

Table of Contents

Preface

Chapter 1: Preparation and Properties of Green Building Materials

Compressive Strength Target Method for Optimal Zero Carbon Concrete Mixtures Synthesized from Fly Ash M.M. Hassoon and M.A. Qissab	3
Sustainability Assessment of Lightweight Artificial Aggregates Made from Industrial Waste Using a Double-Step Cold Bonding Palletization Process J. Raza, N. Singh, F. Colangelo and I. Farina	15
Analysis of the Electrical and Mechanical Properties of Cement Composite Produced with Brake Lining Waste J.B.L. Palma e Silva, R.C.C. Lintz and L.A. Gachet	21

Chapter 2: DataDriven Materials Science

Ontology-Oriented Modeling of the Vickers Hardness Knowledge Graph H.B. Nasrabadi and B. Skrotzki	33
---	----

Chapter 3: Mechatronics

Development and Evaluation of a Vision Inspection System for Plastic Bottle Measurement J. Zhou and N.W. Hartman	41
--	----

Chapter 4: Production Engineering and Management

Lean Production Model to Reduce Defects and Achieve Sustainability in a Peruvian Textile SME V. Camones-Caballero, F. Feril-Encarnacion, C. Leon-Chavarri and F. Noriega-Bardalez	53
Lean Maintenance Design to Optimize the Manufacturing Process: A Peruvian Textile Company Case J. Cabana, W. Quino and E. Ramos	61
Integrated Maintenance Management to Increase the Availability of Drilling Equipment: Case Study in a Peruvian Mine L. Banda, N. Sanchez and E. Ramos	69
