

Table of Contents

Preface

Chapter 1: Properties of Composite Materials Used for Structural Strengthening

Durability of Polyurethane Matrix in Composite Strengthening for Masonry K. Kwiecień, A. Kwiecień, T. Stryszewska and M. Szumera	3
Preliminary Results on Natural Aging of GFRP-Reinforced Masonry Components Exposed to Outdoor Environmental Conditions R. Ramirez, B. Ghiassi, D.V. Oliveira and P.B. Lourenço	11
Long-Term Durability of Inorganic Matrix Composite (IMC) Systems under Sustained Tensile Loading A. Bonati, A. Franco, E. Grasso and A. Occhiuzzi	19
Influence of Freeze/Thaw and Alkaline Environment on the Mechanical Properties of a C-FRCM System Bonded on Masonry Substrate L. Ombres and S. Verre	27
Durability of a Glass Fabric-Reinforced Cementitious Matrix Composite under Different Environmental Conditions A.S. Calabrese, T. D'Antino, P. Colombi and C. Poggi	35
Durability of Stainless-Steel Reinforced Grout against Salt Attack S. Fares, R. Fugger, S. de Santis and G. de Felice	43
Tensile Behavior of FRCM Coupons under Thermal Stresses F. Ferretti, A.R. Tilocca, A. Incerti, C. Mazzotti and M. Savoia	50
Mechanical Behaviour of Glass Fibers FRCM and CRM Systems after Ageing in Alkaline Environments F. Micelli, V. Rizzo, A. Bonati and M.A. Aiello	58
Natural Fiber Composites for Structural Strengthening of Constructions R.S. Olivito and R. Codispoti	66
Cyclic Load Effects on the Bond Behavior of Textile Reinforced Mortar (TRM) Composites A. Dalalbashi, S. de Santis, B. Ghiassi and D.V. Oliveira	74
The Potential of Beeswax Colloidal Emulsion/Films for Hydrophobization of Natural Fibers Prior to NTRM Manufacturing A. Abbass, M.C. Paiva, D.V. Oliveira, P.B. Lourenço, R. Fangueiro and N.M. Alves	82
Tensile Behavior of Textile-Reinforced Mortar: Influence of the Number of Layers and their Arrangement N. Azimi, A. Dalalbashi, D.V. Oliveira, B. Ghiassi and P.B. Lourenço	91
Bamboo Fibers for the Reinforcement of Mortar and Plaster G. Catalogna and L. Molari	98
Testing of Fabric Reinforced Cementitious Matrix in Shear without Substrate R. Fugger, S. Fares, P. Meriggi, F. Nerilli, S. Marfía, E. Sacco and G. de Felice	105

Chapter 2: Materials for Masonry Structures

Adhesion Analysis between Concrete Layers Generated by a 3D Printing A. Bretini, S. Moro and S. Russo	115
Crystallization from Sodium Sulphate Solution Confined in Red Clay Brick during Temperature Decrease D. Bednarska and M. Koniorczyk	123
Abandoned Mine Tailings and Coal Ash Industrial Wastes for Sustainable Production of Geopolymer Brick Masonry: South African Case Study S.O. Ekolu, F. Solomon and A. Naghizadeh	130
Challenges and Problems of Geopolymer Brick Masonry: A Review A. Naghizadeh, S.O. Ekolu and F. Solomon	136

Chapter 3: Computational Models of Masonry Elements Strengthened with Composite Materials

A Design-Oriented Stress-Strain Constitutive Model for Clay-Brick Masonry Columns Confined by FRP	
A. Sandoli, G.P. Lignola, B. Calderoni and A. Prota	147
Analysis of Linear Elastic Masonry-Like Solids Subjected to Settlements	
G. Angjeliu, M. Bruggi and A. Taliervo	155
A Simple and Low-Cost Numerical Model for FRP-Masonry Interface Behavior	
Y. Yuan and G. Milani	163
Advanced and Simplified Modeling Approaches for the Study of the Bond Behavior of FRP Systems on Curved Masonry Substrates	
E. Bertolesi, M. Fagone, E. Grande, G. Milani and T. Rotunno	172
Mesoscale Modelling of Normal Bond Behaviour between FRP and Masonry Substrate: Effect of Mortar Joint	
T.L. Zhao, X. Wang, Z.H. Zhang, Z. Jin and Y.J. Wang	180
Predictive Capability of a Finite Element Micro-Mechanical Model for Masonry Elements Reinforced Using CFRP	
M. Fagone, G. Ranocchiali, T. Rotunno and E. Grande	186
Closed-Form Solutions for FRP and FRCM Strengthening Brittle Substrates	
Y. Yuan and G. Milani	193
A Simplified Modelling Approach for the In-Plane Analysis of Masonry Structures Strengthened by FRCMs	
P. Zampieri, R. Piazzon, B. Pantò and C. Pellegrino	201
On the Modelling of Salt Crystallization-Induced Damage in Layered Porous Materials	
G. Castellazzi, A.M. D'Altri, S. de Miranda, N. Lo Presti, L. Molari and F. Ubertini	207
Modelling of Curved Masonry Elements Reinforced with TRM: From a Detailed to a Simplified Approach	
J. Scacco and G. Milani	214
Numerical Simulations of Masonry Elements Strengthened through Fibre-Reinforced Mortar: Detailed Level Modelling Using the OOFEM Code	
I. Boem, B. Patzák and A. Kohoutková	222
A Numerical Study to Predict the Mechanical Response of FRCM Composites	
G. Minafò, L. La Mendola and M.C. Oddo	230
Modelling of FRP and FRCM-Confined Masonry Columns: Critical Review for Design and Intervention Strategies	
A. Monaco, J. D'Anna, G. Minafò and L. La Mendola	239
An Updated Discrete Element Model for the In-Plane Behaviour of NFRCM Strengthened Masonry Walls	
D. Baraldi, G. Boscato, A. Cecchi and C.B. de Carvalho Bello	249
Numerical Analysis of Masonry Structures through a Modified Composite Interface (MCI) Model	
Y. Di Lallo, D. Rapone, M.G. Masciotta and G. Brando	256

Chapter 4: Properties and Behaviour of Masonry Elements Strengthened with Inorganic Composite Materials

Experimental Investigation on Strengthening of Soft Clay Brick Masonry Columns under Compression with Fiber-Reinforced Inorganic and Organic Matrixes	
G.P. Raj and K.V.L. Subramaniam	267
Experimental Investigation on Flexural Performance of Masonry Wallettes Strengthened with Cementitious Matrix Grid	
D. Tripathy, A. Gupta and V. Singhal	275
Experimental Investigation on the Bond Behaviour of Masonry Element Strengthened with Carbon-TRM and Steel-TRM	
X. Wang, C.C. Lam, Z.H. Zhang and Y.H. Zhu	283

Design of FRCM Strengthened Masonry Walls Subjected to Out-of-Plane Loading According to CNR-DT 215: Discussion of the α Coefficient T. D'Antino, A.S. Calabrese, M.A. Pisani and C. Poggi	289
Structural Performances of Clay Brick Masonry Columns Partially Confined with FRCM/SRG Composites L. Ombres, M. Guglielmi and S. Verre	297
Failure Modes of Masonry Pillars Strengthened with PBO Fibres D. Wojcik, K. Raszczuk and J. Jasięko	305
Bond Behavior of Steel Cords for SRG Systems to Cementitious and Lime Based Mortar F. Roscini and M. Guadagnini	313
Diagonal Compression Tests on Stone Masonry Wallettes Jacketed with Different Techniques G. Guerrini, A. Bruggi, S. Urso, M. Quaini and A. Penna	319
In-Plane Behavior of Adobe Masonry Wallets Strengthened through Inorganic Matrix-Grid Composites P. Cassese, L. Fenu, D. Asprone, A. Occhiuzzi and F. Parisi	328
Shear Transfer Mechanisms of FRCM-Masonry Systems: A Critical Analysis of an Extended Database F. Nerilli and B. Ferracuti	335
Cyclic Out-of-Plane Behavior of FRCM-Strengthened Masonry Walls A. Bellini, A. Incerti and C. Mazzotti	344
Efficiency of Strengthening Interventions on Stone Masonry Panels through Grout Injection and FRCM F. Ferretti, A. Incerti and C. Mazzotti	352
Experimental Study on the Local Behavior of CFRP Anchor Spikes Fixed to Masonry Substrates M. Fagone, T. Rotunno, E. Bertolesi, E. Grande and G. Milani	361
Experimental Qualification of PBO-FRCM Composites for Retrofitting Masonry Structures G. Guerrini, A. Bruggi, I. Senaldi, M. Quaini and A. Penna	369
A Novel Composite Reinforced Mortar for the Structural and Energy Retrofitting of Masonry Panels F. Longo, A. Cascardi, P. Lassandro and M.A. Aiello	377
Load Bearing Capacity of Masonry Arch Constructed by Means of a Patented Method: A Preliminary Study A. Cascardi, F. Micelli and M.A. Aiello	385
Calibration of a Rigid-Trilinear Cohesive Material Law to Describe the Matrix-Fiber Bond Behavior in FRCM Composites V. Bertolli and T. D'Antino	393
Experimental Investigation on the Mechanical and Bond Properties of GFRP Anchors Adopted in FRCM-Masonry Strengthening A.S. Calabrese, T. D'Antino, P. Colombi and C. Poggi	401
Experimental Study on the Fiber-Matrix Interface Behavior of FRCM/CRM Reinforcement Systems O. Tamborrino, D. Perrone, M. Leone and M.A. Aiello	409
Relationship between Results of Tensile Test of FRCM Composites and the Fiber-Matrix Bond Properties F. Focacci, T. D'Antino and C. Carloni	417
Finite Difference Model for the Bond Behaviour of Polyparaphenylene Benzobisoxazole (PBO) Fibre-Reinforced Composite System for Retrofitting Masonry E. Fazzi, G. Misseri, L. Rovero and G. Stipo	425
Experimental Study on the Tensile and Bond Properties of a FRCM System for Strengthening of Masonry Construction P. Simeone, M. Leone, F. Micelli, A. Franco, G. de Luca and M.A. Aiello	433
 Chapter 5: Properties and Behaviour of Masonry Elements Strengthened with Natural Fibres Composite Materials	
FLAX-TRM for the In-Plane Shear Strengthening of Masonry N. Trochoutsou, K. Pilakoutas and M. Guadagnini	443

Debonding of Vegetal FRCM from Concrete Beams Subjected to Bending Loads V. Mendizabal, L. Mercedes, E. Bernat-Maso and L. Gil	449
An Experimental Campaign on the Use of Natural Fibre-Reinforced Cementitious Matrixes I. Bonfanti, A.P. Fantilli, R.D. Toledo Filho and Y. dos Santos Mendonça	457
Characterization of Cementitious Mortar Reinforced with NFRC for Load-Bearing Masonry A. La Tegola and W. Mera	465

Chapter 6: Techniques of Cultural Heritage Restoration with Composite Materials

Masonry Vaults Reinforcement with FRCM-PBO: Conservative and Structural Issues L. Ferrari and L. Melegari	475
Experimental Response of Rubble Stone Masonry Walls Retrofitted with Basalt Textile Reinforced Mortar under Compressive-and-Shear Load C. Caggegi, A. Gabor, P. Meriggi and G. de Felice	483
The Contribution of Glass Microspheres and PP Fibers in the Properties of NHL Grouts L.G. Baltazar and J. Botas	491
Design Criteria for Masonry Reinforcement with Composite Reinforced Mortars (CRM) A. Borri, G. Castori and M. Corradi	498
