

Table of Contents

Preface, Organizing Committee and Acknowledgment

Invited Lectures

<i>In Situ</i> Observation Method for Quantitative Evaluation of Solidification Phenomena and Solidification Cracks during Welding K. Shinozaki, M. Yamamoto, K. Kadoi and P. Wen	3
Investigations on Microstructure Effect of Changing Fluid Flow Characteristic in High Pressure Die Casting C. Chimani, R. Kretz, C. Angermeier and C. Gusenbauer	8
Effect of Sample Mount on Active Screen Plasma Duplex Processing A. Nishimoto and K. Nakazawa	16
Magnetic and Martensitic Transformations in $\text{Ni}_{46}\text{Mn}_{41.5-x}\text{Fe}_x\text{Sn}_{12.5}$ Melt Spun Ribbons W. Maziarz, P. Czaja, J. Dutkiewicz, R. Wróblewski and M. Leonowicz	23
Modern Self-Lubricating Coatings for Automotive, Aviation and Spacecraft Industry B. Wendler, T. Moskalewicz, M. Kot, S. Zimowski, A. Czyrska-Filemonowicz, W. Pawlak, A. Ryłski, K. Włodarczyk-Kowalska, P. Nolbrzak and M. Makowska	31

I. Prediction, Process Simulation and Metallographic Methods

Evaluation of Grain Deformation in Polycrystals M. Martinkovič and S. Minárik	41
Prediction of Ternary Fe-B-Cr Phase Diagram V. Homolová	45
Non-Traditional Use of Torsion Plastometer in Physical Simulation of Steel Production T. Kubina, A. Bořuta, M. Longauerová and J. Bořuta	51
Toughness of Ultra High Strength Steel Sheets S. Hlebová and L. Pešek	57
Effect of Experimental Factors on Hardness Measurement Using the UCI Technique P. Burik and L. Pešek	61

II. Solidification and Solid State Transformation

Experimental Analysis on the Causes of the Breakout of Continuous Cast Steel Slab J. Dobrovská, H. Francová, B. Smetana, K. Stránský, V. Dobrovská and F. Kavička	67
Precipitation in Surface Zone of Continuously-Cast Slab of ULC/IF Steel Microalloyed with Titanium M. Longauerová, M. Hurakova and S. Longauer	73
Influence of Casting Rate on TiNb Microalloyed Steel Slab Surface Area Microstructure P. Bekeč, M. Longauerová and M. Vojtko	81
Homogenization of Microstructure of Castings from the Alloy Fe-40at.%Al-Zr-B I. Schindler, S. Ruzs, R. Kawulok, P. Kawulok, M. Subíková and M. Cagala	87
Kinetics of Austenite Recrystallization of Selected Steels Used for Heavy Forgings J. Horník, P. Zuna, J. Málek and F. Jandoš	93
Impact of Microstructure Modification on Deformation Behaviour of Bulk TRIP Steel J. Zrník, O. Muránsky and P. Šittner	99
Structure Refinement of Medium Carbon Steel and Deformation Properties Respond J. Zrník, S. Dobatkin and G. Raab	104
Effect of Annealing on the Microstructure Evolution and Mechanical Properties of Dual Phase Steel M. Šebek, P. Horňák and P. Zimovčák	111

Shape Evolution of Cementite during Accelerated Carbide Spheroidisation J. Dlouhý, D. Hauserova and Z. Novy	117
Microstructure Development of Bearing Steel during Accelerated Carbide Spheroidisation D. Hauserova, J. Dlouhý and Z. Novy	123
Differential Scanning Calorimetry and Metallographic Analysis of Fe-Si Electrical Steel M. Sopko, F. Kováč, I. Petryshynets, M. Molnárová and P. Gavendová	129
Mechanical Properties of 7CrMoVTiB10-10 Steel after Heat Treatment M. Mojžiš, L. Domovcová, M. Weiss, M. Fujda and Ľ. Parilák	133
Microstructure and Mechanical Properties of Steel Grade 14MoV6-3 L. Domovcová, P. Beraxa, M. Mojžiš, M. Weiss, M. Fujda and Ľ. Parilák	137

III. Welding

Minor Phase Evolution in Homogeneous T24 Welds V. Vodárek, G. Rožnovská, J. Holešínský, A. Maslova and Z. Kuboň	143
Investigation of Dissimilar Metal Weld Behavior Z. Skoumalová and E. Keilová	149
Mechanical and Phase Analysis of Bonding Area Explosively Welded Ti-Cr/Ni Steel in as-Received State and after Heat Treatment Using Synchrotron (BW-5) D. Ostroushko, E. Mazancová, K. Saksl and R. Halgaš	155
Microstructural Stability of Long-Term Annealed AZ91 Magnesium Alloy Weld Joint M. Stopyra and J. Adamiec	161
Hydrogen Response of 304 SS and Ti Weld Realised by Explosion E. Mazancová and D. Ostroushko	166
Case Studies of Steel and their Welded Joint Failures Caused by LME P. Bernasovský	172

IV. Interrelationship between Microstructure and Material Properties

Metallography of CB2 Steel Used for Cast Turbine Components J. Kasl and D. Jandová	179
Application of Metallography for the Slovak Nuclear Power Plants M. Kapusňák and Ľ. Kupča	186
Changes of Mechanical Properties in Response to Changes in the Microstructure of High Pressure Steel Cylinders Obtained by the Various Heat Treatments P. Kučera and E. Mazancová	191
Microstructural Investigations on Vespa Scooter Gear Parts over a Production Period of 50 Years M. Meyer, S. Strobl and R. Haubner	197
Columnar Grain Growth with Enhanced Rotation Texture in Temper Rolled NO Silicon Steels I. Petryshynets, F. Kováč, M. Molnárová, P. Gavendová, M. Sopko and B. Petrov	201
Nanoindentation Measurements in Non-Oriented Silicon Steel at Elevated Temperatures P. Gavendová, F. Kováč, I. Petryshynets, M. Sopko and M. Molnárová	205
The Effect of Long-Term Annealing at Elevated Temperature on Microstructure and Hardness of Heat-Resistant Steel L. Kosec, M. Gojić, S. Kožuh, B. Kosec, G. Dražič and Š. Šavli	209
Changes in Mechanical Properties and Microstructure after Quasi-Static and Dynamic Tensile Loading P. Zubko, M. Vojtko, L. Pešek, M. Német and P. Bekeč	215

V. Fractures, Defects and Material Degradation

Defects and Particles in Laboratory Hot Rolled Steel of C-Mn-Cr-Nb Type P. Kawulok, I. Schindler, J. Sojka, S. Rusz, R. Kawulok, V. Šíma, P. Hanus, R. Turoň and P. Turoňová	221
--	-----

Evaluation of Degradation Causes of the Forged Rotors Made of NiCrMo Steel Grade P. Jonšta, R. Heide, I. Vlčková, M. Gabčová, Z. Jonšta and F. Jandoš	227
Metallographic Examination of Fracture Splitting 44SMn28 Steel Used in the Manufacture of Rotor Shaft Z. Jurasz, R. Kochel and K. Adamaszek	231
Star Cracks in Continuously Cast Deep-Drawing Tin Steel Slab J. Duška, G. Grimplini, M. Molnár, L. Hrabčáková and A. Drotár	235
Surface Defect on Hot Rolled Steel Sheet with Cu Content L. Hrabčáková, J. Duška and A. Mašlejová	239
Failure Analysis of the Rail M. Šmátralová, J. Kosňovská, G. Rožnovská and V. Kurek	243
Failure Analysis of Spherical Roller Bearing M. Juliš, L. Čelko, Z. Spotz, P. Doležal, Z. Pavloušková and J. Švejcar	247
Research through the Stationary Specimen Method of the X20Cr13 Stainless Steel Used for Hydraulic Pumps M.D. Nedeloni, N. Potoceanu, D. Florea and D. Chirus	251
Cavitation Erosion Behavior of the Antifriction Alloy YSn83 N. Potoceanu, M.D. Nedeloni, D. Chirus and D. Florea	257
Cavitation Erosion Research on the X3CrNi13-4 Stainless Steel D. Nedelcu, M.D. Nedeloni and C.I. Lupinca	263
Gray Cast Iron Behavior in Cavitation Erosion C.I. Lupinca, M.D. Nedeloni and D. Nedelcu	269
Investigations on a Defect Sewer Pipe, Attacked by Microbiologically Produced Acid R. Haubner, S. Strobl, P. Linhardt and E. Halwax	275
Effect of Long Term Operation on Degradation of Material of Main Gas Pipelines P. Maruschak, R. Bishchak, I. Konovalenko, A. Menou and J. Brezinová	279
Metallography of Low Alloy Cr-Mn Hot-Rolled Steel and Quantitative Evaluation of Grain Boundary- and Internal Oxides by TEM V.G. Praig and M. Stöger-Pollach	284
Cyclic Oxidation Behaviour of Heat Resistance Cast Steel M. Garbiak and P. Kaczmarek	288

VI. Fatigue and Creep

Influence of Charge Composition on the Structure and Fatigue Properties of Nodular Cast Irons A. Vaško, L. Trško and M. Chalupová	295
Influence of Microstructure and Defect Population on the Fatigue Performance of Cast A356-T6 Automotive Components R. Konečná, G. Nicoletto and E. Riva	301
Laser Hardening Parameters Influencing Component Lifetime and Residual Stresses S. Němeček, M. Míšek, I. Černý, J. Sís, N. Ganey and K. Kolařík	306
Microstructure of CB2 Steel before and after Long-Term Creep Tests D. Jandová, J. Kasl and E. Chvostová	311
Microstructural Stability of P23/P91 Dissimilar Welds during Creep at 500°C L. Strílková, J. Holešínský, A. Maslova, Z. Kuboň and V. Vodárek	319
Evaluation of Materials Degradation Extent after their Long Term Exposition in Power Plants Equipments M. Kraus, V. Mareš and J. Bystrianský	325
Creep of Cast Steel P91 with Weld Joint T. Vlasák, J. Hakl, P. Novák, J. Sochor and J. Čech	331
Study of Microstructure and Phase Composition of Creep Resistant Cast Steel R. Chylińska, M. Garbiak and B. Piekarski	335
Microstructural Phenomenon Occurring in Elektron 21 Magnesium Alloy During Creep I. Pikos, T. Rzychoń and A. Kielbus	339

VII. Nonferrous Alloys

Highly Thermally Stable Light-Weight Al Based Alloys Prepared by Centrifugal Atomization and Powder Compaction D. Vojtěch, K. Dám and F. Průša	347
Microstructure Evolution of Fe-Al-Si and Ti-Al-Si Alloys during High-Temperature Oxidation P. Novák, J. Kříž, A. Michalcová and D. Vojtech	353
The Study of Iron Intermetallic Phases Morphology with Applying Deep Etching in Secondary Al-Si Alloys L. Hurtalová, E. Tillová and M. Chalupová	359
Microstructure Analysis of AlSi10MgMn Aluminium Cast Alloy M. Chalupová, E. Tillová and M. Farkašová	365
Unconventional Metallographic Methods for the Structural Characterization of Laser Hardened Al-Zn-Si Cast Alloy E. Tillová and M. Chalupová	369
Cockcroft-Latham Ductile Fracture Criteria for Non Ferrous Materials T. Kvačák, J. Tiža, J. Bacsó, A. Kováčová, R. Kočiško, R. Pernis, M. Fedorčáková and P. Purcz	373
The Influence of Thermo-Plastic Processes on Materials Recovery T. Kvačák, R. Kočiško, R. Bidulský, J. Bidulská, P. Bella, M. Lupták, A. Kováčová and J. Bacsó	379
Microstructure and Mechanical Properties of Ultrafine-Grained Magnesium AZ91 Alloy S. Fintová, L. Pantělejev and L. Kunz	384
Homogenization of AlSi7MgCu0.5 Alloy as-Cast Structure by ECAP Processing M. Matvija, M. Fujda, M. Vojtko and R. Kočiško	390
Effect of Technologies Processing on Material Properties of Selected Aluminium Alloys P. Lacková, D. Žabecká, O. Milkovič, M. Škrobán and M. Bajcura	394
Non-Metallic Inclusions in Mg-RE-Zr Casting Alloys B. Dybowski and A. Kielbus	398
Metallographic Analysis of ECAP Processed Selected Magnesium Alloys S. Rusz, M. Salajka, L. Čížek, S. Tylšar and J. Kedroň	404
Structural Stability of Welded Joints of Magnesium Alloy EZ33A-T5 R. Kocurek and J. Adamiec	408
Study of Thermal Stability of Ultra Fine-Grained Commercially Pure Titanium Wire Prepared in Conform Equipment T. Kubina, J. Dlouhý, M. Kóvér and J. Hodek	415
Free Machining Brasses with Minimized Lead Content P. Podaný and P. Sláma	421
Use of Decomposition of Non-Thermoelastic Martensite for Structural Changes of CuZnAl Shape Memory Alloys M. Vojtko, P. Žubko and M. Ďurišin	427
Structure Stability of Ni-Base and Co-Base Alloys B. Podhorná, I. Andršová, J. Dobrovská, V. Vodárek and K. Hrbáček	431
Mechanical Properties and Microstructure of IN738LC Nickel Superalloy Castings J. Zýka, I. Andršová, B. Podhorná and K. Hrbáček	437
Nickel Alloys in Directionally Solidified State – Characterisation of Microstructure and Phase Composition of the Alloys J. Malcharcziková, M. Kursá and M. Pohludka	441
Pulsed Electric Current Bonding of Tungsten to Titanium K. Kobuchi and A. Nishimoto	445
Study of Fracture Feature of Titanium Based Alloys for Biocompatible Implants after Removal from Human Body M. Losertová, J. Drápala, K. Konečná and L. Pleva	449
The Influence of Heating/Cooling Rate on Transformation Temperatures of Co-Base Alloy J. Dobrovská, B. Smetana, H. Francová and Z. Jonšta	453
Zinc Alloys for Biodegradable Medical Implants I. Pospíšilová and D. Vojtěch	457

VIII. Powder Metallurgy, Composites, Ceramics, Superconductors and Metallic Glasses

Microstructure Development in Powder Metallurgy Steels: Effect of Alloying Elements and Process Variables

E. Hryha and L. Nyborg 467

Microstructure of High Cr-Alloyed Sintered Steel – Prediction and Analysis

R. Shvab, E. Hryha, P. Shykula, E. Dudrová, O. Bergman and S. Bengtsson 473

Powder Metallurgically Produced Carbide Free Bainite

E. Vuorinen, J. Vang, M. Carradot, P. Johansson and E. Navara 480

Oxide Reduction Processes, Microstructure and Properties of Sintered Chromium Pre-Alloyed Steel

M. Hrubovčáková, E. Dudrová and M. Kabátová 487

PM Materials Prepared from Powders Consisting of Polymer Coated Iron Microparticles

M. Kupková, R. Oriňáková, A. Fedorková and M. Hrubovčáková 491

Microstructure of Composites Based on Phosphated Iron Powder

M. Kabátová, E. Dudrová and H. Bruncková 495

Effect of Silver Content on Microstructure and Corrosion Behavior of Material Prepared from Silver Coated Iron Powder

M. Hrubovčáková, M. Kupková, A. Fedorková, R. Oriňáková and A. Zelenák 499

The Influence of Sintering Conditions on Microstructure of La-Ca-Sr-Mn-O Magnetocaloric Ceramics

K. Zmorayova, S. Piovarči, M. Radusovska, V. Antal, V. Kavečanský and P. Diko 503

The Effect of Ni Interlayers on Compaction of Mo/Mo Silicide Composites

L. Senčková, K. Iždinský, F. Simančík, P. Štefánek and P. Švec 507

Microstructure and Thermal Expansion of Hybrid - Copper Alloy Composites Reinforced with both Tungsten and Carbon Fibres

J. Koráb, Š. Kavecký, P. Štefánek, K. Iždinský, F. Simančík and T. Dvůrák 513

Thermal Cycling of Copper Based Composite Reinforced with High Modulus Carbon Fibres

P. Štefánek, K. Iždinský, F. Simančík and N. Beronská 519

Microstructure and Properties of Composites Prepared by Reactive Pressure Infiltration of Aluminium into Metal and Ceramic Powder Preforms

A. Opálek, K. Iždinský, Š. Nagy, F. Simančík, P. Štefánek and S. Kúdela Jr. 523

Effect of Compaction Pressure Applied to TiC Reactants on the Microstructure and Properties of Composite Zones Produced *In Situ* in Steel Castings

E. Olejnik, G. Sikora, S. Sobula, T. Tokarski and B. Grabowska 527

Mixed and Vacuum/Pressure Impregnated Fe/SiO₂/Shellac Composites

M. Kabátová, J. Fůzer, J. Fůzerova, E. Dudrová and P. Kollár 533

Graphite Polystyrenesulfonate Composite Material

P. Keša, I. Hrmo, P. Diko and M. Antalík 537

Copper (II) Oxide and Graphene as Composite Materials for Glucose Biosensors

P. Keša, I. Hrmo, J. Parnica, V. Vesela and M. Antalík 541

The Influence of Y211 Milling Conditions on the Microstructure of Y123/Y211 Bulk Superconductors

M. Šefčíková, S. Piovarči, M. Radusovska, V. Antal and P. Diko 545

Influence of BaCeO₃ and BaO₂ Addition on the Microstructure of Y-123/Y-211 Bulk Superconductors

K. Zmorayova, S. Piovarči, M. Radusovska, V. Antal and P. Diko 549

Fragmentation of Co-Fe-Ta-B Bulk Metallic Glass

J. Miškuf, K. Csach and A. Juríková 553

Shear Band Creation in Amorphous Ribbon under Bending

M. Hurakova, K. Csach, A. Juríková and J. Miškuf 557

IX. Coatings and Nanomaterials

High Cr-Ni Cast Iron Base Deposits with Tantalum Carbide Particles Produced by Plasma Spraying Y. Hoshiyama, T. Otani and H. Miyake	563
Critical Weak Points of Atmospheric Plasma Sprayed Thermal Barrier Coatings D. Jech, L. Čelko, M. Juliš, L. Klakurková, K. Slámečka, K. Obrtlík and J. Švejcar	567
Thermal Spray Technology and Casting in Renovation of Friction Bearings Surface J. Švejcar, L. Čelko, E. Dvořáček, L. Klakurková, M. Juliš, K. Slámečka and J. Zapletal	573
Quantitative Evaluation of Alitize Coating on ŽS6K Ni-Base Superalloy J. Belan	578
Microstructural Characterization of Slurry Aluminide Diffusion Coatings L. Čelko, S. Hutařová, M. Petrenec, K. Obrtlík, M. Hřčková and T. Podrábský	584
Aluminide Protective Coatings Obtained by Slurry Method A. Kochmańska and P. Kochmański	590
Structure of Intermetallic Al-Si Coating on Inconel 617 A. Kochmańska and P. Kochmański	594
Properties of Ni-Co Alloy Coating Prepared from Sulphate Bath M. Hagarová, R. Dzedzina and P. Gavendová	598
Structure Characterisation of Electrodeposited Ni-Co Alloy O. Milkovič, K. Saksl, M. Hagarová, Š. Michalik and J. Gamcová	603
Degradation of BSA Coating on Magnetite Nanoparticles K. Csach, A. Juríková, J. Miškuf, M. Koneracká, V. Závišová, M. Kubovčíková and P. Kopčanský	607
DSC Study of Biocompatible Magnetite Nanoparticles Coated with Polymer A. Juríková, K. Csach, J. Miškuf, M. Koneracká, V. Závišová, M. Kubovčíková, I. Antal and P. Kopčanský	611
Comparative Analysis of Hard Anodized Layer on Aluminium Alloy L. Klakurková, E. Hégr, L. Čelko, T. Podrábský, M. Juliš, M. Remešová and J. Švejcar	615
The Application of Wear Resistant Thin Layers for Cold Forming Tools P. Beraxa, L. Domovcová and Ľ. Parilák	619
Structural Properties of Zinc and ZnMgAl Coatings on Steel Sheets M. Kollárová, L. Hrabčáková, J. Graban and M. Šohajová	623

X. Metallography in Archaeology (Archaeometallurgy)

Microstructural Features of Bronze-Coated Iron Coins from the Roman Empire S. Strobl and R. Haubner	629
Slag Investigation from Iron Smelting and Iron Processing Sites in Austria – From Hallstatt and Medieval Period and the 19th Century R. Haubner and S. Strobl	635
Archaeometallurgical Simulations of the Processes in Bloomery Furnaces from the Hallstatt and Medieval Period R. Haubner, I. Schatz, F. Schatz, W. Scheiblechner, W.D. Schubert and S. Strobl	641
Determination of Causes of Corrosion Damage of a Roman Vessel from an Early Tiberian Period Š. Msallamová and J. Kmošek	645
