

Table of Contents

Preface

Chapter 1: Materials for Opto- and Microelectronics

Enhanced Electrical Conductivity of Graphene-Incorporated Copper Wire and its Performances on Coaxial Cable Application at Sub 6 GHz

Y.C. Jin, H.C. Pan and S.H. Chen 3

1-xSr_xMnO₃ Thin Films on a-SiO₂ Substrates Produced by Metal Organic Decomposition Method

S. Kawaguchi, K. Hamada, H. Kobori, T. Taniguchi and T. Shimizu 9

Experiments of Failure and Damage in ITO-Coated PC/FPC with ACF Bonding due to Bending Fatigue

C. Lin and C. Chu 15

Fabrication of Liquid-Metal Printed 2D Tin Oxide Nanosheets for Optoelectronic Applications

S. Fujii 21

Chapter 2: Materials for Sensor Devices

Design of Electrical Sheet Resistance of Thin Film Measurement System Based on GM Cryocooler in Cryogenic Temperature

Z. Geng, Y.M. Han, Z.R. Zhou, H.Y. Qi, Y.C. Zhao, H.J. Su, R.J. Huang and L.F. Li 29

Experimental Characterisation of BGBC OTFT for Indoor CO₂ Gas Sensing

M.N. Zailan, K. Ismail, M. Syaripuddin and M.S. Mohd Sabri 35

Enhanced Performance of Epoxidized Natural Rubber Nanocomposites for Strain Sensor Application

S. Trimongkonkool, K. Boonkerd and A. Krainoi 45

Flexible and Disposable Gas Sensors Based on Two-Dimensional Materials

F. Ma'ashi, A. Aljarb and H. Al-Jawhari 51

Chapter 3: Preparation and Properties of Nanomaterials

Preparation of Silver Nanoparticles Deposited on TEMPO-Oxidized Cellulose Nanofibers

P. Phaonoeng, S. Tanpichai and A. Boonmahitthisud 61

Characterization and Self-Cleaning Properties of Silk Fabric Coated by Chitosan-Xyloglucan/nano-TiO₂ Composite Film

C. Na Lampang, P. Sriprom, K. Manamoongmongkol, P. Assawasaengrat, W. Narkrugsa and L. Phumjan 67

Investigation of Polylactic Acid Nanofibers as Enhanced Plant Growth Medium by Improved Melt-Blowing Method

S.P. Tsai, W. Wu, H. Sota, T. Hirogaki and E. Aoyama 73

Chitosan-Based Coating Incorporated with Chitin Nanofibers for Extension of the Shelf Life of Fruits

P. Kaeokanphai, S. Tanpichai and A. Boonmahitthisud 79

Chapter 4: Preparation and Properties of Polymer and Composite Materials

Analysis of the Curing Behavior of Cyanate/Epoxy Resins for Fusion Magnets

B. Baoleer, Y. Xiang, L. Shi, W.T. Sun, Z.X. Wu, R.J. Huang and L.F. Li 87

Rheological and Thermal Characterization of Glycerol Monostearate (GMS) as Compatibilizer on Polyethylene-Palm Stearin Composite	
I. Subuki, N.A. Ramlee, A.R.M. Daud, M.H. Ismail and N. Rasid	93
Glass Transition Temperature and Mechanical Properties of Poly(Ethylene Carbonate)/Organoclay Composites	
N.A. Ramlee, N.S.A. Ibrahim, B.J. Victor and N.Z.K. Shaari	101
Effect of Rubber Formula on Performance of Natural Rubber Based Foam for Insulating Ceiling Board Application	
N. Jantawong, K. Boonkerd and K. Hancharoen	107

Chapter 5: Technologies of Chemical Production

Using Borax as a Cross-Linking Agent in Poly(Vinyl Alcohol)/Hemp-Extracted Cellulose Hydrogels	
P. Silprasert, A. Boonmahitthisud and S. Tanpichai	115
Physical and Chemical Characterization of Lignin-Based Carbon as Acidic Catalyst	
A.H. Hassan, M.M. Zainol, S.N. Ismail, M. Asmadi, K.R. Zainuddin and N. Abd Rahman	121

Chapter 6: Biomedical Materials and Nanomedicine

The Physical Properties of Vanillin-Incorporated Irreversible Hydrocolloid Impression Material	
S. Leelapong, S. Mateekusontan, S. Makkrang, P. Churnjittapirom and S. Thaweboon	129
Antimicrobial Effect of Dental Adhesive on Cariogenic Multi-Species Biofilm	
S. Thaweboon, T. Saito, S. Mateekusontan and B. Thaweboon	135
Tailoring Structure-Dominated Mechanical Properties of Poly(L-Lactide Acid) Monofilaments via Controllable Molecular Relaxation	
J.B. Liu, C. Zhang, X. Hu, J. Cheng, Z.H. Ni and G.T. Zhao	141
Mechanical Behavior of Polymer Braided Stent at Rapid Radial Loading	
X. Hu, C. Zhang, B. Wang, J.B. Liu, J. Cheng, G.T. Zhao, Z.H. Ni and J.K. Yang	147
Isolation of Cellulose Nanosphere from Corn Husk as a Filler for UV-Cured PEGDMA Nanocomposite Hydrogels	
R.C. Tilwani, K.N.A.K. Calimon and P.A.N. de Yro	153
Optimisation Studies of Mesoporous Silica Nanoparticle as a Drug Carrier for Gemcitabine: Enhancing Therapeutic Effectiveness in Pancreatic Cancer	
S.L. Chung, W.M. Lim, C.O. Leong and M.S.L. Yee	161
Revolutionizing Antibacterial Surfaces: 3D Printed Nanoscale and Microscale Topographies through Two-Photon Polymerization	
N. Tan, J. Im, N. Neate, R.D. Wildman, G.E. Marsh and M.S.L. Yee	169
Silver and Palladium-Embedded Acrylamide-Based Hybrid Cryogels as Antimicrobial Agents	
Q. Ullah, N. Kizilbash, J. Ambreen, A. Haleem, M. Soliman, M.A. Alotaibi and M. Siddiq	179

Chapter 7: Materials Forming and Additive Manufacturing

Sheet Forming of Roll Cast Aluminum Alloy for Die Casting	
T. Haga, S. Mori, H. Ochi, H. Fuse, H. Watari and S. Nishida	189
Mechanical Behavior and Void Analysis of 3D Printed PEEK by Fused Deposition Modeling (FDM) with Varying Infill Patterns	
S.L. Abing, P.A.N. de Yro and S.A.C. Aranez	195
Printability and Mechanical Properties of PLA/Iron Composites for FDM 3D Printing	
K. Doungkeaw and J. Tungtrongpairoj	201

Chapter 8: Protective Coatings

Effect of Current Density on Hardness of Ni-P/Diamond Composite Coatings Fabricated by Electrodeposition

N. Kothanam, C. Hom-on, J. Srimaneerat, P. Wintachai, P. Moolla, K. Harachai and P. Jaroenapibal

209

Influence of Duty Cycle on the Phosphorus Content and Hardness of the Ni-P Coatings Produced by Pulse-Current Electroplating

P. Wintachai, N. Kothanam, K. Harachai, N. Triroj and P. Jaroenapibal

215

Chapter 9: Materials for Thermal Engineering Application

Improving the Thermo-Physical Properties of Plum Oil with Zeolite Nanoparticles

P. Assawasaengrat, T. Limsakul, P. Bunprasert, W. Chokelarb and P. Sriprom

223

Halloysite Nanotube (HNT) Dispersion Stability in 10% Ethanol-Water Mixture and Water

A.Z.F. Dilidili, J.B. Habiling, P.E.C. Maglalang and J.C. Millare

229
