

Table of Contents

Preface

I Actuators, Sensors, Test Benches

The Influence of Supply Voltage Amplitude Variation Law on AC Induction Motor Efficiency in Variable-Speed Drive V. Bleizgys and A. Baskys	1
The Feedback Control of Drives with Low Acceleration and Deceleration Rate of Motor A. Baskys and V. Zlosnikas	5
Development of a Novel Micro-Actuator Driven by Shape Memory Alloy C.H. Pan and Y.B. Wang	9
Design of Sensor System for the Linear Actuator of Stewart Platform P. Houška and T. Březina	15
High Precision Mass Measurement in Automation T. Ivanova and J. Rudzitis	19
Application of Non-Linear Correction Systems for Control of Work Movements of the Mobile Crane under a Threat of Stability Loss J. Janusz and J. Kłosiński	25
Determination of Ability of Hydrotronic Systems to Start in Low Ambient Temperatures R. Jasiński	31
Research of Hydrotronic Variable-Displacement Radial Piston Pump with Electro-Pneumatic Control R. Jasiński	37
Calculation of Spectrum Characteristics for Braking Modes of Linear Induction Motors B. Karaliunas and E. Matkevicius	41
Research of Influence of Vibrations on Calibration Quality of Line Scale Gauge A. Kilikevičius, V. Vekteris, K. Slivinskas, A. Kasparaitis and S. Juraitis	47
Development of a Test Bench for SMA Wires I. Lungu, D. Mândru and S. Noveanu	56
The Automation of Test Stand for Engine Cooling System Testing K. Zbigniew and M. Śmieja	61
Energy-Saving Mechatronic System for Fatigue Tests of Materials under Variable-Amplitude Proportional Bending and Torsion W. Macek and E. Macha	67
Mechatronic System for Automatic Inspection of Circular Saw Teeth J. Kapcia, K.A. Orłowski and R. Wasielewski	73
Dynamics of Dust Explosion Localizing System R. Rinkevičienė, A.J. Poška and A. Slepikas	79
Model of a Sensorless Induction Drive R. Rinkevičienė, V. Batkauskas, A. Petrovas and S. Lisauskas	85
Improvement of Precise Angle Control System S. Šakalinis and D. Udriš	91

II Control of Mechatronic Systems

Implementation of the Type-2 Fuzzy Controller in PLC I. Dominik	95
Verification of Multilayer Neural-Net Controller in Manipulator Tracking Control W. Żylski and P. Gierlak	99
Control Algorithms in Mechatronic Systems with Parallel Processes A. Gubarev, O. Yakhno and O. Ganpanturova	105
Coordination of Rated Power of Wind Turbine with a Bar Graph of Wind Speed by Means of Flexible Control Algorithm of the Hydraulic Drive A. Gubarev and O. Ganpanturova	111

About Dynamics Problems of the Vibroisolation System with the Gyroscopic Stabilizer J. Šklíba and J. Škoda	116
Optimum Control of Gyroscopic Systems R. Hein and C. Orlikowski	121
Influence of Dynamic Viscosity on Automatic Dynamic Balance M. Bogdevicius and J. Janutėnienė	127
High Resolution High Power Low Frequency Digital-to-Analog Converter V. Puidokas and A.J. Marcinkevičius	133
Self-Tuning Controller for Nonlinear Object A. Nawrocka and J. Kwaśniewski	139
The Correction and Compensation Motors for the Gyroscopic Stabilizer R. Votrúbec and M. Sivčák	145
Selection of Method for Underwater Robot Control P. Szymak	149
RFID and Wireless Sensor and Actuator Networks in Advanced Production Applications J. Tervonen, M. Luimula, S. Pieskā, T. Pitkāaho and J. Alaspää	155
Rowing Force Simulation and Control System V. Grigas, A. Legha, A. Sulginas and R.T. Toločka	161
Cyclic-Modular Approach for Simulation of Multi-Regime Mechatronic Systems with Hydraulic Components O.V. Uzunov	165
Control Method for Elimination of Self-Excited Oscillations during Turning T. Březina, J. Vetiška, P. Blecha and P. Houška	171
 III Optimization, Optimal Design	
Stewart Platform Model with Uncertain Parameters L. Březina and T. Březina	177
Port-Based Modeling of Distributed-Lumped Parameter Systems C. Orlikowski and R. Hein	183
Modal Reduction and Analysis of Gyroscopic Systems C. Orlikowski and R. Hein	189
Design of a Low-Cost Submicron Measuring Probe G. Hermann	195
Adaptation of the Expert System in Diagnosis of the Connection of the PLC User Interface System and A Field Level J. Świder and M.P. Hetmańczyk	201
Monitoring of Velocity of Manufacturing Machines Subassemblies by Means of a DAQ System W. Blacharski	207
Virtual Prototyping Process Supported by New Diagnostic Method -Method of Metal Magnetic Memory P. Hałas, J. Juraszek and K. Krupa	212
Phase Locked Loop Integrated System J. Charlamov and R. Navickas	221
A Reusable Agent-Based Framework for Smart Embedded Systems E. Kazanavicius, V. Kazanavicius and L. Ostaseviciute	227
Assembler Encoding versus Connectivity Matrix Encoding in the Inverted Pendulum Problem with a Hidden State T. Praczyk	233
Computer-Aided Analysis of Piezoelectric Plates A. Buchacz and A. Wróbel	239
Synthesis of Planetary Gears by Means of Artificial Intelligence Approach Graph-Theoretical Modeling J. Drewniak and S. Zawiślak	243
Modeling of Iron Wolf Howling V. Slivinskas, V. Šimonytė and G. Pyž	249

Study of Influence of Increased Bus Voltage on Motor Insulation System M. Nesvadba, J. Duroň and V. Singule	255
---	-----

IV Analysis of Vibration

Passive and Active Elements in Reduction of Vibrations of Torsional Systems K. Białas	260
Sensorless Vibratory Manipulation of the Automatically Assembled Parts B. Bakšys, J. Baskutiene, A.B. Povilionis and K. Ramanuskytė	265
Parametrization of all Three Impulse Zero Vibration Input Shapers M. Schlegel and L. Bláha	271
Some Aspects of Bearing Noise Generation V. Bučinskas, S. Mirzaei and K. Kirchner	278
Simulation and Experiments of High Speed Machining Vibration Monitoring with Variable Spindle Velocity K.J. Kaliński and M.A. Galewski	285
Verification of Vibration Power Generator Model for Prediction of Harvested Power Z. Hadas, V. Singule and C. Ondrusek	291
Rigid Finite Element Modeling for Identification of Vibrations in Elastic Rod Driven by a DC-Motor Supplied from a Thyristor Rectifier K. Lipiński and Z. Kneba	297
Theoretical Analysis of Vibrations of a Mass Connected with a Support through a Chain of Elastic Elements A.H. Marcinkevičius	303
Research of Vibrations of a System with in Series Connected Elastic Elements Joining a Mass with a Support A.H. Marcinkevičius	308
Sensitivity and Stability Analysis of Mu-Synthesis AMB Flexible Rotor A. Mystkowski	313
Development of Mathematical Model of a Mechatronic System A. Buchacz and M. Płaczek	319
Selection of Parameters of External Electric Circuit for Control of Dynamic Flexibility of a Mechatronic System A. Buchacz and M. Płaczek	323
Dynamic Analysis of Vibrating Device A. Trąbka, L. Majewski and J. Kłosiński	327
Control of Two-Dimensional Vibrating System J. Kłosiński, L. Majewski and A. Trąbka	333
Dynamical Flexibility of Complex Damped Systems Vibrating Transversally in Transportation S. Zolkiewski	339
Numerical Application for Dynamical Analysis of Rod and Beam Systems in Transportation S. Zolkiewski	343
Attenuation-Frequency Characteristics of Beam Systems in Spatial Motion S. Zolkiewski	349
Detection of Defects in Steel Ropes Using Dynamical Methods V.K. Augustaitis, V. Bučinskas and R. Subačius	355

V Tribology

High Efficiency Radial Passive Magnetic Bearing K. Falkowski and M. Henzel	360
--	-----

VI Robotics

Modeling of Vertical Planar Two-Link Manipulator Z. Gosiewski and G. Michałowski	366
Movement Trajectory Planning Algorithm of Rotating Mobile Piezorobot R. Bansevicius, A. Drukteinienė and G. Kulvietis	371

Limb/Ground Impacts and Unexpected Impacts Control Strategy for a Model of a Walking Robot Limb K. Lipiński	377
Numerical Analysis and Experimental Research of a Compliant Minigripper S. Noveanu, D. Mândru, I. Lungu and V.I. Csibi	383
Advanced Tools for Multi-Body Simulation and Design of Control Structures Applied in Robotic System Development T. Kubela, A. Pochyly and V. Singule	387
Orthonormality and Spectral Analysis for Robotics and Astrodynamics R.D. Rugescu, D. Mortari, S. Staicu and S. Aldea	392
Universal Navigation Algorithm Planning Platform for Unmanned Systems R. Sell and P. Leomar	405
Optimization of Transport Movement Parameters of the Transfer Manipulator for the Quenching Bath According to the Technological Process Requirements K. Slivinskas, V. Gichan, V. Striška and A.J. Poška	411
Discrete Action Dependant Heuristic Dynamic Programming in Control of a Wheeled Mobile Robot Z. Hendzel and M. Szuster	419
In-Pipe Modular Robotic Systems for Inspection and Exploration M.O. Tătar, A. Aluței and D. Mândru	425
Research of Hexapod Robot Motion in Irregular Terrain T. Luneckas and D. Udris	431
