

Table of Contents

1. Rotor Dynamics

	1
Comprehensive Analysis of Periodic Regimes of Forced Vibration for Structures with Nonlinear Snap-Through Springs	
S. Huang, E.P. Petrov and D.J. Ewins	3
Studies on Misalignment in Coupled Rotors	
A.W. Lees	13
Mathematical Models of Gear Rattle in Roots Blower Vacuum Pumps	
J.F. Mason, M.E. Homer and R.E. Wilson	21
Proposals for Controlling Flexible Rotor Vibrations by Means of an Antagonistic SMA/Composite Smart Bearing	
D.J. Inman, M.P. Cartmell, A.W. Lees, T. Leize and L. Atepor	29
Time-Frequency Feature Extraction of a Cracked Shaft Using an Adaptive Kernel	
M. Behzad and A.R. Ghias	37

2. Biomedical Systems

	46
On Non-Linear Dynamics and a Periodic Control Design Applied to the Potential of Membrane Action	
F.R. Chavarette, N.J. Peruzzi, J.M. Balthazar and H.A. Hermeni	47
Computational Mechanics in Virtual Reality: Cutting and Tumour Interactions in a Boundary Element Simulation of Surgery on the Brain	
I.A. Jones, A.A. Becker, A.T. Glover, P. Wang, S.D. Benford, M. Vloeberghs and C.M. Greenhalgh	55
A New Approach to Stress Analysis of Vascular Devices Using High Resolution Thermoelastic Stress Analysis	
J. Eaton-Evans, J.M. Dulieu-Barton, E.G. Little and I.A. Brown	63
Experimental Evaluation of Physical Properties of Bone Structures	
F. Antunes, C. Pereira and M.C. Gaspar	71

3. Structural Modelling

	77
Stability Switches in a Neutral Delay Differential Equation with Application to Real-Time Dynamic Substructuring	
Y.N. Kyrychko, K.B. Blyuss, A. Gonzalez-Buelga, S.J. Hogan and D.J. Wagg	79
Finite Element Model Updating of Large Structures by the Clustering of Parameter Sensitivities	
H. Shahverdi, C. Mares, W. Wang, C.H. Greaves and J.E. Mottershead	85
Structural Optimisation using a Hybrid Cellular Automata (HCA) Algorithm	
C.M. Chia, J.A. Rongong and K. Worden	93
Combined Lifting Analysis and Load Test of a Hook Foundation in a GRP Hull	
S. Quinn, S.S.J. Moy and K. Piggott	101
Characterization of Material Properties Using an Inverse Method	
L. Lin, H. Li, A.S.L. Fok, M. Joyce and T.J. Marrow	107

4. Optical Techniques

	115
Stress Analysis in Automobile Components Using Reflexive Photoelasticity Technique	
P. Smith Neto, E.S. Palma and V.M. Figueiredo Bicalho	117

Optimization of the Unnotched Iosipescu Test on Composites for Identification from Full-Field Measurements	
F. Pierron, G. Vert, R.L. Burguete, S. Avril, R. Rotinat and M.R. Wisnom	125
Flexural Testing of Composite Sandwich Structures with Digital Speckle Photogrammetry	
A.D. Fergusson, A. Puri, A. Morris and J.P. Dear	135
Monitoring High Temperature Steam Pipes Using Optical Strain Measurement Techniques	
A. Morris, J.P. Dear and M. Kourmpetis	145

5. Failure and Fracture Analysis

	153
On the Applicability of the Loading Parameter Φ in Pinned Connections with Relevant Initial Clearance	
M. Ciavarella, A. Strozzi, A. Baldini, M. Giacomini, S. Rivasi and R. Rosi	155
Towards the Modelling of Fretting Wear and Fatigue Interaction in Spline Couplings	
J. Ding, J. Madge, S.B. Leen and E.J. Williams	165
Effect of Contact Interaction on the Stress Intensity Factors for a Crack under Harmonic Loading	
O. Menshykov and I.A. Guz	173
Mode I and Mode II Fracture Toughness Testing for a Coarse Grain Marble	
M.R.M. Aliha, R. Ashtari and M.R. Ayatollahi	181
The Effect of Hygrothermal Composite Patch on the Fracture of Reinforced Crack under Mixed-Mode Loading	
R. Hashemi and M.R. Ayatollahi	189

6. Modal/Vibration Analysis I

	197
Damping Measurement of Bending Vibration in Alpine Skis: An Improvement of Standard ISO 6267	
G. Fanti, R. Basso and V. Montauti	199
Natural Frequencies and Mode Shapes of Deterministic and Stochastic Non-Homogeneous Rods	
S. Nachum and E. Altus	207
Non-Linear Modal Interactions in a Suspension Rope System with Time-Varying Length	
R. Salamaliki-Simpson, S. Kaczmarczyk, P. Picton and S. Turner	217
Application of Modal Analysis to Cylinder Structure Based on Random Vibration Test	
C. Li, S. Hu and J. Li	225
Automatic Balancing of a Rigid Rotor with Misaligned Shaft	
D.J. Rodrigues, A.R. Champneys, M.I. Friswell and R.E. Wilson	231

7. Damage

	237
A Wavelet Approach for the Analysis of Bending Waves in a Beam on Viscoelastic Random Foundation	
P. Koziol, C. Mares and I. Esat	239
On the Problem for Damage Detection of Vibrating Cracked Plates	
I. Trendafilova, E. Manoach, M.P. Cartmell, M. Krawczuk, W.M. Ostachowicz and M. Palacz	247
Superposition of Manoeuvres and Load Spectra Extrapolation	
A. Cerrini, P. Johannesson and S. Beretta	255

8. Non-Linear Dynamics I

	263
Force Appropriation for Nonlinear Systems (FANS) Using Optimisation Methods	
D. Hickey, K. Worden, J.R. Wright and J.E. Cooper	265
Nonlinear Response of an Oscillator with a Magneto-Rheological Damper Subjected to External Forcing	
M. Borowiec, G. Litak and M.I. Friswell	277

Investigating Non-Linear Behaviour within a Vehicle Suspension System using Time and Frequency Domain Techniques D. Hickey, M. Haroon, D.E. Adams and K. Worden	285
9. Plates and Composites I	295
An Infinite Elastic Plate Model that Incorporates Periodic Masses A.J. Hull and D.A. Hurdis	297
A Meta-Heuristic Based Weight Optimisation for Composite Wing Structural Analysis V. Sahadevan, Y. Bonnefon and T. Edwards	305
On Approximate Analytical Solutions for Vibrations in Cracked Plates A. Israr, M.P. Cartmell, M. Krawczuk, W.M. Ostachowicz, E. Manoach, I. Trendafilova, E.V. Shishkina and M. Palacz	315
Vibration of a Coupled Plate/Fluid Interacting System and its Implication for Modal Analysis and Vibration Health Monitoring D.G. Gorman, I. Trendafilova, A.J. Mulholland and J. Horáček	323
Three-Dimensional Elasticity Analysis of Thick Rectangular Laminated Composite Plates Using Meshless Local Petrov-Galerkin (MLPG) Method S.M.R. Alavi, M.M. Aghdam and A. Eftekhari	331
10. Manufacturing Process I	349
Stresses in Ultrasonically Assisted Turning N. Ahmed, A.V. Mitrofanov, V.I. Babitsky and V.V. Silberschmidt	351
Analysis of Stress Distribution in SnAgCu Solder Joint J. Gong, C. Liu, P.P. Conway and V.V. Silberschmidt	359
Modelling of the Deburring Process C.G. Dumitraş	367
Effects of Laser Welding Conditions on Toughness of Dissimilar Welded Components E.M. Anawa and A.G. Olabi	375
11. Plates and Composites II	381
Experimental Determination of Stress Concentrations in Composite Laminates and their Effects on Damage Evolution D.T.G. Katerelos and C. Galotis	383
Experimental Analysis of Damping across Joints in Metal Plates S.J.I. Walker, G.S. Aglietti and P.R. Cunningham	391
Failure Characterisation of Heavy Tow Braided Composites Using Digital Image Correlation (DIC) M. Fouinneteau and A.K. Pickett	399
Application of Generalized Differential Quadrature Method to the Bending of Thick Laminated Plates with Various Boundary Conditions M.M. Aghdam, M.R.N. Farahani, M. Dashty and S.M. Rezaei Niya	407
12. Non-Linear Dynamics II	415
Tracking Nonlinear Oscillations with Time-Delayed Feedback J. Sieber and B. Krauskopf	417
Nonlinear Models of Cable-Stayed Bridges C. Massow, V. Vidal, A.R. Champneys and J.H.G. Macdonald	425
A Nonlinear and Non-Ideal Wind Generator Supporting Structure R.M.L.R.d.F. Brasil, L.C.S. Feitosa and J.M. Balthazar	433
A Sensitivity-Based Method for Stochastic and Uncertainty Analyses of Forced Response for Nonlinear Structures with Friction and Gap Interfaces E.P. Petrov	443

13. Modal/Vibration Analysis II

455

Vibration of a Beam Excited by a Moving Flexible Body

H.J. Ouyang and J.E. Mottershead

457

Material Properties' Identification Using Full Field Measurements on Vibrating Plates

B. Guo, A. Giraudeau and F. Pierron

465

Studies of the Sensitivity of Brake Squeal

T. Butlin and J. Woodhouse

473

Decoupling the Equations of Isospectral Flow

S.D. Garvey, P. Van Eetvelt and U. Prells

481

14. Manufacturing Porcess II

491

A Study of Residual Stress Effects due to Adhesive Bonding of MEMS Components

I. Sadaba, C.H.J. Fox and S. McWilliam

493

An Investigation of Residual Stress Effects due to the Anodic Bonding of Glass and Silicon in MEMS Fabrication

I. Sadaba, C.H.J. Fox and S. McWilliam

501

The Effects of Cold Forming and Welding Residual Stress States on the Buckling Resistance of Orthogonally Stiffened Cylinders

R.F. Lennon

509

A Finite Element Model for Ultrasonic Cutting of Toffee

E. McCulloch, A. MacBeath and M. Lucas

519

Keynote Lectures

527

Development of the Humanoid Robot LOLA

H. Ulbrich, T. Buschmann and S. Lohmeier

529

Three-Dimensional Elasticity Solutions for Isotropic and Generally Anisotropic Bodies

J.R. Barber

541

Six Fundamental Boundary Value Problems in the Mechanics of Periodic Composites

V.A. Palmov and A.I. Borovkov

551
