

Table of Contents

Preface

Chapter 1: Functional Nanomaterials

Size Reduction of Dolomite into Nano-Size Range through Milling and Tip-Sonication Processes	
A.F. Osman, A.A.A. Fauzi, M.B. Amin, K.A.A. Halim and A. Ul-Hamid	3
Lanthanide-Based Nanoprobes for Time-Resolved Luminescence Imaging on Various Ions and Molecules	
H.Y. Yang	9
Elastic Piezoelectric Nanofibers Mats for Acoustic Energy Harvesting	
N. Shehata, R. Nair, I. Kandas, N. Omran and A. Hassannin	19
Influence of Lignin Concentration on Polyacrylonitrile Nanofibers for Lead Removal	
P. Jungcharoen and S. Kim	27
Pure Solvent-Based <i>In Situ</i> Microstructural Regulation for Advanced Fiber Materials	
J.X. Huang and B.G. Xu	33
Flexible Graphene-Copper Nanocomposite for Potential Wearable Electronics Applications	
B.E. Nugba, A.A. El-Moneim and A. Osman	39
Plasma-Assisted Growth of Two-Dimensional Ga₂O₃/ Gas Heterophases on Liquid Alloy Substrate for Nanoelectronic Applications	
M.K. Akbari and S. Zhuiykov	49

Chapter 2: Functional Thin Films and Ceramics

AC Susceptibility and Electrical Properties of Ta-Substituted (TlTa)SrCaCuO Superconductor	
A.B.P. Ilhamsyah, R. Abd-Shukor, S. Humaidi and A.N. Jannah	59
Sprayability Analysis of Pristine and Enhanced PEDOT:PSS Inks via Electrohydrodynamic Spray Deposition	
Z. Esa, M.M. Nauman, I. Asif and J. Zaini	65

Chapter 3: Polymers and Composite Materials

Reduced Aging of Thermoplastic Starch Films with Green Hybrid Filler	
S.A. Adnan, A.F. Osman, D.S. Lai, I. Ibrahim, M.N. Ahmad Salimi, N.H. Ahmad Zaidi and M. Jaafar@ Mustapha	75
Investigation of Fracture Mechanisms of Self-Reinforced Polypropylene/Polycarbonate Composites Subjected to Fatigue Loading	
A. Katunin, M. Bilewicz, D. Wachla, J. Amraei and J. Viana	81
Removal of “Majority-Rule” and “Sergeant-Soldier” Polysilane Scaffold from the Hetero-Aggregation System Consisting Circularly Polarized Polydioctylfluorene	
C.K. Wei, N.A. Abdul Rahim and M. Fujiki	87
Optimization of the Electrospraying Parameters for Formulation of Biopolymeric Microcapsules	
J. Anani, H. Noby, A. Zkria, T. Yoshitake and M.F. El Kady	95
Numerical Simulation on the Effect of the Cooling Channel Design on the Warpage of a Thin-Wall Injection Molding Product	
T.P. Nguyen, T.L. Le and T.M.T. Uyen	103

Chapter 4: Protective Coatings

Electrochemical Study of Al₂O₃/ Industrial Waste Coating on Mg Substrate via Sol-Gel Method

S.H. Salleh, R.A. Malek, S.S. Che Abdullah, H. Zengin and A.Z. Abidin

113

A Review of Additives and their Effects on the Hydrophobicity and Abrasion Resistance of Dip-Coated Silica-Based Anti-Reflective Coatings for Solar Panels

L.A.N. Aspa and C.M.L. Escutin

123

Chapter 5: Metals Forming and Processing

Electron Beam Brazing of Titanium and Stainless Steel Dissimilar Joints with Ag-Based Filler

P. Śliwiński, K. Kwieciński and M. Kopyściański

131

Tool Wear of Cubic Boron Nitride in Cutting Sintered Steel

T. Wada

139

Experimental Research on the Effect of the Rotary Friction Welding Process on Carbon Steel AISI 1030

P.Q. Trung and P.B.H. Nam

145

Sheet-Metal Formability Study on a Circular Tube with a Folding Bottom Feature

Y.F. Hsieh, H.T. Nguyen, T.H. Lee and Q.C. Hsu

151

Effect of Zr Concentration on the Microstructure and Mechanical Performance of Porous Ti-Zr System by Powder Metallurgy

E.M. Karakurt, H. Yan, M. Kaya, H. Demirtaş and Ö. Çakmak

157

Chapter 6: Building Materials

The Effect of Bamboo Charcoal Powder on the Tensile Strength of Wood Plastic Composite

A.A.M.Y. Yusof, M.S. Mustapa, A.H. Ariffin, M.R. Ibrahim, M.I.M. Masirin, W.A. Siswanto and M. Yoshiharu

167

Effect of Different C₃A Content on Rheological Parameters in Paste Mixtures

K. Karakuzu, V. Kobya, A. Mardani, B. Felekoğlu and K. Ramyar

175

Chapter 7: Machine-Building Production

Finite Element Analysis of Damage of Cylindrical Roller Bearing of Main Shaft of Shot Blasting Machine

Y.J. Zhang, Y.Z. Pan, Z.F. Jiang, X.L. Fu and T.Y. Zhang

183

Foundry Data Collection and Part Tracking Using Additively Manufactured Digital Code Direct-Part-Marking Tags

T.Ç. Uyan, K. Otto, L. Arasola and K. Jalava

191
