

Table of Contents

Preface

Investigation on the Tensile Behavior of Graphene-Aluminum Nano-Laminated Composites by Molecular Dynamics Simulation

J.q. Zhu, Q.S. Yang and X. Liu 1

A Molecular Dynamics Simulation of the Tensile Behavior of Y-Branched-CNT/SiC Nanocomposite

G.B. Zheng, H. Sano, O. Nakagoe and S. Tanabe 7

Detecting Nanosheet Objects from Noisy CLSM Images Using Deep Learning Approach

H. Fujioka, J. Sawangphol, S. Anraku, N. Miyamoto, H. Kino and A. Hidaka 11

Basic Study of Heating Response Measurement for Nanosheet Particle/Polymer Composite Gel Actuator with Anisotropic Contraction

H. Kino, A. Kiyota, N. Miyamoto, T. Inadomi, T. Kato and H. Fujioka 17

RETRACTED: Study on Development of Novel Mg-Based Alloys by Rapid Solidification Technology of Twin Roll Casting

H.J. Wang, Z.P. Pei and D.Y. Ju 23

Microstructure and Properties of Diffusion Bonded Mg/Al Joints

Y.L. Ding and D.Y. Ju 29

Effect of Mg-Based of Multi-Layered Structure on Hydrogen Desorption Properties

N.N. Zhou and D.Y. Ju 35

Simulation of a Self-Excited Power Generation System for Dielectric Elastomer Generation

T. Sakano, Z.Q. Song, K. Ohyama, S. Zhu, M. Waki and S.A. Chiba 41

Development of Evaluation Method for Damage of Oxidation CoNiCrAlY Coating

M. Chen, K. Yoshikawa, Z.Q. Song and S. Zhu 47

RETRACTED: Corrosion Behavior and Mechanical Properties of Mg-Based Alloys by Rapid Solidification Technology of Twin Roll Casting

H.J. Wang, Z.P. Pei and D.Y. Ju 53

Analysis on Mechanical Behavior of Acrylate Dielectric Elastomers

M. Wei, W. Li, Z.Q. Song and S. Zhu 59

Methods to Improve Energy Conversion Efficiency of Dielectric Elastomer Generators

H.T. Cheng, Z.Q. Song, S. Zhu and K. Ohyama 63

Preparation, Characterization and Tribological Properties of Diamond-Like Carbon Film on AZ31 Magnesium Alloy

B.B. Han, D.Y. Ju, S. Sato and H.J. Zhao 69

Synthesis of Photocatalytic Niobate Nanosheet/Polymer Composite Microgel Particles through Microfluidic Approach

Y.M. Ye, M. Nishi, W.Q. Yang, M. Takinoue and N. Miyamoto 75
