Foreword, Committees and Acknowledgment

Chapter 1: Processes of Metal Machining

Device for Training of Machine Tool Diagnostic Routines under Various Conditions M. Cisar, I. Kuric and V.A. Ceclan	3
Evaluation of Overall Efficiency of Devices with Worm Gear A. Micaciu, I. Vuşcan and N. Panc	9
Researches Regarding the Influence of Cutting Regime on Processed Surface in Aluminum Alloys Turning Process A. Trif, M. Borzan, A. Popan, D. Fraţilă, A. Rus and C. Nedezki	15
Substitution of Bearing Races Grinding Operations of Large-Diameter Cylindrical Bearings by Hard Turning D. Stancekova, J. Semcer, J. Petru and N. Naprstkova	21
The Influence of Quenching Temperature on the Mechanical Properties of a Dual-Phase Steel with 0.094% C and 0.53% Mn C. Dulucianu, N. Bancescu and T. Severin	28
The Influence of Feed per Tooth Variation on Surface Roughness of 7136 Aluminum Alloy in End Milling B. Bontiu POP and M. Lobonţiu	34
Electrical Current at Metal Cutting Process: A Literature Review R. Daicu and G. Oancea	40
New Manufacturing Technology for Variable Pitch and Variable Screw Profile Worms C. Gyenge, A. Păcurar, L. Oláh and R. Păcurar	48
Surface Roughness Prediction During Dry Turning of Austenitic Stainless Steel AISI 304 I.A. Popan, N. Bâlc, A. Popan, D. Fraţilă and A. Trif	54
Different Methods of Artificial Intelligence Used for Optimization the Turning Process N.F. Cofaru and A. Florea	60
Taguchi Design of Experiment versus Dynamic Programming Approach in the Optimization of Turning Process A. Metelski, S. Krile, W.R. Maruda, S. Legutko and G. Królczyk	66

Chapter 2: Metal Forming

Clinching of Steel Sheets Used in Automotive Industry G. Béres, J. Danyi and F. Végvári	75
Manufacturing of Precision Seamless Steel Tubes Using Cold Drawing Technology: Simulation and Experiment M. Ridzon, P. Buček, M. Necpal and L. Parilák	80
Method for Estimating the Manual Nesting Process Efficiency for Profiling Machines, Based upon Image Processing Techniques R.E. Breaz, O. Bologna and S.G. Racz	86
How the Crystallization Process in Metal Casting is Influenced by the Mold Filling and Cooling Methods N. Panc, N. Bâlc and A. Popan	92
Kinematic Process Plastic Cold Orbital Forming S.D. Grozav, V.A. Ceclan, A. Turcu and O.V. Oprea	98

Chapter 3: Processing of Plastics and Composite Materials

Computer Aided Injection Multi Cavity Molding Process Analysis of Thermoplastic Polymers D. Tzetzis, I. Sofianidis and P. Kyratsis	107
--	-----

Correlation between Carbon Fibres/Carbon Nanotubes Fillers and Wear Behaviour of Poly(ether-ether-ketone) Composite	
D.C. Trufasu, M.A.C. Besnea, A. Cotet and G. Andrei	113
Effect of Laminates Orientation on Impact Properties of Fiberglass and Kevlar Composite Panels	
E.I. Croitoru and G. Oancea	119
Experimental and Theoretic Research Regarding Extrusion Optimization for Reinforced Polyamide (PA 6.6 – 10 % GF)	
A. Popescu, L.L. Hancu, P. Bere and C.. Miron-Borzan	125
Experimental Research Regarding the Tensile Strength of some Reinforced Composite Materials	
P. Bere, A. Popescu and L.L. Hancu	131
Friction and Wear Behavior of Moglice Polymer Composite through Dry Sliding Ball-on-Flat Reciprocating Test	
V. Iliuță, M. Rîpă, A. Preda and G. Andrei	137
Mold Design for Polystyrene Plastic Anchor	
C. Neamtu, P. Bere, C. Dobocan, R. Ghinea and S. Solcan	143
Research Concerning Chalk's Influence on Composite-Based Melamine's Compressive Strength	
L.L. Hancu, H. Iancau, P. Bere and A. Popescu	149
Some Researches Regarding the Surface Quality when Drilling Carbon Fiber Reinforced Composites	
G.M. Pop, M. Steopan, G. Coniu and A. Popescu	155
The Mould Design for Production of Plastic Component by Injection Moulding Technology	
V. Bulej, I. Kuric and A. Popescu	161

Chapter 4: Additive Manufacturing and Non-Traditional Technologies

Custom Implants: Manufacturing Principles and Determination of Psychological Price	
C.. Miron-Borzan, A. Popan, V.A. Ceclan, A. Popescu and P. Berce	169
Microscopic Investigation on Material Structure of Broken Additively Manufactured Parts	
G. Dezső and F. Szigeti	175
Topology Optimization of an Airplane Component to Be Made by Selective Laser Melting Technology	
R. Păcurar and A. Păcurar	181
Using Simulation to Improve the Quality of the Metallic Industrial Components Made by Rapid Casting	
A. Popan, N. Bâlc, A. Popan, N. Panc and C.S. Borzan	187
Basic Research on Lattice Structures Focused on the Tensile Strength	
J. Kessler, N. Bâlc, A. Gebhardt and K. Abbas	193
Research on Improving the Outer Surface Quality of the Parts Made by SLM	
N. Bâlc, S.C. Cosma, J. Kessler and V. Mager	199
Influence of Laser Speed on Average Manufacturing Speed of Selective Laser Sintering	
I. Drstvensek, J. Balic, T. Irgolic and T. Brajlili	205
Designing a Hybrid Equipment for Additive Manufacturing	
E. Arnold, C. Neamtu, C. Ciupan and A. Popa	213

Chapter 5: Computer Aided Design and Manufacturing

Application of the CAD/CAM System in the Production of the Anatomic Insole	
A. Boric, S. Maricic and G. Cukor	221
Approach for Obtaining Broken Plastic Parts Using Reverse Engineering Tools	
F. Popișter, D. Popescu, A. teopan and M. Steopan	226
CAD Model Created from Polygon Mesh	
L. Morovič and J. Milde	233
Daylight for Spaces Defined by Movable Walls	
D. Banyai, M. Dragomir and Ș. Bodi	239

Finite Element Analysis of Multispeed Noncircular Gears A. Cristescu, B. Cristescu and L. Andrei	246
Pneumatic Clamp Used for Fixing Plastic Parts in Laminating Tools D. Măgurian, N. Lebaal and G. Oancea	252
SPH Meshless Simulation of Orthogonal Cutting of AA6060-T6 J. Dănu	258
Design and Analyses to Determine the Minimum Acting Force of a Gripper for Handling the Parts with Robots C. Vilău, N. Bâlc and D. Leordean	264
Studies Regarding Redesign and Optimization of the Main Shaft of a Naval Winch A. Sarca, D. Leordean and C. Vilău	271
Utilization of CAD/CAM System Edgcam in Programming of CNC Milling Machine N. Čuboňová	280
The Analyses of Working Parameters for a 3D Complex Part Manufacturing by CNC Machine V.A. Ceclan, I.A. Popan, S.D. Grozav, C.. Miron-Borzan and I. Kuric	286
The Geometry Equations for Multiple Kinematic Structures Using Direct Geometry C. Beldean, I. Vușcan, K. Kacso and N. Panc	292
Optimum Solution for Sliding Formwork Equipment R. Diaconu and D.P. Brindasu	298
Software Application for Welding Processes and Control Optimization M.C. Dijmarescu, G. Solomon, D.T. Cicic, C. Rontescu and D. Tărcatu	307

Chapter 6: Automation of Manufacturing Systems and Assembly

Investigation of Transient Phenomena in the Machine Aggregate with Gear Transmission J. Steinhäuser and M. Nad'	315
Prototyping Industrial Vision Applications and Implementations on Multimedia Processors R. Arsinte and E. Lupu	321
Simulation Model of Coordination Robot Trajectories with Load Sharing – 1D Case A. Slota and K. Krupa	327
The Use of PLC for the Implementation of Technological Operations G. Kocór, S. Legutko and J.B. Krolczyk	333
The Accuracy of the Plastic Parts Milling Process Executed by a Six Axes Robot A. Popan, N. Bâlc, B. Luca, A. Popan and A. Carean	339
Semi-Automatic Assembly Device for Car Stepped Door Stop S. Stroe, C. Onescu, S. Tabacu and I. Cagri	345

Chapter 7: Manufacturing Engineering

Ways of Increasing the Productivity in a Job-Shop Production Company O. Dodun, V. Merticar, L. Slătineanu, G. Nagî and C. Neamtu	353
Innovation and Corporate Social Responsibility in SMEs C. Feniser and F. Lungu	359
Optimization Maintenance Systems with Consideration of Reliability, Availability and Maintenance Costs V. Stuchlý	364
Improving the Industrial System Performance by Using the Balanced Scorecard Instrument F. Fechete and A. Nedelcu	370
Process Improvements Using Simulation Software and Quality Tools Ș. Bodi, M. Dragomir, D. Banyai and D.C. Dragomir	376
