

Table of Contents

Preface

1.1 Phenomenology and Definitions

G. Fantozzi 3

1.2 Mechanical spectroscopy

J. San Juan 32

1.3 Non Linear Dissipative Mechanisms

R. de Batist 74

2. Point Defect Relaxations

M. Wellen 95

3.1 Dislocation: Description and Dynamics

W. Benoit 141

3.2 Dislocation - Lattice Interactions

W. Benoit 158

3.3 Dislocation - Point Defect Interactions

G. Gremaud 178

3.4 Dislocation Damping at Medium Temperature

M.L. Nó 247

3.5 High Temperature Damping

A. Rivière 268

3.6 Recrystallization

R. Schaller and A. Rivière 276

4.1 Grain boundaries: description and dynamics

W. Benoit 291

4.2 Grain Boundary Relaxations in Metals

W. Benoit 306

4.3 Grain Boundary Relaxations in Ceramics

R. Schaller and A. Lakki 315

5.1 Thermodynamics of 2nd and 1st Order Phase Transformations

W. Benoit 341

5.2 Ferroelectric Transitions

G. Fantozzi 361

5.3 The Martensitic Transformation

J. Van Humbeeck 382

5.4 Transitory Effects

J. San Juan and R.B. Perez-Saez 416

5.5 Precipitation

R. Schaller 437

6.1 Magnetic Domains

J. Degauque 453

6.2 Ferroelectric Domains

G. Fantozzi 483

7. Non Crystalline Materials

J.Y. Cavallé, L. David and J. Pérez 499

8.1 Thin-layer Materials

M. Wellen 549

8.2 Surface and Local Spectroscopy

G. Gremaud, E. Dupas and A.V. Kulik 560

8.3 Interface Stress Relaxation in Metal Matrix Composites

E. Carreño-Morelli 570

8.4 Internal Friction in Fibre Reinforced Composites

D. Rouby 581

8.5 Fatigue and Internal Friction

A. Vincent and R. Fougères 595

8.6 Damping and Toughness	
R. Schaller and G. Fantozzi	615
8.7 High Damping Materials	
R. Schaller	621
9.1 Low Frequency Techniques	
A. Rivière	635
9.2 Ultrasonics Techniques: PUCOT and ACT	
G. Gremaud, S.L. Kustov and O. Bremnes	652
9.3 Scanning Local Acceleration Microscopy: SLAM	
G. Gremaud, E. Dupas and A.V. Kulik	667
9.4 Scanning Acoustic Microscopy: SAM	
G. Gremaud	676
