

Table of Contents

I. Integrated Diagnostics

An Induced Shaft Deflection for Rotating Shaft Crack Detection Z. Kulesza	3
Diagnosing Propulsion Systems of a Vessels in Varying Marine Conditions A. Charchalis	9
Diagnostics Problems and Decisions of Low Rotation Speed Rotors with Antifriction Bearings V. Barzdaitis, P. Mažeika and V.V. Barzdaitis	15
Estimation of External Forces in the Rotating System with an Active Magnetic Suspension M. Gizelska, D. Kozanecka, Z. Kozanecki and J. Łagodziński	21
Fundamental Laws of Rolling-Element Bearing Mechanics and Diagnostic Methods FAM-C and FDM-A A. Gębura and T. Tokarski	27
Identification of Operational Damages of Air-Turbine Engines Using Visual Diagnostics A. Szczepankowski and J. Szymczak	33
Knowledge Acquisition and Management for Marine Diesel Engine Diagnosis A. Charchalis and R. Pawletko	43
Mining for Knowledge to Build Decision Support System for Treatment of Plano-Valgus A. Dardzińska-Głębocka and J. Pauk	49
Modular System for Testing the Stability and Safety of Specialised Height Rescue Vehicles S. Kozioł, E. Matras and A. Zbrowski	55
Studies of the Modelling Accuracy of Steam Turbine Control Systems for Diagnostic Tests of Automatic Synchronizers G. Redlarski, J. Piechocki and M. Dąbkowski	61
The Influence of Diagnostic Signal Measurement Period on Blades Technical Condition Images Determined from Phase Shift Difference R. Grądzki	67
The Method of Assessment of Suitability of the Bearing System Based on Parameters of Technical and Adjustment State P. Lindstedt and T. Sudakowski	73
The Multilevel Prognosis System Based on Matrices and Digraphs Methods M.P. Hetmańczyk	79
The Reliability Model of AC-Asynchronous Drive Based on the Multilevel Prognosis System Supported by Matrices and Digraphs Methods M.P. Hetmańczyk	85

II. Failure Analysis

Evaluation of Fatigue Life of Cylindrical Geared Wheels J. Drewniak and J. Rysiński	93
Harmonic Balance Analysis for the Rigid Finite Element Model of the Rotating Cracked Shaft Z. Kulesza	99
Simulation-Based Study on the Dynamics of Wing-Flap Actuating Hydraulic Circuit A. Gronczewski	105
Statistical Diagnostic Thresholds of Rolling Bearings with Correlation of the Bearings Signal and its Environment Based on Cauchy Product P. Lindstedt	111
The Analysis of Finishing Tooling Influence on Contact Fatigue Researched by Profilometer W. Labuda and A. Charchalis	117

Validity Check of the Assessment of a Jet Turbine Engine Regulation in Flight Using a Computer Simulation K. Golak	123
--	-----

III. Tribology in Mechatronic Systems

An Application for Analysis of Temperature during Cold Rolling O. Yevtushenko	131
Effect of Temperature and Deformation Rate on the Dynamic Viscosity of Ferrofluid M. Frycz	137
Graph-Based Models of Compound Planetary Gear Boxes J. Drewniak and S. Zawiślak	143
Measuring and Analyzing the Moment of Friction in Double-Row Ball Bearings R. Korbust and J. Nachimowicz	149
Precision Assessment of Surface Coating Roughness Height 3D Parameter St M. Kumermanis and J. Rudzitis	155
Research on Tool Temperature Dependence on Lapping Grains Size J. Molenda, A. Charchalis and A. Barylski	159
Stochastic Model of Durability of Rolling Bearings Considering Assembly Inaccuracies J. Tomaszewski	165
Structure and Properties of Diamond-Like Carbon Coatings Deposited on Non-Ferrous Alloys Substrate T. Tański, K. Labisz and K. Lukaszewicz	170
Temperature and Adhesion Influence on the Microbearings Operating Parameters K. Wierzcholski and A. Miszczak	176
The Influence of Oil Ageing on the Change of Viscosity and Lubricity of Engine Oil G. Sikora and A. Miszczak	182
The Influence of Temperature and Shear Rate on the Viscosity of Selected Motor Oils A. Czaban	188
The Influence of Workpiece Hardness on Plate Temperature during One Side Lapping J. Molenda, A. Charchalis and A. Barylski	194
Tribological Aspects in Aperture Shaping Process J. Nachimowicz and D. Jabłoński	200
Tribological Behavior of Aerosol Particles in Acoustic Field V. Vekteris, I. Tetsman, V. Striška and V. Mokšin	205
Tribological Characteristics of Anodic Oxide Coat (AOC) Modified - Sealed up the Polymer G. Służalek, P.J. Duda and H. Wistuba	209

IV. Signal and Image Processing

A New Model of the Neuron for Biological Spiking Neural Network Suitable for Parallel Data Processing Realized in Hardware A. Świetlicka, K. Gugala, M. Kolasa, J. Pauk, A. Rybarczyk and R. Długosz	217
Analysis of Significant Prognostic Factors of Patients with Bladder Cancer Using Self-Organizing Maps M. Kolasa, R. Długosz, W. Józwicki, J. Pauk, A. Świetlicka and P.A. Farine	223
Calibration of Cameras and Fringe Pattern Projectors in the Vision System for Positioning of Workpieces on the CNC Machines S. Domek, P. Dworak, M. Grudziński and K. Okarma	229
Filtering Algorithms for 3D Range Image Analysis A. Sioma	235
Finding Bearing in Robot Navigation with the Use of the Kalman Filter A. Sioma and S. Blok	241
Low Power, Low Chip Area, Digital Distance Calculation Circuit for Self-Organizing Neural Networks Realized in the CMOS Technology R. Długosz, M. Kolasa, T. Talaśka, J. Pauk, R. Wojtyna, M. Szulc, K. Gugala and P.A. Farine	247

Visualization of the Workpieces on the CNC Machines Using the Virtual Camera Based on the Sub-Pixel IBR Method	
M. Grudziński, K. Okarma, M. Pajor and M. Teclaw	253

V. Measurement Techinques

An Investigation of the Automatic Relative Gravimeters	
E. Parseliunas, P. Petroškevičius, R. Obuchovski and R. Birvydiene	261
Application of Hybrid Vision Method for the Hot Aluminium Surface Inspection	
T. Giesko and P. Garbacz	267
Application of the 'Iterative Closest Point' Algorithm for Determination of Rotation Axis of a Turntable	
I. Wróbel	273
Control Curves Method of Airframe Geometry Modeling	
S. Kachel	279
Detection of Cesium from Pollucite Using Laser-Induced Breakdown Spectroscopy	
S. Ikezawa, M. Wakamatsu and T. Ueda	285
Determination of the Shot Energy Characteristics of the Pneumatic Gun by Means of High Speed Imaging Method	
W. Jóźwik and A. Zbrowski	291
Effect of Cross Section Size on Ductility and Fragmentation of Copper Ring at High Strain Rate Loading Conditions	
J. Janiszewski	297
Experimental Shear Stress Analysis of the Thin Walled Aluminum Hollow Shaft under Torsion	
R. Gürbüz, M.A. Donertas and M. Yavuz	303
Force Sensor for Laparoscopic Tool of RobIn Heart Robot	
A. Kobierska	309
Influence of CNC Machine Tool Technical Condition on the Geometrical Accuracy of Freeform Surfaces	
Ł. Czerech and R. Kaczyński	315
Influence of Flexible Body Contact Deformation on the Linear Dimension Measurement Precision	
A. Avišāne, J. Rudzitis, G. Upītis and J. Vilcāns	321
Laboratory Station for Research on Angular Translocation in Human Lower Limbs	
M. Ostaszewski and F. Siemieniako	326
Mechatronic Elements for Measuring Systems	
V. Giniotis, M. Rybokas, G. Dmitrijev, D. Sabaitis, L. Šiaudinytė and J. Janulevičius	332
Surface Structure of Components Created by Stereolitography	
S. Dzionk	338
The Computer Simulation of Digital Measurement	
K. Dzierżek	344
The Digital Pre-Operative Planning of Hip Surgical Interventions	
M. Michalíková, T. Tóth, V. Rajčúková and J. Živčák	350
Using 9-Axis Sensor for Precise Cardiosurgical Robot Master Angular Position Determination	
P. Žak	356

VI. Multifunctional and Smart Materials

Laboratory Tests of Shape Memory Alloy Wires	
W. Rączka, J. Konieczny and M. Sibiela	365
Wear Model in Milling Compacted Graphite Iron with Different Lead Angle Using Ceramic Cutting Tools	
Ş. Karabulut and A. Güllü	371

VII. Metallic Alloys

Analysis of the Influence of Drawing Speed on the Amount of Retained Austenite in TRIP Steel Wires S. Wiewiórowska and Z. Muskalski	379
Ballizing Process Impact on the Geometric Structure of the Steel Tubes T.C. Dyl	384
Corrosion of Ni-Al and Ni-Al-Al₂O₃ Plasma Sprayed Coatings in 0.01 M H₂SO₄ and 3.5% NaCl Solutions R. Starosta	390
Effect of Cutting Parameters on Surface Texture of Flame Sprayed Coatings R. Starosta	396
Effect of Magnetohydrodynamical Stirring Method on Deformation Resistance of AlSi7Mg Aluminium Alloy M. Krakowiak, T. Bajor and D. Rydz	402
Effect of Thermo-Mechanical Treatment on Mechanical Properties of AlCuMg Alloys T. Bajor, M. Krakowiak and D. Rydz	407
EIS Research of AW-7020 Alloy Joints Welded by FSW K. Dudzik and A. Charchalis	412
Evolution of Microstructure in Martensitic GX12CrMoVNbN9 – 1 Cast Steel after Low Cycle Fatigue G. Golański and J. Kępa	418
Influence of Heat Treatment on Stress-Corrosion Resistance of EN AW-AlZn5Mg1,5CuZr Alloy L. Kyziół and K. Czapczyk	424
Influence of Friction Stir Welding on Hardness Distribution in Joints of AlZn5Mg1 Alloy K. Dudzik and A. Charchalis	430
Influence of Rolling Reduction, Strip Shape and Asymmetry Factor on the Strip Curvature A. Kawalek, H. Dyja, M. Knapiński, M. Kwapisz and K.B. Laber	436
Investigation of Wear of Ceramic Coating on Tool Steel 105WCr6 L.A. Kuliavas	442
Investigation of W-Re-Ni Heavy Alloys Produced from Plasma Spheroidized Powders T. Majewski	448
Metallographic Analysis of Bimetallic Ribbed Bars Produced from Feedstock Mill of the Surfacing Method TIG and of the Method ESS LM Received S. Sawicki, H. Dyja and S. Mróz	454
Modelling of Titanium-Steel Bimetallic Composite Behaviour under Mechanical Cyclic Loading A. Karolczuk, M. Kowalski and G. Robak	460
Modelling the Magnetic Characteristics and Temperature Influence on Construction Steels D. Jackiewicz, R. Szewczyk and J. Salach	466
Numerical Modelling of Ploughshares Rolling Process from Scrapped Railway Rail P. Szota, S. Mróz, A. Stefanik and H. Dyja	472
Numerical Modelling of the Cooling Ability of Device for the Plates Accelerated Cooling Process K.B. Laber, M. Knapiński, A. Kawalek and M. Kwapisz	478
Physical Simulations of the Controlled Rolling Process of Plate X100 with Accelerated Cooling M. Knapiński, H. Dyja, A. Kawalek, M. Kwapisz and B. Koczurkiewicz	484
Research of Spheroidization Processes of W-Re Powders T. Majewski	490
Surfaces Modification of Al-Cu Alloys by Plasma-Assisted CVD K. Kyziół, Ł. Kaczmarek and S. Jonas	496
The Active Thermography Method as Used to Assess the Bearing of Temperature on Thermophysical Properties of Superalloy of a Gas-Turbine Blade J. Błachnio and A. Kułasza	502

The Analysis of Al-Cu Bimetallic Bars Bond Layers Joined by the Explosive Method S. Wąsek, S. Mróz, G. Stradomski and K.B. Laber	508
The Analysis of the Impact Relative Rolling Reduction at the Area Connector Bimetallic Plate after the Rolling Process D. Rydz, M. Krakowiak, T. Bajor and G. Stradomski	514
The Basic Research of Experimental Steels for Pipelines M. Knapieński, B. Koczurkiewicz, H. Dyja, A. Kawalek and M. Kwapisz	518
The Mechanical Properties and Structure Evolution for High-Manganese TWIP Steel Wires Z. Muskalski, S. Wiewiórowska and M. Pełka	524

VIII. Biomaterials

Application of the NanoLC-MS/MS Technique for Protein Analysis of Biofilm on Surface of Mandibular Fixation with X-Ray Detection of Metallic Ions Relocation to the Osseous Tissue J. Mystkowska, P. Suder, J. Silberring, A. Drabik, J. Sidun, S.Z. Grabowska, J. Borys and J.R. Dąbrowski	531
Changes in UHMWPE Morphology and Structure after Irradiation with an Electron Beam and Thermal Treatment J. Maszybrocka, J. Cybo, A. Barylski and P. Czaja	538
Changes of Free Radical Content in Exposed to Electrons GUR1020 and GUR1050 Polyethylene Types Intended for Endoprosthesis Acetabular Cups P. Czaja, J. Maszybrocka, J. Michniowski, J. Cybo and A. Barylski	544
Evaluation of the Possibility of Mucin Adsorption onto Implantation Materials J. Mystkowska, P. Suder, A. Drabik, A. Bodzoń-Kulakowska, J. Silberring and J.R. Dąbrowski	550
Fretting-Corrosion of 316L Steel Metallic Biomaterial Methodological Aspects E. Kulesza	556
Surface Modification of Titanium by Plasma Assisted Chemical Vapor Deposition (PACVD) Methods M. Januś, J. Konefał-Góral, A. Małek, S. Kluska, W. Jastrzębski, S. Zimowski and S. Jonas	561
Tribological Properties of Selected Self-Made Solutions of Synthetic Saliva J. Mystkowska, M. Jałbrzykowski and J.R. Dąbrowski	567

IX. Functional Composites

Axisymmetric Heat Conduction Problem for a Half-Space Covered with a Laminated Coating of Periodic Structure W. Kołodziejczyk and R. Kulchytsky-Zhyhailo	575
Destruction of Epoxy Coatings under the Influence of Climatic Factors D. Kotnarowska	581
High Power Diode Laser Cladding of Wear Resistant Metal Matrix Composite Coatings D. Janicki	587
Multiscale Modelling Method for Chosen Functionally Graded Material D. Miedzińska, R. Panowicz and P. Jóźwicki	593
Testing of Fibreglass-Metal Laminates in Epoxy Warp Connected by Means of the Adhesive Layer S. Zolkiewski	599

X. Nanomaterials

Generation of Protective Low-Friction Layers in Tribological Processes A. Kotnarowski	607
---	-----

XI. Ceramics and Glasses

Influence of Flat Lapping Kinematics on Machinability of Ceramics A. Barylski and M. Deja	615
Spectral and Statistical Analysis for Ceramic Plate Specimens Subjected to Impact T.C. Akinci, S. Seker, R. Gürbüz and E. Guseinovienė	621
Technological Problems in Lapping on Flat Surfaces of Ceramic Parts A. Barylski	627
Wear of Electroplated Tools Used for Flat Grinding of Ceramics M. Deja	633

XII. New Trends in Mechatronic and Materials Science Education

Partition of the Optimality Problems in Mechatronics W. Tarnowski	641
Teaching in Automatic Control and Robotics Discipline in Terms of Changes in Higher Education System: Experiences and Suggestions L. Podsędkowski, A. Kobierska, M. Sikora, L. Fracczak, A. Niewola, M. Zawierucha and P. Żak	648

XIII. Teaching Materials and Laboratory Facilities

Control of the Hydrostatic Load Unit with the Electronic Control System M. Banaś	657
Didactic Models Used on Mechatronic Courses M. Kelemen, A. Gmitterko, T. Kelemenová, F. Trebuňa, L. Miková and Z. Bobovský	661
High Pressure Nano-Destruction of a Brittle Polymeric Materials Surface A. Svirydzionak, S. Chizhik and M. Ihnatouski	667
