

# Table of Contents

## Preface

## Chapter 1: Superalloys

<b>Numerical Analysis of Aerospace Nickel-Based Single-Crystal Superalloy Weldability Part I: Crystallography-Dependent Dendrite Growth</b> Z.G. Gao	3
<b>Numerical Analysis of Solidification Behavior during Laser Welding Nickel-Based Single-Crystal Superalloy Part: II Crystallography-Dependent Supersaturation of Liquid Aluminum</b> Z.G. Gao	13
<b>Numerical Analysis of Aerospace Nickel-Based Single-Crystal Superalloy Weldability Part III: Solidification Cracking Susceptibility</b> Z.G. Gao	23
<b>Numerical Analysis of Aerospace Nickel-Based Single-Crystal Superalloy Weldability Part II: Nonequilibrium Solidification Behavior</b> Z.G. Gao	33
<b>Low-Cycle Fatigue-Creep Interaction Behavior of GH4169 Superalloy</b> Y.D. Lian, L.Q. Gao, Q. Yin, Z.Z. Xu and Z.X. Wen	43

## Chapter 2: Optimization of Electrical Discharge Machining Processes

<b>Multi-Objective Optimization of PMEDM Process of 90CrSi Alloy Steel for Minimum Electrode Wear Rate and Maximum Material Removal Rate with Silicon Carbide Powder</b> T.T. Hong, N.V. Cuong, B.T. Danh, L.H. Ky, N.H. Linh, V.T. Lien, N.T. Vinh and N.M. Cuong	51
<b>Multi-Objective Optimization of Surface Roughness and Electrode Wear in EDM Cylindrical Shaped Parts</b> L.H. Ky, B.T. Danh, N.V. Cuong, N.H. Linh, T.T. Hong, T.N. Giang, D.T. Tam and V.N. Pi	59
<b>A Study on Influence of Input Parameters on Surface Roughness in PMEDM Cylindrical Shaped Parts</b> T.T. Hong, B.T. Danh, N.V. Cuong, L.H. Ky, N.H. Linh, N.T.T. Nga, T.N. Giang and N.M. Cuong	65
<b>Multi-Objective Optimization of PMEDM Input Factors for Processing Cylindrical Shaped Parts</b> T.T. Hong, N.V. Cuong, T.N. Hien, B.T. Danh, L.H. Ky, N.H. Linh, N.T. Vinh and D.T. Tam	71
<b>Effects of Input Parameters on Electrode Wear Rate when EDM Cylindrical Shaped Parts</b> T.T. Hong, N.V. Cuong, B.T. Danh, N.H. Linh, L.H. Ky, N.T.T. Nga, D.T. Tam and V.N. Pi	79
<b>Evaluating Influences of Input Parameters on Surface Roughness in Sinking EDM Cylindrical Shaped Parts</b> T.T. Hong, N.A. Tuan, B.T. Danh, L.H. Ky, N.H. Linh, T.N. Giang, V.N. Pi and N.M. Cuong	85
<b>Influence of Process Parameters on Material Removal Rate in Electrical Discharge Machining Cylindrical Shaped Parts</b> T.T. Hong, N.H. Linh, B.T. Danh, L.H. Ky, V.T. Lien, T.N. Giang, V.N. Pi and D.T. Tam	91
<b>Effect of Process Parameters on Machining Time in PMEDM Cylindrical Shaped Parts with Silicon Carbide Powder Suspended Dielectric</b> T.T. Hong, N.H. Linh, N.V. Cuong, B.T. Danh, L.H. Ky, L.T. Quy, N.M. Cuong, V.N. Pi and D.T. Tam	97

## Chapter 3: Magnetic Abrasive Finishing

<b>Discussion on Roundness of Non-Ferromagnetic Tube by Interior Magnetic Abrasive Finishing Using a Magnetic Machining Jig</b> J.N. Liu and Y.H. Zou	105
--	-----

<b>Investigation on the Improvement of Surface Quality by the Magnetic Plate-Assisted Magnetic Abrasive Finishing Process</b> Y.H. Zou and H.J. Xie	111
<b>Study on the Magnetic Abrasive Finishing Process Using an Alternating Magnetic Field - Discussion on the Application of Full-Wave Rectifier Current -</b> H.J. Xie and Y.H. Zou	117
<b>Study on Plan Magnetic Abrasive Finishing - Discussion on Processing Methods for Improving Flatness</b> Y.L. Zhang, Y.H. Zou and H.J. Xie	123

## Chapter 4: Metal Forming Processes

<b>The Effect of the Sheet Metal Postures on the Forming Thickness Based on the Finite Element Analysis</b> H. Zhu, Y. Wang and D.W. Jung	131
<b>Formability Analysis on Ultra-High Strength Steel for Automotive Parts Using Finite Element Simulation</b> A. Nakwattanaset and S. Suranuntchai	137

## Chapter 5: Engineering Materials

<b>Synthesis and Characterization of MCM-48 Molecular Sieves with High Specific Surface Area</b> M. Li, L.Y. Dong, X.X. Li, Z.P. Guo, Y. He and Q. Lin	147
<b>Relationship Study and Primary Application between Gas Permeability and Crack State on Bridge Joint Concrete</b> G.R. Zhang, X.D. Wang, J.K. Han and Y.X. Han	153
<b>Experimental Study on Mechanical Properties of Basalt Fiber Reactive Powder Concrete</b> C.F. Fan, B.K. Zhou and W. Zhang	163
<b>Failure Mechanism of Diamond Saw Blade Sawing Concrete</b> S.S. Hu, L.A. He, Y.N. Hu and C.Y. Wang	169
<b>Segment Matrix Design and Drilling Test of Diamond Bit for Sapphire</b> L. Xu, Y.B. Liu and Q. Xu	177
