

Table of Contents

Preface

Chapter 1: Superalloys

Numerical Analysis of Aerospace Nickel-Based Single-Crystal Superalloy Weldability Part I: Crystallography-Dependent Dendrite Growth Z.G. Gao	3
Numerical Analysis of Solidification Behavior during Laser Welding Nickel-Based Single-Crystal Superalloy Part: II Crystallography-Dependent Supersaturation of Liquid Aluminum Z.G. Gao	13
Numerical Analysis of Aerospace Nickel-Based Single-Crystal Superalloy Weldability Part III: Solidification Cracking Susceptibility Z.G. Gao	23
Numerical Analysis of Aerospace Nickel-Based Single-Crystal Superalloy Weldability Part II: Nonequilibrium Solidification Behavior Z.G. Gao	33
Low-Cycle Fatigue-Creep Interaction Behavior of GH4169 Superalloy Y.D. Lian, L.Q. Gao, Q. Yin, Z.Z. Xu and Z.X. Wen	43

Chapter 2: Optimization of Electrical Discharge Machining Processes

Multi-Objective Optimization of PMEDM Process of 90CrSi Alloy Steel for Minimum Electrode Wear Rate and Maximum Material Removal Rate with Silicon Carbide Powder T.T. Hong, N.V. Cuong, B.T. Danh, L.H. Ky, N.H. Linh, V.T. Lien, N.T. Vinh and N.M. Cuong	51
Multi-Objective Optimization of Surface Roughness and Electrode Wear in EDM Cylindrical Shaped Parts L.H. Ky, B.T. Danh, N.V. Cuong, N.H. Linh, T.T. Hong, T.N. Giang, D.T. Tam and V.N. Pi	59
A Study on Influence of Input Parameters on Surface Roughness in PMEDM Cylindrical Shaped Parts T.T. Hong, B.T. Danh, N.V. Cuong, L.H. Ky, N.H. Linh, N.T.T. Nga, T.N. Giang and N.M. Cuong	65
Multi-Objective Optimization of PMEDM Input Factors for Processing Cylindrical Shaped Parts T.T. Hong, N.V. Cuong, T.N. Hien, B.T. Danh, L.H. Ky, N.H. Linh, N.T. Vinh and D.T. Tam	71
Effects of Input Parameters on Electrode Wear Rate when EDM Cylindrical Shaped Parts T.T. Hong, N.V. Cuong, B.T. Danh, N.H. Linh, L.H. Ky, N.T.T. Nga, D.T. Tam and V.N. Pi	79
Evaluating Influences of Input Parameters on Surface Roughness in Sinking EDM Cylindrical Shaped Parts T.T. Hong, N.A. Tuan, B.T. Danh, L.H. Ky, N.H. Linh, T.N. Giang, V.N. Pi and N.M. Cuong	85
Influence of Process Parameters on Material Removal Rate in Electrical Discharge Machining Cylindrical Shaped Parts T.T. Hong, N.H. Linh, B.T. Danh, L.H. Ky, V.T. Lien, T.N. Giang, V.N. Pi and D.T. Tam	91
Effect of Process Parameters on Machining Time in PMEDM Cylindrical Shaped Parts with Silicon Carbide Powder Suspended Dielectric T.T. Hong, N.H. Linh, N.V. Cuong, B.T. Danh, L.H. Ky, L.T. Quy, N.M. Cuong, V.N. Pi and D.T. Tam	97

Chapter 3: Magnetic Abrasive Finishing

Discussion on Roundness of Non-Ferromagnetic Tube by Interior Magnetic Abrasive Finishing Using a Magnetic Machining Jig J.N. Liu and Y.H. Zou	105
--	-----

Investigation on the Improvement of Surface Quality by the Magnetic Plate-Assisted Magnetic Abrasive Finishing Process Y.H. Zou and H.J. Xie	111
Study on the Magnetic Abrasive Finishing Process Using an Alternating Magnetic Field - Discussion on the Application of Full-Wave Rectifier Current - H.J. Xie and Y.H. Zou	117
Study on Plan Magnetic Abrasive Finishing - Discussion on Processing Methods for Improving Flatness Y.L. Zhang, Y.H. Zou and H.J. Xie	123

Chapter 4: Metal Forming Processes

The Effect of the Sheet Metal Postures on the Forming Thickness Based on the Finite Element Analysis H. Zhu, Y. Wang and D.W. Jung	131
Formability Analysis on Ultra-High Strength Steel for Automotive Parts Using Finite Element Simulation A. Nakwattanaset and S. Suranuntchai	137

Chapter 5: Engineering Materials

Synthesis and Characterization of MCM-48 Molecular Sieves with High Specific Surface Area M. Li, L.Y. Dong, X.X. Li, Z.P. Guo, Y. He and Q. Lin	147
Relationship Study and Primary Application between Gas Permeability and Crack State on Bridge Joint Concrete G.R. Zhang, X.D. Wang, J.K. Han and Y.X. Han	153
Experimental Study on Mechanical Properties of Basalt Fiber Reactive Powder Concrete C.F. Fan, B.K. Zhou and W. Zhang	163
Failure Mechanism of Diamond Saw Blade Sawing Concrete S.S. Hu, L.A. He, Y.N. Hu and C.Y. Wang	169
Segment Matrix Design and Drilling Test of Diamond Bit for Sapphire L. Xu, Y.B. Liu and Q. Xu	177
