J.B. Hu, Z.X. Peng and W.C. Liu                                                 | 38 |
| <b>Research on Simulation of Motion Compensation for 8×8 Omnidirectional Platform Based on Back Propagation Network</b><br>P. Tian, Y.N. Zhang, J. Zhang, N.M. Yan and W. Zeng | 44 |
| <b>Study on Modeling and Kinematics Analysis of an Assistant Robot</b><br>R.O. Kivugo and Z.M. Wang                                                                            | 48 |
| <b>Research on Performance Simulation of Recoil Mechanism Based on Computational Fluid Dynamics</b><br>Y.Z. Sun, J.Q. Qin, C.C. Di, K.B. Cui and Y.L. Yang                     | 52 |
| <b>Simulation Research on Reliability Enhancement Testing of the Spring</b><br>Y.F. Yang, J. Zheng, C.C. Di and Y.L. Yang                                                      | 56 |
| <b>The Study on Flow Field Numerical Analysis</b><br>X.P. Liu and D.M. Zhao                                                                                                    | 60 |
| <b>Research on Mathematical Modeling of Ship Simulation System</b><br>Y.X. Li and J.H. Zhang                                                                                   | 64 |

## Chapter 2: Control Technology and Industrial Electronics

|                                                                                                               |    |
|---------------------------------------------------------------------------------------------------------------|----|
| <b>Design of Intelligent Street Light Control System Based on ZigBee</b><br>X.Y. Li and W.Q. Zhang            | 71 |
| <b>Real Time Simulation of Insulated Gate Bipolar Transistor</b><br>X.J. Ma, Z.M. Yang, C.G. Liu and Y.L. Yan | 75 |
| <b>The Study on Electro-Hydraulic Servo System Nonlinear Control and Robustness</b><br>X.P. Liu and D.M. Zhao | 79 |

|                                                                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Application of Integrated Electrical Mechanical Control System Technology for Civil Transportation Aircraft Design and Development</b><br>L. Zhang, N. Shan and M.H. Zhang | 83  |
| <b>The Study on Motor Speed Controller</b><br>X.P. Liu and D.M. Zhao                                                                                                          | 89  |
| <b>Research on Rolling Force Model Based on Distributed Cooperative Control System</b><br>H.J. Li, Q.X. Huang, C.J. Ju, X.L. Gong and J.M. Wang                               | 93  |
| <b>The Temperature Control System Research of PVC Latex Batching Based on PLC</b><br>H. Meng, M.Y. Li, J. Zhu and Y.J. Zhang                                                  | 97  |
| <b>Study of an Original Regulating Voltage Soft-Start Method</b><br>S.Z. Yu, Y. Yu and N. Yu                                                                                  | 102 |
| <b>Simulation of Reticle-Setting State at Image-Stabilization Fire Control System Based on RV</b><br>Z.L. Liao, Y.L. Yan, Z.X. Zhao and R.F. Hu                               | 106 |

### **Chapter 3: Network and Computer Technology. Applied Methods of Computing**

|                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>An Improved Algorithm of Linearization Localization Based on RSSI Ranging</b><br>L. Li and H. Zhu                                   | 113 |
| <b>An Approach to Monitoring of Gearbox Based on HHT Spectrum</b><br>Z.X. Chen, H.T. Sun and S. Xie                                    | 117 |
| <b>A New Ant Colony Algorithm for Finite Element Analysis</b><br>L. Meng and S. Zhang                                                  | 121 |
| <b>Construction and Research of Virtual Network User File System Based on Upnp and FUSE on Linux</b><br>N. Xue and L.W. Jia            | 125 |
| <b>A Novel Stable Algorithm of Getting User's Account Based on Telnet Protocol</b><br>L. Wei and D.Z. Deng                             | 130 |
| <b>Safety Testing Method Analysis of Computer Software</b><br>P. Wang                                                                  | 135 |
| <b>The Household Appliance Control System Based on ZigBee Network</b><br>J. Hu, W.Q. Zhang and X.Y. Li                                 | 139 |
| <b>Hybrid Discrete Variable Robust Design Optimization Based on the Intelligent Single Particle Algorithm</b><br>M.F. Liu and H.X. Han | 143 |
| <b>Research and Design of Experiment Platform Based on ARM Embedded System</b><br>J.H. Zhang                                           | 148 |
| <b>Research on Radio Frequency Identification Technology</b><br>X.L. Hu                                                                | 152 |
| <b>Study on Marine Automatic Identification System Based on Wireless Local Area Network</b><br>X.L. Hu                                 | 156 |
| <b>Research on the Embedded Network Streaming Media Technology</b><br>J.H. Zhang                                                       | 160 |
| <b>Study on Classification of Network Streaming Media Encryption</b><br>J.H. Zhang                                                     | 164 |
| <b>Survey on a Fast Hyperspectral Image Classification Method Combined with Spatial Information</b><br>Q. Wang                         | 168 |
| <b>The Research of Hard Disk Encryption System Based on Advanced Encryption Standard Algorithm</b><br>W. Bin, C.R. Jiang and J. Li     | 172 |
| <b>The Study on Process Development System</b><br>X.P. Liu and D.M. Zhao                                                               | 176 |

### **Chapter 4: Advanced Technologies in Materials Science**

|                                                                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Facile Synthesis of SnS Microrods Films Prepared by Electrochemical Deposition</b><br>M.T. Zhao, Y.B. Du and X.F. Yang                                                            | 183 |
| <b>Single Crystal Alloy on the Creep Behavior of Holes Multi-Level Transformation Arrangement Algorithm Simulation</b><br>L. Meng and S. Zhang                                       | 187 |
| <b>A Surface-Enhanced Resonance Raman Scattering Method for the Determination of Trace Crystal Violet on Colloidal Au Nanoparticle Substrate</b><br>Z.L. Jiang, L. Ma and A.H. Liang | 191 |
| <b>Colorimetric Assay of H<sub>2</sub>O<sub>2</sub> Using Fe<sub>3</sub>O<sub>4</sub> Nanoparticles as Nanocatalyst</b><br>Z.L. Jiang, X.J. Liang, X.J. Lu and Q.Y. Huang            | 195 |
| <b>Study on Thermal Oxidative Aging of Nitrile Rubber</b><br>X.G. Li, Y.L. Zhang and M.Y. Yang                                                                                       | 199 |
| <b>The Technology of Biological Nutrient Removal in SBR and the Modifications of the System</b><br>J. Mao, L.J. Zhao, H. Yu and X.D. Lin                                             | 203 |
| <b>The Elimination of Heavy Metal-Containing Wastewater by Eggshells Membrane</b><br>N. Liu, Y.N. Liu, Y.S. Luan and X.J. Hu                                                         | 207 |
| <b>SOC Estimation of Lithium-Ion Battery Packs Based on Thevenin Model</b><br>Y.Q. Fang, X.M. Cheng and Y.L. Yin                                                                     | 211 |
| <b>Plastic Analysis of Metal Sheet Forming with SD Effects</b><br>Z.Y. Chen, C.D. Wu and Z.X. Wang                                                                                   | 216 |
| <b>A New Resonance Rayleigh Scattering Assay for the Determination of Trace Hg(II) Using the Immunonanogold as Probe</b><br>L.L. Xu, Z.L. Jiang, Y.Z. Wang, H. Yang and A.P. Deng    | 221 |
| <b>Research on Reservoir Flow Unit Classification at Block D404 of Xinzhan Oilfield in Songliao Basin</b><br>Z. Liu, N. Song, Z.L. Wei, S.S. Yang and H.Y. Guo                       | 225 |
| <b>Proton Transfer Reaction - Mass Spectrometry Determination of the Emission Rate of Flavor Ingredients in Toothpastes</b><br>G. Zhang, S.N. Gao, W.D. Wei and Q.J. Xu              | 229 |
| <b>Based on a New Immune Genetic Finite Element Analysis of the Alloy</b><br>L. Meng and S. Zhang                                                                                    | 233 |
