

Table of Contents

Preface

Thermodynamic Properties of the Surface Phase from Fused Salts to Water M. Abraham, M.-. Abraham and I. Ziogas	3
Complexes in Polyvalent Metal - Alkali Halide Melts Z. Akdeniz and M.P. Tosi	11
Solubility Studies of the Ca-CaO-CaCl₂ System K.M. Axler and G.L. DePoorter	19
Spectroscopic and Electrochemical Investigations of Selected Aromatic and Heteroaromatic Compounds in Ambient Temperature Chloroaluminate Melts J.E. Coffield, S.P. Zingg, K.D. Sienerth, S. Williams, C. Lee, G. Mamantov and G.P. Smith	25
Surface Tension of Alkali-Metal Acetate Hydrated Melts S. Deki, T. Yanomaru, A. Kajinami and Y. Kanaji	33
The Effect of Possible Phase Changes on the Heat Conduction of Slags T. El Gammal and S. Odendahl	37
Gold Anions in Alkali Bromide Melts: Solubility and Optical Spectrum R. Erdmann, R. Wormuth and R.W. Schmutzler	45
Investigations of Complex Formation and Phase Diagrams of Molten Salts Related to the Oxidized Form of Sulphuric Acid Catalysts G.E. Folkmann, G. Hatem, R. Fehrmann, M. Gaune-Escard and N.J. Bjerrum	53
Neodymium Chloride and Alkali Chlorides Mixtures: Calorimetric Investigation and Modeling M. Gaune-Escard, A. Bogacz, L. Rycerz and W. Szczepaniak	61
BaF₂-NaF-ZrF₄ Melts: Experimental Thermodynamics and Modeling G. Hatem, M. Guane-Escard and M. Hoch	71
Structural Study of Molten CaCl₂-KCl System K. Igarashi, K. Tajiri, T. Asahina and M. Kosaka	79
Molecular Dynamics Simulation of Molten Mixture of Lithium Bromide and Lithium Iodide S. Itoh	85
Structural Analyses of B₂O₃-Cs₂O Glasses Y. Iwadate, T. Hattori and J. Mochinaga	93
Estimation of Excess Thermodynamic Functions of Aluminium Monochloride Dissolved in Alkali Chloride Melts G. Kaptay	101
Microstructure of the Metal-Molten Salt Interface A.I. Karasevskii, R.E. Kris and E.V. Panov	109
Catalytic Activity and Spectroscopic Investigations of the M₂S₂O₇/V₂O₅-SO₂/O₂/SO₃/N₂ System (M = Na, K and Cs) D.A. Karydis, K.M. Eriksen, R. Fehrmann, G.N. Papatheodorou and N.J. Bjerrum	115
High Temperature NMR Studies of Oxide Glasses and Melts H. Maekawa, Y. Inagaki, S. Shimokawa, Y. Nakamura, T. Maekawa and T. Yokokawa	123
Thermodynamic Modeling of the 3(Zr,Hf)Cl₄-2POCl₃ Distillable Molten Salt Composition D.F. McLaughlin	131
Structure of Molten Alkanoates: Order and Disorder Aspects T.A. Mirnaya	143
Short Range Structures of Several Rare Earth Chloride Melts J. Mochinaga, Y. Iwadate and K. Fukushima	147
Direct Observations of Marangoni Convection in Molten Salts T. Nakamura, K. Yokoyama, F. Noguchi and K. Mukai	153
Correlations between Structure, Spectra and Thermodynamics of Transition Metals Dissolved in Molten Chloroaluminate Solutions D.S. Newman, P.J. Tumidajski and M. Blander	159
X-Ray Diffraction Analysis of Molten AgCl under Ultra High Pressure H. Ohno, N. Igawa, T. Makita, K. Igarashi, T. Kikegawa and O. Shimomura	167

The Chemla Effect in Molten (Li,Cs) Cl - Electromigration and MD Simulation I. Okada, S. Okazaki, H. Horinouchi and Y. Miyamoto	175
Vapour Pressure and Thermodynamics of the System 1-Methyl-3-Ethyl-Imidazolium Chloride - Aluminium Chloride H.A. Øye, M. Jagtoyen, T. Oksefjell and J.S. Wilkes	183
Thermodynamicis of MgCl_2 in Plutonium Electrorefining G.S. Perry and R.F. Watson	191
The Thermodynamic Properties of Molten $\text{PbO-PbCl}_2\text{PbS}$ Solutions C.A. Pickles and S.N. Flengas	199
Construction and Thermodynamic Analysis of Molten Salt Phase Diagrams of Systems Containing Rare Earth Chlorides Z.Y. Qiao and X.R. Xing	217
Studies on the Behaviour of Hydrous Melts: The Non-Aqueous (Ag, Tl)NO_3+DMSO Liquid System from Thermodynamic and Volumetric Measurements G.A. Sacchetto and Z. Kodejs	227
Effects of Alkali Halides on Sodium Borate Melts by Means of Molecular Dynamics Simulations N. Sawaguchi, K. Kawamura and T. Yokokawa	237
Viscosity and Glass-Transition Temperature of Some Silicate Melts under Low and High Pressures H. Taniguchi and E. Takahashi	245
Solubility of FeCl_2 in Molten NaCl-AlCl_3 P.J. Tumidajski and M. Blander	251
Careful (Partial) Oxidation of Methane Gas on Molten Metal Complexes S.V. Volkov, V.A. Bandur and N.I. Buryak	273
Vibrational Spectra of Fluoro and Oxofluoro Complexes of Nb(V) and Ta(V) J.H. von Barner, R.W. Berg, N.J. Bjerrum, E. Christensen and F. Rasmussen	279
Raman Spectra of Subvalent Mercury Species Formed during Electrolysis of HgCl_2 in Melts G.A. Voyiatzis, G.C. Carountjos and I.V. Boviatsis	285
Pourbaix Diagram of Molten Oxide Mixture T. Yokokawa, K. Kawamura and S. Denzumi	291
EmF Studies of $\text{AgNO}_3\text{-KNO}_3\text{-NaNO}_3$ Melts I.J. Zsigrai and K. Mészáros Szécsényi	295
Electrochemical Properties of NbCl_5 or K_2NbF_7 Dissolved in NaCl-KCl Equimolar Mixture L. Arurault, J. Bouteillon, J. de Lepinay, A. Khalidi and J.C. Poignet	305
Electroreduction of Fluoniobate, K_2NbF_7, in Fused NaCl-KCl A. Barhoun, F. Lantelme, M.E. de Roy and J.P. Besse	313
Preparation of Electrode Materials by Electrolytic Reduction of Molten Salts J.P. Besse and M.E. de Roy	321
Stability and Electrochemical Properties of Mono and Trivalent Indium Species in Fused LiCl-KCl Eutectic J. Bouteillon, M. Jafarian, M. Mohamedi and J.C. Poignet	327
Behaviour of Oxygen Reduced Species in Molten $\text{Na}_2\text{CO}_3\text{-K}_2\text{CO}_3$ Eutectic at 750-800°C: Correlation with the Oxidative Coupling of Methane M. Cassir, G. Moutiers, C. Moneuse, J. Devynck and B. Tremillon	333
Chemical and Electrochemical Behaviour of Tin Ions in $\text{ZnCl}_2\text{-xNaCl}$ Molten Salts Y. Castrillejo, D. Ferry, A. García, R. Pardo and P. Sanchez Batanero	341
Fundamental Study of Electrodeposition of Chromium in Fused Salts by Pulse Techniques E. Cherrat, K. Benslimane, F. Lantelme and M. Chemla	349
Chemical and Electrochemical Behaviour of Chromium Containing Ions in the Molten $\text{Na}_2\text{CO}_3\text{-K}_2\text{CO}_3$ (58/42 MOL%) Eutectic Mixture at 800°C P. Claes, B. Thirion and J. Gilbert	357
Qualitative and Quantitative Electrochemical Studies of Multivalent Elements in Molten Oxide Glasses P. Claes, J.-. Tilquin and J. Gilbert	365
Impedance Measurements in KF-2HF Melts D. Devilliers, H. Groult, O. Kerrec and M. Chemla	373

Production of Fluorine with Large Amplitude AC Signals in KF-2HF Melts D. Devilliers, B. Teisseyre, H. Groult and M. Chemla	381
Electrochemical Determination of Arsenic (III) in Molten Sodium Hydroxide R. Dorin and E.J. Frazer	387
Electrochemical Behaviour of Niobium in CsCl-KCl-NaCl-NbCl₅ Melt I. Elizarova, E.G. Polyakov and L.P. Polyakova	393
Effects of Oxide on Anodic Behaviours of Graphite Electrodes in Fluoride Molten Salts C. Guang-Sen, T. Oki, B. Pacaud and N. Tanaka	401
Rotating Ring Disk Electrode in Molten Chloride Systems Y. Ito, S. Hikino and K. Ema	409
An Electrochemical Study of Tungsten Species in an Acidic Zinc Chloride-Sodium Chloride Melt A. Katagiri	415
Electrochemical Reduction of Niobium Ions in Molten NaCl-KCl A. Khalidi, P. Taxil, B. Lafage and A.P. Lamaze	421
Electrochemical Investigation of Diffusion of Lithium in Beta-LiAl Alloy at Room Temperature N. Kumagai, Y. Kikuchi, K. Tanno, F. Lantelme and M. Chemla	429
The Conventional Standard Potential of Alloys V.A. Lebedev	435
Electrochemical Reduction of Molybdenum from KF-B₂O₃-K₂MoO₄ Molten Salt System G. Li and D.H. Fan	443
Continuous Refining of Niobium in Molten Salts G. Lorthioir, A. Saile and F. Basile	449
The Auxiliary Electrode for TiCl₂ Electrolysis Design of Anodes M. Maja, P. Spinelli, G. Morello and E. Serra	457
The Auxiliary Electrode for TiCl₂ Electrolysis the Active Porous Mass M. Maja, N. Penazzi, M. Gaido and M. Martano	465
Electrodeposition of Aluminum from AlCl₃-MEIC-NaCl and AlCl₃-MEIC-LiCl Melts M. Matsunaga, T. Miwa, Y. Inoue and K. Hosokawa	473
Summerized Process in the Electrolysis of Cryolite-Alumina Melts V. Moskvitin, V. Shchavlev and V. Shchavlev	479
Intercalation of Fluorine into Graphite in the KF₂HF Melt T. Nakajima, M. Tohma and Y. Kawabata	483
Electrochemical Behaviour of Lithium Oxide in Equimolar NaCl-KCl at a Glass Carbon Electrode V.N. Nekrasov, N.M. Barbin and L.E. Ivanovsky	491
Thin-Layer Melt Electrolysis A.A. Omel'chuk and O. Zarubitsky	499
The Niobium Chemistry in Molten LiCl+KCl Eutectic G. Picard and P. Bocage	505
Electrochemical Experiments in Molten Sulphates for Simulating Hot Corrosion of Metallic High Temperature Materials H.-. Rätzer-Scheibe	513
Electrochemical Studies and Anode Reaction Mechanisms of Al-Li Alloys and Li₂O-LiF-CaF₂ Melts R.G. Reddy and A.R. Narayan	521
Aspects of the Liquid Cerium Electrodeposition in Molten Halide Media T.A.G. Restivo and E.J. Pessine	533
Formation of Corrosion Resistant Niobium Coatings by Electrode-Position in Fluoride Melts A. Robin, M.E. de Almeida and A.F. Sartori	539
Standard Potentials of Lanthanide and Actinide Trichlorides in Molten Eutectic LiCl-KCl Electrolyte J.J. Roy, L.F. Grantham, L.R. McCoy, C.L. Krueger, T.S. Storvick, T. Inoue, H. Miyashiro and N. Takahashi	547

Metallurgical Electrochemistry: The Interface between Materials Science and Molten Salt Chemistry D.R. Sadoway	555
Electrochemical Reduction of Quinones from Molten Amides S. Sampath and R. Narayan	561
Electroanalytical Study of the Reduction of KWCl_6 in Molten LiCl-KCl Eutectic C.A.C. Sequeira	569
Development of AL-Mn Alloy Electroplated Steel Sheet from Molten Salt A. Shibuya, J. Uchida, Y. Yamamoto, H. Seto and T. Tsuda	577
The Electrochemical Process at the Interface of Carbon Electrode and Metal in the Baths for Refining of Aluminium G. Sidorin and V. Moskvitin	585
Electrolysis of Zr^{4+} in the Molten Fluoride System under Gamma-Ray Radiation Field R. Takagi and G. Li	591
Studies of the Electroreduction of Tantalum and Niobium in Fluorochloroaluminate Melts V. Taranenko, K.D. Sienerth, N. Sato, A.G. Edwards and G. Mamantov	595
Anodic Behavior of Nickel and Nickel Based Alloy in a $\text{CsF-HF-NH}_4\text{F}$ System A. Tasaka, K. Mizuno, A. Kamata and K. Nishimura	603
Low Polarization Electrode Impregnated with Molten Metal Fluorides in Fluorine Cell T. Tojo, J. Hiraiwa, Y. Chong and N. Watanabe	609
Kinetics of the Oxygen Electrode Reactions at Golden Electrode in Molten (Li/Na) Carbonate Eutectic P. Tomczyk, L. Bieniasz and G. Mordarski	617
Electrochemical Characteristics of Calcia Stabilized Zirconia Electrolyte in the Molten Alkali Chloride-Carbonate Systems C.C. Yang and S.N. Flengas	625
Research on Chemical Metallurgy of Al-Li Master Alloy in Molten Salt M. Zhao, Y. Zhang, K. Chang and D. Tang	637
Electrorefining of Titanium Metal in Molten Alkali Halide Mixtures S. Zuca and N. Ene	643
Amide Electrolyte Molten Systems: Mixtures Showing Megavalue of the Dielectric Constant G. Berchiesi	653
Molten Salts Reactions a Process for Fine Grained Solids Preparation B. Durand and M. Roubin	663
Temperature Dependence of the Vapor Pressures and Electrochemical Windows of the $\text{NH}_4\text{HF}_2\text{-HF}$ Mixtures D. Filliaudeau and G. Picard	669
Investigation of the 1-Methyl-3-Ethyl-Imidazolium Chloride-AlCl_3 Melt for Lithium Battery Application Y.S. Fung and S.M. Chau	677
Global Measure for Energy & Environmental Problems by Thorium Molten-Salt Nuclear Energy Synergetics K. Furukawa, A. Lecocq, K. Mitachi and Y. Kato	685
Hydrotreating Properties of MoS_2 Catalysts Prepared from Thiocyanate Melts C. Geantet, D.H. Kerridge, T. Decamp, B. Durand and M. Breyse	693
Feasibility Study of Materials for a Medium-Temperature Reserve Cell Concept C.O. Giwa	699
High-Temperature Calibration Quality Data: Molten Salts and Metals G.J. Janz	707
Molten Salts Database for PC Users: Design and Development G.J. Janz	715
Molybdenum Alumosilicides Corrosion by Molten Salts V. Kodash, P. Kisly and N. Krezhova	725
Preparations of Ion-Exchanged Beta-Alumina by Employing Molten Salts and those Applications to Thermodynamic Investigations Z. Kozuka and M. Itoh	735
The Solubilization and Desulfurization of Coal in Low Temperature Chloroaluminate Melts D.S. Newman, D. Chen and V. Nanayakkara	741

High Temperature Corrosion of Nickel with Molten Alkali Carbonate Coating K. Ota, B. Kim, H. Yoshitake and N. Kamiya	749
Influence of the Environment in the Corrosion Kinetics of Different Superalloys at High Temperature in Eutectic Melt 60%V₂O₅-40%Na₂SO₄ E. Otero, A. Pardo, J. Hernàez, F.J. Pérez and M. Laguna	757
Effect of Hydrogen Sulfide on Kinetics of Hydrogen Oxidation in Molten Alkali Carbonate I. Uchida, S. Ohuchi and T. Nishina	765
Studies on Pressurized Oxygen Electrode Reaction in Molten Alkali Carbonate I. Uchida, K. Yamada and T. Nishina	773
Gas Driven Electrolyte Flow and Its Implications for the Dynamics of Aluminium Smelter Cells B.J. Welch, J.J.J. Chen, W.D. Zhang, J.M. Purdie and M.P. Taylor	779
