ISBN(softcover): 978-3-03785-336-8 ISBN(eBook): 978-3-03813-828-0

Table of Contents

Preface, Organizing Committee and Sponsors

Chapter 1: Control Theory and Application

Application of High-Speed Wind Tunnel Control Based on PID Neural Network
J. Li, H. Wang and H.L. Huang 3

Mathematical Modeling of Control Systems Based on Output Feedback Decoupling, Curve Fitting and Spline Interpolation
C. Zhang, H. Wang and X.F. Lian 7

Position Control of Ultrasonic Motor Using IMC-PID Combined with Tribes Type NN Algorithm
S.L. Mu and K. Tanaka 12

Research on 760mm Hot Tandem Mill Hydraulic AGC Control System
K. Tong, N. Ke, M.Z. Che and J.C. Song 18

Design and Analysis of the Bellows Fatigue Test-Bed Based on Electro-Hydraulic Proportional Position Control
E.T. Zhou, S.L. Shi, W.M. Wang and J.Z. Lin 24

Development of Discoid Products Stacking Machine Based on PLC
W.G. Zheng, Z.N. Xu and X.G. Yu 29

Directional Control of a Driver-Heavy-Vehicle Closed-Loop System
S.H. Li, S.P. Yang and N. Chen 33

Research on SVPWM Method and its Neutral Point Potential Control
Y. Liu, X. Wang and Y. Xing 39

Study on Acc/Dec Algorithm Based on Piecewise Polynomial in CNC
G.S. Ji, Z.P. Chen, J.Y. Zhang and W. Liu 43

Climbing and Turning Control of a Biped Passive Walker by Periodic Input Based on Frequency Entrainment
S. Suzuki, Y. Cao, M. Takada and K. Oi 48

Simulation and Study on Non-Sinusoidal Oscillation Control System of Continuous Casting Mold
X.J. Zhang 53

Design and Simulation of PEM Control System for Reactive Sputtering Coating
Y. Huang, J.Y. Zhao, C.H. Chen and Y.C. Zhang 57

Tail Deviation's Predictive Control of the Tandem Rolling Strip Based on Manifold Learning
G.B. Wang, Y.Q. Kong and K. Wang 63

Synchronic Fuzzy Control of Master and Slave Arc in Twin-Wire Pulsed Metal Active Gas Welding
K.F. He, J.G. Wu and S.W. Xiao 69

Control of Pushing and Pulling Motion of a Wheeled Inverted Pendulum Based on a Reduced Order Observer
L. Canete, S. Kimura and T. Takahashi 74

A Sun Tracking PV System Equipped Greenhouse Control System for Educational Purpose
K.H. Kim 80

Output Feedback Control of a Ball and Beam System Based on Jacobian Linearization under Sensor Noise
H.D. Kim, K.H. Oh and H.L. Choi 85

Development of a Neural Network Based Q Learning Algorithm for Traffic Signal Control
L.B. Fu and K.T. Chong 91

Multi-Channel Active Noise Control System Designs with Fuzzy Logic Stabilized Algorithms
D.J. Ahn, K.S. Kim, H.D. Nam and E.W. Shin 96

Chapter 2: Sensors and Signal/Image Processing

Removal of Ocular Artifact from EEG Using Constrained ICA
L. Huang, H. Wang and Y. Wang 105

HHT Based Analysis on Experiments of Rotor System with Rub-Impact
Y. Yong, S. Zhang and Y.H. Qu 111

Energy Analysis Method Based on Wavelet Transform for Sensor Fault Diagnosis
P.P. Qian, J.G. Liu, W. Zhang and Y.Z. Wei 117

Research on the Peripheral Sound Visualization Using the Improved Ripple Mode
B. Xu, D. Yang, Y.Y. Zhang and X. Wang 123

Speech Enhancement Using Wavelet Neural Network with Sub-Band Adaptive Matched Filter
D. Yang, B. Xu, L.L. Ye and X. Wang 127

Design and Implementation of Sensor Network Device Control System with AR Technology
N. Sakamoto, H. Shimada and K. Sato 131

Speech Endpoint Detection in Noisy Environment Based on the Ensemble Empirical Mode Decomposition
J.J. Li, D. An, J. Wang and C.Q. Rong 135

Simulation Analysis on Cymbal Transducer
Q.F. Yang, P. Wang, Y.H. Wang and K. Zhang 140

Research on the Broadband Dual-Excited Underwater Acoustic Transducer
K. Zhang, D.S. Wang, P. Wang and Y.Q. Du 144

Experiments of Ultrasonic Sensing Using FBG Sensors
W.W. Shi, T.T. Hu and Y.G. Tan 148

Research and Application of Machine Vision in Industry
W. Liao and X.R. Pei 153

Study of Method of Denoising for Triaxial Flight Simulation Turntable Based on Generalized Minimum Variance
Y.L. Luo and H.Q. Sun 156

Measurement of Natural Properties of a Beam Based on Machine Vision
Q.P. Han, P.X. Gao, L. Tang, X.W. Sun and Z. Luo 162

Optical Properties of Ta_2O_5/SiO_2 Antireflection Coating System
S.N. Sun, L.Y. Xie, Y.C. Zhang and Y. Huang 167

An Intelligent Fire-Detection Method Based on Image Processing
M.X. Lin, W.L. Chen, B.S. Liu and L.N. Hao 172

Two De-Noising Methods Based on Gabor Transform
Y.J. Shen, G.M. Zhang, S.P. Yang and H.J. Xing 176

A New Extension of the Rank Transform for Stereo Matching
G. Zhao, Y.K. Du and Y.D. Tang 182

Signal Denoise Method Based on the Higher Order Cumulant and Local Tangent Space Mean Reconstruction
G.B. Wang, X.J. Li and K. Wang 188

Feature Extraction of Early AE Signal Based on the Lifting Wavelet and Empirical Mode Decomposition
X.J. Li, Z.Q. Deng, L.L. Jiang and K.F. He 193

KPCA Feature Extraction Based on Bacterial Foraging Algorithm
X.J. Li, D.L. Yang, Z.Q. Deng and L.L. Jiang 200

A New Open Curve Detection Algorithm for Extracting the Laser Lines on the Road
H.J. Fan, L.P. Zhao, S.Y. He and Y.D. Tang 205

Optimization Mode Research of Weighted Undirected Graph
W. Fan, H. Wang, F. Liu and Q. Xing 211

Chapter 3: Biomedical and Welfare Engineering

Blood Flow Velocity Changes in the Middle Cerebral Artery Induced by Driving Fatigue
H. Wang, X.M. Chi, Y.J. Yan and N.N. Zhang 219

A Signature Identification Method Based on Strength and Strokes Direction
H.L. Huang, H. Wang and L. Ji 223

A System for Relieving Mental Fatigue Based on Light and Sound Stimulation
Y. Zhang, X. Geng and H. Wang 228

Design of the Control System for Rehabilitation Horse Based on MCU STC89C52
H.T. Qi, G.L. Feng and H. Wang 234

Neural Measures Reveal Human Short-Term Working Memory–Varying Both Load and Cue Size
N.N. Zhang and H. Wang 239

Heart Sound Analysis for Discrimination of VSD
S.P. Sun, Z.W. Jiang, H.B. Wang and T. Tao 243

An Experimental Study of EMG Signal Features for Motion Discriminations Using Support Vector Machine
T. Shinozaki, K. Kojima, S. Ito and M. Sasaki 249

Investigation on a Novel Sensing Technology for the Detection of Blood Coagulation Based on Liquid Resonance Characteristics
S.P. Liu, Q. Zhou and G.M. Chen 253

Reducing Interference of Involuntary Movements in EEG Signal Analysis
H.S. Jung and B.H. Seo 257

Study on EEG Feature Extraction under LED Color Exposure to Enhance the Concentration
J.E. Lim, B.H. Seo, S.H. Kim and S.Y. Chun 261

Chapter 4: Robotics and Human Interface

Design of Cross-Country Robot Control System Based on Wireless Communication Module
S.Y. Yan, C. Liu, Y.G. Li and H. Wang 269

Distinctions in Weight Perception between Constrained and Unconstrained Lifting of Objects
S.M.M. Rahman, R. Ikeura, S. Hayakawa and H.Y. Yu 273

Lifting Objects with Power-Assist: Weight-Perception-Based Force Control Concepts to Improve Maneuverability
S.M.M. Rahman, R. Ikeura, S. Hayakawa and H.Y. Yu 277

Lowering Objects with a Power Assist Robot: The Preliminary Study
S.M.M. Rahman, R. Ikeura, S. Hayakawa and H.Y. Yu 281

Research on Dynamic Characteristics of Serial-Parallel Combination Joint with Flexible-Cable
L.J. Fang, Y.L. Wei and G.H. Tao 285

Structural Optimization of Variable Section Slender Manipulator Based on Sensitivity Analysis Method
Z. Luo, L. Liang, Y.Y. Chen and F. Wang 291

A Relationship between Movement Time and Traveled Distances in Forward/Backward Direction Cooperative Task
F.S. Ahmad, I. Ryojun, S. Hayakawa and H. Sawai 296

Kinematic Analysis of Three-Wire-Driven Parallel (TWDP) Robot
T. Yu and Q.K. Han 302

Key Posture Extraction from Object Manipulations Experiments
N. B. Melo and T. Watanabe 308

System Analysis and Design of Gripping Device for Wafer Transfer Robot
P. Zhang, X.W. Zhuang, L.N. Hao and H.T. Liu 314

An Overview on Wafer Pre-Aligner
X.W. Zhuang, P. Zhang, L.N. Hao and C.B. Huang 320

Multi-Objective Optimal Kinematic Design of 3-TPS/TP Parallel Robot Manipulator
J.M. Luo, D.L. Wang, Z.H. Xing and N.M. Kwok 324

The Manipulator Cleared the Surface of Fluid Pipelines
B. Li, J.P. Hong and Z.F. Cao 330

Modeling and Control of Flexible Hydraulic Robotic Arm
L. Dai, Y. Wu, J. Wang, Y.G. Li and Y. Liu 334

Research on the Modeling and Transition Algorithm of a Novel Wall-Climbing Robot
Z.H. Li, H.G. Wang, Y.C. Wang, A.H. Liu and W.G. Dong 340

Design and Analysis of a Novel Wall-Climbing Robot Mechanism
W.G. Dong, H.G. Wang, A.H. Liu and Z.H. Li 346

A Tolerance Analysis Approach Based on Robot Kinematics
X.H. Zhang, H.Y. Liu and Z. Luo 352

Study on Measurement of Spatial Motion Trajectory Based on Laser Tracing Measurement System
D.Z. Guo, Y.Y. Zou, S.J. Zhu and M.Y. Zhao 358

Tracking Testing of Dynamic Errors for Linear Guideway Based on Position Sensitive Detector
D.Z. Guo, Y.Y. Zou, S.J. Zhu and M.Y. Zhao 362

Dynamic Analysis of a 165Kg Spot Welding Robot
L. Cheng, Y.W. Liu, H.G. Wang, Y. Chang, Y.F. Song and H.T. Luo 366

Vibration Suppression of a 3-DOF Parallel Manipulator Based on Hybrid Negative Impulses Multi-Mode Input Shaping
Y.Y. Han, B. Li, Y.L. Wei, S.X. Zhu and Y.J. Dai 372

Analysis of Multi-Fingered Grasp and Manipulation of Ping-Pong Racket
Y.W. Liu, Y.Q. Leng, H.G. Wang and W.J. Zhou 378

A Judgment Criterion of Crossing Obstacle Ability for Lunar Rover with Track Angle
K.F. Gu and G.Y. Yang 384

Development of an Autonomous Two-Wheeled Vehicle Robot
M. Sasaki, H. Tanaka and S. Ito 390

System Development of an Experimental Rocket and an Autonomous Free Falling Mobile Robot
Y. Mori, N. Ogushi, T. Nishimura and M. Sasaki 396

A Tetra-State Hopping Robot Driven by Shape Memory Alloy Spring
T.Q. Liu, S.P. Chen, J.L. Guo, Z.L. Dou, C. Liu and Q.C. Zhang 402

A Study on Teleoperation of a Mobile Robot Using Haptic Feedback
Y.B. Kim and G.S. Choi 408

Bipedal Walking Trajectory Generation Using Tchebychev Method
Y.J. Kim, J.Y. Lee and J.J. Lee 414

A Sludge Cleaning Robot for Sulfuric Acid Tank
T.G. Lim and S.G. Lee 419

Research on EEG-Based Control of Prosthetic Hand
C.S. Li, H.B. Zhao and H. Wang 423

Human-Robot Interaction System Research for 500kV EHV Power Transmission Line Inspection Robot
W.B. Guo, H.G. Wang, P. Sun and L. Ling 427

Research on Pedestrian's Detection Based on the Integration of AdaBoost Algorithm and Shape Features
Y. Yang, Y.G. Ma, X.D. Guo and K. Jiao 433

Chapter 5: Embedded System and Mechatronics

Design of Vibrating Signal Acquisition and Processing System Based on Wireless Transducer Network
J.C. Gao, H.B. Guo, L.N. Hao and Y.G. Li 441

Twin Channel of Speed Control System Based on DSP
B. Li, Z.F. Cao and J.P. Hong 447

Development of a Wireless Inertial Measurement System for Pitching Motion Analysis
S. Kitamura, K. Sagawa, T. Tsukamoto and Y. Ishibashi 452

The Design of Embedded AeroEngine Measurement and Test System Based on ARM and FPGA
Y.D. Sha, J. Han and F.T. Zhao 458

Planar Contour Primitive Recognition of Thin Sheet Part Dimensional Inspection System
J.G. Wu, K.F. He and B. Qin 463

Research on Dimensional Inspection System of Thin Sheet Part Based on Machine Vision
J.G. Wu, X.J. Li and B. Qin 469

Design of the AC Motor Speed Regulator Controlled by ARM
J.L. Huang, Z.Z. Peng and P. Qing 475

Inverter Control System of Alternating Current Motors Based on ARM and μC/OS-II
K.F. He, X.J. Li, J.G. Wu and J.L. Huang 480

The Design of Combined DCU (Data Concentration Unit) System with Power-Line Communication and DOCSIS Cable Modem for AMR (Auto Meter Reading)
S.M. Jeong, C.K. Seo and S.J. Kim 486

A Micro-Force-Tracking System Based on PVDF Static Micro-Force Sensor and Fuzzy-PID Control Method
Z.Y. Sun, W.L. Chen, Y.Q. Su and L.N. Hao 489

Design and Implementation of Vehicle Pedestrian Detection System Based on FPGA
X.W. Ma, S. Ma, M.Y. Li and M.L. Jin 495

Path Following Control for a Class of Electro-Mechanical Systems and its Application
M. Taniguchi and K. Fujimoto 501

MSC ADAMS Based Simulation of a Test-Bed for Cell Injecting Using IPMC
L.N. Hao, H.T. Liu, J.C. Gao and P. Zhang 507

Investigation on Slot/Pole Number Combinations for PMSM with Concentrated Fractional Slot Winding
G.Q. Liu 512

Research on the Planetary Gear Deceleration Machine Design of a Novel Rapidly-Opening/Closing Actuator of Manual Valve
B. Shi, F. Wang, H.Q. Wang, Y.J. Chen and C.Y. Chen 519

The Real-Time Look-Ahead NURBS Curve Interpolation Algorithm
G.Z. Wang 523

A Stenciling Delay System for Steel Plate Ultrasonic Flaw Detection Process
G.Z. Wang 527

Welding Seam Turbulent Tracking Technique for Spiral Welded Pipe Ultrasonic Flaw Detection
W.J. Zhang 531

Vibration Control and Dynamical Model of a Thermal-Electrical-Mechanical Coupled Smart Cantilevered Beam
T. Zhang, H.G. Li and J.J. Zhao 535

A Study on CO_2/CO Dual Sensor Module by NDIR Method
B.S. Lee, K.H. Kim, Y.D. Yeom, H.T. Kim, J.H. Lee, G.S. Kim and C.H. Lim 541

High Density Ozone Generation System Using Fuzzy Inference Engine
W.H. Lee, I.W. Kim and K.B. Kim 547

The Optical Network Design Using Availability Models to Accept Additional Nodes
J.B. Eun, G.T. Park, G.H. Ahn and H.S. Kim 553

Design of Measuring System of ASC (Acupuncture Spot Current) for Constitutional Diagnosis
U.H. Ji and S.Y. Chun 559

Chapter 6: Information Technology and Intelligent System

Fast Volume Rendering Using a Spherical Index Method for Shading
Y. Wang, H. Wang and L. Huang 567

Device Management System Using Group Information on SNS
Y. Shirakawa and T. Koita 573

User-Oriented Web Service Search Technique for Mobile Mashup
K. Hizen and T. Koita 579

A Systematic Framework for Building Trusted Online Transaction Environment: Three Information Infrastructures
X. Yu, Y.T. Chai and Y. Liu 583

Study on Design Method of Logistics Platform Based on SOA & ESB
Y. Yu 589

Acquisition and Analysis System of the Ballistocardiogram Signal Based on Virtual Instruments
F.F. Jiang, X. Wang, D. Yang and Y. Hao 595

A Game Theory Based Approach for Routing in Wireless Sensor Networks
F.Y. Li, F.X. Gao, L. Yao and G.R. Chang 599

Implementation Mechanism of Automated Reconciliation for Web Services Protocols
H.D. Yu, Y. Zou and F. Liu 604

Ant Colony Intelligence in Flexible Manufacturing Scheduling Using Contract-Net Model
Y.Z. Wei, Y.J. Feng and K.F. Gu 608

The Research of the NURBS Curve Interpolation Algorithm
W.J. Zhang 614

Simulation of NURBS Curve Interpolation Algorithm and Five S-Phased Acceleration and Deceleration Control Algorithm
G.Z. Wang 619

Source Data Model of Integration Manufacturing Information System
Y.J. Feng 624

A New Dynamic Version Control Method Oriented the Complex Product
M.X. Ma, X. Mao and Q.C. Zhang 629

Cast Shadow Detection for Surveillance System Based on Tricolor Attenuation Model
L.L. Zhu, J.D. Tian, Y.D. Tang and J.D. Han 635

Implementation of FxLMS Algorithm Based on Level-2 S-Function and Behavior Analysis
F. Zhang, Y.N. Li and L. Wang 640

A Research on the Extraction and Interpretation of Power Line Communication Noise Pattern Using Genetic Algorithm
C.K. Seo, S.M. Jeong and D.J. Chung 645

A Study on the Effective Gas Safety Management Using Smart Appliances
G.T. Park, G.J. Lyu, Y.G. Kim, Y.D. Kim and H.S. Kim 649

Development of Statistical Server to Apply Call Center Management Solution
I.S. Kown, B.H. Choi and H.S. Kim 655

Chapter 7: Condition Monitoring and Fault Diagnosis

Nonlinear Vibration Analysis of Machine-Tool Guideway System with Clearance
H.T. Luo, Y.W. Liu, H.G. Wang and W.J. Zhou 661

The Effect of Initial Cooling Temperature on Deformation of U75V Heavy Rail after Cooling
M.X. Gao, H. Jia, J.J. Jiang, P.L. Wang, H. Song, S.Y. Yuan and Z.Q. Wang 667

Effect of Draw Blank Velocity on Steel Fluid Flow Field in Blank Continuous Caster Crystallizer
Z.N. Xu, H.Y. Liu, Y.P. Lu and L.G. Liu 673

Nonlinear Dynamic Behavior of Double-Disk Isotropic Rotor System with Axial Rub-Impact
Y. Zhang, W.M. Wang and J.F. Yao 678

Backward-Auto-Regressive Model Based Rotor-Bearing System Stability Prediction
J.L. Yang, W.M. Wang, Y.J. Zhu and Y. Zhang 683

Identification of Damping Ratio for a Rotor-Bearing System Using a Magnetic Bearing Exciter
Y.J. Zhu, Y. Zhang, W.M. Wang and J.F. Yao 688

Gas Turbine Condition Monitoring and Prognosis: A Review
S.S. Wang, W.M. Wang, Y.Q. Shi and Y. Zhang 694

Effects of Shroud Curvature on the Performance of Centrifugal Compressor Blade
K.Y. Hao, W.M. Wang, Y.Q. Shi and S.S. Wang 700

Fault Prediction Method Based on Data Mining in Semiconductor Test Line
R.H. Yue, Y.M. Ma, F. Qiao and X.H. Wu 706

Comparison of Critical Speeds of a Rotor System with Different Types of Finite Elements
H. Ma, H. Zuo, X.Y. Tai and B.C. Wen 711

Time-Frequency Characteristics Analysis on Vibration Signals of a Three-Supported Rotor System with Misalignment
X.X. Qi, M.L. Wang, L.J. Lin, J.W. Ji and Q.K. Han 717

Nonlinear Dynamics of Jeffcott Rotor System with Rub-Impact Fault
Y.Z. Chen, L.Q. Liu, Y. Liu and B.C. Wen 722

Research on Periodic Motion Stability of Rotor-Bearing System with Dual-Unbalances
C.F. Li, G.C. Liu, Q.L. Li and B.C. Wen 728

Numerical Analysis of Structure Acoustic Radiation Based on Wave Superposition Method
S.Y. Gao, D.S. Wang and Y.Q. Du 733

Damage Process Simulation of Damping Coating of Thin Plate
J.Y. Zhai, H. Li and Q.K. Han 739

Machine Condition Classification by Using Wavelet Packet Decomposition and Multi-Scale Entropy
H.K. Li, S.A. Zhou and Y.Z. Chen 743

The Model of Equipment Integrated Maintenance Management Based on MES
X.J. Li, P. Wang and X. Huang 749

Parameter Optimization in KPCA for Rotating Machinery Feature Vector Dimensionality Reduction
L.L. Jiang, P. Li and S.W. Tang 755

A Character of Rotating Machinery Defined Based on KICA
L.L. Jiang, Z.Q. Deng and S.W. Tang 761

Research on Characteristics of Chaotic Motion Based on the Wavelet Ridge
H. Li, J.D. Wen, J. Zhang and B.C. Wen 765

Second Derivative Gaussian Algorithm in Engine Fault Image
Y.L. Luo, G.H. Liu and K. Wang 769

Model-Based Fault Diagnosis Approach for Rotor System with Unidentified Supporting Parameters
H.L. Yao, H.B. Ma, Q.K. Han and B.C. Wen 773

Development of a Kind of Mine Staff Management System
W.L. Chen, B.S. Liu, S.W. Sun and L.N. Hao 779

The Study of Interoperability Test for Onboard Control System in Railway Condition
J.H. Baek, Y.K. Kim, J.H. Lee and H.J. Jo 785

Verification Experiment and Analysis for Electrical Utilities Diagnosis System by HFPD Detector
J.H. Yoo, T.H. Dilimureti and H.S. Kim 791

Chapter 8: Applied Mechanics and Design

Experimental Study of Micro Mill-Grinding Process on Al 6061-T6
J. Cheng, Y.D. Gong, Y.M. Liu and J.Y. Yang 797

Optimization Algorithm of Matrix Riccati Differential Equation and Application
X.L. Hou, D.S. Huang and C. Chen 801

Nonlinear Frequencies for Transverse Free Oscillations of a Transporting Tensioned Beam
H. Ding, L.Q. Chen and H.Y. Jiang 807

Analysis of Flow Field for Link Rod Butterfly Valve
X.D. Ma and J. Teng 817

Fluid-Structure Interaction Vibration of Hydraulic Pipe System
J.Z. Lin, L. Qin, E.T. Zhou and B.C. Wen 822

Modal Analysis of Temporarily Installed Suspended Access Equipment Based on ANSYS
X.J. Zheng, Z. Lu, X.Y. Zhao and X.L. Gao 828

Dynamic Design and Computer Imitation of Belt Conveyor with Horizontal Curves
D. Wang, W.G. Song and J. Liu 833

Finite Element Modeling and Dynamic Analysis of Rotating Disc and Drum Connected by Bolted Joints
Z.Y. Qin, H.Y. Wang and F.L. Chu 838

Research on the Vibration of Rolling Mill
Y.P. Sun and D.C. Zhang 843

FEM Analysis on the Frame of Cross Roll Straightener for Steel Pipes
L.P. Wang, J.W. Piao, Z.N. Xu, C.H. Jiang and X. Bi 848

Structure Analyses and Flow Rate Model of Peristaltic Pump of Cement Foaming Machine
X. Wu and Q.Z. Cui 852

Study on the Temperature Field of Casting Process in ANSYS
C. Li, G.B. Zhao, S.Y. Zhang and X. Han 856

Finite Element Analysis for Whole Machine of Link-Type Ladle Turret
L.L. Li, G.P. Xu and B.B. Cui 861

Nonlinear Response of Graphite-Epoxy Composite Thin-Walled Structure under Elevated Thermal Environment
Y.D. Sha, F. Xu and Z.J. Gao 865

Investigation into Noise Frequency Spectrum Characteristics Corresponding to Blade Nonsynchronous Vibration in Multi-Stage Axial Compressor
Y.D. Sha, F.T. Zhao and J. Han 870

Influence of Thermal Loading on the Dynamic Response of Thin-Walled Structure under Thermo-Acoustic Loading
Y.D. Sha, Z.J. Gao, F. Xu and J.Y. Li 876

Free Axial Vibrations of Non-Uniform Rods
S.Q. Guo and S.P. Yang 882

Dynamic Simulation on Impact Test of Vehicle Wheel
Y.Q. Zheng, B. Li and Z.L. Wang 890

Discrete Element Analysis of Friction Coefficient on Granular Accumulation
Q.L. Li, B. Zhao, B. Wang and B.C. Wen 894

Speed Effects on Inherent Rotating Frequency of Motorized Spindle System
B. Wang, W. Sun, K.P. Xu and B.C. Wen 900

Research on Numerical Method for Fluid-Structure Interaction in Engine Blades
Z. Tan, P. Zhang, G.Y. Du and B.C. Wen 906

Study on Dynamic Response of Assembly Type Gear-Rotor System
J.S. Dai, P. Zhang, C.F. Li, B. Wang and B.C. Wen 912

Free Vibration of a CLD Combination Cylindrical Shells
H.J. Ren, B.P. Wang, X.Y. Song and Q.K. Han 918

Reliability Analysis and Motion Simulation of Steel Coil Upender Clamp
A.Y. Jiao and F.H. Wang 924

Modal Analysis of Five-Layer Vertical Structure Platform
B.Y. Ma, H. Song, C.Z. Yu and Q. Liu 928

FE Analysis on Contact Properties between Root- Blade and Slot-Disc
B.P. Wang, J. Wang, X.Z. Li and Q.K. Han 932

Similitude Analysis on Mechanical Parameters of Thin Walled Shells
G.M. Qin, H.Y. Duan, Z. Luo and Q.K. Han 936

The Gyroscopic Effect on Dynamic Characteristics of Dual- Disk Rotor System
M.L. Wang and Q.K. Han 942

Analytical Solution for Free Vibration of Multilayered Circular Plate
H.J. Ren, X.Y. Song and Q.K. Han 948

The Research on Single-Disc Rotor Nonlinear Vibration Model and Mechanism
M. Wu and J.F. Yang 954

DEM Simulation of Spin Vibration Screening Process
D.S. Li and Y.Q. Du 960

Symmetric Deflection of CFRP-Based Polymeric Laminate
W.Y. Lin, M. Sasaki and H. Tamagawa 966

The Modal Analysis of Rotor-Rolling Bearing-Base System
X.J. Li and B.H. Yao 972

A Vibration-Isolated Body of Chaotic Prediction
Y.Y. Gao, S.P. Zhan and B.G. Li 978

The Design and Simulation of HPLC's Structure
Z.N. Xu, X.X. Wang, L. Hou and L.G. Liu 984

Reformation Design of the Feeding System of the Semi-Mobile Crushing Station
X.Y. Wang and X.G. Yu 988

Stress Analysis on Saw Blade of Hot Sawing Machine
Y.H. Xiang and X.G. Yu 991

Fluid Finite Element Analysis for Hot-Air Valve Duct
Y. Yao and H. Yu 995

Analysis of Moment Transmitted by Universal Joint in Varying Operating Condition
C.L. Feng, D.S. Wang and Y.Y. Zhu 999

Reliability Sensitivity Analysis of Bearing-Rotor System Based on the Dynamic Coefficient
Q.C. Zhao and Y.M. Zhang 1004

Analysis of Intensity and Vibration of 190T Electric Wheel Dump Truck Frame
X.G. Yu and L. Yang 1008

Natural Characteristics Analysis of Frame of 1780 Tandem Rolling Mill
D.C. Zhang and Y.P. Sun 1014

Dynamics Characteristics of Blast Furnace Shell
D.C. Zhang and Y.P. Sun 1018

Sealing Teeth Effects on Natural Frequencies of a Short Cylindrical Shell
Y. Wang, H.Y. Duan, G.M. Qin, Z. Luo and Q.K. Han 1021

Kinematic Analysis on Materials on Counter Flow Screen and Selection of Dynamic Parameters of Machine
J. Jiang, Q.K. Han, Y.H. Xie, J. Han and S.Y. Liu 1027

Simulation of Fatigue Failure of Rail Joint Bolts by FEA
X.P. Li, H.F. Nie, W.J. Yuan and B.C. Wen 1035

Feasibility Study on Structure Optimization of Filter Elements for Hydraulic Pipelines
L.W. Zhao and Y. Wang 1041

The Optimal Design of Trench Field Rings for High Breakdown Voltage
E.G. Kang, S.Y. Hong and B.S. Ahn 1047

Application of P1-Nonconforming Element for Shell Structure of Incompressible Materiel
L. Chen, G.W. Jang, T.J. Chung and T.H. Baek 1051

Chapter 9: Applied Electromagnetics

Non-Parametric Model of Magneto-Rheological (MR) Damper Based on Adaptive Neuro-Fuzzy Inference System (ANFIS)
L. Zheng, F. Liu and Z.Y. Zhou 1059

Semi-Active Control of Vehicle Seat Suspension System with Magnetorheological Damper
H.J. Xing, S.P. Yang and Y.J. Shen 1067

Combinatorial Synthesis and Evaluation of Vanadium Oxide Films
Q.J. Wang 1071

Vibration Control and Design of Vehicle Engine Mount Activated by Magnetorheological Fluid
Z.X. Deng and L. Zheng 1077

Research of Film Uniformity on Vacuum Coating by Magnetron Sputtering with Multi-Sites
Y. Huang, S.T. Gao and M. Liu 1082

Virtual Design and Visual Simulation of Cathode Target on Magnetron Sputtering Coater
Y.C. Zhang, C.L. Li, X.Y. Li and H. Li 1088

Self-Helpingly Exchanging and Charging Batteries for EN-V
S.P. Chen, Q.C. Zhang, X.F. Meng, F.H. Pan, H.L. Liu and F.Q. Cheng 1093

Improvement of Zero Suspension Force Performance Using a Special Magnet for a Magnetic Suspension Device
F. Sun, K. Oka and J.J. Jin 1099

Adaptive State Feedback Control of Electromagnetic Levitation System for Uncertain Ball Mass
G.M. Park, W.J. Hwang and H.L. Choi 1105
