

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Mechatronics

Design of a 6-DOF VCM-Driven Micro Stage J.H. Jeong, M.H. Kim, S.W. Woo, D.H. Ahn and D.P. Hong	3
Embedded PLC Programming Techniques of Forging CNC System Q.F. Wang, X.S. Wang and Y.L. Mao	7
Preliminary Study on Piezoelectric Actuation Solution Proportioner W. Zheng, X.F. Yao, J.S. Dong and B.D. Wu	13
Research of Double Nozzle Flapper Valve Accelerated Degradation Test X.H. Wang, Q.X. Li and Y.L. Feng	18
Research of Intelligent Mower Based on High Accuracy 3D Electronic Compass X. Zheng, X.S. Wang and Y.L. Mao	22
Modeling and Performance Analysis of Switched Reluctance Motor in Electric Vehicles Y.Y. Zhu and J.F. Mou	26
The Sensorless Control of IPMSM Based on the Extended State Sliding Mode Observer J.X. Liu, P.C. Du and L.Y. Li	31
Study on Nonlinear Backlash of Shipboard Antenna Servo System D.X. Zhu, G. Fu and Q. He	36
Development of High-Speed Response Electromagnetic Linear Actuator Using for Pneumatic Control Valve M.J. Chung	41
Study on Linear Active Disturbance Rejection Control Technique and its Application in Ship-Borne Servo Control System D.X. Zhu, G. Fu, Y. Liu and Q. He	46
Model Predictive Control Dedicated to an Electrified Auxiliary in HEV/PHEV K.D. Nguyen, E. Bideaux, M.T. Pham and P. le Brusq	50
Adaptive Robust Control for Servo System with Combustion Gas Flow Disturbance and Load Uncertainties Y. Zheng, D.W. Ma, J.Y. Yao and Y.F. Wu	58
Design and Implementation of Actuator Controller for Greenhouse Control System Y.C. Gao and G.C. Liu	62
Modeling and Control for a Small UAV Helicopter P. Liu, S.D. Liu, Z. Zhao and J.Q. Liu	70
Adaptive Impedance Control for a Tendon-Sheath-Driven Compliant Gripper K. Wang and X.S. Wang	74

Chapter 2: Sensors and Measurements

Nondestructive Technique for the Determination of Cracks Parameters by Eddy Current in Differential Mode S. Harzallah and M. Chabaat	81
Research of Shock Wave Damage Evaluation Method Based on LY-12 Effect Plate L.P. Li, D.R. Kong, C.R. Zhao, Y. Hang, F. Yang and T.W. Gu	88
Mechanism Study of Acoustics Method for Dryness Measuring and Model Establishment J. Han, Y.F. Wei and Y. Huang	96
Fault Diagnosis for Rotator in Rotating Machinery Based on Support Vector Machine W. Niu	102
Sampling Strategy for Free-Form Surface Inspection Using Coordinate Measuring Machines X.L. Wen, D.X. Wang, L. Fang and Y.B. Zhao	106

Diagnosis Rule Discovery Based on Causality in the Context of Fault Diagnosis in Rotating Machinery Z. Jin, R.J. Wang and J. Zhang	113
--	-----

Chapter 3: Processing of Signal and Data

Positioning Algorithm of Underground Personnel Based on ZigBee Technology W. Jiang and F. Yang	121
Method of Image Matching for Seabed Sonar Images Based on Regions of Interest Z.G. Zhang, H.Y. Bian, H. Xu and Z.Q. Song	126
Study on the Fundamental of Crop Pest Image Recognition J. Zhang, F. Jiang, C.J. Xie and R. Li	130
A New View of Mode Mixing Phenomenon Y.R. Du, L.H. Chen and J. He	134
An Algorithm of Digital Image Watermarking Based on Turbo Code and Particle Swarm Optimization Y.Q. Wang and H. Zhang	138
Research on Demodulation Algorithm of PCM/FM Signal G. Fu, Y. Feng, G.Z. Wu and L.P. Wang	142
Research on Soft Demodulation of Anamorphic PCM/FM Signal under the Condition of Low SNR G. Fu, D.X. Zhu, R.L. Li and L.P. Wang	147
Research on Soft Demodulation of Telemetry Signal Based on the Orthogonal Complex Baseband Rotating MSD G. Fu, D.X. Zhu, Q. He and M.X. Kou	152
Research of Noise Reduction Algorithm Based on Real Time G.X. Tong, F.F. Lv and J. Tan	157

Chapter 4: Robotics, Automation and Control

A Monocular Vision Measurement Algorithm Based on the Underwater Robot T. Liu, L. Wan and X.W. Liang	165
Design of a Remote-Controlled Basketball-Playing Mobile Robot F. Liu, C.Q. Shen, Y.B. Liu and F.R. Kong	170
Design of Automatic Insertion System for a Tendon-Sheath-Driven Searching and Rescuing Robot G.X. Zhang and X.S. Wang	175
Application of Photovoltaic Radar Target Simulator by Developing RFID Middleware S.S. Wan, J. Cao, C. Yan and Y. Yang	179
Application Research of Integrated Design Using Reinforcement Learning Model J. Cao, C. Yan and X.N. Wang	183
Sinusoidal Path Planning for Attitude Maneuver of Flexible Spacecraft X.W. Wu, L. Zhao, Y. Hao, B. Zhang and S. Chen	187
The Application of the Amorphous Metal Transformers in Heavy Oil Electric Heating System B.J. Sun, L. Su and C. Zhang	191
Motion Control System and Control Algorithm of 3-Axes Platform Based on Controller Area Network C.L. Zhou, X.S. Wang and Y.L. Mao	196
The Internal Model Control of Greenhouse System Based on LS_SVM Q.L. Dai	200
Design and Implementation of Intelligent Control System for Infrared Shrink Film Machine J. Zhao, W.K. Fei, C.Q. Hao and Y. Zhang	204
Automatic Bone Drilling in Orthopedic Surgery Parameter Tuning of an Active Force Control T. Boiadjev, K. Zagurski, G. Boiadjev, K. Delchev and R. Kastelov	208

Model Reference Adaptive Motion Control Research of Servo Press J. Zhang and X.S. Wang	212
Design of a Tendon-Sheath-Driven Robot with Proportional Control for Medical Surgery P. Yuan and X.S. Wang	218

Chapter 5: Applied Information Technologies and Algorithms

Application of UML for Embedded System Design L. Pang, S. Ji and B. Du	227
Image Vectorization Based on Mathematical Morphology in Geographic Information System W. Dong, Y. Li, C. Lu and B. Zhao	231
Research and Development of an Embedded Security Network Card Based on AM 1808 H.H. Qin, W.S. Hao and W. Shao	235
Research on Virtual Cellular Manufacturing Scheduling Based on the Scale-Free Random Network Model W.M. Han, Y. Huang and L. Mei	241
Development of an Intelligent CAD System for Involute Cylindrical Gear Cutting Tools Y.H. Liao, G.J. Liu and X.G. Sun	249
Research and Application on NURBS Curve Inverse Algorithm Y.G. Zhao, T.C. Cai, Z.J. Wang and X.Y. Liu	253
Research on Construction of Kinect-Based Virtual Situation Laboratory H.J. Liao, X.L. Long and L.P. Wang	259
Design of General ATS Software Platform Based on Components S.M. Guo, K.B. Xu, C.J. Su and Y.F. Liu	264
Study and Realization of Three-Dimensional Human Body Modeling M. Hu	268

Chapter 6: Design of Machines and Mechanisms

A General Inverse Kinematic Analysis of 6-Dof Articulated Manipulators X.P. Yang, K. Zhou and Z. Ni	275
A Practical Real-Time Motion Cueing Algorithm for Crane Simulator Z. Zhu, H.B. Xiao, G.X. Wang and K. Hu	280
Analysis and Detection of Elastic Deformation of the Large-Scale Crankshaft in Non-Circular Grinding N.Y. Shen, J. Li, X.D. Wang, J. Ye and Z.X. Yu	285
Analysis on Nonlinear Buckling Failure Influence Factors of Telescopic Boom System Based on Arc-Length and FEM Method G.N. Xu, G.H. Gao and Z.C. Guo	291
Application of Parallel Mechanism in Multi-DIM Vibration Absorbers C.C. Yu	297
CAE Simulation Study on Thermal Stress of Butterfly Valve and Actuator X.B. Tian, J.T. Yang and D. Meng	301
Corrosion Prevention in Boilers by Using Energy Audit Consideration M.K. Amir, M. Samad, S.M. Behzad and S.M. Mehdi	307
Design and Experiment of Thermal Water and Mechanical Deicing Device Z.C. Zhu, X.J. Zhang, G.L. Mou, C.X. Li and J. You	311
Effects of Flexural Stiffness, Axial Velocity and Internal Support Locations on Translating Beam's Natural Frequencies F. Köstekci	316
Herringbone Gear Meshing Force Simulation Based on UG and ADAMS K. Li	320
Modal Testing and Parameters' Identification of Spray Boom Y.J. He, B.J. Qiu and Y.F. Yang	324

Numerical Simulation of the Influence of Curvature Radius on Aerodynamic Characteristics of the Moving Vehicle	328
J.Y. Wang, Q.T. Gu, X.J. Hu and B.Y. Wang	
Numerical Simulation Study on the Thickness of Cylinder Influencing on Energy-Absorbing Characteristics	332
W.H. Zheng, Y.S. Pan, X. Ma, Z.Y. Qiu and X.J. Zhu	
Simulation of Dynamic Crack Propagation under Quasistatic Loading	337
N. Kazarinov, V. Bratov and Y.V. Petrov	
Simulation Study on High-Powered Shaped Charge Warhead Penetrating into Target with Water Layer	342
S.L. Xing and X.K. Huang	
Solitary Wave and Periodic Wave Solutions and Chaotic Behaviors in a (2+1)-Dimensional Nonlinear System	346
X.X. Zhu, S.H. Ma and Q.B. Ren	
Study on Tube Formation Mechanism and Lateral Stiffness Testing Method of the Tubular Conveyor Belt	351
W.F. Zhang, C.S. Wang, F.X. Zhang and J.H. Liu	
Study of the Solitoff Solution and Fractal Solution for the (2+1)-Dimensional Broek-Kaup System with Variable Coefficients	356
W.T. Zhu	
The Research of Lean Combustion Characteristic of Compound Injection System of Direct Injection Engine	362
J.F. Mou, R.Q. Chen and Y.W. Lu	
Tracking Property Analysis of a Dry Gas Seal Operating in Low Pressure Condition	367
C. Xu, W.F. Huang and X.F. Liu	
Vibration Test and Fault Diagnosis for Main Hoist Gearbox of Heavy Casting Crane	374
Z. Li, X.D. Wang, C.Y. Hu, C.Z. Chen and L. Ming	
Statics, Instantaneous Kinematics and Singularity Analysis of Planar Parallel Manipulators via Grassmann-Cayley Algebra	378
K.F. Wen and J.W. Lee	
Research on the Model of Scramjet Fuel Supply System	382
W.S. Yi, J. Jiang, L.L. Li and H.G. Chen	
Designation and Optimization of an Offset Self-Adaption Centralizer with Three Pairs of Arms	388
X.F. Gong and Y. Zhu	
Optimization of Roadheader Crawler Parameters Based on the Theory of Driving	394
Y. Fei, W.N. Zhang and Z.H. Wu	
Precise Frequency Calculation Model on BTA Boring Bar	398
W. Zhao, W.T. Jia, Q.B. Zhang and Z.Q. Hu	
Shallowly Discuss the SUV External Projections Check	402
G.X. Yu	
Thermal Fatigue Analysis of HSK Shrink Toolholder	408
J. Chen, L. Tian, H.M. Shang and G.C. Wang	
The Modal and Harmonic Response Analysis of the Oil and Water Separation Process under the Shaft	413
X.C. Cao and M.H. Jiang	
Research on Stress Intensity Factor of Wheels with Cracks	418
Y. Zhang and J.L. Xie	
The Optimization Design of Multistage Hybrid Planetary Transmission Based on Improved Genetic Algorithm	422
J.M. Tian and X. Tan	
Research of Transferring Characteristics of Ink among Rollers	427
H.Y. Chu, X.L. Zhang, L. Su, R.Q. Shen and L.G. Cai	
Development of a Grinding Carriage for an Inner Cooling Grinding in a General Grinding Machine	435
L.D. Zhang, Y. Wang and Z.R. Li	
Heat Transfer Analysis of Exhaust Manifold with Water Jacket of a High Speed Gasoline Based on FSI	439
J. Yang, Z. Lu, K. Li and Y. Wang	

Design and Optimization on the Steel Rope Automatic Tensioning Device of Mine Elevator G.F. Mao, G.H. Cao, J.S. Pan and B.B. Fu	443
Study on the Relationship between Impeller Design Parameters and Performance of Partial Emission Pump Based on CFD Technology L.S. Zhang, J. Jiang, Z.H. Xiao and Y.H. Li	447
The Optimization of Suspension's Bushing Mounting Direction L.G. Wu and L.X. Jing	452
Identification of Surface Crack in Steel Rods Using Wavelet Transform Modulus Maximum on Vibration Mode H.C. Sun, L.L. Zhang and B.M. Zhao	457
Lightweight Design of Outer Wing Based on Importance Evaluation Factor D.Q. Zhang, Z.P. Zhu and X.D. Tan	461
Topology Optimization of QY70G Truck Crane Turntable Structure Y. Fei, X.K. Wang and W.M. Liu	466
Design of Thin Wall Telescopic Space Mast Based on Self-Assembly of Steel Band B. Li and X.S. Wang	470
Numerical Simulation for the Spray Field in Absorption Refrigerator for Automotive Air-Conditioning H.J. Qiao and J.N. Wu	475
Discussions of Influence of some Factors on New Vehicle Absorption Cold Source H.J. Qiao and J.N. Wu	479
Study on the Optimum Angle for Solar Collector L.J. Liu, Z.H. Dai and X.Q. Li	483
The Reliability Analysis of Wheel Groove Milling Machine's Column Based on Probability Finite Element Method F.J. Luo and D.L. Song	487
Comprehensive Analysis of C.I. Engine Fueled with Methyl Esters of Karanja Oil R. Sarala, M. Rajendran and B. Sutharson	491
Methods of Low Passive Intermodulation Design B. Wang, L.J. Chen, W. Li, Y.Q. Zhao and J.H. Qiu	496

Chapter 7: Materials and Processing Technologies of Materials in Mechanical Engineering

Nonlinear Variation Analysis of Compliant Sheet Metal Assemblies Including Effect of Surface Continuity in Components S.A. Hashemian and B. Moetakef Imani	503
Projectile Material Model Included Phase Transformation Erosion J.B. Wang, Q.M. Zhang, G.Y. Xu, W. Chen and C.L. Feng	510
Research on Manufacturing Technics of New Low-Carbon Green Packaging Materials D.J. Shen	515
Stress Analysis of Isotropic Material Flywheel Battery Rotor S.Q. Tang and X. Xia	519
Stress Fields and Energy Analysis during the Fracture of Composite Materials H. Benzahar and M. Chabaat	524
Tensile Strength Characteristic of Al6061-T6 and Al7003-T6 Aluminum by the Change in the Friction Welding Process Variable H.S. Kim, D.P. Hong, S.M. Yang and H.Y. Kang	534
The Design of Indexable Gear Insert and Cutting Parameter Optimization J. Chen, H.M. Shang, L. Tian and G.C. Wang	540
Numerical Simulation Study of Metal Transfer in MIG Welding with Magnetic Control C. Yang, S.Y. Jiang and H.B. Bi	545
Investigation of Spring-Back and Spring-Go of AISI 400 S Sheet Metal in "V" Bending Dies Depending on Bending Angle and Punch Radius K. Özdin, E. Büyük, F. Abdalov, H. Bayram and A. Çini	549
Mechanical Performance Degradation Rule of Deformed Bar under Different Corrosion States B.H. Hao, J.Y. Guo, D. Zeng and Q.H. Zeng	554

Parameters Optimization for Roundness of Hemispherical Surface Milling J.B. Ou, P.Y. Hao, M.H. Shu, B.M. Hsu and J.H. Ou	558
Preparation and Characterization of Bulk Porous Nickel Fabricated by Novel Scanning Jet Electrodeposition K. Gong, G.Q. Xu and Z.J. Tian	562
Study on Effects of Ultrasonic Vibration on Grinding Force H.L. Zhang and J.H. Zhang	568

Chapter 8: Engineering Solutions in the Power Industry

Arc Fault Detection Device and its Development Trend J. Pang, W.C. Feng and Q.R. Liu	575
A Modulation Method of PWM Pulse with Dead-Time Based on MCU B.J. Sun and C. Zhang	581
Design of the Shunt Liner Active Power Filter for the Hybrid-Magnet Superconducting Outsert Power Supply J.L. Wu, J.J. Long, X.N. Liu and S.M. Chen	586
Study on Hazard Evaluation of Smart Grid Based on Credibility Entropy Evaluation Model Y.J. Li, J.Z. Xu, Z.Z. Li and W.G. Liu	590
Research on Parallel Operation Technology of Following-Setting Compensation Mode Arc-Suppression Coils B. Cai	595
Research on System Reconfiguration Technology of Distribution System Single-Phase-to-Earth Fault B. Cai	603
Structure Optimization on High-Speed Electromagnetic Repulsion Mechanism E.Y. Dong, M.W. Liu, Z.B. Li, X.L. Yan and Y.S. Chen	611
The Novel Control Technology of Wind Turbine in VSCF Wind Power Generation System J.L. Zhang, Y.R. Li and L.L. Xie	616

Chapter 9: Engineering Management

Research on Product Design Process Driven by Customer Value Theory C.Y. Zhang, R.H. Tan and G.Z. Cao	623
Research on the Key Technology of PDM Applied to Office Chair Manufacturer Z.H. Tang, W.J. Liu and G.Q. Zhang	629
Research on Resource Allocation Evaluation of Service-Oriented Manufacturing Enterprise Based on DEA X.G. Xu, S. Gao and C. Ma	634
Low-Carbon Value Chain Construction for Machinery Manufacturing L.J. Du, Y.H. Zhang and M.Q. Du	640
Production Process Modeling and Realizing Based on Activiti D.W. Zhang, R.Y. Zhang, H.W. Ma and X.G. Cao	644
An Approach of Systematic Engineering of Green Manufacturing Based on Optimization of Resources and Environmental Attributes G. Zhao, L.M. Guo, Z. Zhang and Y.X. Zhang	650
