

Table of Contents

Preface

Simulation of Polymer Removal from a Powder Injection Molding Compact by Thermal Debinding

S. Ying, Y.C. Lam, S.C.M. Yu and K.C. Tam 1

Singularity of Interface Stresses in Fibre Push-Out Test

J.H. Park, Y. Dai and J.K. Kim 7

A Self-Consistent Scheme for Asperity Contact

H. Fan and K.Y. Sze 17

Microstructural Influences on Inhomogeneous Deformation in Superplastic Ti-6Al-4V

T.W. Kim and N.S. Choi 23

Novel Methods to Measure Residual Stresses in Thin Films

T.Y. Zhang 31

The Root Angle in Elastoplastic Peeling Tests

Z. Chen 41

Fracture Toughening Analysis of Shape Memory Alloys

S. Gao and S. Yi 49

Finite Element Modelling Damage in Brittle Matrix Composites

J. Chia and J.W. Hancock 55

Popcorn Failure and Unstable Void Growth in Plastic Electronic Packages

C.W. Chong, T.F. Guo and L. Cheng 61

Three-Dimensional Modeling of Coordination Number and Contiguity in the Incipient Stage of Liquid Phase Sintering

P. Liu and D.X. Wang 67

Micromechanical Modeling of Granular Materials Using Three Dimensional Discrete Element Modeling

T.G. Sitharam and S.V. Dinesh 73

A Constitutive Equation for Viscoelastic Porous Gels during Drying Process

B. Wang, Y. Liu and Z. Xiao 79

A Thermodynamic Model of the BCC FCC Polymorphic Change in Niobium due to Nanocrystallization by Mechanical Milling

P.P. Chattopadhyay and I. Manna 87

The Modeling and Determination of Dynamic Elastic Modulus of Metal Matrix Composites

N. Srikanth and M. Gupta 93

Micro-Macro Combined Study for a Porous Constitutive Model Based on the Analysis of a Cylindrical Void

B. Chen, Z.H. Gao, X.H. Peng, J.H. Fan and C. Cai 101

New Materials for Magnetic Refrigerator Applications

R. Nirmala, V. Sankaranarayanan, K. Sethupathi and A.V. Morozkin 113

Dynamic Properties of Magnetorheological Materials

W.H. Li, G. Chen, S.H. Yeo and H. Du 119

Molecular Dynamics Simulations of Hydrogen Embrittlement of a Single Crystal of Nickel by the Embedded Atom Method

X.J. Xu, M. Wen, S. Fukuyama and K. Yokogawa 125

Nanoscale Friction and Interfacial Effects

T. Kawaguchi and H. Matsukawa 133

Scaling Behavior of Dynamic Hysteresis in Multi-Domain Spin Systems

J.M. Liu, X.Y. Chen, H.L.W. Chan and C.L. Choy 139

Scaling Property of Hysteresis Dispersion in Spin Systems

J.M. Liu, X.Y. Chen, H.L.W. Chan and C.L. Choy 145

Atomistic Simulation of the Core Structure of 90° Partial Dislocation in Silicon: A Burgers Vector Perspective

Z.M. Choo, M.H. Liang and S. Li 151

EPR Spectroscopy, Powder EPR Lineshape Simulation Technique in Rigid-Lattice and Slow-Motional Regime: An Application to V₂O₅-Based Glass	157
B.B. Das	
Computer Modelling of the Structures, Stabilities and Thermoelectric Efficiency of Materials with Clathrate Structures	163
J.S. Tse, K. Uehara, Z.Q. Li, R. Rousseau and D.D. Klug	
Quantum Confinement and Excitonic Effects in Vertically Coupled Quantum Dots	171
X. Xu and Y.P. Feng	
Computational Study of GaAs Microclusters	177
T.B. Boo, H.H. Kwong and Y.P. Feng	
Shear-Induced Particle Migration in a Pressure Driven Tube Flow	183
X. Chen, Y.C. Lam, K.W. Tan, M. Jan, K.C. Tam and S.C.M. Yu	
A Multi-Scale Analysis for Size-Dependent Indentation Microhardness	189
Y.X. Gao and H. Fan	
New Techniques to Study Materials: Application of Synchrotron X-Ray, CCD-Instruments and Lasers	195
S.K. Saxena	
Improvement of Material Characterization of Curing Polymers by Image Processing	205
V. Gonda, C.J. Liu, C. van't Hof, L.J. Ernst and G.Q. Zhang	
Damping Characterization of Aluminium Based Composites Using an Innovative Circle-Fit Approach	211
N. Srikanth and M. Gupta	
Determination of Sintering Stress on the Densification of Micron-Sized Alumina	217
Z.M. He and J. Ma	
Interfacial Microstructure of Solid-State Diffusion Bonded Inconel Alloy 718	223
G.G. Zhang, R.S. Chandel, H.P. Seow and H.H. Hng	
Coupled Finite Element Thermal and Structural Analysis	229
T.F. Lam	
Finite Element Analysis as a Tool for the Investigation of Backward Cup Extrusion	235
U.R. Krishna and H.S. Valberg	
Simulation and Design Optimisation of Micro Pumps	241
Y. Xu, C.W. On, Y. Kui, E.H.T. Francis, X.X. Zhang, K.Y. Peng and W.P. Wang	
Web Based Process and Material Selection for MEMS Design and Manufacturing	247
X.F. Zha and H. Du	
On Modelling of Biodegradable Foams for Packaging Applications	253
B. Wang, J. Song and Y. Kang	
The Role of Ab Initio Electronic Structure Calculations in Contemporary Materials Science	261
M. Šob, M. Friák, L.G. Wang and V. Vitek
