

Table of Contents

Committees**Preface**

Multi-Fingered Haptic Interface Robot and its Application Systems	1
H. Kawasaki	
Rotor Crack Detection Using Active Magnetic Bearings	9
J.T. Sawicki	
Analysis of Robustness of Vibration Control System for a Magnetically Supported Shaft	16
A. Mystkowski and Z. Gosiewski	
Uncertainty Modeling in Robust Control of Active Magnetic Suspension	22
A. Mystkowski and Z. Gosiewski	
Fluoride Release from Composite Materials for Dental Fillings	27
J. Mystkowska	
The Influence of Selected Powder Fillers on the Tribological Properties of Composite Materials for Dental Fillings	33
J. Mystkowska and J.R. Dąbrowski	
Analytic Description of Impulse Response Signals	39
A. Kotowski	
The Method of Complex Worthiness Assessment of an Engineering Object in the Process of its Use and Service	45
P. Lindstedt	
Modeling of Magnetic Attraction Force of Electromagnetic Module in a Relative Base – Air-Gap – Absolute Base System	53
T. Huścio and K. Falkowski	
Modeling of Beam as Control Plane for a Vibration Control System	59
Z. Gosiewski and A.P. Koszewnik	
Control of Slewing Motion of a Crane Model Taking into Account Non-Linearities in Drive System	65
J. Janusz, J. Kłosiński and L. Majewski	
Assessment of Dynamical Properties of Die Hammer MPM 10000 B Considering Deformations of Working Material	71
L. Majewski and A. Trąbka	
Control of Operational Motions of a Mobile Crane under a Threat of Loss of Stability	77
J. Kłosiński and J. Janusz	
Weak Interactions between Objects Used as New Diagnostic Signals in the Detection of Pipeline Leakages	83
P. Ostapkowicz	
Test Stand for Analysis of Fatigue Crack Propagation under Bending with Torsion	90
G. Gasiak and G. Robak	
Analysis of Timings in Networks that Use TCP/IP or UDP/IP Protocols for Communication with Industrial Controllers in Mechatronic Systems	94
K. Pucher and D. Polok	
Constitutive Models of Vascular Tissue	100
K. Mirota	
Application of Modern E-Learning Techniques in the Vocational Training in Automation and Robotics	106
Z. Pilat, M. Słowiński and J. Zieliński	
Wavelet Analysis of Barkhausen Noise in Reconstructing Distributions of Residual Stress	112
C. Kownacki	
Diagnostics of Scoring in Gears	118
K. Mirota, J. Tomaszewski and J. Rysiński	
Modeling of Magnetoelastic Materials for Force and Torque Sensors	124
R. Szewczyk, J. Śalach and A. Bieńkowski	
Modeling of Moment of Friction under Increasing Load Using Artificial Neural Networks	130
K. Gocman, B. Giemza and T. Kaldoński	

Calculation Spectral Characteristics of Magnetic Field of the Linear Induction Motor at the Braking Modes	136
B. Karaliunas and E. Matkevicius	
The Formation and Growth Behavior of Aluminium Boride Crystals in an Al-B Alloy	140
R. Kayikci, O. Kurtulus and R. Gürbüz	
A Model for Estimation of Mould Thermal Fatigue Life in Permanent Mould Casting	145
R. Kayikci, M. Durat, E. Nart and I. Ozsert	
Optimum Rapidity Ensuring and Power Resource Saving Two-Coordinate Positioning System	151
G. Blažiūnas and V. Geleževičius	
Method of Dynamic Parameters Measurement of High-Speed DAC's	157
V. Kvedaras, R. Kvedaras and T. Ustinavičius	
PBG Fiber Low Concentration Gas Sensor	163
J. Pawłat, X.F. Li, T. Matsuo, T. Sugiyama and T. Ueda	
The Operation of the Linear Induction Motor by Changing the Position of the Inductors between each other	169
L. Radzevicius and E. Matkevicius	
Mechatronics Approach for Desk-Top CNC Milling Machine Design	175
R. Gürbüz	
Control of a Symmetrical Dual-Drive Gantry System Using Energetic Macroscopic Representation	181
X. Kestelyn, J. Gomand, A. Bouscayrol and P.J. Barre	
Pendulum-Generator as New Energy Source	186
G. Korouji, R. Hanitsch and B. Hübner	
Enhancing the Accuracy of MRI-Compatible Robots with an Optical Tracking System	191
P. Junntila, K. Nevala and P. Kroneld	
Shape Control of a FRP Airfoil Structure Using SMA-Actuators and Optical Fiber Sensors	196
P. Ruotsalainen, P. Kroneld, K. Nevala, T. Brander, T. Lindroos and M. Sippola	
Control of Mobile Crane by Means of Fuzzy Logic Controller	202
T. Pędrak and J. Kłosiński	
Managing Changes in Product Configurations	208
L. Burneika	
Transition Test Patterns Generation for BIST Implemented in ASIC and FPGA	214
V. Abraitis and Ž. Tamoševičius	
Vibration Control of Oscillating System Based on Governing Visco-Elastic Characteristics of Absorber by Means of External Electric Signal	220
V.A. Bilyk, E.V. Korobko, G.N. Reizina, E.A. Bashtovaya, E.B. Kaberdina and V.A. Kuzmin	
Infrared Reflective Coatings for Window Glazing	226
J. Mohelníková	
Determination of Factors Affecting Safety Stress in Machine Design by Using Artificial Intelligence Technologies	232
D. Karayel, S.S. Ozkan and F. Vatansever	
Modeling of Trainer's Electric Drive Control	238
L. Brazdeikis and D. Réklaitienė	
"Magnetoactivated" Elastomer: An Alternative to Electroactive Polymer	244
Y. Razouk, E. Duhayon and B. Nogarede	
Design of Dynamic Nonlinear Control Techniques for Flexible-Link Manipulators	250
V. Gavriloiu, V. Yurkevich and K. Khorasani	
Investigation of Alloy Elements Transfer in Arc Facing by High Carbon and Chromium Content Electrodes	257
V. Varnauskas, A.V. Valiulis and V. Rudzinskas	
The Characterization of WC-Co Based Materials Boronized within Molten Salt Bath	261
S. Köksal	
Structure and Properties Enhancement in High-Speed Steels upon Primary Solidification of a Melt	267
A.S. Chaus	
The Differential Passive Magnetic Bearing for High-Speed Flexible Rotor	273
Z. Gosiewski and K. Falkowski	

Examination of Selective Transfer Phenomenon

A. Kotnarowski

279

Effect of Nanofillers on Wear Resistance of Polymer Coatings

D. Kotnarowska

285
